Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

Australia Bank Feeds SuiteApp

The Australia Bank Feeds SuiteApp is a single-page SuiteApp that automates the transfer of your bank data from financial institutions domiciled in Australia into NetSuite.

The Australia Bank Feeds SuiteApp enables you to:

- Connect NetSuite to multiple bank accounts across financial institutions domiciled in Australia.
- Get automated daily imports of bank transactions that are ready for bank reconciliation.
- View information for financial institutions and bank accounts in a single page.
- Map connected bank accounts in your feed to their relevant GL accounts.
- Receive bank transactions daily from your financial institution accounts.

When using the Australia Bank Feeds SuiteApp, keep in mind the following:

- Connection to financial institutions through the Australia Bank Feeds SuiteApp is limited to Australia-domiciled bank accounts.
- The Australia Bank Feeds SuiteApp supports the Multi-Language feature in NetSuite.
However, there may be financial institution websites that use or contain language that NetSuite does not support. In such cases, texts are either in English or in the website's original language when viewed in NetSuite.
- Legal terms contained in documents, records, or websites in languages not supported by NetSuite are not translated.

Watch the following video for more information about the Australia Bank Feeds SuiteApp.

 [Australia Bank Feeds Overview](#)

Installing the Australia Bank Feeds SuiteApp

This section includes the prerequisites and instructions for installing the Australia Bank Feeds SuiteApp.

Enabling Features for Australia Bank Feeds SuiteApp

To use the Australia Bank Feeds SuiteApp, you need to enable the following features in your account.

To enable features in your account for Australia Bank Feeds SuiteApp:

1. Go to Setup > Company > Setup Tasks > Enable Features.
2. On the **SuiteCloud** subtab, check the following boxes:
 - Custom Records
 - Client SuiteScript
 - Server SuiteScript
3. Click **Save**.

For more information about enabling features in your account, see the help topic [Enabling Features](#).

You also need to allow pop-up windows in your browser for the bank feeds setup.

Installation

Any role with access to the SuiteApp Marketplace in NetSuite can install the Australia Bank Feeds SuiteApp.

To install the Australia Bank Feeds SuiteApp:

1. Go to SuiteApps.
2. From the listed SuiteApps, search **Australia Bank Feeds SuiteApp** in the **Search Apps** field.
3. Click the **Australia Bank Feeds** tile.
4. In the top right area of the Australia Bank Feeds SuiteApp details page, click **Install**.

For more information about the SuiteApp Marketplace, see the help topic [SuiteApp Marketplace in NetSuite](#).

The Australia Bank Feeds SuiteApp is a managed SuiteApp and is automatically updated whenever there are enhancements or new features added.

Roles and Permissions for Australia Bank Feeds SuiteApp

The Australia Bank Feeds SuiteApp has no built-in default or custom roles. To use the SuiteApp, you can either use the Accountant (ABFS) custom role or customize existing roles in your account.

To customize a role for Australia Bank Feeds SuiteApp:

1. Go to Setup > User Roles > Manage Roles.
2. Search for the role you want to customize. Click **Customize**.
3. Click the **Permissions** subtab.
4. Set the permissions and the access levels required for the custom role as shown in the following table:

Subtab	Permissions	Access Level
Transactions	Import Online Banking File	View – To access the Upload File and Bank Import History page
Lists	Accounts	View
	Custom Record Entries	Full
Setup	Financial Institution Records	Full
	SuiteScript	View
	Set Up Company	View

5. Click **Save**.

Importing Bank Data Using Australia Bank Feeds SuiteApp

To import your financial institutions and bank accounts data using Australia Bank Feeds SuiteApp, you must first complete the following tasks:

1. [Activating SISS Data Services](#)
2. [Connecting to the Data Service Provider](#)
3. [Importing Bank Data to Australia Bank Feeds](#)
4. [Linking Bank Accounts to NetSuite GL Accounts](#)
5. [Adding Bank Transaction Codes \(Optional\)](#)

Activating SISS Data Services

SISS Data Services is the data service provider for the Australia Bank Feeds SuiteApp.

To start the bank data import using the Australia Bank Feeds SuiteApp, you must first activate SISS Data Services in your account.

