This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Invoice Presentation Template

The Invoice Presentation Template (IPT) SuiteApp provides project-based businesses the flexibility to present data in multiple formats using invoice presentation templates. The SuiteApp also lets you add different levels of details about charges on invoices.

Features

The IPT SuiteApp lets you:

- Select default invoice print, email, and presentation templates for a subsidiary. To learn more, see [Setting Up the Invoice Presentation Template Preference](#).
- Create, copy, edit, delete, and view an invoice presentation template. To learn more, see [Working with the Invoice Presentation Template SuiteApp](#).
- Configure charge tables to display charges incurred on a project. To learn more, see [Configuring a Charge Table](#).
- Assign an invoice presentation template to a subsidiary, customer, project, or invoice. To learn more, see [Assigning Invoice Presentation Templates](#).
- Include expense receipts on an invoice. To learn more, see [Including Expense Receipts](#).
- Preview the invoice presentation template on customer, project, and invoice records. To learn more, see [Previewing Invoice Presentation Templates](#).
- Print and email invoices with charge details. To learn more, see [Printing and Emailing Invoices with Charge Details](#).

To understand how the Invoice Presentation Template SuiteApp works, read the following topics:

- [Installing the Invoice Presentation Template SuiteApp](#)
- [Setting Up the Invoice Presentation Template Preference](#)
- [Working with the Invoice Presentation Template SuiteApp](#)

Installing the Invoice Presentation Template SuiteApp

You can install the Invoice Presentation Template (IPT) SuiteApp from the SuiteApp Marketplace.

To install the SuiteApp:

1. Go to the **SuiteApps** tab.
2. In the **Search Apps** field, enter **Invoice Presentation Template SuiteApp**.
3. Click the Invoice Presentation Template SuiteApp tile.
4. In the top right of the Invoice Presentation Template SuiteApp details page, click **Install**.

The IPT SuiteApp is managed, so it updates automatically when there are new features or improvements.

The SuiteApp provides Invoice Presentation Print and Invoice Presentation Email templates, enabling you to display invoice presentation features on invoices. Refer to the steps in the [Prerequisites](#) section to select these templates in your preferred invoice transaction form.

Prerequisites

If you have the Administrator role, you can do the following:

- [Customizing Invoice Forms](#)
- [Update Billing Information](#)
- [Enabling Features](#)

Customizing Invoice Forms

To use invoice presentation template features on your invoices, you must customize your preferred invoice form.

To customize your preferred invoice form:

1. Go to Customization > Forms > Transaction Form.
2. Click **Customize** next to your preferred invoice form.
3. Set the following fields:
 - a. In the **Printing Type** field, choose **Advanced**.
 - b. In the **Print Template** field, select **Invoice Presentation Print Template**.
 - c. In the **Email Template** field, select **Invoice Presentation Email Template**.

Warning: Don't edit the contents of the Invoice Presentation Print and Email templates. Changing them could affect how the IPT SuiteApp works.

4. Click **Save**.

Update Billing Information

To use invoice presentation template features on your invoices, you must enable the following in the billing information.

To update the biling information:

1. Go to Set Up > Company > NetSuite Account Information > View Billing Information.
2. Click the **Add-On Modules** subtab.
3. Enable the following:
 - Charge Based Billing
 - Project Accounting and Management

Enabling Features

To use invoice presentation template features on your invoices, you must enable the following features.

To enable the required features:

1. Go to Set up > Company > Enable Features.

2. Click the **Company** subtab and check the following boxes:
 - Projects
 - Project Management
 - Multiple Units of Measure
3. Click the **Accounting** subtab and check the following boxes:
 - Accounting
 - A/R
 - Accounting Periods
4. Click the **Transactions** subtab and check the following boxes:
 - Charge Based Billing
 - Billing Operations
5. Click the **Employees** subtab and check the following boxes:
 - Expense Reports
 - Per-Employee Billing Rates
 - Purchase Requests
 - Time Tracking
6. Click the **CRM** subtab and check the following boxes:
 - Customer Relationship Management
 - Mail Merge
7. Click the **SuiteCloud** subtab and check the following boxes:
 - Custom Records
 - Advanced PDF/HTML Templates
 - Client SuiteScript
 - Server SuiteScript
 - SuiteCloud Development Framework
8. On a project record, set the **Billing Type** to **Charge-Based**.

