November 12, 2025

Copyright © 2005, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

Cash 360

Cash 360 lets you effectively manage cash flow by providing a real-time view of your company's cash position and the ability to generate fast and accurate near-term forecasts.

The SuiteApp has a cash management dashboard that allows you to do the following:

- Inspect real-time cash projections using charts and graphs.
- View the current balances for transactions, payables, and receivables.
- View the A/P and A/R aging summary pie charts.
- View cash projections for each subsidiary.
- View cash projections for consolidated subsidiaries.
- Click on links to view invoices and bills, approve invoices, view A/R and A/P aging summary reports, and view account categories.
- Set subsidiary-wide forecast preferences.

You can also do the following in the Cash 360 SuiteApp:

- Set the forecast period to days, weeks, or months. This shows the impact of future cash inflows and outflows on your company's cash position over different periods.
- Automate forecasts based on your general ledger history. You can define account categories (based on one or several GL accounts) to forecast at your preferred level of detail.
- Add ad hoc cash inflow and outflow transaction lines, such as finance inflow or capital investments, into the cash forecast.
- View the Cash Forecast table to show the projection of financial inflows and outflows. The data in the table enables you to predict your company's cash requirements and analyze your company's liquidity status.
- Include installment transactions in cash projections. You can view installment details for receivable and payable transactions from the Cash Forecast table. Installment transactions are included in the Cash 360 dashboard calculations, graphs, and tables.
- Include sales orders in the computation of inflow amounts, as shown in the Cash Forecast table and Cash 360 dashboard.
- Include purchase orders in the computation of outflow amounts, as shown in the Cash Forecast table and Cash 360 dashboard.
- Exclude bank accounts from bank balance calculations in the Cash Forecast table and in the Cash 360 dashboard.
- Export the opening balance, undeposited/future-period funds, receivable, and payable transaction details in a CSV file.

Cash forecasts are generated directly from NetSuite data. There is no need to set up or import external data.

With this SuiteApp, receivable transactions for your company such as interest and dividend payments, non-recurring cash flow such as financing and sale of assets can be set as additional inflow transactions. Payable transactions such as cash disbursements for purchases, payroll, taxes, interest, dividends, rent, and any projected debt repayments can be set as additional outflow transactions.

Cash 360 is available by default only on NetSuite Classic and Accounting Centers.

This SuiteApp is available in all languages that NetSuite supports. For more information, see the help topic [Configuring Multiple Languages](#).

Availability

Cash 360 is a public and managed SuiteApp. As a managed SuiteApp, it is automatically updated when enhancements or new features are added.

For instructions on installing this SuiteApp, see [Installing Cash 360](#).

Cash 360 Prerequisites

- To obtain accurate reports in the Cash 360 dashboard, an administrator must do the following before installing the Cash 360 SuiteApp:

- To use aging reports in this SuiteApp, set the **Aging Reports Use** preference.

Go to Setup > Accounting > Accounting Preferences > General and select the **Due Date** option under the **Aging Reports Use** preference.

- To approve invoices while using this SuiteApp:
 - Enable the following required features. For instructions on enabling features, read the help topic [Enabling Features](#).

Subtab	Feature
Employees	Approval Routing
SuiteCloud	Client SuiteScript Server SuiteScript SuiteFlow

- Set the **Invoices Approval Routing** preference.

Go to Setup > Accounting > Accounting Preferences > Approval Routing and check the **Invoices** box.

- To include installment transactions in the Cash 360 calculations, enable the Installments feature from the **Accounting** subtab. For instructions on enabling features, read the help topic [Enabling Features](#).
- If your company uses multiple currencies, enable the following features. For instructions on enabling features, read the help topic [Enabling Features](#).

Subtab	Feature
Company	Multiple Currencies
SuiteCloud	SuiteCloud Development Framework

- Ensure there are no access restrictions to the Subsidiary record. Remove any value selected in the **Subsidiary** field under Set Preferences > Restrict View > Subsidiary.

If there is a value selected in the Subsidiary field, it means your access is restricted only to that selected subsidiary and consolidated subsidiary cash forecasts may not work properly.

- Set the **Report by Period** user preference to accurately display values in the Cash 360 tiles. Go to Set Preferences > Analytics > Reporting and select **Financials Only** in the **Report By Period** field.

Installing Cash 360

Cash 360 requires a NetSuite OneWorld account.

Before installing this SuiteApp, read [Cash 360 Prerequisites](#).

To install the Cash 360 SuiteApp:

1. Go to **SuiteApps**.

The **SuiteApps** tab is not available for the following centers:

- Advanced Partner Center
 - Customer Center
 - Employee Center
 - Partner Center
 - Support Center
 - Vendor Center
2. In the **Search SuiteApps** field, enter **Cash 360** to search for the SuiteApp.
 3. Click the Cash 360 SuiteApp tile.
 4. On the top right corner of the page, click **Install**.

For information about the installation status, see the help topic [Viewing SuiteApp Installation or Uninstallation Status](#).

Cash 360 Terms and Definitions

Term	Definition
Inflow	These are transactions where money flows into your company. The following are examples of inflow transactions: ■ Dividend payments ■ Non-recurring cash flow such as financing and sale of assets
Outflow	These are transactions where money flows out of your company. The following are examples of outflow transactions: ■ Purchases ■ Payroll ■ Taxes ■ Rent
Accounts receivable	These are accounts with receivable amounts that fall on a given period. For example: Open invoices
Accounts payable	These are accounts with payable amounts that fall on a given period. For example: Open vendor bills
Future-period funds	These are funds from transactions that fall on the next period but is within the same forecast period. For example, you have a forecast period that is set to 6 or 12 weeks, a report that starts on the last week of October 2025, and bank transactions for November 1, 2025. The total bank transactions for October 1 are counted as future-period funds.
Opening balance	This is the amount of cash available at the start of a period. The initial opening balance amount is the sum of all accounts in the chart of accounts with the type equal to bank (except for those excluded from Cash 360 calculations) for the selected subsidiary or consolidated subsidiary up to the current posting period. The succeeding opening balance amounts are taken from the closing balance amounts from the previous periods.
Closing balance	This is the cash forecast at the end of a period.

Term	Definition
	The closing balance is calculated as the opening balance amount, plus undeposited/future-period funds, plus the total forecast inflow amount, minus the total forecast outflow amount. Closing balance = Opening balance + Undeposited/Future-period funds + Total forecast inflow – Total forecast outflow amount
Net balance	The net balance is calculated as the total forecast inflow amount minus the total forecast outflow amount for a given period. Net balance = Total forecast inflow amount – Total forecast outflow amount

Cash 360 Roles and Permissions

There are no custom roles included with this SuiteApp. An administrator must create custom roles for financial users in the company, give access to the role, and set the required permissions for those roles. For more information about creating custom roles and setting permissions, see the help topic [Customizing or Creating NetSuite Roles](#).

Giving a Role Access to Cash 360

An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to view and use the SuiteApp.

Note: Access can only be given to custom roles and is not available for standard roles.

To give a role access to Cash 360:

1. Go to Setup > Users/Roles > Manage Roles.
2. Click **Edit** beside the custom role.
3. In the Authentication section, check the **Cash 360 Access** box.
Checking this box gives the role permissions to view transactions, cash forecasts, and other relevant financial information in the Cash 360 SuiteApp.
4. Click **Save**.

Setting Permissions and Subsidiary Restrictions for a Cash 360 Custom Role

An administrator must set permissions and subsidiary restrictions so users can fully access Cash 360.

If the required permissions are not set and subsidiary restrictions are not set up correctly, the following may happen for the custom role.

- Cannot fully access Cash 360.
- Cannot access account category pages.
- Consolidated subsidiary forecasts may not work properly.

To set permissions and subsidiary restrictions for a Cash 360 custom role:

1. Go to Setup > Users/Roles > Manage Roles.

2. Click **Edit** beside the custom role.
3. Under the Subsidiary Restrictions section, in the **Accessible Subsidiaries** field, select the subsidiaries that are accessible for the custom role.

Be sure to set the correct subsidiary restrictions to ensure that consolidated subsidiary forecast will work properly for the custom role.

For more information, see the help topic [Restricting Role Access to Subsidiaries \(OneWorld Only\)](#).

4. Set the required permissions.
 - a. Click the **Permissions** subtab.

See the following table for a list of required permissions

Custom Role	Subtab	Permission	Permission Level
CFO CEO Financial controller	Lists	Custom Record Entries	Full
		Accounts	View
	Setup	SuiteScript	View
		Custom List	View
	Custom Record	Cash 360 Account	View
		Cash 360 Account Category	Full

- b. Click **Add**.
5. Click **Save**.

Enabling Support for Custom Transactions

If you have custom transactions to include in the Cash 360 forecast, an administrator must do the following steps to enable support for these custom transactions.

Omit these steps if you do not have custom transactions to include in the cash forecast.

