File Cabinet for Administrators

2025.2

January 7, 2026

Copyright © 2005, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. File Cabinet for Administrators

Only users with the Administrator role and users with the Documents and Files permission can use the File Cabinet. For more information, see the help topic [Setting Permissions](#).

This section includes information about the tasks that are common to users with the Administrator role. For information about tasks that are common to all users, regardless of their roles, see the help topic [File Cabinet Overview](#).

For information about how to make your files accessible on any URL listed on the file, see [Making Web Site Hosting Files Always Available](#).

For information about the Hide Attachment Folders preference, see [Hiding Attachment Folders](#).

For information about how to predefine dedicated folders where employee-specific expense report attachments are automatically saved, see [Enabling the Use of Employee-Specific Expense Folders](#).

For information about how to upload a logo, see [Uploading and Setting Your Logo](#).

For information about using the Expense Report Attachments Migration Tool that allows you to migrate existing expense attachments to the File Cabinet dedicated employee expense folders, see [Expense Report Attachments Migration Tool](#).

System Folders in the File Cabinet

To support your activity in the system, NetSuite creates folders in the File Cabinet and automatically adds relevant files to these folders. Some system folders include, but aren't limited to:

- Attachments Sent
- Attachments Received
- SuiteBundles
- SuiteApps
- User Documents

Only users with the Administrator role can see this folder.
- Web Site Hosting Files

Note: Some system folders don't allow creating new folders, making folders private or inactive, or restricting access to the contents in the folder.

Note: To prevent performance issues, you shouldn't permanently store large numbers of work files in SuiteBundles, SuiteScript, and other system folders. Instead, you should create dedicated folders for such files in the File Cabinet. For more information, see the help topic [Creating File Cabinet Folders](#).

Users with the Administrator role can restrict access to attachment folders. For more information, see [Hiding Attachment Folders](#).

For information about the Web Site Hosting Files and the SuiteBundles folders, see [Making Web Site Hosting Files Always Available](#).

Making Web Site Hosting Files Always Available

You can use the **Available Without Login** box on file records to restrict external access to individual files. However, files you want to publish on a company intranet or an e-commerce website must have the **Available Without Login** box checked to be displayed correctly on your website.

Web Site Hosting Files Always Available and SuiteBundle Files Always Available are general company preferences in NetSuite. Both preferences are checked by default. They affect how files in the Web Site Hosting Files folder and files in the SuiteBundles folder are made available online. These global settings override the **Available Without Login** and the **Company-Wide Usage** boxes on individual file records. To clear the general preferences, go to Setup > Company > General Preferences.

Files added to the Web Site Hosting Files folders using Add File or Advanced Add are automatically available without login. On Advanced Add, the **Make All Files Available Without Login** box is checked by default. When you add a file using Add File, the **Available Without Login** setting is applied automatically for these folders.

The **Available Without Login** setting makes website assets accessible on your shopping domain. In this way, visitors to your website can view images and website content using their web browsers. The Available Without Login setting appears as a box on all file records in the File Cabinet.

By default, files uploaded using SuiteScript are available only with login, regardless of which folders the files are saved in. To make files uploaded using SuiteScript available without login, you must set the parameter on the upload script or check the **Available Without Login** box.

Files uploaded using Web Services files use the same available without login rules as files uploaded using SuiteScript. For more information, see SuiteScript [File Object Members](#) and SOAP Web Services [File Record Field Definitions](#).

Note: The **Company-Wide Usage** box on individual file records doesn't affect whether the file is accessible on your website or not. File availability on the website is controlled only by the Web Site Hosting Files Always Available preference and the Available Without Login setting.

SuiteScript (.ss files) and SuiteScript Server Pages (.ssp files) stored in the Web Site Hosting Files Folder are executable. Audience settings on the Permission subtab on each file override both general preferences and individual file settings. Depending on the settings on the Permissions subtab, these files return either the expected script response value or a Permission Violation.

Setting the General Preferences

When the **Web Site Hosting Files Always Available box is checked**, your settings for the **Available Without Login** box are ignored on individual file records. Files stored in the Web Site Hosting Files folder are accessible for all URLs listed on the file record. Anyone can access these files on a NetSuite shopping domain or a custom domain that you set up in NetSuite. You can download both server-side and client-side JavaScript files.

When the **SuiteBundle Files Always Available box is checked**, your settings for the Available Without Login boxes on individual files are ignored. Files stored in the SuiteBundles folder are accessible for any URL listed in the file.