Important: Using the Australia Bank Feeds SuiteApp in the NetSuite Sandbox environment only connects to SISS Sandbox, thus the bank data that will be imported are all fictitious.

To activate the SISS Data Services, you must perform the following tasks:

1. [Accepting the Terms of Service](#)
2. [Granting Consent to SISS Data Services](#)

Accepting the Terms of Service

To begin using the Australia Bank Feeds SuiteApp, you must first accept the terms of service.

To accept the terms of service:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Available Connections section, the initial connection status for the SISS Data Services is set to **Not Yet Activated**. To start the activation, in the **Actions** column, click **Activate**.
The Terms of Service popup window opens.
3. Click **OK** to accept the terms of service.

After confirming and accepting the terms of service, the SISS Consent popup window opens where you should grant consent to SISS data services. The following section provides information for granting consent to SISS Data Services.

Granting Consent to SISS Data Services

In the SISS popup window, you must grant consent to SISS Data Services to collect your bank information to share with NetSuite.

For the procedure on how to grant consent to SISS Data Services, refer to the SuiteAnswers article [Granting Consent to SISS Data Services in Australia Bank Feeds](#).

Connecting to the Data Service Provider

To display your financial institutions and bank accounts data in the Bank Information section, you must connect to the SISS Data Services. SISS Data Services is the data service provider for this SuiteApp.

To connect to the data service provider:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. On the Local Bank Connection page, in the **Actions** column, click **Connect**.
The SISS Credentials popup window opens with the following credential fields automatically populated:
 - Client ID
 - Client Secret Key
 - Subscription Key
3. In the Connection Name field, enter a name for your new connection.
4. Click **Login**.
After the SuiteApp is done with the bank imports, the connection status for SISS Data Services changes to **Connected**.
5. To see the newly created connection, click the expand button (>) next to SISS Data Services.
The newly created connection appears under SISS Data Services, and its status also shows **Connected**.
6. To add another connection under SISS Data Services, perform steps 1 through 3.

After adding a connection, the bank accounts selected in the SISS Data Services activation appear on the **Bank Accounts** subtab in the Bank Information section.

You will receive an email notification after every successful connection.

Importing Bank Data to Australia Bank Feeds

After connecting to the service provider and establishing a connection, you can now begin importing bank data to Australia Bank Feeds.

The following are SuiteAnswers articles about the ways you can import bank data to your bank feeds:

- [Importing Bank Data Using a Trusted Adviser in Australia Bank Feeds](#)
- [Importing Bank Data Using Direct Data Access in Australia Bank Feeds](#)
- [Importing Bank Data Using Business Disclosure Agreement in Australia Bank Feeds](#)

Linking Bank Accounts to NetSuite GL Accounts

To import bank accounts and transactions to NetSuite, you must link them to NetSuite GL accounts.

The SuiteApp enables you to select bank accounts that you want to link to a NetSuite GL account. If you do not want to link a particular bank account, you can leave it unlinked.

Linking bank accounts to NetSuite GL accounts will prompt you to create a new account profile.

To link a bank account to a NetSuite GL account:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Bank Information section, under the **Bank Accounts** subtab, click **Update Account Profile**.
3. Expand the button for the bank where you want to link bank accounts to GL accounts.
4. Select the account where you want to link a GL account and in the **Linked GL Account** column, select the GL account.
5. Click **Save Changes**.

You can either override an existing account profile or create a new one.

- a. To override the changes for the current account profile, click **Override Changes**.
- b. To create a new account profile, do the following steps:
 - i. Click **Create New**.
 - ii. In the **Account Profile** field, enter a name for the account profile.
 - iii. Click **Save**.
Saving the account profile triggers the bank import into your selected NetSuite GL accounts.
6. To check the status of the bank import, go to the **Bank Import History** subtab.
If the status of the recent bank import shows a green check mark, the import is complete.

After completing bank imports, you can perform bank reconciliation. For more information, see help topic [Bank Data Matching and Reconciliation](#).

Adding Bank Transaction Codes (Optional)

The Australia Bank Feeds SuiteApp lets you map transaction codes for each transaction type. This enables NetSuite to correctly import and map your transactions.