To enable support for custom transactions:

1. Go to Customization > Lists, Records & Fields > Transaction Types.
2. Click the transaction name to edit it.
3. On the **Statuses** tab, check the **Posting** box.

 **Note:** If there are transaction statuses listed, make sure you check the **Posting** box for each transaction status line.

4. On the **Permissions** tab, select **Cash 360 – Service Role** and set **View** as its permission level.
5. Click **Add**.
6. Click **Save**.

Cash 360 Excluded Transactions

Some transactions are excluded from the cash forecasts. See [Transactions Excluded From the Cash Forecast](#) for a list of these transactions, listed per NetSuite edition.

To include these transactions in the cash forecast, an administrator must do the following:

1. Enable the following required features. For information about enabling features, read the help topic [Enabling Features](#).

Subtab	Feature
Company	Multiple Currencies
SuiteCloud	SuiteCloud Development Framework

2. Create a customized service role. Permissions for the excluded transactions must then be manually added to the customized service role. For more information, see [Adding Permissions for Transactions Excluded From the Cash 360 Forecast](#).
3. Update script deployments. Set the **Execute as Role** field to point to the customized service role. For more information, see [Updating Scripts for the Cash 360 Customized Service Role](#).

Transactions Excluded From the Cash Forecast

Note: The following table is a non-exhaustive list of transactions excluded from the cash forecast, listed per NetSuite edition.

NetSuite Edition	Transaction Name
Australia Edition	Pay Tax Liability
Canada Edition	Process GST Refund
	Pay Tax Liability
	Pay Sales Tax
Japan Edition	Pay Tax Liability
	Tegata Payable
	Tegata Receivable
U.K. Edition	Pay Tax Liability
	Pay Sales Tax
	Tegata Payable
	Tegata Receivable
U.S. Edition	Pay Sales Tax
International Edition	Pay Tax Liability

Adding Permissions for Transactions Excluded From the Cash 360 Forecast

Some transactions, depending on your NetSuite edition, are excluded from the cash forecast. For a list of these transactions, see [Transactions Excluded From the Cash Forecast](#).

To include these transactions in the cash forecast, an administrator must enable required features and create a customized service role for these transactions. Permissions for these transactions must then

be manually added to the customized service role. After adding permissions for these transactions, an administrator must update script deployments for the customized service role. For more information, see [Cash 360 Excluded Transactions](#).

To add permissions for excluded transactions:

1. Go to Setup > Users/Roles > Manage Roles.
2. Click **Customize** beside **Cash 360 – Service Role**.
3. In the **Name** field, enter a name for the customized service role.
For example: Customized Service Role
4. (Optional) In the **ID** field, enter an ID for the customized service role.
5. In the **Center Type** field, select **Classic Center**.
6. In the **Permissions** tab, under the **Transactions** subtab, do the following and add each excluded transaction.
 - a. In the **Permission** column, select the transaction you want to add.
For a list of transactions that must be added, listed per NetSuite Edition, see [Transactions Excluded From the Cash Forecast](#).
 - b. In the **Level** column, select **View** as the permission level for the transaction.
 - c. Click **Add**.
7. Click **Save**.

Updating Scripts for the Cash 360 Customized Service Role

Some transactions, depending on your NetSuite edition, are excluded from the cash forecast. For a list of these transactions, see [Transactions Excluded From the Cash Forecast](#).

To include these transactions in the cash forecast, an administrator must enable required features and create a customized service role for these transactions. Permissions for these transactions must then be manually added to the customized service role. For more information, see [Cash 360 Excluded Transactions](#).

After adding permissions for these transactions, an administrator must update script deployments and set the Execute as Role field to point to the customized service role.

To update scripts for the customized service role:

1. Go to Customization > Scripting > Scripts.
2. Look for the following deployment scripts.

Script Name	Script ID
Cash 360 – Application Data	customscript_cash360_su_application_data
Cash 360 – AR and AP Data	customscript_cash360_su_arap
Cash 360 – Inflow and Outflow Data	customscript_cash360_su_inflow_outflow
Cash 360 – Opening Balance Data	customscript_cash360_su_opening_balance
Cash 360 – Preference Data	customscript_cash360_su_preference

3. Do the following for each of the scripts in step 2.
 - a. Click **View**.

- b. On the Script page, click the **Deployments** subtab.
- c. In the **Title** column, click the script deployment name link.
- d. On the Script Deployment page, click **Edit**.
- e. In the **Execute as Role** field, select the customized service role you created.
For more information about the customized service role, see [Adding Permissions for Transactions Excluded From the Cash 360 Forecast](#).
- f. Click **Save**.

Cash 360 Account Categories

Automate forecasts based on your general ledger history. Define account categories based on one or several GL accounts to forecast at your preferred level of detail. Account categories in the Cash 360 SuiteApp let you classify chart of accounts, set them as inflow or outflow accounts, and include them in the cash forecast.

 **Note:** An administrator must set permissions so users can access the Cash 360 account category pages. For more information, see [Setting Permissions and Subsidiary Restrictions for a Cash 360 Custom Role](#).

Read the following topics to know more about the Cash 360 account categories:

- [Adding Cash 360 Account Categories](#)
- [Displaying the Cash 360 Account Category List](#)
- [Searching for Cash 360 Account Categories](#)

Adding Cash 360 Account Categories

Add account categories to classify chart of accounts as inflow or outflow transactions and include them in the cash forecast.

 **Note:** An administrator must set permissions so users can access the Cash 360 account category pages. For more information, see [Setting Permissions and Subsidiary Restrictions for a Cash 360 Custom Role](#).

To add Cash 360 account categories:

1. Go to Financial > Cash 360 > Account Category > New.
2. In the **Name** field, enter a name for the account category.
For example: Salaries and wages
3. In the **Subsidiary** field, select a subsidiary for the account category.
You can select from subsidiaries that are assigned to your role.
4. (Optional) Check the **Inactive** box to make the account category inactive.

 **Note:** Only check the **Inactive** box if you will not use the account category.

5. In the **Type** field, select the account category type. Select from **Inflow** or **Outflow**.

Note: The SuiteApp only supports **Inflow** and **Outflow** account categories.

Inflow accounts are accounts with cash projected to flow into your company, such as dividend income. Outflow accounts are accounts with cash projected to flow out of your company, such as utility expenses.

6. In the **Chart of Accounts** list, select a chart of account for the category.

Note: Take note of the following:

- You must select an appropriate chart of account to associate with your account category. For example, you can only select an inflow type chart of account for inflow account categories.
For inflow account categories, you can only add chart of accounts with the type equal to income or other income. For outflow account categories, you can only add chart of accounts with the type equal to expense, other expense, and cost of goods sold (COGS).
- You can associate each chart of account with only one account category.
- You can add a maximum of 1000 chart of account values to a single category.

7. Check the **Use in Forecasting** box to include the chart of account in the cash forecast.

When this box is checked, data, amounts, and transactions for the chart of account are included in the cash forecast.

8. Click **Add**.
9. Click **Save**.

Displaying the Cash 360 Account Category List

You can display all Cash 360 account categories in a single list to edit or view them.

Note: An administrator must set permissions so users can access the Cash 360 account category pages. For more information, see [Setting Permissions and Subsidiary Restrictions for a Cash 360 Custom Role](#).

To display the Cash 360 account category list:

1. Go to Financial > Cash 360 > Account Category.
All Cash 360 account categories are displayed.
2. (Optional) Expand the Filters section and select a subsidiary to filter account categories by subsidiary.
3. Click **Edit** or **View** beside the account category to edit or view it.

Searching for Cash 360 Account Categories

You can use a saved search form to search for account categories. Search for account categories before creating them to ensure you are not creating duplicates.

Note: An administrator must set permissions so users can fully access the Cash 360 account categories. For more information, see [Setting Permissions and Subsidiary Restrictions for a Cash 360 Custom Role](#).

To search for Cash 360 account categories:

1. Go to Financial > Cash 360 > Account Category > Search.
2. Fill out any or all of the following search criteria to display the corresponding results:
 - a. In the **Name** field, select a filter and enter the name of the account category.
 - b. In the **Script ID** field, select a filter and enter the script ID for the account category.
 - c. In the **Date Created** field, select a filter and enter dates or pick dates from the calendar popup window.
 - d. In the **Last Modified** field, select a filter and enter dates or pick dates from the calendar popup window.
 - e. Choose **Either**, **Yes**, or **No** to select the inactive status of the account.
 - f. In the **Subsidiary** list, select a filter and select a subsidiary.
3. Click **Submit**.

Setting Cash 360 Preferences

The preferences you specify determine the cash forecast display in the Cash Forecast table and in the Cash 360 dashboard. Set Cash 360 preferences to define the forecast period, the display in the Cash Forecast table, and what and how account categories and additional values are used in the cash forecast.

To set Cash 360 preferences:

1. Go to Financial > Cash 360 > Dashboard.
2. On the left pane, click **Preferences**.
3. In the General Preferences section, specify forecast preferences:

General preferences are shared across all custom roles that have access to the SuiteApp within the same subsidiary.

