This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. The Enhanced Sales Center SuiteApp

The Enhanced Sales Center provides user interface enhancements to the standard NetSuite Sales Center. The Enhanced Sales Center makes information that is relevant to sales users available to them through better organized tabs, forms, links, and dashboards.

For more information on the enhancements introduced in the Enhanced Sales Center, see [Sales Center Enhancements](#).

If you are new to NetSuite and you want to find more information about the NetSuite user interface and Standard Centers, see the help topic [Centers Overview](#).

Setting up the Enhanced Sales Center

The following sections provide instruction for setting up the Enhanced Sales Center.

Prerequisites

Before you download and install the SuiteApp, you should ensure that the following features are enabled:

- Customer Relationship Management
- Sales Force Automation

For more information on enabling NetSuite features, see the help topic [Enabling Features](#).

If you do not use the Opportunities and Customer Support and Service features, you must disable the Opportunities and Support tabs. These tabs are located in the Enhanced Sales Center. To delete custom center tabs, go to Customization > Centers and Tabs > Center Tabs. Click Edit next to the center tab that you want to delete. On the Actions list, click Delete.

Installing the Enhanced Sales Center

 **Note:** This SuiteApp can only be installed on NetSuite 2012.1 or higher.

Bundle Name: Enhanced Sales Center

Bundle ID: 19656

Location: Production (Account ID: 3368792)

Availability: Public

For more information on installing SuiteApps, see the help topic [Installing a Bundle](#).

For updates to the Enhanced Sales Center, an account administrator or a user with SuiteApp Marketplace permission can update the installed bundle. For more information, see the help topic [Installed Bundle Updates](#).

Sales Center Enhancements

The Enhanced Sales Center includes comprehensive changes to the standard Sales Center user interface. These changes provide a more intuitive and convenient interface specifically designed for sales users.

Click these topics for more details on the Sales Center enhancements:

- [Enhanced Sales Center Roles and Permissions](#)
- [Enhanced Tabs, Categories, and Links](#)
- [Enhanced Sales Forms](#)

- [Enhanced Field Labels and Custom Fields](#)
- [Enhanced Saved Search Forms and Search Results List Views](#)
- [Enhanced Dashboards and Portlets](#)

Enhanced Sales Center Roles and Permissions

The following custom roles are available in the Enhanced Sales Center:

- Sales Admin - Enhanced Sales Center
- Sales Mgr - Enhanced Sales Center
- Sales Rep - Enhanced Sales Center
- Publisher - Enhanced Sales Center

Each custom role includes a set of associated permissions. These permissions determine the data sales users can see and the tasks they can perform in the Enhanced Sales Center. If you are a NetSuite Administrator, you can assign these roles to users, as needed. For more information, see the help topic [Assigning Roles to an Employee](#). The roles in the Enhanced Sales Center are locked, but you can customize them, which creates copies that you can edit. For more information, see the help topic [Customizing or Creating NetSuite Roles](#). You can also compare permissions of the standard NetSuite Sales Center and the Enhanced Sales Center roles before you assign the latter to users. For information on comparing roles and permissions, see the help topic [Showing Role Permission Differences](#).

Enhanced Tabs, Categories, and Links

When you access the Enhanced Sales Center roles for the first time, a default set of tabs display. The Enhanced Sales Center includes the standard tabs found in the standard Sales Center. It also includes tabs for the Calendar, Leads & Prospects, Contacts, and Items. The More tab contains the least used links. The default Enhanced Sales Center tabs may vary depending on the role in use.

The Leads & Prospects, Opportunities, Customers, Contacts, Forecasts, and Items tabs include three basic categories: Overview, Reports, and Tools. The links under each category include only information that is most useful to a particular sales role.

You can disable list menus on tabs and categories. For information, see [Setting Up Appearance Preferences](#).

Enhanced Sales Forms

Note: If you are a NetSuite Administrator, ensure that you upgrade your account with the latest form layout enhancements. When you update your account you take advantage of the Enhanced Sales Center field groups, subtabs, and sublists. For more information about the latest form layout enhancements, see Version 2010 Release 2 User Interface Overview. For information about deploying the form layout enhancements, see the help topic [Deploying Upgraded Forms](#).

The default leads, prospects, opportunities, customers, and partners forms display all information in two columns.

The subtabs on sales forms show sections instead of tabs to limit the number of clicks required to get to a specific field or information.

Note: You should set the **Expand Tabs on Entry Forms** preference to Yes to activate this enhancement. For more information, see [Setting Up Appearance Preferences](#).

The forms in the Enhanced Sales Center are locked, but you can customize them, which creates copies that you can edit. You can place your custom fields anywhere in the custom form. You can also customize

the roles provided by the SuiteApp to control access to your customized form. For more information, see the help topic [Custom Forms](#).

