This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. NetSuite for Mobile Overview

NetSuite for Mobile enables you to keep track of time, expenses, and key business metrics all from your phone. The app works offline, so you can keep working without connection to internet (like on a plane) and upload to NetSuite later.

You can download the app for free from the Apple App Store or Google Play, and it's ready to use as soon as you log in. The NetSuite desktop application takes care the setup for you.

All standard roles, including Employee and Advanced Partner Center are supported and enabled by default.

 **Note:** NetSuite for Mobile doesn't support access to Customer Center, Vendor Center, or the standard Partner Center. See [Mobile Device Access Permission](#).

With NetSuite for Mobile you can:

- Manage expenses and attach copies of receipts. See [NetSuite for Mobile Expense Reporting](#).
- Log and manage billable time. See [NetSuite for Mobile Time Tracking](#).
- Manage your NetSuite calendar. See [NetSuite for Mobile Calendar](#).
- Monitor key business information with complete support for Home and Employee Center dashboard portlets. See [NetSuite for Mobile Dashboards](#).
- View, edit, and attach files to records. See [NetSuite for Mobile Record Management](#).
- Log inbound and outbound business calls from your device and assign them to companies and customers. See [Tracking Calls with Phone Call Logging in NetSuite for iOS](#).

 **Note:** You can only track calls with NetSuite for iOS.

Configuring NetSuite for Mobile

The following sections cover topics related to configuring NetSuite for Mobile. You can find the latest system requirements for both iOS and Android devices. You can also learn how to configure your app's settings to best fit your needs.

- [System Requirements](#)
- [Mobile Security](#)
- [Mobile Device Access Permission](#)
- [Setting Date and Number Formatting in NetSuite for Mobile](#)
- [Setting the Time Zone in NetSuite for iOS](#)
- [Setting the Language in NetSuite for Mobile](#)
- [Configuring Maximum Entries in Dropdown Lists in NetSuite for Mobile](#)
- [Configuring Phone Call Logging in NetSuite for iOS](#)
- [Configuring the Tab Bar in NetSuite for iOS](#)
- [Push Notifications in NetSuite for iOS](#)
- [Changing App Settings](#)

System Requirements

The system requirements for iOS and Android devices are as follows:

- NetSuite for iOS works on any device with iOS 16 or higher, but it's mainly designed for iPhone.
- NetSuite for Android works on any Android device running Android 11 or higher.

Note: What you need to know:

- The app requires internet connection to access data from NetSuite
- NetSuite for Mobile doesn't work on rooted or jailbroken devices.
- Only the latest versions of NetSuite for iOS and Android are supported. Make sure you've installed the latest version on your device.

Mobile Security

The following section covers topics related to mobile data security, the use of security questions, and IP address rules for the app.

Mobile Data Security

NetSuite for Mobile stores a limited amount of data on your device, like Time and Expense logs. The app always encrypts your data with industry-standard encryption.

You can use the Remember Me option to save your username and password. If you want to log in with TouchID or Fingerprint, you need to enable the Remember Me option. When you do, the app stores and encrypts your username and password on your device. See [Saving your Login Details in NetSuite for Mobile](#).

Mobile Security Questions

The first time you use the app, you need to answer one of the three security questions you set up on your desktop and enter your password. You also need to do this if you use a different device or reset or reinstall the app.

IP Address Rules for the App

Any IP address filtering you set up in your browser also applies to the app. Don't enable this for roles that need unrestricted mobile access, like sales roles. See the help topic [Enabling and Creating IP Address Rules](#).

Mobile Device Access Permission

Administrators can manage who gets mobile access to NetSuite by enabling the Mobile Device Access permission for each role. This lets your administrators control mobile access for each role separately.

By default, NetSuite enables Mobile Device Access permission for all standard roles including Employee and Advanced Partner Center roles with the following exceptions.

Roles requiring you to enable Mobile Device Access permission in a browser session before using the app:

- **Custom**
- **System Administrator**

Roles that do not support Mobile Device Access permission:

- **Administrator**
- **Customer Center**
- **Partner Center**
- **Vendor Center**

Note: If you're an Administrator and need mobile access for the Administrator role, you can do one of the following:

- Assign yourself to a custom role that has Mobile Device Access enabled.
- Add the Mobile Device Access permission to your employee record. See [Adding Mobile Device Access Permission to Users](#).

See the next sections to learn how to add mobile device access permission to roles and individual users.

- [Adding Mobile Device Access Permission to Roles](#)

■ Adding Mobile Device Access Permission to Users

Adding Mobile Device Access Permission to Roles

You can add the Mobile Device Access permission to any role that needs app access.

To add Mobile Device Access permission to a role:

1. Go to Setup > User/Roles > Manage Roles.
2. Click **Edit** or **Customize** next to the relevant role.
3. On the **Permissions** subtab, click the **Setup** subtab.
4. In a new row, from the Permissions list, select **Mobile Device Access**.
5. Click **Add**, and then **Save**.

 **Note:** Only Administrators can add this permission to a role. See the help topic [Customizing or Creating NetSuite Roles](#) for more information about setting permissions.

Adding Mobile Device Access Permission to Users

You can add the Mobile Device Access permission to individual users.

 **Note:** For security, you shouldn't give the Mobile Device Access permission directly to a user. Instead, add it to their role. See the help topic [Using the Global Permissions Feature](#).

To add Mobile Device Access permission to a user:

1. Go to Setup > User / Roles > Manage Users.
2. Click the relevant username.
3. Click **Edit**.
4. On the **Access** tab, click the **Global Permissions** subtab.
5. In a new row, from the Permissions list, select **Mobile Device Access**.
6. Click **Add**, and then **Save**.

 **Note:** Only Administrators can add the Mobile Access Device permission to a user.

Setting Date and Number Formatting in NetSuite for Mobile

The app uses the same date, time, and number formats as your device. If you're changing time zones (like when you're traveling), make sure your browser's time zone matches your device.

Time zone switching from within the app is only available with iOS devices:

- **For iOS**, go to Account Menu > Time Zone. See [Setting the Time Zone in NetSuite for iOS](#).

 **Note:** **Android** doesn't support time zone switching from within the app

Setting the Time Zone in NetSuite for iOS

The NetSuite for iOS app uses the time zone from your NetSuite account. Calendar dates and schedules show up in that time zone, and the app ignores your phone's time zone settings. You can set your NetSuite account's time zone right from your mobile device.

To change your NetSuite account time zone from your mobile device:

1. Tap the Account Menu icon .
2. Tap **Time Zone**.
3. (Optional) Tap **Notification** to enable or disable notifications.

 **Note:** When enabled, the app notifies you when your mobile device and your NetSuite account have different time zones.

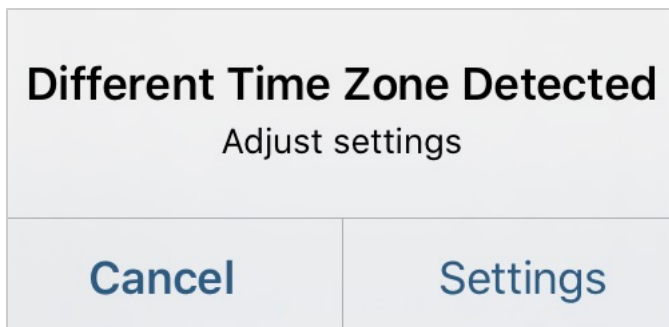

4. Tap **NetSuite** to display and select a time zone.

 **Note:** **Local** displays the time zone setting of your mobile device.

5. Tap **Done** to save any changes to your time zone.

Synchronizing Your Time Zone

If you have notifications enabled, NetSuite for iOS notifies you when your mobile device and your NetSuite account have different time zones. After you log in a pop up window displays.