- a. In the **Forecast Period** field, select a forecast period.
 This field lets you specify the period to include in the cash forecast. The default forecast period is 3 months.
 The forecast period is counted from the current day, week, or month.
- b. Check the **Include Opening Balance** box to display the opening balance, undeposited/ future-period funds, closing balance, and net balance in the Cash Forecast table.
- c. Check the **Include Sales Orders** box to include sales orders in forecast computations.
 When this box is checked, sales orders are included in the computation of inflow amounts and in the cash forecasts, as shown in the Cash Forecast table and in the Cash 360 dashboard.
 Only sales orders without billing schedules, installments, and subscriptions are included in forecast computations.
- d. Check the **Include Purchase Orders** box to include purchase orders in forecast computations.

When this box is checked, purchase orders are included in the computation of outflow amounts and in the cash forecasts, as shown in the Cash Forecast table and in the Cash 360 dashboard.

Only purchase orders without billing schedules, installments, and subscriptions are included in forecast computations.

4. In the **Subsidiary-Wide Preferences** section, set preferences for your selected subsidiary.
 - a. In the **Subsidiary** selector, select a subsidiary where to apply the account categories and additional values.
 - b. (Optional) In the **Account Categories** tab, specify what and how account categories are used in the cash forecast.

 **Note:** You must first add account categories before you can specify them for inclusion and set preferences for them in this tab. For information, see [Adding Cash 360 Account Categories](#).

- i. In the **Category** column, select an account category.
Account categories are arranged by category type. Inflow and outflow account categories are grouped together. Inflow account categories appear first and the outflow account categories next.
- ii. In the **Use In Forecasting** column, check the box for the account category if you want to include it in the cash forecast.
- iii. In the **Data To Use** column, specify the time frame of the data you want to use in the cash forecast.

You can use the historical average for the last 3 months or the last 6 months.

 **Note:** The cash forecast does not include the current month but considers the last full 3 or 6 months before the current month. For example, if the current date is June 22, and you want to use data for the last 3 months, the cash forecast considers data from March, April, and May.

- iv. In the **% Movement** column, specify the movement of cash flow in percent for the account category.
The percentage of cash movement represents the increment or decrement of cash flow. A positive value indicates increment and a negative value indicates decrement. The value specified is evenly applied to the account category and is not cumulative. The movement of cash flow is calculated considering the average amount for each category and the value specified in the **Data To Use** column. In the Cash Forecast table, the percent movement is only applied to the succeeding periods and not to the current date, month, or week.
- v. Click **Add**.
- c. (Optional) In the **Additional Values** tab, add additional values to include in the cash forecast. This tab lets you add values that have no corresponding chart of account items.

 **Note:** The additional values are shared across users within the same subsidiary.

- i. In the **Name** column, add a name for the additional value.
- ii. In the **Date** column, enter or select a date from the calendar popup window.
- iii. In the **Amount** column, enter an amount for the additional value.
- iv. In the **Type** column, select the account type.

Select from **Inflow** or **Outflow**.

Inflow accounts are accounts with cash projected to flow into your company, such as dividend income. Outflow accounts are accounts with cash projected to flow out of your company, such as utility expenses.

- v. In the **Recurrence** column, enter a number to specify how often the additional value is used in the cash forecast.

You can enter a number from 1 through 12.

- vi. In the **Recurrence Type** column, select the frequency the additional value is used in the cash forecast.

For example, if you entered **2** in the **Recurrence** column and selected **Monthly** in the **Recurrence Type** column, the additional value appears in two consecutive months starting from the date specified in the **Date** column and is included as such in the cash forecast.

- vii. Click **Add**.

- d. (Optional) In the **Order Billing Lead Time** tab, manually enter the order billing lead time for customers without closed sales orders and vendors without closed purchase orders.

Order billing lead time is the average number of days it takes to fully bill sales orders and purchase orders for each customer and vendor. This value is system-calculated for all fully billed and closed sales orders and purchase orders. The system-calculated order billing lead time is displayed in the customer record for sales orders and in the vendor record for purchase orders. For more information, see [Viewing the System-Calculated Order Billing Lead Time](#).

For customers without closed sales orders and vendors without closed purchase orders, you can manually enter the order billing lead time in this tab. The preferences you set here apply to all customers without closed sales orders and all vendors without closed purchase orders for the selected subsidiary.

The order billing lead time is added to the sales order or purchase order transaction date along with payment terms (if any) to calculate forecast dates as shown in the Cash Forecast table and in the Cash 360 dashboard.

If both the manually entered and system-calculated order billing lead time values are specified, the system-calculated value takes precedence over the manually entered one and is used to calculate forecast dates.

- i. In the **Sales Order Billing Lead Time** field, enter the order billing lead time in days for sales orders. You can enter a maximum of 999 days.
- ii. In the **Purchase Order Billing Lead Time** field, enter the order billing lead time in days for purchase orders. You can enter a maximum of 999 days.

- 5. Click **Save**.

Excluding Bank Accounts from Cash 360 Calculations

By default, all accounts in the chart of accounts with the type equal to Bank are included in the Cash 360 bank balance calculations and cash forecasts. You can exclude bank accounts from bank balance calculations and cash forecasts from the account record. Excluded bank accounts are not considered when displaying the bank balance in the Cash 360 dashboard and when displaying the opening balance amount in the Cash Forecast table.

To exclude bank accounts from Cash 360 calculations:

1. Go to Setup > Accounting > Chart of Accounts.
2. Click **Edit** next to the bank account that you want to exclude from Cash 360 calculations and cash forecasts.
3. In the Account record, check the **Exclude from Cash 360** box.
4. Click **Save**.

Cash 360 Subsidiary Consolidation

Cash 360 lets you see the cash forecast for a single subsidiary or for a consolidated subsidiary.

Single subsidiary and consolidated subsidiary reports are available on the Cash 360 dashboard and in the Cash Forecast table. To change reports by subsidiary or to view reports for a consolidated subsidiary, go to the upper right corner of the page and select the subsidiary or consolidated subsidiary.

If you select Parent Company (Consolidation) or any designated parent company, the corresponding Internal ID must have a numerical value of 1. Cash 360 does not support consolidation for a parent company with an Internal ID other than 1.

 **Note:** Inactive subsidiaries are not included in the list of subsidiary options. However, all posting transaction amounts from inactive subsidiaries are included in the cash forecast when viewing reports for a consolidated subsidiary. For more information about consolidated reports in OneWorld accounts, see the help topic [Consolidated Reporting in OneWorld](#).

Subsidiary Consolidation and Currencies

Transactions in subsidiaries follow the currency exchange rate set for the transaction currency, based on the effective date. When viewing consolidated reports, transaction amounts in child subsidiaries, which may be in another currency, are converted to the currency of the parent company or consolidated subsidiary using consolidated exchange rates.

Read the following topics to view related information about subsidiary consolidation and currencies:

- [Consolidated Cash Forecast Computation for Account Categories](#)
- [Consolidated Cash Forecast Computation for Additional Values](#)
- [Consolidated Exchange Rates vs. Currency Exchange Rates](#)

Viewing the System-Calculated Order Billing Lead Time

The system-calculated order billing lead time is defined for each customer and vendor for all fully billed and closed sales orders and purchase orders. It is the average number of days between the sales order or purchase order transaction date and the transaction date of the last related invoice or bill. The system-calculated order billing lead time measures the average time it takes to fully bill sales orders and purchase orders for each customer and vendor for the past 12 months. The system-calculated order billing lead time is displayed in the customer record for sales orders and in the vendor record for purchase orders.

You can also view the Cash 360 Entity custom record for a list of the system-calculated order billing lead time for each customer and vendor for all fully billed and closed sales orders and purchase orders. This custom record is only available if your role has a custom records permission. To view the Cash 360 Entity custom record, go to Customization > Lists, Records, & Fields > Record Types.

The SuiteApp calculates the order billing lead time using a map/reduce script that runs daily. You can change the frequency of the script run, depending on your preference. For more information, see [Rescheduling the Order Billing Lead Time Script Run](#). The map/reduce script processes all customers and vendors that have fully billed and closed sales orders and purchase orders in its initial run. Subsequent runs of the script only process new customer and vendor records that have fully billed and closed sales orders and purchase orders and those customer and vendor records that have changes to transactions.

The order billing lead time is added to the sales order or purchase order transaction date along with payment terms (if any) to calculate forecast dates as shown in the Cash Forecast table and in the Cash 360 dashboard.

For customers without closed sales orders and vendors without closed purchase orders, you can manually enter sales order and purchase order billing lead time values on the Cash 360 Preferences page. For more information, see [Setting Cash 360 Preferences](#).

If both values are specified, the system-calculated order billing lead time takes precedence over the manually entered value and is used to calculate forecast dates.