Clearing the General Preferences

When the **Web Site Hosting Files Always Available box is cleared**, your settings for the **Available Without Login** box are recognized and applied on individual files. You can clear the Available Without Login box on individual files stored in the Web Site Hosting Files to make them unavailable on a shopping domain. Files with the Available Without Login box cleared, return 404 Not Found errors when accessed using a shopping domain.

When the **SuiteBundle Files Always Available** box is cleared, your settings for the Available Without Login boxes are recognized and applied on individual files.

 **Warning:** If you clear the Available Without Login box on published image files, they won't display, and your website might appear broken.

Additional information:

- [File Cabinet Overview](#)
- [Setting General Account Preferences](#)
- [Setting Available Without Login](#)
- [Make Images Available Without Login](#)

Hiding Attachment Folders

Users with the Administrator role can set the Hide Attachment Folders preference at Setup > Company > General Preferences to prevent access to the following folders:

- Attachments Received
- Attachments Sent
- Mail Merge

When you set this preference, employees and partners still have access to files attached to customer and other record types, even if those files are in one of the folders listed above. However, they can't view or search for those files in the File Cabinet.

To make sure only users with the right permissions can access confidential records and files in the File Cabinet, the attachments folder is hidden by default. The Hide Attachments Folder box on the General Preferences page defaults to checked for all new customers.

 **Note:** The Hide Attachment Folders preference overrides any restrictions on subfolders in the Attachments Received or Attachments Sent folders.

Enabling the Use of Employee-Specific Expense Folders

You can configure NetSuite to predefine dedicated folders where employee-specific expense report attachments are automatically saved. If you have the Administrator role, you can see the contents of these folders, but employees can't locate or access these attachments from the File Cabinet. Instead, employees have to get their expense attachments from the expense report record.

 [Enabling Employee Specific Expense Folders](#)

To enable the use of employee-specific expense folders:

1. Go to Setup > Company > Enable Features.
2. Click the **Company** subtab.
3. Under **Data Management**, check the **Enhanced File Security – Use Employee Specific Folders** box.
4. Click **Save**.

Use the Expense Report Attachments Migration Tool to move any existing expense attachments to the dedicated employee expense folders in the File Cabinet. The migration tool searches all expense reports

for files that should be moved to the predefined user folders. For more information, see [Expense Report Attachments Migration Tool](#).

Expense Report Attachments Migration Tool

If you have administrative permissions, you can use the Expense Report Attachments Migration Tool to move existing expense attachments to the dedicated employee expense folders in the File Cabinet. The migration tool automatically searches all expense reports for files that need to be moved to the predefined user folders. You can automatically schedule the migration, or you can use the migration tool to schedule the migration later.

Note: Before completing this migration, you should test the expense changes with your customizations in a sandbox account.

Enabling Employee Specific Expense Folders

For more information, see the following:

- [Enabling and Configuring the Expense Report Attachments Migration Tool](#)
- [Managing the Expense Report Attachments Tool](#)
- [Expense Report Attachments Migration Tool Subtabs](#)
- [Scheduling an Expense Report Attachments Tool Migration](#)
- [Canceling an Expense Report Attachments Tool Migration](#)

Enabling and Configuring the Expense Report Attachments Migration Tool

Use the Expense Reports Attachments - Migration Tool link on the Enable Features page to open the migration tool. You can use the migration tool to schedule or cancel a migration and view migration details. Before you can use this feature, you must enable it.

To enable the migration tool feature:

1. Go to Setup > Setup Tasks > Company > Enable Features.
2. Click the **Company** subtab.
3. Under **Data Management**, check the **Enhanced File Security** box.

4. On the message that appears, select an option:
 - To automatically schedule the migration, click **OK**. NetSuite schedules the migration for the next available time slot, and you can check the migration status on the Migration Details subtab of the Expense Report Attachments - Migration Tool.

- To schedule the migration manually later using the migration tool, click **Cancel**.

5. Click **Save**.

You can now access the Expense Report Attachments Migration Tool using the Expense Report Attachments – Migration Tool link. If you try to open this page before saving the setting on the Enable Features page, you'll get a message instructing you to enable the feature.

Note: If you disable the Enhanced Security feature, any scheduled migrations will be cancelled.

Note: You can enable and disable this feature as needed without affecting the existing file structure. Enabling and disabling the feature affects only how new expense attachments are created.

Managing the Expense Report Attachments Tool

Open the Expense Report Attachments Migration Tool using the Expense Report Attachments – Migration Tool link on the Enable Features page. The Expense Report Attachments Migration tool opens in a new window and lists any files ready for migration. For more information, see [Enabling and Configuring the Expense Report Attachments Migration Tool](#).