Tap **Settings** to go to Time Zone settings. Adjust your time zone as needed, and then tap **Done**.

No further notifications display until there are new changes to the time zone.

Setting the Language in NetSuite for Mobile

The app takes the language settings from your browser session. See the help topic [Choosing a Language for Your NetSuite User Interface](#).

Configuring Maximum Entries in Dropdown Lists in NetSuite for Mobile

The number of entries in a list of options determines which type of selector NetSuite displays: popup selector or roll selector. You can configure this from a browser by setting the Maximum Entries in Dropdowns preference.

To set the Maximum Entries in Dropdown preference:

1. Log in to NetSuite from a browser session, and then go to Home > Set Preferences.
2. In the **General** subtab, under Optimizing NetSuite, enter a value in the **Maximum Entries in Dropdowns** field.

If the list has more items than this value, you'll see a popup list. Otherwise, you'll get a roll selector.

Configuring Phone Call Logging in NetSuite for iOS

 **Note:** The Phone Call Logging feature is not available with Android devices.

Phone Call Logging lets you track all calls you make from NetSuite for iOS. It can also remind you to log your last call. After a call ends, a popup alert reminds you to log it.

To enable or disable phone call logging:

1. Tap the Account Menu icon .
2. Tap **Phone Call Logging**.
3. Tap **Track Outbound Calls** to turn automatic phone call logging on or off.
4. Tap Prompt to Log Call to enable the popup alert. This alert asks you to log calls after they end.

When switched off, the calls are added to the Phone Calls portlet.

When switched on, a popup reminder displays after a call ends prompting you to log the call. The alert provides two options:

- Tap **Choose Show Phone Calls** to log the call
- Tap **Not Now** to mark the call as unlogged in the Recent Calls portlet. See [NetSuite for Mobile Dashboards](#).

5. To return to My Dashboard, tap the Back Arrow icon , and then tap **Done**.

Configuring the Tab Bar in NetSuite for iOS

 **Note:** The Tab bar is a feature specific to the iPhone version of the NetSuite app.

You can set up the Tab Bar to show four options from Home, Calendar, Saved Searches, or any supported record type.

For information on how to configure your dashboard, see [Dashboards in NetSuite for iOS](#).

To configure the Navigation Tab Bar:

1. In the Tab bar, tap **More**.
2. Tap **Reorder**.
3. To move a record type up or down in the list, touch and hold the grab icon .
The first four items, under the Tab Bar section, display in the Tab bar.
4. To confirm the order of your items, tap **Done**.

Note: When selecting record types for the Tab Bar, think about your user roles and what each role can access. If you select a record type that isn't available for a role, it won't show up when that role is active. Instead, the next available item in the list will appear in the Tab bar.

Push Notifications in NetSuite for iOS

Push notifications are like instant messages sent to your device, reminding you about important information from your NetSuite account. When they're enabled, you don't need to have the app open or even be logged in. You can easily customize them, and lots of record types are supported.

For a video guide on setting up push notifications in NetSuite for iOS, see [How to Set Up Push Notifications on NetSuite for iOS](#).

Prerequisites for using Push Notifications with iOS

Administrators:

- Enable the **Mobile Push Notification** feature in NetSuite. See Setup > Company > Enable Features > Mobile > Mobile Push Notification
- Notifications based on a saved search (shown with a magnifying glass icon) need a matching saved search in NetSuite.

Enabling Push Notifications in NetSuite for iOS

Follow this procedure to enable push notifications in your app.

To enable push notifications:

1. Tap the Account Menu icon .
2. Tap **Push Notifications**.
3. Slide the **Allow Push Notifications** slider to on.
4. The first time you log in, a pop-up window prompting you to confirm the action displays.
Tap **OK** to confirm.
5. Tap **OK** again to approve the iOS-generated dialog.

The **Badge Count** switch controls whether to display the number of unread notifications (all roles), next to the app icon on the iOS home screen. By default the badge count is switched on when push notifications are enabled.

Example 1. Setting a push notification for an event in NetSuite

Follow this example to set a notification for an event. You can set similar notifications for other activities and records.

To set a notification for an event

1. Create a new event in your NetSuite desktop account by going to Activities > Scheduling > Events > New.
2. On the **Attendees** subtab, check the **Notify Attendees by Email** box.
3. Click **Save**.

Attendees who have push notifications enabled receive a push notification for the event invite.

Default notification set for iOS push notifications

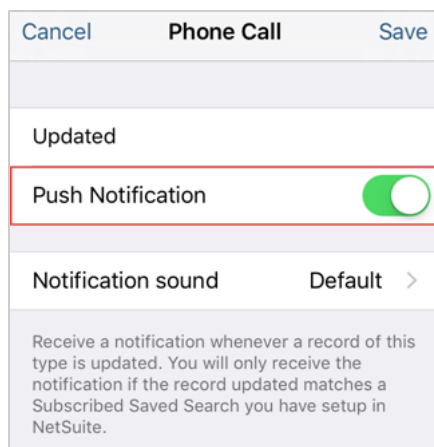

These notifications are switched on by default when you enable push notifications in your app.

Activities	Calendar Event	Canceled, Updated, Invited
	Phone Call*	Created, Updated
	Task*	Created, Updated
Approvals	Expense Report	Approval required
	Purchase Order	Approval required
Support	Support Case*	Created, Updated

* These notification types are based on saved searches (shown with a magnifying glass icon in the app). You might need to set them up first.

To switch individual push notifications on and off :

1. Tap the Account Menu icon .
2. Tap **Push Notifications**.
3. Tap the push notification you want to manage, for example Phone Call Updated.
4. Slide the **Push Notification** slider to off.

Cancel Phone Call Save

Updated

Push Notification ☒

Notification sound Default >

Receive a notification whenever a record of this type is updated. You will only receive the notification if the record updated matches a Subscribed Saved Search you have setup in NetSuite.

The NetSuite for iOS Notification Center

The Notification Center is like your inbox for all NetSuite notifications. Unlike push notifications, which are one-time alerts, the Notification Center saves your notifications so you can check them later. Tap any notification to open the Actions menu. The badge count shows how many notifications you haven't read.

The iOS Notification Center Options Screen

The Notification Center has an options screen where you can set how you view items. Tap the slider icon in the top left to open it:

What do the Options do?	
Date	Orders notifications from newest to oldest
Type	Orders notification type alphabetically (A-Z)
Show done*	Displays items which have been marked done as well as items requiring action
Show unsupported*	Shows all notification types from NetSuite, even ones that aren't available as push notifications.
Mark All as Read	Bulk select option — marks all notifications in the center as read.
Mark All as Done	Bulk select option — marks all notifications in the center as done.
* These options are session-based. They'll go back to off when you log out of the app.	

Changing App Settings

See the following topics for information on how to change app settings in NetSuite for Mobile.