To view the system-calculated order billing lead time:

1. Open the customer or vendor record.
 - To open the customer record, go to Lists > Relationships > Customers and select the customer record.
 - To open the vendor record, go to Lists > Relationships > Vendors and select the vendor record.
2. Click the **Financial** subtab.
3. View the order billing lead time for sales orders and purchase orders.
 - To view the order billing lead time for sales orders, expand the Balance Information section in the customer record and locate the **Order Billing Lead Time** field.
 - To view the order billing lead time for purchase orders, expand the Vendor Bill Matching section in the vendor record and locate the **Order Billing Lead Time** field.

For customers without closed sales orders and vendors without closed purchase orders, the **Order Billing Lead Time** field displays a hyphen (-).

Rescheduling the Order Billing Lead Time Script Run

The system calculates the order billing lead time using a map/reduce script that runs daily. You can change the frequency of the script run, depending on your preference. The optimal schedule of the script run is daily at the end of your business day.

This map/reduce script processes all customers and vendors with fully billed and closed sales orders and purchase orders in its initial run. Subsequent runs of the script only process new customers and vendors with closed sales orders and purchase orders, and any customer and vendor records with updated transactions.

To reschedule the order billing lead time script run:

1. Go to Customization > Scripting > Scripts and locate the **Cash 360 | MR SO PO Order Lead Time Calc** script.
2. Click **View** beside the script name.
3. Click the **Deployments** subtab.
4. Click **Cash 360 | MR SO PO Order Lead Time Calc**.
5. Click **Edit**.
6. In the **Schedule** subtab, specify the new schedule of the script run.

 **Note:** When you make changes to the schedule of the script run, ensure that the value in the **Last Entity Internal ID** field under the **Parameters** subtab remains blank.

7. Click **Save**.

Cash Forecasts in Cash 360

The cash forecast computation varies for account categories and for additional values. The computation also varies for a single subsidiary and for a consolidated subsidiary.

For more information, read the following topics:

- [Cash Forecast Computation for Account Categories in a Single Subsidiary](#)
- [Cash Forecast Computation for Additional Values in a Single Subsidiary](#)
- [Consolidated Cash Forecast Computation for Account Categories](#)
- [Consolidated Cash Forecast Computation for Additional Values](#)

The following table shows the factors affecting the cash forecast computation for a single subsidiary and for a consolidated subsidiary.

Single Subsidiary	Consolidated Subsidiary
Account categories	Account categories
Additional values	Additional values
Cash forecast preferences	Cash forecast preferences
	Consolidated exchange rate type
	Consolidated exchange rate

See the following topics to view related information:

- [Adding Cash 360 Account Categories](#)
- [Setting Cash 360 Preferences](#)
- [Viewing Consolidated Exchange Rates](#)

Cash Forecast Computation for a Single Subsidiary

The cash forecast computation for a single subsidiary varies for account categories and additional values. Read the following topics to know more.

- [Cash Forecast Computation for Account Categories in a Single Subsidiary](#)
- [Cash Forecast Computation for Additional Values in a Single Subsidiary](#)

Cash Forecast Computation for Account Categories in a Single Subsidiary

The cash forecast computation for account categories in a single subsidiary varies depending on the **Data To Use** and **% Movement** values on the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

The following table shows how the cash forecast for account categories is calculated when there is no subsidiary consolidation.

Forecast Period	Cash Forecast Computation Without % Movement	Cash Forecast Computation with % Movement
Daily	The total amount for the account category, divided by the Data To Use value in months, multiplied by 12 months, and divided by 365 days. Daily Cash Forecast = (Total Amount for the account category ÷ Data To Use in months) × 12 months ÷ 365 days	The daily cash forecast amount for the account category, multiplied by the percentage of movement, plus the daily cash forecast amount. Daily Cash Forecast with % Movement = (Daily Cash Forecast × % Movement) + Daily Cash Forecast
Weekly	The total amount for the account category, divided by the Data To Use value in months, multiplied by 12 months, and divided by 52 weeks. Weekly Cash Forecast = (Total Amount for the account category ÷ Data To Use in months) × 12 months ÷ 52 weeks	The weekly cash forecast amount for the account category, multiplied by the percentage of movement, plus the weekly cash forecast amount. Weekly Cash Forecast with % Movement = (Weekly Cash Forecast × % Movement) + Weekly Cash Forecast
Monthly	The total amount for the account category divided by the Data To Use value in months. Monthly Cash Forecast = Total amount for account category ÷ Data To Use in months	The monthly cash forecast amount for the account category, multiplied by the percentage of movement, plus the monthly cash forecast amount. Monthly Cash Forecast with % Movement = (Monthly Cash Forecast × % Movement) + Monthly Cash Forecast

Note: In the Cash Forecast table, the **% Movement** values are not applied to the current day, month, or week but are only applied to succeeding periods.

Cash Forecast Computation for Additional Values in a Single Subsidiary

The following factors affect the cash forecast computation for additional values in a single subsidiary:

- Whether the amount is considered as outflow or inflow
- Forecast period
- Recurrence
- Recurrence Type

These factors can be set on the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

The following table shows examples of how the cash forecast for additional values is calculated when there is no subsidiary consolidation.

Date	Amount	Type	Recurrence	Recurrence Type	Forecast Period	Cash Forecast
Today	1000	Inflow	5	Daily	5 Days	1000 appears on the cash forecast as an outflow amount for five days starting on the current date.
Today	2000	Outflow	3	Weekly	4 Weeks	2000 appears on the cash forecast as an outflow amount for three weeks starting on the current week.
Today	3000	Inflow	6	Monthly	6 Months	3000 appears on the cash forecast as an inflow amount for six months starting on the current month.

Cash Forecast Computation for a Consolidated Subsidiary

The cash forecast computation for a consolidated subsidiary varies for account categories and additional values. Read the following topics to know more.

- [Consolidated Cash Forecast Computation for Account Categories](#)
- [Consolidated Cash Forecast Computation for Additional Values](#)

Consolidated Cash Forecast Computation for Account Categories

The cash forecast for account categories in a consolidated subsidiary is dependent on the consolidated exchange rate, the type of exchange rate used to translate foreign currency amounts for the chart of account, and the **Data To Use** and **% Movement** values set on the Preferences page of this SuiteApp. For more information, see [Setting Cash 360 Preferences](#).

To calculate the cash forecast for account categories in a consolidated subsidiary:

1. Determine the type of exchange rate used to translate foreign currency amounts for the chart of account.
 - a. Go to Setup > Accounting > Manage G/L > Chart of Accounts.
 - b. Click **View** beside the name of the chart of account.
 - c. Go to the **General Rate Type** field to determine the type of exchange rate used to translate foreign currency amounts for the chart of account.

For more information, see the help topic [Consolidated Exchange Rate Types](#).

2. Determine the consolidated exchange rate to use for consolidation. The consolidated exchange rate to use varies depending on the **General Rate Type** field value set for the chart of account.
 - If the **General Rate Type** value is **Current**, use the consolidated exchange rate of the current posting period.
 - If the **General Rate Type** value is **Historical** or **Average**, use the consolidated exchange rate of the posting period on the transaction.

For instructions to view the consolidated exchange rate, see the help topic [Viewing Consolidated Exchange Rates](#).

3. Compute the cash forecast using the equations in the following table.

Forecast Period	Consolidated Cash Forecast Computation for Account Categories Without % Movement
Daily	The sum of all transaction amounts multiplied by the consolidated exchange rate (depending on the general rate type), divided by the Data To Use value in months, multiplied by 12 months, and divided by 365 days. Consolidated Daily Cash Forecast = (Sum of transaction amount × Consolidated exchange rate depending on the General Rate Type) ÷ Data To Use in months × 12 months ÷ 365 days
Weekly	The sum of all transaction amounts multiplied by the consolidated exchange rate (depending on the general rate type), divided by the Data to Use value in months, multiplied by 12 months, and divided by 52 weeks. Consolidated Weekly Cash Forecast = (Sum of transaction amount × Consolidated exchange rate depending on the General Rate Type) ÷ Data To Use in months × 12 months ÷ 52 weeks
Monthly	The sum of all transaction amounts multiplied by the consolidated exchange rate (depending on the general rate type) and divided by the Data To Use value in months. Consolidated Monthly Cash Forecast = (Sum of transaction amount × Consolidated exchange rate depending on the General Rate Type) ÷ Data To Use in months

Consolidated Cash Forecast Computation for Additional Values

The cash forecast for additional values in a consolidated subsidiary is dependent on the consolidated exchange rate, whether the amount is considered as outflow or inflow, the forecast period, recurrence, and recurrence type as specified on the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

The consolidated exchange rate type used for additional values is always the **Current** consolidated exchange rate. For more information about the consolidated exchange rate types, see the help topic [Consolidated Exchange Rate Types](#).

The consolidated cash forecast for additional values is calculated as the additional value amount multiplied by the current consolidated exchange rate. The recurrence, recurrence type, and forecast period determines how the cash forecast is displayed on the Cash Forecast table and on the dashboard.