Roles and Permissions

The Administrator and Accountant roles have the required permissions to work with the SuiteApp. However, there are a few restrictions for the Accountant role:

- Set IPT preferences only for subsidiaries the Accountant role can access.
- When creating an IPT, can select only the subsidiaries that the Accountant role has access to.
- When editing an IPT, can edit IPTs that are not assigned to any subsidiary and the IPTs assigned to subsidiaries that the Accountant role has access to.

Role	Subtab	Permissions	Access Level
Administrator	Custom Records	ALF Configuration	Full
Accountant		IPT Preference	
		Invoice Presentation Template	

If you want to grant permissions to other roles that are required to work with the SuiteApp, complete the following steps.

To grant permission to a custom role:

1. Go to Setup > Users/Roles > Manage Roles.
2. Choose a role.
 - Click **Edit** to add permissions to a custom role.
 - Click **Customize** to create a custom role from a standard role.
3. Locate the **Permissions** subtab.
4. Click the **Setup** subtab.
5. Select **Subsidiary Settings Manager** from the list.
6. Set the access level to **Full**.
7. Click **Add**.
8. Click the **Custom Record** subtab.
9. Select the following from the list:
 - IPT Preference
 - Invoice Presentation Template
 - ALF Configuration

Note: If you have Advanced Localization Feature (ALF) SuiteApp installed in your account, select **ALF Configuration** from the **Record** list.

10. Set the access level to **Full**.
11. Click **Add**.
12. Click **Save**.

If you want to create links for custom records (IPT Preference and Invoice Presentation Template) for other centers, complete the following steps.

To add custom records links for other center:

1. Go to Customization > Scripting > Single Page Applications. The system displays a list of all of the SPAs in your account.
2. On the list, click the **SPA Name** to open the management page for that SPA.
3. From the **Basic Info** tab, copy the **SPA URL**.
4. Go to Customization > Centers and Tabs > Center Links New.
5. In the **Label** column, enter a name for the custom link.
6. In the **URL** column, enter the URL for the link.
7. In the **Script ID** field, enter a unique alphanumeric ID for the custom center link.
8. Click **Add**.
9. Click **Save**.
10. Go to Customization > Centers and Tabs > Center Categories > New.
11. Create a center category. For information about steps, see the help topic [Creating Center Categories](#).
12. Repeat Step 1 – Step 10 to add each custom record link for other centers.

Supported Languages in Invoice Presentation Template SuiteApp

You can view the Invoice Presentation Template (IPT) SuiteApp pages in the following languages:

- Chinese (Simplified)
- Chinese (Traditional)
- Czech
- Danish
- Dutch
- English (AU)
- English (CA)
- English (International)
- English (UK)
- English (U.S.)
- Finnish
- French
- French (Canada)
- German
- Indonesian
- Italian
- Japanese
- Korean
- Norwegian
- Portuguese (Brazilian)
- Russian
- Spanish
- Spanish (Latin America)
- Swedish
- Thai
- Turkish
- Vietnamese

For information about displaying Invoice Presentation Template SuiteApp in your preferred language, see the help topic [Setting Language Preferences](#).

Setting Up the Invoice Presentation Template Preference

In the IPT Preference page, set your default templates for the root subsidiary and its associated subsidiaries.

The selection of default templates for a root subsidiary is required for the following reasons:

- To print, preview, and email invoices with charge details.
- If there are no templates selected for a subsidiary, the default templates selected for the root subsidiary is used as default.

If you have marked the root subsidiary inactive before setting the default templates, a warning message appears. However, if the root subsidiary is inactivated after setting the default templates, the SuiteApp continues to use the default templates for print, preview, and email.

You can select any of the standard PDF/HTML, advanced PDF/HTML and Advanced Localization Feature (ALF) templates as the default templates.