- [Changing App Settings in NetSuite for iOS](#)
- [Changing App Settings in NetSuite for Android](#)

Changing App Settings in NetSuite for iOS

NetSuite for iOS enables you to configure the settings for the app in several ways.

To change your app settings in NetSuite for iOS:

1. Tap the Account Menu icon . The Settings subtab contains the following options:
 - **Remember Me** - Enables you to remove your login details. See [Removing your Login Details from NetSuite for Mobile](#).
 - **Time Zone** - Configure the time zone of your app. See [Setting the Time Zone in NetSuite for iOS](#).

- **Phone Call Logging** - Configure phone call logging. See [Configuring Phone Call Logging in NetSuite for iOS](#).
- **Receipt Image Resolution** - Enables you to set a maximum resolution of image attachments. See [Attaching Files To a Record in NetSuite for Mobile](#).
- **Push Notifications** - Enable and configure push notifications.
- **Submit Feedback** - Share feedback and suggestions directly from the app.
- **About** - The About screen has info about the app and a link to contact support. It includes:
 - **EULA** - access to read the EULA for the application.
 - **Oracle Privacy Policy** - access to the Oracle Privacy Policy page.
 - **App Version** - displays the version of the app you are using.
 - **Server Version** - displays the version of the server the app is using.
 - **User Login** - displays the username you are currently logged in with.
 - **Account** - displays the account you are currently logged in with.
 - **Role** - displays your current user role.
 - **Documentation** - access to NetSuite for Mobile documentation.
 - **Contact Support** - access to contacting customer support.
 - **Visit SuiteAnswers** - a link to SuiteAnswers.
- **Log Out** - Tap to log out of the app.
- **Reset to Defaults** - Tap to perform a factory reset of the app.

 **Note:** When you reset the app to defaults, all your data including login information, expense details, and time logs are removed.

Changing App Settings in NetSuite for Android

NetSuite for Android enables you to configure the settings for the app in several ways.

To change your app settings in NetSuite for Android:

1. Tap the Navigation Menu icon , and then tap **Settings**. The Settings screen contains the following options:
 - **Remember Me** - Tap to remove your login details. See [Removing your Login Details from NetSuite for Mobile](#).
 - **Receipt Image Resolution** - Enables you to set a maximum resolution of image attachments. See [Attaching Files To a Record in NetSuite for Mobile](#).
 - **Favorites** - Configure your favorite record types.
 - **Reset to Defaults** - Tap to perform a factory reset of the app.

 **Note:** When you reset the app to defaults, all your data—including login info, expense details, and time logs—gets removed.

2. To share feedback and suggestions directly from the app, tap **Submit Feedback**.
3. To open the About screen, tap the Navigation Menu icon, then tap **About**. The About screen has information about the app and a link to contact support. It includes:
 - **Legal Terms** - access to read the EULA for the application.

- **Oracle Privacy Policy** - access to the Oracle Privacy Policy page.
- **App Version** - displays the version of the app you are using.
- **Server Version** - displays the version of the server the app is using.
- **User Login** - displays the username you are currently logged in with.
- **Account** - displays the account you are currently logged in with.
- **Role** - displays your current user role.
- **View Documentation** - access to NetSuite for Mobile documentation.
- **Contact Support** - access to contacting customer support.
- **Visit SuiteAnswers** - a link to SuiteAnswers.

Working with NetSuite for Mobile

The following sections cover tasks that NetSuite for Mobile enables you to perform. You can quickly learn how to perform any task to get the most out of your app.

NetSuite for Mobile Basics:

- [NetSuite for Mobile Login Options](#)
- [Changing Roles in NetSuite for Mobile](#)

NetSuite for Mobile Main Features:

- [NetSuite for Mobile Expense Reporting](#)
- [NetSuite for Mobile Time Tracking](#)
- [NetSuite for Mobile Dashboards](#)
- [NetSuite for Mobile Calendar](#)
- [NetSuite for Mobile Record Management](#)
- [NetSuite for Mobile Sublist Management](#)
- [Tracking Calls with Phone Call Logging in NetSuite for iOS](#)
- [My Approvals in NetSuite for Mobile](#)
- [Accessing Saved Searches in the App](#)

NetSuite for Mobile Login Options

Logging in to the app does not affect any NetSuite session you may have open in a browser. Similarly, logging out from a browser session does not affect your access to the mobile app.

If you prefer to use a biometric login method instead of entering a password, enable the **Remember Me** option from the login screen of the app. Your device stores saved passwords securely using standard cryptography like Keychain (iOS) or Keystore (Android).

The following sections cover login methods available with NetSuite for Mobile.

- [Logging into NetSuite for Mobile with your NetSuite Account](#)
- [NetSuite for Mobile Biometric ID Login](#)
- [Logging into NetSuite for Mobile with Single Sign-on](#)
- [Saving your Login Details in NetSuite for Mobile](#)
- [Removing your Login Details from NetSuite for Mobile](#)
- [Resetting a Forgotten Password from NetSuite for Mobile](#)
- [Logging out of NetSuite for Mobile](#)

Logging into NetSuite for Mobile with your NetSuite Account

Follow this procedure to log in to the app using your NetSuite account credentials.

Important: You need to have access to a role with the Mobile Device Access permission enabled. For more information, see [Mobile Device Access Permission](#).

To log in to the app:

1. Enter the email address and password that you use to log in to your NetSuite account.
2. Tap **Log In**.
3. The first time you log in, you must answer one of your three security questions. Fill out your answer and tap **Submit**.

Note: You can also change the role with which you want to log in by tapping **Change Role**. The app chooses the role you last used in a browser session otherwise.

NetSuite for Mobile Biometric ID Login

NetSuite for Mobile supports logging in with a biometric ID. There are some differences in biometric ID types for iOS and Android as described in the following section.

Setting up Face and Touch ID login for iOS

NetSuite for iOS supports Face and Touch ID.

To set up Face and Touch ID login for iOS:

1. Make sure to enable Face and Touch ID in system settings.
2. Enter your log in credentials.
3. Tap **Remember Me**.
4. Tap **Log in**.

No further setup is required.

Setting up Fingerprint Login for Android

NetSuite for Android supports logging in with fingerprint.

To set up fingerprint login for Android:

1. Make sure to enable Fingerprint system settings.
2. Enter your log in credentials.
3. Tap **Remember Me**.
4. Tap **Log In**.
5. In the popup window, tap **OK**.
6. Touch the fingerprint sensor to confirm and complete the setup.

Logging into NetSuite for Mobile with Single Sign-on

To use Single Sign-on (SSO) with your app, first check with your administrator that SAML (Security Assertion Markup Language) has been enabled for your company. See the help topic [SAML Single Sign-on](#) for complete setup instructions. Ask your administrator to do the following:

- Add the **Mobile Device Access** and **SAML Single Sign-on** permissions to a custom role, and assign that custom role to you.
- Forward the Account ID to you. Administrators can find this at Setup > Company Information > Account ID.

Note: Take note of the following:

- If you are testing SSO in a Release Preview or Sandbox account, make sure that the entire alphanumeric Account ID is supplied (for example, 2000201_RP).
- NetSuite for Mobile does not support importing custom certificates that some SSO providers require.