Consolidated cash forecast for additional values = Additional value amount × Current consolidated exchange rate

The following table shows examples of how the cash forecast for additional values is calculated for consolidated subsidiaries.

Date	Amount	Type	Recurrence	Recurrence Type	Sample Current Consolidated Exchange Rate	Forecast Period	Consolidated Cash Forecast
Today	1000	Inflow	1	Daily	0.934	5 days	934 appears on the cash forecast as an inflow amount for the current date.
1st day of June	2000	Outflow	8	Weekly	0.848 for June 0.995 for July	12 weeks	1696 appears on the Cash Forecast table as an outflow amount for four weeks starting on the 1st week of June. 1990 appears on the Cash Forecast table as an outflow amount for four weeks starting on the first week of July.
1st day of September	3000	Inflow	2	Monthly	.779 for September .834 for October	6 months	2337 appears on the cash forecast as an inflow amount for the month of September. 2502 appears on the cash forecast as an inflow amount for the month of October.

Viewing Cash Forecasts

Note: An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to view the cash forecasts. For more information, see [Giving a Role Access to Cash 360](#).

You can display the cash forecast for a single subsidiary or for consolidated subsidiaries in the Cash Forecast table. To change reports by subsidiary or to view consolidated reports, go to the upper right corner of the page and select the subsidiary or consolidated subsidiary.

Dates in the Cash Forecast table are based on the time zone preferences of the of the logged-in user. For more information, see the help topic [Setting Your Calendar Time Zone](#).

Note: Inactive subsidiaries are not included in the list of subsidiary options. However, all posting transaction amounts from inactive subsidiaries are included in the cash forecast when viewing reports for a consolidated subsidiary. For more information about consolidated reports in OneWorld accounts, see the help topic [Consolidated Reporting in OneWorld](#).

To view cash forecasts:

1. Go to Financial > Cash 360 > Dashboard.
2. On the left pane, click **Cash Forecast** to display the Cash Forecast table.

The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.

The Cash Forecast table displays the following information.

Table Heading	Table Element	Description
Account Category	Column header	This column displays the account categories and additional values. The account categories are sorted per type, whether they are inflow or outflow. Additional values are marked with an asterisk (*). Accounts receivable and accounts payable are also displayed in this column.
Amount (Currency)	Column header	This column is divided into subcolumns that show the cash forecast amount for the date range specified in the SuiteApp's Preferences page. The cash forecast amount is shown in the currency of the selected subsidiary or consolidated subsidiary.
Date, Week, Month	Column subheader	This is the date range specified in the Forecast Period field on the SuiteApp's Preferences page. Each column shows the forecast amount for the date range and starts with the current date, week, or month. If you selected 3 Months in the Forecast Period field, the SuiteApp computes the next full 3 months after the current date. For example, if the current date is October 20, the table displays the next full 3 months of data after October. That is, data from November to January.

Table Heading	Table Element	Description
Opening Balance	Row header	This row displays the opening balance amount for the date range specified in the SuiteApp's Preferences page. For more information, see Setting Cash 360 Preferences. The initial opening balance amount is the sum of all accounts in the chart of accounts with the type equal to bank (except for those excluded from Cash 360 calculations) for the selected subsidiary or consolidated subsidiary up to the current posting period. For more information about excluding bank accounts from the opening balance calculations, see Excluding Bank Accounts from Cash 360 Calculations. The succeeding opening balance amounts are taken from the closing balance amounts from the previous periods. This row is only displayed if the Include Opening Balance box is checked in the SuiteApp's Preferences page. Click the opening balance amount to open a window that lists all accounts included in the opening balance amount calculation. You can only click the opening balance amount if it is greater than zero. For more information, see Viewing the Opening Balance Details.
Undeposited/Future-Period Funds	Row header	This row displays the total undeposited funds and bank transaction amounts for the date range specified that fall on the succeeding posting period. This row displays values if there are undeposited funds or if there is an overlap in the accounting periods within the same forecast period. For example, you have a forecast period that is set to 6 or 12 weeks, a report that starts on the last week of October 2025, and bank transactions for November 1, 2025. Any undeposited funds and any bank transaction amounts for November 1 is shown on this row. This row is only displayed if the Include Opening Balance box is checked in the SuiteApp's Preferences page. For more information, see Setting Cash 360 Preferences.
Inflow	Row separator	All entries below this row are inflow account categories, additional values, accounts receivables, and sales orders. The forecast amount for the account categories are based on historical averages as set in the Forecast Period field on the SuiteApp's Preferences page. When there is no data available for the period specified, the forecast amount will contain zero values. If the Cash Forecast table displayed is for a consolidated subsidiary, the inflow amounts are grouped together for each subsidiary. Expand the subsidiary name to show the account categories or additional values for that subsidiary. Additional values are marked with an asterisk. For information about how to add additional values, see Setting Cash 360 Preferences.
Accounts Receivable	Row	This row displays the accounts receivable from all A/R posting transactions that fall on the date, week, or month specified. If there are receivable installment transactions, the installment amount is included on the month, week, or date when the installment amount is received.

Table Heading	Table Element	Description
		The amounts in this row include transactions with due dates in the future. Where due dates are not specified for transactions, the transaction date is used in place of the due date. This row is displayed even if there are no A/R posting transactions, account categories, or additional values entered. The first column in this row includes all the accounts receivable amount up to the current date, week, or month. Click the accounts receivable amount to open a window that lists all accounts included in the accounts receivable amount calculation. You can only click the accounts receivable amount if it is greater than zero. For more information, see Viewing the Accounts Receivable Details.
Sales Orders	Row	The first column in this row displays the total open amount (up to the current date, week, or month) from all open and partially billed sales orders. The succeeding columns in this row display the total open amount for all open and partially billed sales orders with forecast dates that fall on the date, week, or month specified. The following sales order statuses are included in the calculation of the total open amount: partially fulfilled, pending billing, and pending fulfillment. Sales orders with billing schedules, installments, and subscriptions are not included in the calculation of amounts in this row. Click the sales order amount (if greater than zero) to open a window listing all related sales orders and their details. For more information, see Viewing the Sales Order Details. This row is only displayed if the Include Sales Orders box is checked in the SuiteApp's Preferences page. For more information, see Setting Cash 360 Preferences.
Outflow	Row separator	All entries below this row are outflow account categories, additional values, accounts payables, and purchase orders. The forecast amount for the account categories are based on historical averages as set in the Forecast Period field on the SuiteApp's Preferences page. When there is no data available for the period specified, the forecast amount will contain zero values. If the Cash Forecast table displayed is for a consolidated subsidiary, the outflow amounts are grouped together for each subsidiary. Expand the subsidiary name to show the account categories or additional values for that subsidiary. Additional values are marked with an asterisk. For information about how to add additional values, see Setting Cash 360 Preferences.
Accounts Payable	Row	This row displays the accounts payable from all A/P posting transactions that fall on the date, week, or month specified. If there are payable installment transactions, the installment amount is included on the month, week, or date when the installment amount is paid.

Table Heading	Table Element	Description
		The amounts in this row include transactions with due dates in the future. Where due dates are not specified for transactions, the transaction date is used in place of the due date. This row is displayed even if there are no A/P posting transactions, account categories, or additional values entered. Click the accounts payable amount to open a window that lists all accounts included in the accounts payable amount calculation. You can only click the accounts payable amount if the it is greater than zero. For more information, see Viewing the Accounts Payable Details.
Purchase Orders	Row	The first column in this row displays the total open amount (up to the current date, week, or month) from all open purchase orders. The succeeding columns in this row display the total open amount for all open and partially billed purchase orders with forecast dates that fall on the date, week, or month specified. The following purchase order statuses are included in the calculation of the total open amount: partially received, pending billing, and pending receipt. Click the purchase order amount (if greater than zero) to open a window listing all related purchase orders and their details. For more information, see Viewing the Purchase Orders Details. This row is only displayed if the Include Purchase Orders box is checked in the SuiteApp's Preferences page. For more information, see Setting Cash 360 Preferences.
Net Balance	Row header	This row displays the net balance amount for a given period. The net balance amount is calculated as the total forecast inflow amount minus the total forecast outflow amount for a given period. This row is only displayed if the Include Opening Balance box is checked in the SuiteApp's Preferences page. For more information, see Setting Cash 360 Preferences.
Closing Balance	Row header	This row shows the closing balance amount for a given period. The closing balance amount is calculated as the opening balance amount, plus the undeposited/future-period funds, plus the total forecast inflow amount, minus the total forecast outflow amount for a given period. Closing balance = Opening balance amount + Undeposited/Future-period funds + Total forecast inflow amount – Total forecast outflow amount This row is only displayed if the Include Opening Balance box is checked in the Preferences page of this SuiteApp. For more information, see Setting Cash 360 Preferences.