Note that Administrators can set the default templates for any subsidiary. However, a role with the required permissions can set preferences only for subsidiaries that the role has access to.

You can also select a default IPT for each subsidiary on the IPT Preference page.

To set up the default templates for a subsidiary:

1. Go to Transactions > Sales > IPT Preference (Administrator).
2. From the **Subsidiary** list, select a subsidiary.
3. Set the following fields:
 - a. **Default Invoice Print and Preview Template** - The field lists the default templates available for print and preview.
 - b. **Default Invoice Email Template** - The field lists the default templates available for email.
 - c. (Optional) **Default Invoice Presentation Template** - The field lists the invoice presentation templates corresponding to a subsidiary and the IPTs that are not assigned to any subsidiary templates.
4. Click **Save**.

Working with the Invoice Presentation Template SuiteApp

To work with the invoice presentation template (IPT) SuiteApp, you can perform the following tasks:

- [Creating Invoice Presentation Templates](#)
- [Including Expense Receipts](#)
- [Viewing and Editing Invoice Presentation Templates](#)
- [Copying Invoice Presentation Templates](#)
- [Previewing Invoice Presentation Templates](#)
- [Assigning Invoice Presentation Templates](#)
- [Deleting Invoice Presentation Templates](#)
- [Printing and Emailing Invoices with Charge Details](#)

Watch the following help video for information about creating invoice presentation templates and adding the templates to invoices.

 [Invoice Presentation Template](#)

Note: Creating, editing, copying, and deleting of invoice presentation templates require Administrator access or the required permissions to work with the SuiteApp. For information about permissions, see [Roles and Permissions](#).

Creating Invoice Presentation Templates

The New Invoice Presentation Template page enables you to create invoice presentation templates to customize the display of project-related charges.

To create an invoice presentation template:

1. Go to Transactions > Sales > Invoice Presentation Templates > New (Administrator).
2. Enter a unique template **Name**.
3. Enter template **Description**.
4. (Optional) In the **Subsidiary** field, select subsidiaries to assign the template.
5. Check the **Include Receipts** box to add expense receipts files to an invoice. For more details, see [Including Expense Receipts](#).
6. Click the **View Options** subtab.
7. Select a charge type and configure details as necessary. For more information see, [Configuring a Charge Table](#).
8. To preview, click the **Preview** subtab.
9. Click **Save**.

Note: The **Default** checkbox remains unavailable by default. The system checks the **Default** box when an IPT is set as default for a subsidiary.

You must select at least one charge type in the table to save and preview the template.

Configuring a Charge Table

You can configure details for the following charge types in the table:

- Expense-Based
- Fixed Date
- Milestone
- Project Progress
- Purchase
- Time-Based

When you select a charge type, the default values corresponding to your selection populate in the other columns of the table. However, you can change the default values as necessary. The values act as the column headings of the table.

You can configure multiple charge tables in a template. Before you configure a charge table, consider the following points:

- The **Primary Grouping** column in the table enables you to sort charges based on the selected value. The selected value populates in Column 1 by default and cannot be changed.

- The **Secondary Grouping** column in the table enables you to display the subtotal for each group based on the selected value. The selected value populates in Column 2 by default and cannot be changed.
- In column 3 - Column 6, you can keep the default value or change as necessary.
- The **Amount** column 7 is fixed for all charge types.
- Select a value other than **None** in one of the columns of the table to preview an invoice.

After configuring the charge table, you can preview the template before saving the record. The preview mode only displays sample data of charges.

The following table illustrates the charge types and their corresponding values in the columns of the charge table.