To use SSO to log in to the app:

1. Launch the app and tap **Company SSO**.
2. Enter your NetSuite Account ID.

Note: With **iOS**, the app remembers your ID automatically. To store your ID with **Android**, tap **Remember Me**.

3. Tap **Continue**.
4. Log in from the third-party authentication screen using your SAML credentials.

Note: If you use SAML SSO with Microsoft Entra and you experience issues, see [Error when Logging into NetSuite For Mobile with SAML SSO](#).

Logging out of NetSuite for Mobile

Follow this procedure to log out of NetSuite for Mobile.

To log out of the app:

1. Do one of the following:
 - **For iOS**, tap the Account Menu icon .
 - **For Android**, tap the Navigation Menu icon .
2. Tap **Log out**.

Note: Logging out of the app does not affect any open browser sessions.

Saving your Login Details in NetSuite for Mobile

The app can store your login details using the Remember Me feature. When you enable the Remember Me feature the app automatically logs you in on each startup, or whenever you switch between other open applications.

-  **Note:** The app uses industry standard encryption to secure your password and database keys:
- iOS uses the KeyChain encryption standard
 - Android uses the KeyStore encryption standard

To save your login details:

1. In the login screen, tap **Remember Me**.
2. Enter your username and password.
3. Tap **Log In**.

Removing your Login Details from NetSuite for Mobile

You can remove your login details if you don't want to store them on your device.

To remove your login details:

- **For iOS**, go to Account Menu > Remember Me, and then tap **Disable**.
- **For Android**, go to Menu > Settings, and then tap **Remember Me** to disable the option.

Resetting a Forgotten Password from NetSuite for Mobile

You can request a password reset from the login screen. After you request a password reset, you receive a reset link in the inbox of the email address you specified.

To reset your forgotten password:

1. In the login screen, tap **Forgot?** in the Password field.
2. Enter an email address registered with NetSuite, or accept the populated address.
3. Tap **Request Reset Link** on the Reset Password screen with your email address.
4. Tap **Back** for **iOS** or **OK** for **Android**.
5. Follow the instructions sent to your email address.

Changing Roles in NetSuite for Mobile

You can select roles with the Mobile Device Access permission enabled as follows.

To change your current role:

1. Do one of the following:
 - **For iOS**, tap the Account Menu icon .
 - **For Android**, tap the Navigation Menu icon .
2. Tap the active role at the top of the Menu to display a list of available roles.
3. Tap the role you want use.

NetSuite for Mobile Expense Reporting

If you have the necessary permissions, My Dashboard includes the My Expenses portlet by default. From the portlet, you can log expenses and create expense reports.

You can also log expenses directly from the login screen.

When you log expenses, NetSuite for Mobile stores them locally on your device until you submit them as a part of an expense report. To submit an expense report, you must log in with a role that includes the permission to create expense reports.

Your expense reporting capabilities depend on your access level. See the following topic for an overview of expense reporting capabilities available for each access level.

- [Expense Reporting Access Levels](#)

For information on how to log expenses and create expense reports, see the following topics:

- [Logging an Expense with NetSuite for Mobile](#)
- [Creating an Expense Report with NetSuite for Mobile](#)

Important: You need to enable the File Cabinet to use expense logging. Open a browser session and go to Setup > Company > Enable Features, Data Management..

Logging an Expense with NetSuite for Mobile

Expenses are the basic elements from which you create expense reports. They can include an image of the physical receipt and accompanying description of what the expense relates to. You can attach up to four attachments to an expense enabling you to organize multiple items under a single category. For example, parking tickets, taxi fares, or evening meals. With NetSuite for Android you can also attach multiple page invoices in PDF format, such as hotel bills or flight tickets.

Important: NetSuite stores logged expenses locally on your device. Make sure you submit these expenses with an expense report as often as possible. Expenses that have not been submitted with an expense report are not available if you log in from another device. Locally stored expense are also lost if you lose, or reset your device, or if you reset the app. See [Expense Features](#).

You can log expenses in different ways. See the following:

- [To log an expense from within NetSuite for Mobile:](#)
- [To log an expense from the Photos or Files app:](#)

To log an expense from within NetSuite for Mobile:

1. Do one of the following:
 - From the login screen, tap **Expenses**.
 - From My Dashboard, on the My Expenses portlet, tap **Add Expense**.
2. Complete the required fields.
3. (Optional) Capture a new image of a bill or receipt for the expense:
 - **For iOS**, tap the Camera icon , and then tap **Capture using Camera**.
 - **For Android**, tap **Take a Photo**. To rotate the photo:
 1. Tap the thumbnail, and then tap **Open**.
 2. Tap the Rotate icon .

3. To delete the photo, tap the Discard icon .
4. To confirm the rotation and return to the Expense screen, tap the Back icon .
4. (Optional) Attach an existing file to the expense:
 - **For iOS**, tap the Camera icon, and then tap **Choose existing from Gallery**.

 **Note:** NetSuite for iOS supports JPG, PNG, TIFF, and HEIF formats.

 - **For Android**, tap **Pick a File**.

 **Note:** NetSuite for Android supports PDF, JPG, and PNG formats.
5. Repeat step 3 or 4 to attach additional files.

 **Note:** You can add up to four attachments to an expense.
6. To save the expense:
 - **For iOS**, tap **Done**.
 - **For Android**, tap the Tick icon .

To log an expense from the Photos or Files app:

1. **For Android:**
 1. Go to your Photos app or Files app, select an image of your receipt, tap **Share**, and then tap **NetSuite**.
 2. Under **Expense Details**, enter an **Amount**, **Category**, and **Memo**.
 3. Tap **Save**.

 **Note:** You can upload up to 4 images for each expense report.

 **Note:** PDF file size is limited to 8MB.
2. **For iOS:**
 1. Go to your Photos app or Files app, select an image of your receipt, tap **Share**, and then tap **NetSuite**.
 2. Under **Expense Details**, enter an **Amount**, **Category**, and **Memo**.
 3. Tap **Done**.
 4. For iOS, be aware of:
 - When sharing an image from Safari, you must open the image in its own page to share it to NetSuite.
 - When sharing a PDF file from Safari, you must open the file in its own page to share it to NetSuite.
 - PDF file size is limited to 8MB.

Sharing files with NetSuite for iOS has some known issues. See [Known Issues when Sharing Files to NetSuite for iOS](#).

Creating an Expense Report with NetSuite for Mobile

You can create expense reports directly from your mobile device.

If you want to attach receipts to your expenses, it is best practice to log them as an expense before selecting them on an expense report. For more information, see [Logging an Expense with NetSuite for Mobile](#).

To create an expense report:

1. From My Dashboard, on the My Expenses portlet, tap **Report Expense**.
2. To begin selecting expenses to report:
 - **For iOS**, tap **Select Expenses to Report**.
 - **For Android**, tap **Create Expense Report**.

 **Note:** For iOS, the limit of expenses attachable to an expense report is 30.

3. To finish your selection:
 - **For iOS**, tap **Create Expense Report**.
 - **For Android**, tap the Tick icon .
4. The generated report displays for review.

 **Important:** You should make any necessary edits at this stage, because only an Administrator or someone with an Accountant role can edit submitted reports.