Viewing the Opening Balance Details

Click the opening balance amount in the Cash Forecast table to open a window that lists all accounts included in the opening balance amount calculation. Bank accounts excluded from the Cash 360 calculations are not included in the list. For more information, see [Excluding Bank Accounts from Cash 360 Calculations](#). You can only click the opening balance amount if it is greater than zero.

The row that displays the opening balance amount is only displayed if the **Include Opening Balance** box is checked in the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

To view the opening balance details:

1. Go to Financial > Cash 360 > Dashboard.
2. On the left pane, click **Cash Forecast** to display the Cash Forecast table.

The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.

3. Click the opening balance amount for the current day, week, or month.

Note: Take note of the following:

- The Opening Balance row is only displayed if the **Include Opening Balance** box is checked in the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).
- You can only click the current opening balance amount and not the opening balance for the succeeding days, weeks, or months.

The Opening Balance window opens and displays the following information:

Item	Description
Account Category	This field displays the account category for the amount. For example, if the amount is the opening balance amount, this field displays Opening Balance.
Total Amount	This field displays the total opening balance amount that fall on the date, week, or month specified.
Period	This field displays the period covered for the total opening balance amount.
Currency	This field displays the currency of the total opening balance amount.
Subsidiary	This column displays the subsidiary of the account that contributed to the total opening balance amount calculation.
Account Name	This column displays the account name that contributed to the total opening balance amount calculation.
Transaction Amount (Currency)	This column displays the amount that contributed to the total opening balance amount calculation. The amount is shown in the currency of the selected subsidiary or consolidated subsidiary.

4. (Optional) Under the Opening Balance Details section, click the **Export to** icon and select **CSV** to export the report as a CSV file.

The Opening Balance window displays up to 100 recent transactions. Use Export to CSV to view all transactions.

Viewing Details of Undeposited/Future-Period Funds

Click the undeposited/future-period funds amount in the Cash Forecast table to open a window that lists all accounts included in the undeposited/future-period funds amount calculation. You can only click the undeposited/future-period funds amount if it is greater than zero.

The row that displays the undeposited/future-period funds amount is only displayed if the **Include Opening Balance** box is checked in the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

To view the details of undeposited/future-period funds:

1. Go to Financial > Cash 360 > Dashboard.
2. On the left pane, click **Cash Forecast** to display the Cash Forecast table.

The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.

3. Click the undeposited/future-period funds amount.

Note: The Undeposited/Future-Period Funds row is only displayed if the **Include Opening Balance** box is checked in the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

The Undeposited/Future-Period Funds window opens and displays the following information:

Item	Description
Account Category	This field displays the account category for the amount. For example, if the amount is an undeposited/future-period amount, this field displays Undeposited/Future-Period Funds.
Total Amount	This field displays the total undeposited/future-period funds amount that fall on the date, week, or month specified.
Period	This field displays the period covered for the total undeposited/future-period funds amount.
Currency	This field displays the currency of the undeposited/future-period funds amount.
Subsidiary	This column displays the subsidiary of the account that contributed to the total undeposited/future-period funds amount calculation.
Transaction Number	This column displays the ID of the transaction that contributed to the total undeposited/future-period funds amount calculation. Click the transaction ID to open the transaction record.
Transaction Type	This column displays the type of transaction that contributed to the to the total undeposited/future-period funds amount calculation. For example: Payment
Entity	This column displays the entity for the transaction that contributed to the total undeposited/future-period funds amount calculation. Entity can be a customer name, vendor name, employee name, or other entities.
Account Name	This column displays the account name that contributed to the total undeposited/future-period funds amount calculation.
Transaction Amount (Currency)	This column displays the transaction amount that contributed to the total undeposited/future-period funds amount calculation.

Item	Description
	The amount is shown in the currency of the selected subsidiary or consolidated subsidiary.

- (Optional) Under the Undeposited/Future-Period Funds Details section, click the **Export to** icon and select **CSV** to export the report as a CSV file.

The Undeposited/Future-Period Funds window displays up to 100 recent transactions. Use Export to CSV to view all transactions.

Viewing the Accounts Receivable Details

Click the accounts receivable amount in the Cash Forecast table to open a window that lists all accounts included in the accounts receivable amount calculation. You can only click the accounts receivable amount if it is greater than zero.

To view the accounts receivable details:

- Go to Financial > Cash 360 > Dashboard.
- On the left pane, click **Cash Forecast** to display the Cash Forecast table.
The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.
- Click the accounts receivable amount.

The Accounts Receivable window opens and displays the following information:

Item	Description
Account Category	This field displays the account category for the amount. For example, if the amount is an accounts receivable amount, this field displays Accounts Receivable.
Total Amount	This field displays the total accounts receivable amount that falls on the date, week, or month specified.
Period	This field displays the period covered for the total accounts receivable amount.
Currency	This field displays the currency of the total accounts receivable amount.
Subsidiary	This column displays the subsidiary of the transaction that contributed to the total accounts receivable amount calculation.
Transaction Number	This column displays the ID of the transaction that contributed to the total accounts receivable amount calculation. Click the transaction ID to open the transaction record.
Transaction Type	This column displays the type of transaction that contributed to the total accounts receivable amount calculation. For example: Invoice
Entity	This column displays the entity for the transaction that contributed to the total accounts receivable amount calculation. Entity can be a customer name, vendor name, employee name, or other entities.
Transaction Date	This column displays the date of the transaction that contributed to the total accounts receivable amount calculation.
Due Date	This column displays the due date of the installment amount or due date of the transaction that contributed to the total accounts payable amount calculation.

Item	Description
Terms	This column displays the installment term of the transaction that contributed to the total accounts receivable amount calculation. This column is only available if there is an installment term created for transactions. For more information about creating installments, see the help topic Creating Installments.
Installment Amount (Currency)	This column displays the installment amount that is receivable on the due date specified. This column is only available if there is an installment term created for transactions. For more information about creating installments, see the help topic Creating Installments.
Amount Due (Currency)	This column displays the amount due for a given period for the receivable transaction that contributed to the total accounts receivable calculation. For installment transactions, this column displays the installment amount. If there is no receivable amount due for a given period, this column displays 0.
Transaction Amount (Currency)	This column displays the total receivable transaction amount. The amount is shown in the currency of the selected subsidiary or consolidated subsidiary.
Status	This column displays the status of the transaction that contributed to the total accounts receivable amount calculation. For example: Partially Paid
Close Date	This column displays the close date of the receivable transaction. For example, close date of the invoice.
Foreign Currency Amount	This column displays the transaction amount or installment amount for receivable transactions, in the transaction currency.
Transaction Currency	This column displays the currency of the transaction.

4. (Optional) To view more than 100 transactions, under the Accounts Receivable Details section, click the **Export to** icon and select **CSV** to export the report as a CSV file.

The Accounts Receivable window displays up to 100 recent transactions. Use Export to CSV to view all transactions.

Viewing the Sales Order Details

Click the sales order amount in the Cash Forecast table to open a window that lists all open sales orders included in the amount calculation. You can only click the sales order amount if it is greater than zero.

The row showing amounts from sales orders only appears if the **Include Sales Orders** box is checked on the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

To view the sales order details:

1. Go to Financial > Cash 360 > Dashboard.
2. On the left pane, click **Cash Forecast** to display the Cash Forecast table.

The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.

3. Click the sales order amount.

The Sales Orders window opens and displays the following information:

Item	Description
Account Category	This field displays the account category for the amount. For example, if the amount is from open sales orders, this field displays Sales Orders.
Total Amount	This field displays the total amount from all open sales orders that fall on the date, week, or month specified.
Period	This field displays the period covered for the total sales order amount.
Currency	This field displays the currency of the total sales order amount.
Subsidiary	This column displays the subsidiary of the sales order that contributed to the total sales order amount calculation.
Document Number	This column displays the ID of the sales order that contributed to the total sales order amount calculation. Click the ID to open the sales order record.
Entity	This column displays the entity for the transaction that contributed to the total sales order amount calculation. Entity can be a customer name, vendor name, employee name, or other entities.
Transaction Date	This column displays the transaction date of the sales order that contributed to the total amount calculation.
Forecast Date	This column displays the forecast date for the sales order. The forecast date is calculated as the transaction date plus the order billing lead time for the sales order plus the payment terms if there are any. Forecast date = Transaction date + Order billing lead time + Payment terms The order billing lead time is system-calculated for all sales orders that are fully billed and closed. You can manually enter this value for customers without closed sales orders. For more information, see Viewing the System-Calculated Order Billing Lead Time and Setting Cash 360 Preferences .
Payment Terms	This column displays the payment terms for the sales order. If the payment term is installment, this column displays zero (0). If there is no payment term for the sales order, this column is blank. Only standard payment terms are considered, and not date-driven or installment terms.
Order Billing Lead Time	This column displays the order billing lead time for the sales order. The sales order billing lead time is the time it takes in days for a customer to be billed for goods or services. It can be system-calculated for all fully billed and closed sales orders and displayed in the customer record or manually entered on the Cash 360 Preferences page. For more information, see Viewing the System-Calculated Order Billing Lead Time and Setting Cash 360 Preferences . If the sales order billing lead time is specified in both the customer record and the Cash 360 Preferences page, the value in the customer record takes precedence and is used to calculate forecast dates.
Open Amount (Currency)	This column displays the open amount for the sales order.
Transaction Amount (Currency)	This column displays the transaction amount of the sales order.
Amount Billed (Currency)	This column displays the amount billed for the sales order.
Status	This column displays the status of the sales order. For example: Pending Fulfillment

Item	Description
Open Amount in Foreign Currency	This column displays the open amount for the sales order in foreign currency.
Transaction Currency	This column displays the currency of the sales order transaction.
Transaction Amount in Foreign Currency	This column displays the transaction amount for the sales order in foreign currency.