Contact your bank for your specific bank transaction code. For more information about transaction codes supported by this SuiteApp, see the help topic [Supported Transaction Codes for Bank Statement Parsers SuiteApp](#).

To add a bank transaction code:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Bank Information section, click the **Bank Transaction Codes** subtab.
3. In the **Bank Transaction Code** field, enter the bank transaction code that applies to your transaction.
4. In the **Description** field, enter a description for the bank transaction code.
5. From the **Bank Data Type** list, select the bank data type for the transaction.
6. From the **Credit/Debit** field, select one of the following:
 - **Credit** if the transaction type is credit.
 - **Debit** if the transaction type is debit.
 - **Not Applicable** if the transaction is neither debit nor credit.
7. Click **Save Changes**.

Availability of Foreign Currency Accounts and Credit Card Data

Foreign Currency Accounts

The availability of foreign currency accounts using the Australia Bank Feeds SuiteApp varies depending on the connection used when importing bank data.

- **Bank Data Imported Using a Trusted Adviser and Using Business Disclosure Agreement** – If a bank account is available for selection, the correct foreign currency is displayed.
- **Bank Data Imported Using Direct Data Access** – You must have a numeric account number.

Credit Card Data

You can connect credit card accounts to the Australia Bank Feeds SuiteApp through a trusted adviser or business disclosure agreement. When connected, credit card data is then included in your bank feeds.

For more information, see the following SuiteAnswers articles:

- [Importing Bank Data Using a Trusted Adviser in Australia Bank Feeds](#)
- [Importing Bank Data Using Direct Data Access in Australia Bank Feeds](#)
- [Importing Bank Data Using Business Disclosure Agreement in Australia Bank Feeds](#)

Viewing the Bank Account Connection Status

You can view the status of bank account connections in the Bank Information section.

To view the bank account connection status:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Bank Information section, under the **Bank Accounts** subtab, look for the **Bank Account Status** column.

The following table displays the typical bank account connection statuses for all connection types.

Bank Account Connection Status	Scenario
Not Yet Available	Connection and setup is in progress.
Updating	Connection has been established. Bank is yet to initiate account feeds.
Active	Bank feeds are successfully being imported.
Problem Encountered	Problem encountered in the bank feeds. Specific reason is sourced from SISS and displayed in the Status Reason column.

Setting the Span of Bank Data Imports

You can set the span of bank data you want to import, in number of days. You have the option to import a minimum of one day worth of bank data or set a maximum of two months worth of bank data to import. By default, the SuiteApp imports seven days worth of bank data if there is no option specified.

You can either set a default number of days for all accounts under a bank or set the number of days for each of the accounts under a bank.

Note: Transactions are imported based on the ID number of the last imported transaction. For example, if your most recent import of transactions has the last ID number of 01002, only subsequent transactions starting at ID 01003 will be included in the next import. This prevents duplicate transactions from being imported.

Transactions that have updates or changes, regardless of the ID number, are also imported.

To set the span of bank data imports:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Bank Information section, under the **Bank Accounts** subtab, click **Update Account Profile**.
3. Expand the button for the bank where you want to set the span of bank data imports.
4. Define the number of days worth of bank data that you want to import. You can do one of the following steps.
 - Set a default number of days worth of bank data to import for all accounts under a bank.
To do this, in the first row under the selected bank, enter a number in the **Days to Retrieve** column and check the **Default** box.
For example, if you want to import three days worth of bank data for all accounts under a bank, enter **3** in the **Days to Retrieve** column and check the **Default** box.
 - Manually enter the number of days worth of bank data to import for each account under a bank.
To do this, in the first row under the selected bank, clear the **Default** box in the **Days to Retrieve** column and enter the span in number of days to retrieve bank data for each of the accounts under the bank.
For example, if you want to import three, four, and five days worth of bank data for respective accounts under a bank, first clear the **Default** box and enter **3**, **4**, and **5** for each account in the **Days to Retrieve** column.

If you enter zero as the number in the **Days to Retrieve** column, no data import will be imported. If you leave the field blank, the SuiteApp imports seven days worth of bank data. The maximum number of days you can enter is 60.
5. Click **Save Changes**.