Charge/Summary Type	Primary/Secondary Grouping	Column 1 – Column 6	Column 7
Expense-Based	Date Employee Expense Category Task None	Date Description Employee Expense Category Item Memo Quantity Rate Task None	Amount
Fixed Date	Date None	Date Description Item Quantity Rate None	Amount
Milestone	Date None	Date Description Item Quantity Rate None	Amount
Project Progress	Date None	Date Description Percentage Complete Rate None	Amount

Charge/Summary Type	Primary/Secondary Grouping	Column 1 – Column 6	Column 7
Purchase	Date Item Task Vendor None	Date Item Quantity Rate Task Units Vendor None	Amount
Time-Based	Date Employee Item Task None	Billing Class Date Employee Item Memo Quantity Rate Task Units None	Amount

Including Expense Receipts

The IPT SuiteApp enables you to print or email expense receipts along with an invoice. To include receipts to an invoice, check the **Include Receipts** box in an invoice presentation template.

Ensure the following when you include receipts:

- Expenses are attached to expense reports.
- The IPT **Include Receipts** box is checked.
- Expense receipt files must be in PNG, JPEG, GIF, or TIFF format only.
- The total file size of all expense receipts must not exceed 10 MB.
- The charge or summary type selected on invoice presentation template is **Expense-Based**.
- Invoice should include expense based charges.
- The **Company-Wide Usage** box is checked for each receipt attached to an invoice to print or email.

Viewing and Editing Invoice Presentation Templates

The Invoice Presentation Template List page lists all the invoices presentation templates (IPTs). To view an IPT, you can click **View** next to the template.

To edit an invoice presentation template, perform the following.

To edit an invoice presentation template:

1. Go to Transactions > Sales > Invoice Presentation Templates (Administrator).
2. Click **Edit** next to the template that you want to edit.
3. Click **Save**.

If an invoice presentation template has dependent records, you cannot edit the **Subsidiary** field in the template.

 **Note:** If you have set an IPT as default for a subsidiary and then inactivated the subsidiary, you cannot edit **Subsidiary** field on the IPT. When you click **View Dependent Records**, the IPT preference page will not list the inactive subsidiary.

Copying Invoice Presentation Templates

You can make a copy from an existing invoice presentation template when you view or edit a template.

To make a copy of an invoice presentation template:

1. Go to Transactions > Sales > Invoice Presentation Templates (Administrator).
2. Click **Edit** next to the template that you want to copy.
3. Enter a unique name and other details as necessary.
4. Click **Make Copy**.
5. Click **Save**.

You can view the copied template on the Invoice Presentation Template list.

Assigning Invoice Presentation Templates

You can set a default invoice presentation template (IPT) for a subsidiary on the IPT Preference page. You can select a default template from the IPTs that are assigned to the subsidiary and IPTs that are not assigned to any subsidiary. For more information, see [Setting Up the Invoice Presentation Template Preference](#).

The SuiteApp provides you the flexibility to select your desired IPT for a customer, project, or invoice if you do not want to set a default IPT for a subsidiary.

For example, if you have set IPT1 as the default IPT for subsidiary A, the customers, projects, and invoices for subsidiary A will use IPT1 as default. However, this is only true if you have not changed the default IPT or changed the subsidiary on customer, project, or invoice records.

To understand the selection of default of IPT on customer, project, or invoice records work in detail, read the following sections:

Customer Record

The IPT set as default for a subsidiary is used as default for the customers associated with the subsidiary.

If no default IPT has been set for the subsidiary selected for the customer, no IPT is used as default. You can always select or change the IPT from the **Invoice Presentation Template** field.

To assign an invoice presentation template to a customer:

1. Go to the customer record.
2. Click the **Classification** subtab.
3. From the **Primary Subsidiary** field, select a subsidiary.
4. Click the **Financial** subtab.
5. From the Account Information section, select an IPT from the **Invoice Presentation Template** field.
6. Click **Preview**.
7. Click **Save**.

Project Record

The IPT set as default for a customer is used for the projects associated with the customer.

However, if no default IPT has been set for a customer or the subsidiaries in the customer and project are different, the IPT associated with the subsidiary selected on the project is used as default.

If no default IPT has been set for the subsidiary selected on the project, no IPT is used as default.

You can always select or change an IPT from the **Invoice Presentation Template** field.

To assign an invoice presentation template to a project:

1. Go to the project.
2. Click the **Classification** subtab.
3. Select the subsidiary on the **Primary Subsidiary** field.
4. Click the **Financial** subtab.
5. From the Billing Information section, select an IPT from the **Invoice Presentation Template** field.
6. Click **Preview**.
7. Click **Save**.