Use the migration tool to move existing employee expense files to their dedicated folders. You should only have to run this migration one time. However, you might need to run the migration tool multiple times if there are too many files to move or if you encounter any issues. For more information, see [Scheduling an Expense Report Attachments Tool Migration](#). After the migration is completed, employee expense files are automatically saved to the appropriate employee expense folders.

Use the migration tool to:

- View a list of files ready for migration
- Open and view attached files
- View applicable related expense reports
- Schedule a migration or cancel a scheduled migration
- View migration details, such as the progress or status of a migration job and history of previous migrations

For more information about using the migration tool, refer to the following topics:

- [Expense Report Attachments Migration Tool Subtabs](#)
- [Scheduling an Expense Report Attachments Tool Migration](#)
- [Canceling an Expense Report Attachments Tool Migration](#)

Expense Report Attachments Migration Tool Subtabs

For information about the subtabs available on the Expense Report Attachments Migration Tool, see the following sections:

- [Expense Attachments Subtab](#)
- [Migration Details Subtab](#)

Expense Attachments Subtab

When there are files available for migration, the Expense Attachments subtab displays a list of files ready for migration. You can review this list prior to migration, open files to view them, and view any

associated expense reports. This page also shows the name of the folder where the file is stored and the last date and time the file was modified. You can't add or remove files, and files remain in the list until they're successfully migrated. If there aren't any files to migrate, this page shows a **No records to show** message.

When files appear in this list, you can schedule them for migration. For more information, see [Scheduling an Expense Report Attachments Tool Migration](#).

If you need to, you can cancel a scheduled migration. For more information, see [Canceling an Expense Report Attachments Tool Migration](#).

Migration Details Subtab

The Migration Details subtab shows migration details, such as the progress or status of a migration job, history of previous migrations, and migrations in the queue for processing. These details include the migration status, date and time a migration is scheduled to run, and the completed date and time for finished migrations. The status can be queued, in-progress, finished, or failed.

The following screenshot shows an example of the Migration Details subtab with queued and finished migration jobs:

Expense Attachment Migration			
Schedule Migration		Cancel Migration	
Expense Attachments		Migration Details	
Status	ID ^	Scheduled	Completed
Finished	3		8.3.2022 2:00 am
Cancelled		4.3.2022 5:00 am	
Cancelled		4.3.2022 5:00 am	
Queued		31.7.2024 5:00 am	
Schedule Migration		Cancel Migration	

For processed migrations, the link in the ID column opens the Expense Attachment Migration page, which includes Phases and Log subtabs.

The Phases subtab shows each migration phase, its status, start and end dates, and percent complete.

Phases Log					
Order ^	Phase	Status	Start Date	Percent Complete	End Date
1	Expense attachment migration	Finished	8.3.2022 2:00 am	100.0%	8.3.2022 2:00 am
2	Check future expense attachment migration	Finished	8.3.2022 2:00 am	100.0%	8.3.2022 2:00 am

The Log subtab provides more details about the migration such as when each phase started and finished, how many files were migrated, and how long it took.

Phases Log		
Date ^	Phase	Message
8.3.2022 2:00 am		Migration of attachments finished.
8.3.2022 2:00 am	Check future expense attachment migration	Phase finished.
8.3.2022 2:00 am	Check future expense attachment migration	Phase started.
8.3.2022 2:00 am	Expense attachment migration	Phase finished.
8.3.2022 2:00 am	Expense attachment migration	Migration finished after migrating 0 attachments in 0 seconds.
8.3.2022 2:00 am	Expense attachment migration	Phase started.
8.3.2022 2:00 am		Migration of attachments started.

Scheduling an Expense Report Attachments Tool Migration

Important: After migration, you can't revert to the file structure before migration. You can't remove new attachments from the User Documents structure. Only users with the Administrator role can restore the original file structure manually. Additionally, files in the User Document structure keep the new access rights behavior, even if the Enhanced File Security feature is disabled.

To schedule an expense attachment migration, open the Expense Report Attachments Migration Tool. For more information, see [Enabling and Configuring the Expense Report Attachments Migration Tool](#).

When the migration tool lists expense attachment files available for migration, you can schedule an expense report attachments migration. Migrations are scheduled to run during your maintenance window. The time of the maintenance window can vary, with Pacific Time being the default. In the Expense Report Attachments Migration Tool, click **Schedule Migration**. You'll see a confirmation message letting you know the migration was scheduled, and the button will become inactive.

The scheduled migration appears as Queued on the Migration Details subtab. If you schedule a migration when there aren't any files available to move, the Migration Details subtab still shows the Queued status, but no files will be migrated.