Receiving Email Notifications for Bank Data Imports

Bank data imports are scheduled every two hours, from 8:00 AM to 2:00 PM AEST/AEDT. You can choose to receive an email notification for every scheduled bank data import, that is every two hours from 8:00 AM to 2:00 PM AEST/AEDT. By default, no email notifications are sent until you choose to receive them.

Note: Transactions are imported based on the ID number of the last imported transaction. For example, if your most recent import of transactions has the last ID number of 01002, only subsequent transactions starting at ID 01003 will be included in the next import. This prevents duplicate transactions from being imported.

Transactions that have updates or changes, regardless of the ID number, are also imported.

To receive email notifications for bank data imports:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Bank Information section, click the **Bank Import History** subtab.
3. Check the **Receive Email Notification for Imports** toggle box.
4. Click **Confirm**.

Removing Bank Accounts From Your Bank Feeds

You can remove bank accounts from your bank feeds and exclude them from any bank data imports.

To remove bank accounts from your bank feeds:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Bank Information section, under the **Bank Accounts** subtab, click **Manage Account**.
3. Check the box for the accounts that you want to remove from your bank feeds and click **Save Changes**.
4. In the Revoke Accounts dialog, click **Revoke** to remove the bank accounts from your bank feeds.

Note: You can add back removed bank accounts to your bank feeds. Read the following SuiteAnswers articles for instructions.

- [Importing Bank Data Using a Trusted Adviser in Australia Bank Feeds](#)
- [Importing Bank Data Using Direct Data Access in Australia Bank Feeds](#)
- [Importing Bank Data Using Business Disclosure in Australia Bank Feeds](#)

Disconnecting from a Data Service Provider

The Australia Bank Feeds SuiteApp lets you disconnect a single connection under SISS Data Services or disconnect all connections under it.

You will receive an email notification each time a connection is disconnected, and when all connections are terminated.

To disconnect a single connection:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Available Connections section, next to the status of the connection that you are deleting, click **Disconnect**.
3. In the Confirmation popup window, click **Proceed**.

To disconnect all connections:

1. Go to Transactions > Bank > Australia Bank Feeds.
2. In the Available Connections section, next to SISS Data Services' status, click **Disconnect All**.

 **Warning:** Clicking **Disconnect All** will also deactivate the SISS Data Services in your account. To create a new connection, you must reactivate the SISS Data Services in the account.

3. In the Confirmation popup window, click **Proceed**.

Australia Bank Feeds FAQs

The following questions are frequently asked about the Australia Bank Feeds SuiteApp.

Does the Australia Bank Feeds SuiteApp have a cost?

No. The Australia Bank Feeds SuiteApp is a free and managed SuiteApp. As a managed SuiteApp, it automatically updates whenever there are enhancements or new features added.

How do I check if a bank is supported for Australia Bank Feeds SuiteApp?

You can check the list of banks supported by the SuiteApp when granting your consent in the SISS Consent popup window. For more information, see [Granting Consent to SISS Data Services](#).

What should I do if my bank is not supported for Australia Bank Feeds?

If your bank is not available in the SISS Consent popup window's list of bank providers, you can connect to your bank using the Auto Bank Statement Import SuiteApp. For more information, see the help topic [Auto Bank Statement Import SuiteApp](#).

Does Australia Bank Feeds SuiteApp have a limitation on the number of banks that I can import?

There is no effective limit to the number of banks that you can import in the SuiteApp.

Can I get real-time feeds from my bank?

An automated daily import schedule is performed by the system every two hours, from 8:00 AM to 2:00 PM AEST/AEDT, to ensure you have an updated account balance in NetSuite.

Can the daily import schedule be customized?

No. The automated daily import schedule cannot be customized.

What is the time line for banks to release transactions?

Normally, Australian banks release transactions the following day. For example, transactions for December 15 are seen on the SuiteApp on December 16.

Delays in the appearance of bank transactions may be due to bank internal issues, transaction issues, public holidays, or weekends. Contact NetSuite Customer Support if the transactions are not reflected on the second day after the transactions are made.