5. Fill in all required fields, and then tap **Add** for every expense in your report.
6. (Optional) To complete the report later:
 - **For iOS**, tap **Complete Later**.
 - **For Android**, tap the Tick icon, and then tap **Complete later** from the Select Action popup window.

 **Note:** The Complete Later option is only available with the Employee Center role.

7. To submit the report for approval:
 - **For iOS**, tap **Save** or **Submit** depending on the role you are using.
 - **For Android**, tap the Tick icon, and then tap **Submit**.

 **Note:** When you've submitted your report, it won't show up in your Expenses list anymore. To view your expense reports in the app:

- **For iOS**, go to More > Expense Reports.
- **For Android**, go to Menu bar > Records > Recents. Select **Expense Reports** from the list.

Expense Reporting Access Levels

Your expense reporting capabilities depend on your access level. See the following tables for an overview of expense reporting capabilities available for each access level.

- [NetSuite for iOS Expense Reporting Access Levels](#)
- [NetSuite for Android Expense Reporting Access Levels](#)

NetSuite for iOS Expense Reporting Access Levels

Permission	Access Level	Expense Reporting Capabilities
Expense Report	None	- The My Expenses portlet is unavailable for this access level - Expense logging is available from the login screen  Note: To submit expense reports you need to switch to a role that includes an access level that includes the ability to create expense reports.
Expense Report	View	- The My Expenses portlet is unavailable for this access level - Expense logging is available from the login screen and the My Expenses portlet  Note: To submit expense reports you need to switch to a role that includes an access level that includes the ability to create expense reports.
Expense Report	Create	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - You can create and submit expense reports
Expense Report	Edit	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - You can create, submit, and edit expense reports.
Expense Report	Full	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - You can create and submit expense reports - You can edit expense reports

NetSuite for Android Expense Reporting Access Levels

Permission	Access Level	Portlet Capabilities
Expense Report	None	- The My Expenses portlet is unavailable for this access level - Expense logging is available from the login screen  Note: To submit expense reports you need to switch to a role that includes an access level that includes the ability to create expense reports.
Expense Report	View	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - Creating expense reports is not permitted

Permission	Access Level	Portlet Capabilities
		 Note: To submit expense reports you need to switch to a role that includes an access level that includes the ability to create expense reports.
Expense Report	Create	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - You can create and submit expense reports
Expense Report	Edit	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - You can create and submit expense reports - You can edit expense reports
Expense Report	Full	- The My Expenses portlet is available for this access level - Expense logging is available from the login screen and the My Expenses portlet - You can create and submit expense reports - You can edit expense reports

NetSuite for Mobile Time Tracking

NetSuite for Mobile enables you to perform time tracking tasks from your mobile device.

- [Accessing Timesheet](#)
- [Creating Time Entries](#)
- [Editing Time Entries](#)
- [Creating a Timer Log](#)
- [Editing a Timer Log](#)
- [Deleting a Timer Log](#)
- [Converting a Timer Log into a Time Entry](#)

Accessing Timesheet

To access the Timesheet screen, from My Dashboard, on the My Time portlet, tap **Reported This Week**.

On the My Time screen, you see these options:

- **Add** – You can add a new time entry by tapping the Add icon:
 -  for **iOS**.
 -  for **Android**.
- **Today** – View a list of all time entries for today.
- **Go to Date** – Select a specific date to view:
 - **For iOS**, tap the current date at the top of the view to display a date picker, choose your desired date, and then tap **Done**.

- **For Android**, tap the More icon  tap **Go to date** to display a calendar, choose your desired date from the calendar, and then tap **OK**.
- **Next / Previous week** – Use the arrow buttons to view next or previous weeks.
- **Select Day** – Tap the day you want to view.
- **Total** – The bottom of the timesheet shows a summary of total hours entered for the selected day and week. The minimum unit of time displayed is one minute.
- **Open / Edit** – Tap or swipe a record to open and edit entries.

Creating Time Entries

Time entries are records of (billable) time, which you post to a relevant customer record in NetSuite. The duration for Time entries is input manually. Timer logs create automatically after a timer session saves. Timer logs do not have to be posted to NetSuite.

The posting method is dependent on your NetSuite account settings. NetSuite for Mobile supports Time Bill, and Timesheet 2.0.

To create a new time entry:

1. From My Dashboard, on the My Time portlet, tap **Report Time**.
2. Complete the required fields.

Note: The fields available are dependent on your current role and your preferred form as set up in NetSuite.

3. To save your time entry:
 - **For iOS**, tap **Save**.
 - **For Android**, tap the Tick icon .

Editing Time Entries

You can edit existing time entries.

Note: To edit time entries, you need the Track Time permission with Edit or Full level.

To edit a time entry:

1. From My Dashboard, on the My Time portlet, tap **Reported This Week**.
2. Tap the time entry you want to edit.
3. Do one of the following:
 - **For iOS**, tap **Edit**.
 - **For Android**, tap the More icon  and then tap **Edit**.
4. Edit the time entry.
5. To save your changes:
 - **For iOS**, tap **Save**.
 - **For Android**, tap the Tick icon .

Creating a Timer Log

The timer (stopwatch) function enables you to track the time you spend on tasks or with clients by creating a timer log. You can convert timer logs into time entries for project billing.

You can also create timer logs manually.

 **Note:** An active timer keeps running until you pause or stop it, even during phone calls.

To create a timer log using the timer:

1. Do one of the following:
 - From the login screen, tap **Timer**.
 - From My Dashboard, on the My Time portlet, tap **To Report**.
2. Tap the Start icon:
 - **For iOS**, .
 - **For Android**, .
3. (Optional) You can add a description for the time event:
 - **For iOS**, tap **Edit Memo**, enter a description for the timed event, and then tap **Save Memo**.
 - **For Android**, tap **Edit Memo**, enter a description for the timed event, and then tap Return.
4. (Optional) You can pause the event by tapping the Pause icon. Tap the Start icon to resume tracking your event.
5. Tap **Stop & Save** once the tracked event is over.

To create a timer log manually:

1. Do one of the following:
 - From the login screen, tap **Timer**.
 - From My Dashboard, on the My Time portlet, tap **To Report**.
2. Tap the Add icon:
 - **For iOS**, .
 - **For Android**, .
3. In the **Date** field, select the date of your timer log.
4. In the **Duration** field, set a duration of your timer log.
5. In the **Edit Memo** field, you can add a description of your timer log.
6. To save your timer log, do one of the following:
 - **For iOS**, tap **Done**.
 - **For Android**, tap the Tick icon .

Editing a Timer Log

Follow this procedure to edit a timer log.

To edit a timer log:

1. From My Dashboard, on the My Time portlet, tap **To Report**.
2. Tap the timer log you want to edit.
3. You can edit the following fields:
 - Date
 - Duration
 - Memo

 **Note:** Start and End fields are read-only fields.

4. To save your changes:
 - **For iOS**, tap **Timer**.
 - **For Android**, tap the Tick icon .

Deleting a Timer Log

Follow this procedure to delete a timer log.

To delete a timer log:

1. From My Dashboard, on the My Time portlet, tap **To Report**.
2. To delete a timer log:
 - **For iOS**, swipe a timer log entry tap **Delete**, and then tap **Delete** to confirm.
 - **For Android**, touch and hold the timer log entry you want to delete, tap **Delete**, and then tap **Yes** to confirm.