For large jobs, the migration automatically splits into one-hour runs. When one run ends, the tool schedules another run for the next day. These runs keep going until all expense attachments are migrated. If the migration tool encounters any unexpected issues, it reschedules the migration for the next day. After a migration is finished running, an email notification is sent to the account administrator to confirm if the migration was successful or if it failed. The Migration Details subtab shows the migration as processed, and the migrated files no longer appear in the Expense Attachments subtab.

Canceling an Expense Report Attachments Tool Migration

If necessary, you can cancel a scheduled migration. You can't cancel a migration that's already in progress.

To cancel an expense report attachments migration, open the Expense Report Attachments Migration Tool. For more information, see [Enabling and Configuring the Expense Report Attachments Migration Tool](#). In the Expense Report Attachments Migration Tool, click **Cancel Migration**. This button is only active if there's a scheduled migration.

Any scheduled migrations are canceled. A confirmation message appears on the page to notify you that the expense attachment migration was successfully canceled. The Migration Details subtab shows the migration as canceled.

Note: If you disable the Enhanced Security feature on the Enable Features page, any scheduled migrations will be canceled.

Uploading and Setting Your Logo

When you upload your logo to the File Cabinet, you can print it on all forms except checks. You can also show your logo in your Customer, Partner, or Vendor Center, and on your website.

Logo files must be in GIF or JPG format, and the file size should be less than 10 KB. To print your logo on standard forms, the logo must be no more than 200 pixels wide and 60 pixels high. Image resolution may change how your logo appears on a standard form. If your logo doesn't display correctly, change the image resolution.

First, upload your logo to the File Cabinet. For information, see [Uploading Your Logo to the File Cabinet](#).

After you've uploaded your logo, choose your next step based on the result you want to get.

- [Setting Your Logo to Appear on Forms and Centers Associated with your NetSuite Account](#)
- [Setting the Logo for your Site Builder Website](#)
- [Setting the Logo to Display on NetSuite Pages](#)

You can choose a logo that displays for each subsidiary when viewing pages or printing transactions. For more information, see the help topic [Logos in OneWorld](#).

Uploading Your Logo to the File Cabinet

To complete this task, you need the Administrator role or a role with access to the Company Information page in NetSuite.

To upload your logo:

1. Go to Documents > Files > Images.

Note: You can upload your logo to a different File Cabinet folder, but you shouldn't use the Attachments Received or Attachments Sent folders.

2. Click **Add File**.
3. Select your logo image.
4. Click **Open**.

Next, set your logo to appear on forms, in centers, and in your website. For more information, see the following help topics:

- [Setting Your Logo to Appear on Forms and Centers Associated with your NetSuite Account](#)
- [Setting the Logo for your Site Builder Website](#)
- [Setting the Logo to Display on NetSuite Pages](#)

Setting the Logo for your Site Builder Website

After you've uploaded your logo to the File Cabinet, you can set the logo for your Site Builder website.

To set the logo for your Site Builder website:

1. Go to Commerce > Websites > Website List.
2. Click **Edit** next to the website you want to modify.
3. Click the **Appearances** subtab.
4. Select your image under **Website Logo**.
5. Set alignment in the **Web Site Logo Alignment** field. Your logo shows up at the top of your site, and you can align it left, right, or center.
6. Click **Save**.

After you click Save on the Web Site Setup page, click Commerce > Websites > Preview Website to see the results.

Setting Your Logo to Appear on Forms and Centers Associated with your NetSuite Account

After you've uploaded your logo to the File Cabinet, you can set your logo to appear on forms and centers associated with your NetSuite account.

To set your logo to appear on forms and on centers associated with your NetSuite account:

1. Go to Setup > Company > General Preferences.
2. Select the folder where you uploaded your company logo in the **Company Logo Folder** field.
3. Click **Save**.
4. Go to Setup > Company > Company Information.
5. Select your logo in the **Company Logo (Forms)** field. The logo you select here displays on transaction forms.
6. Select your logo in the **Company Logo (Pages)** field. The logo you select here displays on Customer, Partner, and Vendor Centers associated with your NetSuite account.

Important: Ensure the **Available Without Login** box is checked on the logo image file record. If you uploaded your logo image file to a folder other than the default Images folder in the File Cabinet, this box **isn't** automatically checked. To check the box, edit the logo image file record.

7. Click **Save**.

Setting the Logo to Display on NetSuite Pages

After you've uploaded your logo to the File Cabinet, you can set your company logo to display internally on all pages of your NetSuite account next to the Oracle | NetSuite logo. For more information, see the help topic [Configuring Company Information](#).