- (Optional) To view more than 100 transactions, under the Details of Sales Orders section, click the **Export to** icon and select **CSV** to export the report as a CSV file.

The Sales Orders window displays up to 100 recent transactions. Use Export to CSV to view all transactions.

Viewing the Accounts Payable Details

Click the accounts payable amount in the Cash Forecast table to open a window that lists all accounts included in the accounts payable amount calculation. You can only click the accounts payable amount if it is greater than zero.

To view the accounts payable details:

- Go to Financial > Cash 360 > Dashboard.
- On the left pane, click **Cash Forecast** to display the Cash Forecast table.

The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.

- Click the accounts payable amount.

The Accounts Payable window opens and displays the following information:

Item	Description
Account Category	This field displays the account category for the amount. For example, if the amount is an accounts payable amount, this field displays Accounts Payable.
Total Amount	This field displays the total accounts payable amount that fall on the date, week, or month specified.
Period	This field displays the period covered for the total accounts payable amount.
Currency	This field displays the currency of the total accounts payable amount.
Subsidiary	This column displays the subsidiary of the transaction that contributed to the total accounts payable amount calculation.
Transaction Number	This column displays the ID of the transaction that contributed to the total accounts payable amount calculation. Click the transaction ID to open the transaction record.
Transaction Type	This column displays the type of transaction that contributed to the total accounts payable amount calculation. For example: Bill Payment
Entity	This column displays the entity for the transaction that contributed to the total accounts payable amount calculation.

Item	Description
	Entity can be a customer name, vendor name, employee name, or other entities.
Transaction Date	This column displays the date of the transaction that contributed to the total accounts payable amount calculation.
Due Date	This column displays the due date of the installment amount or due date of the transaction that contributed to the total accounts payable amount calculation.
Terms	This column displays the installment term of the transaction that contributed to the total accounts payable amount calculation. This column is only available if there is an installment term created for the transaction. For more information about creating installments, see the help topic Creating Installments.
Installment Amount (Currency)	This column displays the installment amount that is payable for a given period. This column is only available if there is an installment term created for the transaction. For more information about creating installments, see the help topic Creating Installments.
Amount Due (Currency)	This column displays the amount due for a given period for the payable transaction that contributed to the total accounts payable calculation. For installment transactions, this column displays the installment amount. If there is no payable amount due for a given period, this column displays 0.
Transaction Amount (Currency)	This column displays the total payable transaction amount. The amount is shown in the currency of the selected subsidiary or consolidated subsidiary.
Status	This column displays the status of the transaction that contributed to the total accounts payable amount calculation. For example: Partially Paid
Close Date	This column displays the close date of the payable transaction. For example, close date of the bill payment.
Foreign Currency Amount	This column displays the transaction amount or installment amount for payable transactions, in the transaction currency.
Transaction Currency	This column displays the currency of the transaction.

4. (Optional) To view more than 100 transactions, under the Accounts Payable Details section, click the **Export to** icon and select **CSV** to export the report as a CSV file.

The Accounts Payable window displays up to 100 recent transactions. Use Export to CSV to view all transactions.

Viewing the Purchase Orders Details

Click the purchase order amount in the Cash Forecast table to open a window that lists all open purchase orders included in the amount calculation. You can only click the purchase order amount if it is greater than zero.

The row showing amounts from purchase orders only appears if the **Include Purchase Orders** box is checked on the SuiteApp's Preferences page. For more information, see [Setting Cash 360 Preferences](#).

To view the purchase order details:

1. Go to Financial > Cash 360 > Dashboard.

2. On the left pane, click **Cash Forecast** to display the Cash Forecast table.

The default display of the Cash Forecast table is always based on the currently logged-in user's subsidiary. To display the table for another subsidiary, select the subsidiary in the upper right corner of the page.

3. Click the purchase order amount.

The Purchase Orders window opens and displays the following information:

Item	Description
Account Category	This field displays the account category for the amount. For example, if the amount is from open purchase orders, this field displays Purchase Orders.
Total Amount	This field displays the total amount from all open purchase orders that fall on the date, week, or month specified.
Period	This field displays the period covered for the total purchase order amount.
Currency	This field displays the currency of the total purchase order amount.
Subsidiary	This column displays the subsidiary of the purchase order that contributed to the total purchase order amount calculation.
Document Number	This column displays the ID of the purchase order that contributed to the total purchase order amount calculation. Click the ID to open the purchase order record.
Entity	This column displays the entity for the transaction that contributed to the total purchase order amount calculation. Entity can be a customer name, vendor name, employee name, or other entities.
Transaction Date	This column displays the transaction date of the purchase order that contributed to the total amount calculation.
Forecast Date	This column displays the forecast date for the purchase order. The forecast date is calculated as the transaction date plus the order billing lead time for the purchase order plus the payment terms if there are any. Forecast date = Transaction date + Order billing lead time + Payment terms The order billing lead time is system-calculated for all purchase orders that are fully billed and closed. You can manually enter this value for vendors without closed purchase orders. For more information, see Viewing the System-Calculated Order Billing Lead Time and Setting Cash 360 Preferences .
Payment Terms	This column displays the payment terms for the purchase order. If the payment term is installment, this column displays zero (0). If there is no payment term for the purchase order, this column is blank. Only standard payment terms are considered, and not date-driven or installment terms.
Order Billing Lead Time	This column displays the order billing lead time for the purchase order. The purchase order billing lead time is the time it takes in days for a vendor to be billed for goods or services. It can be system-calculated for all fully billed and closed purchase orders and displayed in the vendor record or manually entered in the Cash 360 Preferences page. For more information, see Viewing the System-Calculated Order Billing Lead Time and Setting Cash 360 Preferences . If the purchase order billing lead time is specified in both the vendor record and the Cash 360 Preferences page, the value in the vendor record takes precedence and is used to calculate forecast dates.
Open Amount (Currency)	This column displays the open amount for the purchase order.

Item	Description
Transaction Amount (Currency)	This column displays the transaction amount of the purchase order.
Amount Billed (Currency)	This column displays the amount billed for the purchase order.
Status	This column displays the status of the purchase order. For example: Pending Receipt
Open Amount in Foreign Currency	This column displays the open amount for the purchase order in foreign currency.
Transaction Currency	This column displays the currency of the purchase order transaction.
Transaction Amount in Foreign Currency	This column displays the transaction amount for the purchase order in foreign currency.

4. (Optional) To view more than 100 transactions, under the Details of Purchase Order section, click the **Export to** icon and select **CSV** to export the report as a CSV file.

The Purchase Orders window displays up to 100 recent transactions. Use Export to CSV to view all transactions.

Cash 360 Dashboard

Note: An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to access the Cash 360 dashboard. For more information, see [Giving a Role Access to Cash 360](#).

If you are an Administrator, access the Cash 360 dashboard by going to Customization > Scripting > Single Page Applications. Click the icon next to the Cash 360 name to open the dashboard.

The Cash 360 dashboard lets you quickly view the total receivables, total payables, total bank balance, and cash forecasts for your company. This dashboard also has links where you can access records, transactions, and reports. Aging summary pie charts are also available for accounts receivables and accounts payables.

All posting transactions that affect the accounts receivable and accounts payable, including installment transactions, are considered when displaying values in the Cash 360 tiles and in A/R and A/P aging summary pie charts.

The default display on Cash 360 dashboard is always based on the currently logged-in user's subsidiary. To display data on the dashboard for another subsidiary, select the subsidiary in the upper right corner of the page.

Note: Memorized transactions are not supported.

Read the following topics to know more about the dashboard.

- [Accessing Reports, Records, and Transactions From the Cash 360 Dashboard](#)
- [Viewing the Cash Position](#)
- [Viewing the Cash Forecast From the Cash 360 Dashboard](#)
- [Viewing the A/R and A/P Aging Summary From the Cash 360 Dashboard](#)

Accessing Reports, Records, and Transactions From the Cash 360 Dashboard

Note: An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to view the Cash 360 dashboard. For more information, see [Giving a Role Access to Cash 360](#).

If you are an Administrator, access the Cash 360 dashboard by going to Customization > Scripting > Single Page Applications. Click the icon next to the Cash 360 name to open the dashboard.