Converting a Timer Log into a Time Entry

Follow this procedure to convert a timer log into a time entry.

To convert a timer log into a time entry:

1. From My Dashboard, on the My Time portlet, tap **To Report**.
2. To convert a timer log into a time entry:
 - **For iOS**, swipe the timer log, and then tap **Use for Time Entry**.
 - **For Android**, touch and hold the timer log, and then tap **Create Time Entry**.
3. Complete the required fields.
4. To save your time entry:
 - **For iOS**, tap **Save**.
 - **For Android**, tap the Tick icon .

NetSuite for Mobile Dashboards

NetSuite for Mobile enables you to configure and use all web dashboards. It also provides a native My Dashboard that serves as the center of your mobile workflow. In a browser session, configure the

dashboards with mobile-supported portlets to access them on your device. You can customize the mobile dashboards to fit your workflow and tasks. For example, you can set up your Home dashboard to display a general overview of key metrics along with important reminders while your Lists dashboard contains custom searches you frequently access.

To switch dashboards, tap the current dashboard's name, then choose the one you want.

Tip: To add a web portlet to My Dashboard, tap the Star icon on a portlet on one of the web dashboards.

For more information about how to set up and customize your dashboards, see the following help topics:

- [Dashboards in NetSuite for iOS](#)
- [Dashboards in NetSuite for Android](#)

Dashboards in NetSuite for iOS

See the following topics for information on working with dashboards in NetSuite for iOS:

- [My Dashboard in NetSuite for iOS](#)
- [Arranging My Dashboard in NetSuite for iOS](#)
- [Dashboard Portlets in NetSuite for iOS](#)

My Dashboard in NetSuite for iOS

My Dashboard is a native mobile dashboard that serves as the center of your mobile workflow. My Dashboard can have up to four mobile-only portlets, depending on your role and permissions. You can also add any portlet from other Dashboards by tapping the Star icon on the portlet.

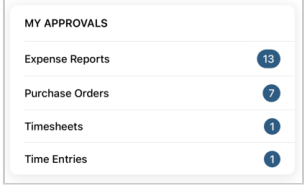

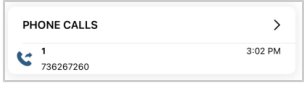

You can rearrange and hide portlets on My Dashboard, see [Arranging My Dashboard in NetSuite for iOS](#).

The following table describes the four mobile-only portlets available with NetSuite for iOS.

Note: The portlets you see on My Dashboard depend on your role and permissions.

Portlet Name	Description	Screenshot
My Time	Displays the amount of time to report in timer logs, and time entries you have reported this week. For more information, see NetSuite for Mobile Time Tracking. Note: This portlet is only available if you enable the Track Time permission, and if you enable either Time Sheet or Time Tracking in your account.	
My Expenses	Displays the number of expenses not yet reported, and the total value of outstanding expenses. For more information, see NetSuite for Mobile Expense Reporting.	

Portlet Name	Description	Screenshot
My Approvals	Displays the number of records awaiting your approval. For more information, see My Approvals in NetSuite for Mobile .	
Phone Calls	This portlet displays the last three calls initiated from your NetSuite for iOS application. Tap the Arrow icon > to see the full list of recent calls. Tap on any call in the list to log the call. For more information, see Tracking Calls with Phone Call Logging in NetSuite for iOS .	

Arranging My Dashboard in NetSuite for iOS

You can personalize My Dashboard to best suit your needs.

To arrange My Dashboard in NetSuite for iOS:

1. From My Dashboard, tap **Edit**.
2. Drag a portlet to move it to your preferred spot.
3. Tap the Tick icon to show or hide a portlet. ✓
4. To remove a portlet added from another dashboard, tap the Remove icon ✖.
5. To exit the Personalize screen, tap **Done**.
My Dashboard reloads with your changes.

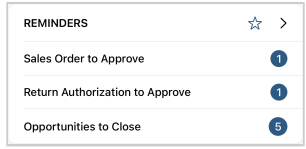

Dashboard Portlets in NetSuite for iOS

NetSuite for iOS enables you to use all web dashboards. If you add portlets available in NetSuite for iOS to any of your dashboards in a browser session, the portlets display on your corresponding mobile dashboard. See the help topic [Dashboard Personalization](#).

To switch between dashboards, tap the name of the currently displayed dashboard, and then tap the dashboard you want to access from the list.

The following table lists portlets available with NetSuite for iOS.

✓ **Tip:** To add a portlet to My Dashboard, tap the Star icon.

Portlet Name	Description	Screenshot
Reminder	Displays the first three reminders you would see on your browser session dashboard. To see the full list of reminders, tap the Arrow icon >. All reminders based on a saved search display natively within the app. Reminders with a launch icon alongside them are not natively supported. In such cases, the app prompts you to view the results in a browser session. The system often includes launch icons for reminders that are generated by custom workflows. See the help topic Setting Up Reminders .	

Portlet Name	Description	Screenshot
Key Performance Indicators	The default behavior is to display the first three KPIs from your browser session Dashboard. If you have set up headline KPIs, their settings override this behavior. Tap the Arrow icon > to see the full list of dashboard KPIs. For more information, see the help topic Highlighting KPIs .	
KPI Scorecard	Displays KPI scorecards as configured on your browser session dashboard. To browse through your scorecards, swipe left or right. Tap a scorecard to access the chart detail. To see your full list of KPI Scorecards, tap the Arrow icon >. See the help topic Adding a KPI Scorecard Portlet to a Dashboard .	
KPI Meter	The portlet displays the first KPI Meter as configured in your browser session. To browse through your KPI meters, swipe left or right. For more information, see the help topic KPI Meters .	
Report Snapshot	The portlet displays the first report snapshot from your browser session Dashboard. Tap the Arrow icon > to see your full list of report snapshots. To display report snapshots on your app, make sure that the Display Type is set to Graph in the portlet set-up options in your browser session. The app does not support the List view. For more information, see the help topic Setting Up a Report Snapshot Portlet .	
Custom Searches	The portlet displays the first three custom search portlets from your browser session Dashboard. Tap the Arrow icon > to access the full list of your custom searches. For more information, see the help topic Displaying Saved Search Results in Dashboard Portlets .	
Trend Graphs	The portlet displays the first trend graph from your browser session dashboard. To browse through your trend graphs, swipe left or right. Tap a trend graph to access the chart detail. To see your full list of trend graphs, tap the Arrow icon >. For more information, see the help topic Setting Up Trend Graph Portlets .	

Dashboards in NetSuite for Android

See the following topics for information on working with dashboards in NetSuite for Android:

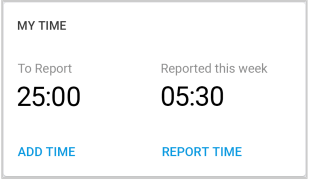

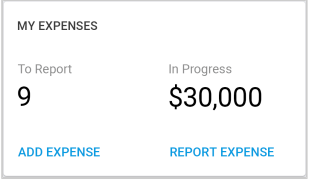

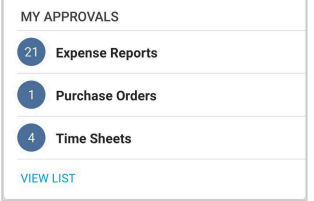

- [My Dashboard in NetSuite for Android](#)
- [Arranging My Dashboard in NetSuite for Android](#)
- [Dashboard Portlets in NetSuite for Android](#)
- [Changing the Dashboard Layout in NetSuite for Android](#)

My Dashboard in NetSuite for Android

My Dashboard is a native mobile dashboard that serves as the center of your mobile workflow. Depending on your role and permissions, My Dashboard can contain up to three mobile-only portlets. You can also add any portlet from other Dashboards by tapping the Star icon on the portlet.