Enhanced Field Labels and Custom Fields

Fields on records are renamed to more closely follow typical industry terminology. The following custom fields, which are commonly used in other popular CRM applications, are also included:

- Annual Revenue
- Campaign Category
- Created Date
- Industry
- Last Modified Date
- No. of Employees

The following tables list the fields on the Enhanced Sales Center and their counterpart fields on the standard Sales Center. It also provides the equivalent fields used in other popular CRM applications.

Field Labels on Customer and Prospect Records

Enhanced Saved Search Forms and Search Results List Views

The Enhanced Sales Center includes saved searches. You can use them as the default search forms and results list view when you search for the following record types:

- Activity
- Contact
- Customer
- Document
- Event
- Group
- Item
- Opportunity
- Phone Call
- Task
- Transaction

The standard Sales Center, by default, uses a search form with system-defined set of fields that you can use as search filters.

Opportunity Search List Search

☐ Use Advanced Search

Prospect/Customer any of - None - 1 ACME Industries 11 ACME Industries : Whiz Inc. 2 ACME Corporation Title any Projected Amount any Value Range - High any Value Range - Low any Value Range - High (Foreign Currency) any Value Range - Low (Foreign Currency) any Value Period Tax Period Date within All From To	Item any of - None - - Airborne - Billable Expense Markup - Billable Group Number any Value Document Status any of - In Progress - Issued Estimate - Closed - Won - Closed - Lost Line Item any of - None - - Airborne - Billable Expense Markup - Billable Group Line Amount any Value Expected Close Date within All From To Probability any Value
---	---

The Enhanced Sales Center saved search forms include only search filters that are commonly used by sales persons when they search for sales records.

Global and quick search results for the above records will use the saved search list view that is included in the SuiteApp.

For more information on setting the default search forms and results list view, see the help topic [Setting Search Defaults for a Role](#).

For general information about views, see the help topic [Working with List Views, Sublist Views, and Dashboard Views](#).

Enhanced Dashboards and Portlets

The links portlets are streamlined to include only links that sales users are most likely to access.

The following new saved searches are set as the default dashboard views on their corresponding center tabs:

- My Tasks
- My Phone Calls
- My Leads
- My Prospects
- My Opportunities
- My Customers
- My Contacts,

For general information about views, see the help topic [Working with List Views, Sublist Views, and Dashboard Views](#).

The Setup tab contains a links portlet with links for Sales & Marketing Automation, Customization, User/Roles, Import/Export in place of the standard NetSuite Setup Manager.

The More tab contains a links portlet with links to least used sales information.

Customizing the Enhanced Sales Center

If you are new to NetSuite, you should familiarize yourself with the following concepts before you customize the Enhanced Sales Center:

- [Assigning Roles to an Employee](#)
- [Dashboard Personalization](#)
- [Publishing Dashboards](#)

 **Note:** Ensure that you assign Enhanced Sales Center roles to administrator users before you perform the following configuration tasks.

Setting Up Appearance Preferences

You should set up the following appearance preferences for each Enhanced Sales Center role to take advantage of the user interface enhancements.

To set up appearance preferences:

1. Go to Home > Set Preferences.
2. Click the Appearance tab and select the following values for the following fields:

Preference	Setting
Color Theme	Custom: New Sales Color Theme
Screen Font	Arial
Limit Entry Forms to Two Columns	Yes
Expand Tabs on Entry Forms	Yes

3. Click **Save**.

Duplicating Custom Center Tabs

If you added custom center tabs to your sales center, you can make copies of these tabs to add to the Enhanced Sales Center. For more information, see the help topic [Creating Center Tabs](#).

To duplicate a center tab:

1. Go to Customization > Centers and Tabs > Center Tabs.
2. Click **Edit** next to the name of the custom tab that you want to duplicate. The Custom Center tab form is displayed.
3. In the **Center** field, change the selection from **Classic Center** to **Enhanced Sales Center**.
4. Under the **Save** button, click **Save a Copy**.

Recreating Custom Categories

If you created custom categories in the standard Sales Center that you want to use in the Enhanced Sales Center, you must recreate them. You cannot edit the custom categories that you added to tabs

on the standard Sales Center. To create custom categories in the Enhanced Sales Center, go to Setup > Customization > Center Categories > New. Enter the values to the Custom Center Category fields. For information on how to create Custom Categories, see the help topic [Creating Center Categories](#).

Adding Custom Center Links

Center links take users to other pages within NetSuite, custom records, Suitelets, or external websites. You can add previously used links in the standard Sales Center categories to the Enhanced Sales Center categories.

To add center links:

1. Log in to NetSuite using the Enhanced Sales Center - Publisher role.
2. Click the tab you want to add the link to.
3. On the upper-right corner, below the tabs, click **Edit Custom Tab**.
4. Click **Save**.
5. If you are prompted to submit an unchanged record, click **OK**.
6. Click **Edit** next to the center category you want to add the link to.
7. Add the links that you previously used in the standard Sales Center.
8. Click **Save**.

For more information, see the help topic [Creating Center Links](#).