Invoice Record

The IPT set as default for a project is used as default for the invoices associated with the project.

However, if no default IPT has been set for a project or the subsidiaries in the project and invoice are different, the default IPT associated with the customer selected on the invoice is used as default.

If no default IPT has been set for the customer or the subsidiaries in the customer and invoice are different, the default IPT associated with the subsidiary selected on the invoice is used as default.

If no default IPT has been set for the subsidiary selected for the invoice, no IPT is used as default.

You can always select or change an IPT from the **Invoice Presentation Template** field.

To assign an invoice presentation template to an invoice:

1. Go to the invoice.
2. Click the **Billing** subtab.
3. In the Billing Address section, from the **Invoice Presentation Template** field, select an invoice presentation template.

4. Click **Preview**.
5. Click **Save**.

Generating an Invoice without an Invoice Presentation Template

To generate an invoice without an invoice presentation template (IPT), set the **Invoice Presentation Template** field to blank.

Previewing Invoice Presentation Templates

You can preview an Invoice Presentation Template when you create a new template, on customer, project, and invoice records. However, the data displayed on the template varies based on the record used to preview the template.

The following table illustrates the data displayed on different records:

Record	Template Data	Footer Information
New Invoice Presentation Template page	Static	Static
Customer record	Static	Derived from subsidiary
Project record	Static	Derived from subsidiary
Invoice record without charges	Static	Derived from subsidiary
Invoice record with charges	Real-time	Derived from subsidiary

Note the following points when you preview a template:

- For preview, the SuiteApp uses the default invoice template set for a subsidiary on the IPT Preference page. For more information, see [Setting Up the Invoice Presentation Template Preference](#).
- If a subsidiary does not have a default invoice template, the SuiteApp uses the default template used by the root subsidiary. If a default template is not set for both the subsidiary and the root subsidiary, a warning message appears.
- If the primary details (for example, address, telephone, and email) are unavailable for a subsidiary, the footer of the IPT will not contain the primary details during preview.
- To preview an invoice presentation template (IPT), you must select a value other than **None** in one of the columns on the charge table.
- If you have set the default templates for a subsidiary and then marked as inactive, the SuiteApp uses the templates for preview.

Deleting Invoice Presentation Templates

You can delete invoice presentation templates (IPTs) from the Invoice Presentation Template List page. However, the IPTs with dependent records cannot be deleted.

To delete an invoice presentation template:

1. Go to Transactions > Sales > Invoice Presentation Templates (Administrator).

2. Hover over the template that you want to delete.
3. On the new icon, click **Delete Record**.
4. Click **OK** to confirm deletion of the template.

Printing and Emailing Invoices with Charge Details

You can print or email invoices with charge details using an invoice presentation template (IPT). When you print or email an invoice with charges, the footer information about an IPT matches with the selected default templates for the subsidiary.

To successfully print or email invoices with charge details successfully, make sure the following tasks are performed:

- Complete the prerequisites of using the Invoice Presentation Template SuiteApp. For more information, see [Prerequisites](#).
- Select default invoice print and email templates for a subsidiary on the IPT Preference page. The SuiteApp continues to use the default templates even when the subsidiary is inactivated provided the set up is done before inactivation. For more information, see [Setting Up the Invoice Presentation Template Preference](#).

If already selected, ensure that the default templates are not missing or deleted.

- You must select an IPT at the subsidiary, customer, project, or invoice level.

If you have marked the root subsidiary inactive before setting the default templates, a warning message appears.

Invoice Presentation Template SuiteApp Limitations

Before using the Invoice Presentation Template SuiteApp, be aware of the following limitations:

- The **Invoice Presentation Template** field on an entity record can list upto 160 IPTs that are not assigned to any subsidiary.
- The total file size for all expense receipt files must be 10 MB.
- The expense receipt files must be of type: PNG, JPEG, GIF, or TIFF.
- The IPT Preference Center Link is not translatable.