You can rearrange and hide portlets on My Dashboard, see [Arranging My Dashboard in NetSuite for Android](#).

The following table describes three mobile-only portlets available with NetSuite for Android.

Portlet Name	Description	Screenshot
My Time	Displays the amount of time to report in timer logs, and time entries you have reported this week. For more information, see NetSuite for Mobile Time Tracking. Note: This portlet is only available if you enable the Track Time permission, and if you enable either Time Sheet or Time Tracking in your account.	
My Expenses	Displays the number of expenses not yet reported, and the total value of outstanding expenses. For more information, see NetSuite for Mobile Expense Reporting.	
My Approvals	Displays the number of records awaiting your approval. For more information, see My Approvals in NetSuite for Mobile.	

Arranging My Dashboard in NetSuite for Android

You can personalize My Dashboard to best suit your needs.

To arrange My Dashboard in NetSuite for Android:

1. From My Dashboard, tap the More icon .
2. Tap **Personalize**.

3. Drag a portlet to move it to your preferred spot.
4. To hide a portlet, tap the Remove icon .
5. To exit the Personalize screen, tap the Close icon .

My Dashboard reloads with your changes.

Dashboard Portlets in NetSuite for Android

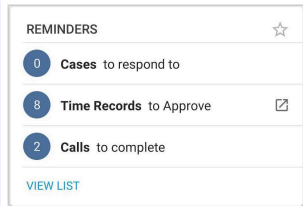

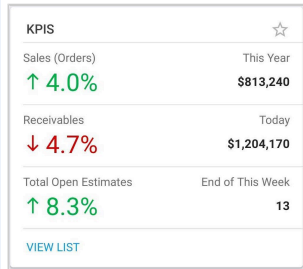

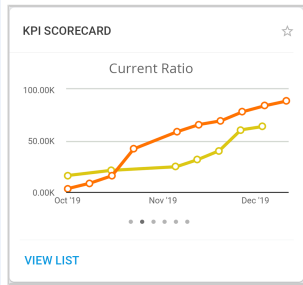

NetSuite for Android enables you to use all web dashboards. If you add portlets available in NetSuite for Android to any of your dashboards in a browser session, the portlets display on your corresponding mobile dashboard. See the help topic [Dashboard Personalization](#).

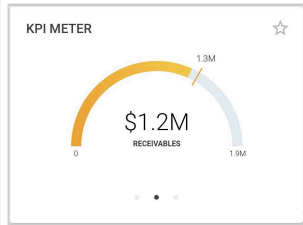

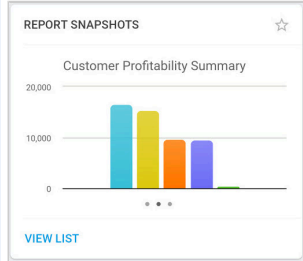

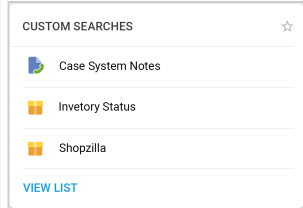

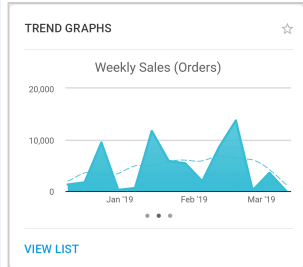

To switch between dashboards, tap the name of the currently displayed dashboard, and then tap the dashboard you want to access from the list.

You can change the layout of your dashboard to fit your device. See [Changing the Dashboard Layout in NetSuite for Android](#).

The following table lists portlets available with NetSuite for Android.

 **Tip:** To add a portlet to My Dashboard, tap the Star icon.

Portlet Name	Description	Screenshot
Reminders	Displays the first three reminders you would see on your browser session dashboard. To see the full list of reminders, tap View List. All reminders based on a saved search display natively within the app. For example, Cases to respond to is a reminder based on a saved search. Reminders with a launch icon alongside them are not natively supported. In such cases, the app prompts you to view the results in a browser session. The system often includes launch icons for reminders that are generated by custom workflows. See the help topic Setting Up Reminders .	
Key Performance Indicators	The default behavior is to display the first three KPIs from your browser session Dashboard. If you have set up headline KPIs, their settings override this behavior, see the help topic Highlighting KPIs . Tap a KPI to access the chart detail. To see your full list of KPIs, tap View List .	
KPI Scorecard	Displays KPI scorecards as configured on your browser session dashboard. To browse through your scorecards, swipe left or right. Tap a scorecard to access the chart detail. To see your full list of KPI Scorecards, tap View List. See the help topic Adding a KPI Scorecard Portlet to a Dashboard .	

Portlet Name	Description	Screenshot
KPI Meter	Displays the first KPI Meter as configured on your browser session dashboard. Tap the KPI meter to display more details in the portlet. To browse through your KPI meters, swipe left or right. See the help topic KPI Meters .	
Report Snapshots	Displays the first report snapshot as configured on your browser session dashboard. To browse through your report snapshots, swipe left or right. Tap a report snapshot to access the chart detail. To see your full list of report snapshots, tap View List. To display report snapshots on your app, make sure that the Display Type is set to Graph in the portlet set-up options in your browser session. See the help topic Setting Up a Report Snapshot Portlet .	
Custom Searches	Displays the first three custom search portlets from your browser session dashboard. Tap a custom search to access it. To see your full list of custom searches, tap View List. See the help topic Displaying Saved Search Results in Dashboard Portlets .	
Trend Graphs	The portlet displays the first trend graph from your browser session dashboard. To browse through your trend graphs, swipe left or right. Tap a trend graph to access the chart detail. To see your full list of trend graphs, tap View List. See the help topic Setting Up Trend Graph Portlets .	

Changing the Dashboard Layout in NetSuite for Android

You can choose between a horizontal or vertical layout of your dashboards to best suit the device you are using.

To change dashboard layout in NetSuite for Android:

1. Go to any dashboard, with the exception of My Dashboard.
2. Tap the More icon , and then tap Horizontal Layout or Vertical Layout.

 **Note:** The available layout depends on the layout you are currently using.

NetSuite for Mobile Calendar

The Calendar feature lets you create and accept new activities, and customize your calendar view based on an entity, group, or resource. You can also filter the type of activity to display based on events, phone calls, and tasks.

- [NetSuite for iOS Calendar](#)
- [NetSuite for Android Calendar](#)

NetSuite for iOS Calendar

The following sections cover information on working with the NetSuite for Mobile Calendar with iOS devices.

To access your calendar with NetSuite for iOS:

- On your Tab bar, tap the Calendar icon .

For your calendar, the app takes the time zone settings from your NetSuite desktop application. See [Setting the Time Zone in NetSuite for iOS](#).

The following topics cover information on working with NetSuite for iOS Calendar.