The Actions portlet is available on the Cash 360 dashboard to let you access relevant Cash 360 records, reports, and transactions in one place.

To access reports, records, and transactions from the Cash 360 dashboard:

1. Go to Financial > Cash 360 > Dashboard.
2. In the **Actions** portlet, select from the following actions:

Action	Description
View Invoices	View a list of all invoices in the system or in your subsidiary.
Approve Invoices	View a list of all invoices that need approval. To approve invoices, an administrator must enable features. For more information, see Cash 360 Prerequisites .
View Bills	View a list of all vendor bills in the system or in your subsidiary.
View A/P Aging Summary	View the A/P aging report in the system or for your subsidiary.
View A/R Aging Summary	View the A/R aging report in the system or for your subsidiary.
View Account Categories	View a list of all the account categories in the Cash 360 SuiteApp.

Viewing the Cash Position

The Cash 360 dashboard has a tiles portlet that immediately lets you know your company's cash position. Cash position such as the bank balance for the current posting period, total payables, and total receivables for the selected subsidiary or consolidated subsidiary as of the current date are available as tiles in the Cash 360 dashboard.

To view the cash position:

1. Go to Financial > Cash 360 > Dashboard.

Note: An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to view the Cash 360 dashboard. For more information, see [Giving a Role Access to Cash 360](#).

If you are an Administrator, access the Cash 360 dashboard by going to Customization > Scripting > Single Page Applications. Click the icon next to the Cash 360 name to open the dashboard.

Go to the upper right corner of the dashboard to view the cash position. The total balance in your bank account (except for excluded bank accounts) up to the current posting period, the total receivable amount, and the total payable amount for your company in the currency of the

selected subsidiary or consolidated subsidiary are displayed as tiles in the dashboard. All posting transactions that affect the accounts receivable and accounts payable, including installment transactions, are considered when displaying values in the tiles. For more information about excluding bank accounts from Cash 360 calculations, see [Excluding Bank Accounts from Cash 360 Calculations](#).

The total payable and receivable amounts are from the A/P and A/R Aging Summary reports.

Note: If an error occurs while retrieving the total bank balance, total receivable amount, or the total payable amount for your company, **Request Timed Out** is displayed in the tiles. Contact NetSuite Customer Support for assistance.

Viewing the Cash Forecast From the Cash 360 Dashboard

The Cash Forecast portlet is available on the Cash 360 dashboard to let you view the cash forecast line graph and table. The values in this portlet are based on the Cash Forecast table and from the preferences set for this SuiteApp. For more information, see [Cash Forecasts in Cash 360](#) and [Setting Cash 360 Preferences](#).

To view the cash forecast from the Cash 360 dashboard:

1. Go to Financial > Cash 360 > Dashboard.

Note: An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to view the Cash 360 dashboard. For more information, see [Giving a Role Access to Cash 360](#).

If you are an Administrator, access the Cash 360 dashboard by going to Customization > Scripting > Single Page Applications. Click the icon next to the Cash 360 name to open the dashboard.

The Cash Forecast portlet displays a line graph and a cash forecast table with the following information.

Portlet Element	Description
Line graph	Data on the line graph are based on the forecast table in the Cash Forecast portlet. The cash forecast is displayed in the y-axis and is shown in the currency of the selected subsidiary or consolidated subsidiary. The period for the cash forecast is shown on the x-axis. The period varies from days, weeks, or months, depending on the preferences set for the SuiteApp. Points in the line graph show the forecast amount for a given period. The cash forecast is calculated as the opening balance amount, plus the total undeposited/future-period funds, plus the total inflow amount, minus the total outflow amount. Cash Forecast = Opening balance + Undeposited/Future-period funds + Total forecast inflow amount – Total forecast outflow amount
Cash forecast table	Data in this table are condensed and based on the Cash Forecast table. For more information, see Cash Forecasts in Cash 360. This condensed table shows the period as specified in the Preferences page of this SuiteApp. This table displays the total inflow and outflow amounts, as well as the cash forecast for the given period. The cash forecast is calculated as the opening balance amount, plus the undeposited/future-period funds, plus the total inflow amount, minus the total outflow amount.

Portlet Element	Description
	Cash Forecast = Opening balance + Undeposited/Future-period funds + Total forecast inflow amount – Total forecast outflow amount Installment amounts are included in the calculation of forecast inflow or outflow amounts.

Note: If an error occurs while retrieving values in the Cash Forecast portlet, **Request Timed Out** is displayed in the portlet. Contact NetSuite Customer Support for assistance.

Viewing the A/R and A/P Aging Summary From the Cash 360 Dashboard

The A/R Aging Summary and A/P Aging Summary portlets are available on the Cash 360 dashboard. These portlets display A/R and A/P aging reports in a pie chart. All posting transactions that affect the accounts receivable and accounts payable, including installment transactions, are considered when displaying values in the A/R and A/P aging summary pie charts.

To view the A/R and A/P aging summary from the Cash 360 dashboard:

1. Go to Financial > Cash 360 > Dashboard.

Note: An administrator must give access to roles that will use the Cash 360 SuiteApp. When access is not given, the role has no permission to view the Cash 360 dashboard. For more information, see [Giving a Role Access to Cash 360](#).

If you are an Administrator, access the Cash 360 dashboard by going to Customization > Scripting > Single Page Applications. Click the icon next to the Cash 360 name to open the dashboard.

The A/R Aging Summary and A/P Aging Summary portlets on the lower part of the dashboard displays the following information.

Portlet	Item	Description
A/R Aging Summary	Total Amount	This field displays the total amount of receivables in the currency of the selected subsidiary or consolidated subsidiary. The total receivable amount is based on the A/R Aging Summary report.
	# of Transactions	This field displays the total number of receivable transactions with customer information.
	Transactions w/o Customers	This field displays the total number of receivable transactions without customer information.
	Customers	This field displays the total number of customers with receivable transactions.
	Current	This portion of the pie chart represents receivable transactions that are not overdue.
	1–30 Days	This portion of the pie chart represents receivable transactions that are overdue by 1–30 days.
	31–60 Days	This portion of the pie chart represents receivable transactions that are overdue by 31–60 days.

Portlet	Item	Description
A/P Aging Summary	61–90 Days	This portion of the pie chart represents receivable transactions that are overdue by 61–90 days.
	90+ Days	This portion of the pie chart represents receivable transactions that are overdue by more than 90 days.
	Total Amount	This field displays the total amount of payables in the currency of the selected subsidiary or consolidated subsidiary. The total payable amount is based on the A/P Aging Summary report.
	# of Transactions	This field displays the total number of payable transactions with vendor information.
	Transactions w/o Vendors	This field displays the total number of payable transactions without vendor information.
	Vendors	This field displays the total number of vendors with payable transactions.
	Current	This portion of the pie chart represents payable transactions that are not overdue.
	1–30 Days	This portion of the pie chart represents payable transactions that are overdue by 1–30 days.
	31–60 Days	This portion of the pie chart represents payable transactions that are overdue by 31–60 days.
	61–90 Days	This portion of the pie chart represents payable transactions that are overdue by 61–90 days.
	90+ Days	This portion of the pie chart represents payable transactions that are overdue by more than 90 days.

Note: If an error occurs while retrieving the values in the A/R Aging Summary and A/P Aging Summary portlets, an em dash (—) is displayed. Contact NetSuite Customer Support for assistance.

Cash 360 Limitations

- You can only add a maximum of 1000 chart of accounts for a single category. For more information, see [Adding Cash 360 Account Categories](#).
- The SuiteApp supports up to one million transactions. If your NetSuite account exceeds this limit, forecasts may not display properly in the Cash 360 dashboard.
- Additional values that are included in the cash forecast are shared across users within the same subsidiary. For more information about additional values, see [Setting Cash 360 Preferences](#).
- In the inclusion of sales orders in the cash forecasts, only sales orders without billing schedules, installments, or subscriptions are considered. Also, only standard payment terms are included; date-driven and installment payment terms are excluded.
- In the inclusion of purchase orders in the cash forecasts, only purchase orders without billing schedules, installments, or subscriptions are considered. Also, only standard payment terms are included; date-driven and installment payment terms are excluded.
- The Opening Balance, Undeposited/Future-Period Funds, Accounts Receivable, Sales Orders, Accounts Payable, and Purchase Orders windows can only display the 100 most recent transactions. To view more than 100 transactions, you can use the Export to CSV function.

- When exporting records through CSV for the Opening Balance, Undeposited/Future-Period Funds, Accounts Receivable, Sales Orders, Accounts Payable, Purchase Orders windows, there is a limit of 40,000 rows and a maximum file size of 10MB. It may take a while to export transactions that reach the transaction number limit or file size limit.
- The navigation menus for the Cash 360 dashboard and Account Categories are only available in English.
- You can access the Cash 360 SuiteApp only if your subsidiary is active.