- [Configuring the Calendar View in NetSuite for iOS](#)
- [Calendar Icons in NetSuite for iOS](#)
- [Adding a Calendar Item in NetSuite for iOS](#)
- [Editing a Calendar Item in NetSuite for iOS](#)
- [Deleting a Calendar Item in NetSuite for iOS](#)
- [Responding to an Event in NetSuite for iOS](#)
- [Adding an Unlisted Calendar in NetSuite for iOS](#)

Configuring the Calendar View in NetSuite for iOS

The Calendar Navigation bar offers options for viewing and configuring your calendar.

- **Today** – Returns to today's date.
- **1. Daily** – Displays a list view of daily activities.
 - Items are grouped into days. You can scroll down the list to find the item you require.
 - View displays items from today onwards. Past items do not display.
- **2. Weekly** – Displays items for the selected week.
 - Tap the left and right arrow buttons to move between weeks.
 - Tap any day of the week to view the items for that day.
- **3. Monthly** – Displays items for the selected month.

- Tap the left and right arrow buttons to move between months.
 - Tap any day of the month to view the items for that day.
 - **4. Customize** – Customize your calendar. Tap to access the following options:
 - **Calendar** – Select an active calendar from the list. The screen displays up to four most recently used calendars, plus your own calendar (which remains at the top of the list). To add another calendar to the list see [To add an unlisted calendar](#).
 - **Activities** – Select the types of items to display in the calendar: **Event**, **Phone Call**, or **Task**. By default all are selected.
- Tap Done to save changes to your calendar customizations, or Cancel to return to the calendar view.

Note: You can only view one calendar at a time.

If you'd like phone calls and tasks that do not reserve time to show on your calendar, you must configure the following calendar preferences in your NetSuite account: **Display Non-blocking Phone Calls in Calendar**, and **Display Non-blocking Tasks in Calendar**. See the help topic [Setting Calendar Preferences](#).

Calendar Icons in NetSuite for iOS

The following table gives an overview of calendar icons. The type of icon is determined by the item type and the current status of that item.

Event icons

Accepted	
Tentative	
Awaiting Response	

Task icons

Completed	
In progress	
Not started	

Phone Call icons

Completed	
Scheduled	

 **Note:** Cancelled events do not appear in the app.

Adding a Calendar Item in NetSuite for iOS

Follow this procedure to add an item to your calendar.

To add an item to your calendar:

1. On your Tab bar, tap the Calendar icon .
2. Navigate to the day you want to add the item to.
3. Tap the Add icon  next to the date.
4. Select the type of item you want to add from the following options:
 - Event
 - Phone Call
 - Task
5. Fill out the required information for your item. This may vary depending on the type of item you choose.
6. To add the item to your calendar, tap **Save**.

Editing a Calendar Item in NetSuite for iOS

Follow this procedure to edit a calendar item.

To edit a calendar event:

1. On your Tab bar, tap the Calendar icon .
2. Swipe left to right across the item you want to edit to reveal Quick Actions.
3. Tap **Edit**.
4. Tap Record Menu icon  to go to the available sublists for the event based on your preferred form setup.
5. Edit the relevant fields.
6. To save your changes, tap **Save**.

Deleting a Calendar Item in NetSuite for iOS

Follow this procedure to delete an event from your calendar

To delete an event from your calendar:

1. On your Tab bar, tap the Calendar icon .
2. Navigate to the event you want to delete.
3. Swipe the event from left to right to reveal quick actions.
4. Tap **Edit** to go to the edit screen.
5. Tap **Delete**.

 **Note:** Only the event organizer can delete the event.

Responding to an Event in NetSuite for iOS

Follow this procedure to respond to edit and send your response to an event.

To respond to an event:

1. On your Tab bar, tap the Calendar icon .
2. Navigate to the event you want to respond to.
3. Tap the event.
4. Tap **Quick Accept** to accept the event. No further action is needed if you choose this option.
5. To reveal additional response options, tap the Arrow icon :
 - Tap **Accept** to accept the event.
 - Tap **Decline** to decline the event.
 - Tap **Tentative** to mark your response as tentative.
6. Edit and customize your response in the Response screen:
 - Select **Send a response** or **Do not send a response** to either attach a response message or not.
 - You can add and edit your message in the **Message Text** window.
 - To set up a reminder for the event:
 - Tap **Reminder**.
 - From the time picker, tap the time of your reminder.
 - Tap **Done**.
 - To choose the type of your reminder:
 - Tap **Reminder type**.
 - Select your reminder type.
 - Tap **Done**.
7. To save and send your response, tap **OK**.

The event status is updated, and confirmed by the updated event icon in the calendar view screen.

Adding an Unlisted Calendar in NetSuite for iOS

Follow this procedure to view an unlisted calendar.

To add an unlisted calendar:

1. On your Tab bar, tap the Calendar icon .
 2. Tap the Customize icon .
 3. Tap **Add**.
 4. From the Calendar Type bar, tap the type of calendar you want to add.
 5. Tap the calendar you want to view.
- This adds the calendar to your calendar list and sets it as the active calendar.

NetSuite for Android Calendar

To access your calendar with NetSuite for Android:

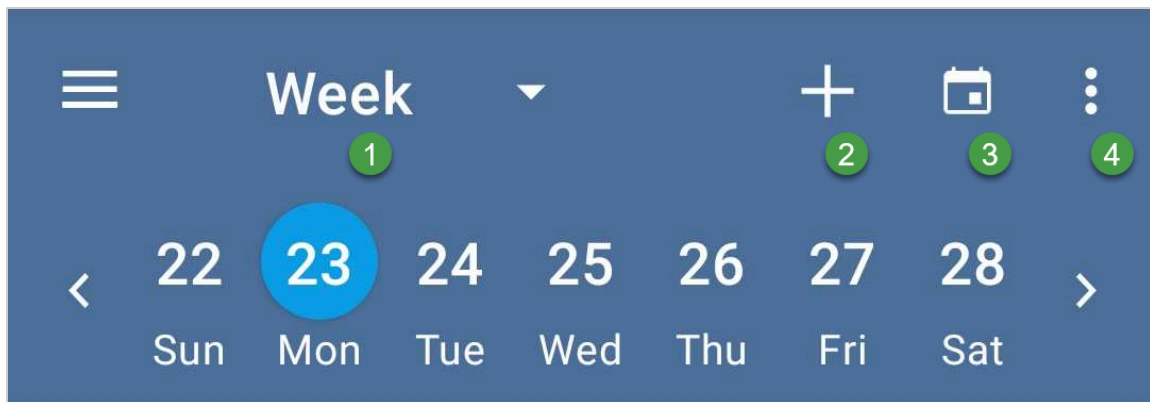

- Tap the Navigation Menu icon  and then tap **Calendar**.

The following sections cover information on working with the NetSuite for Android calendar.

- [The Calendar Navigation Bar in NetSuite for Android](#)
- [Calendar Icons in NetSuite for Android](#)
- [Adding a Calendar Item in NetSuite for Android](#)
- [Editing a Calendar Item in NetSuite for Android](#)
- [Responding to an Event in NetSuite for Android](#)
- [Deleting a Calendar Item in NetSuite for Android](#)
- [Adding a Shared Calendar in NetSuite for Android](#)

The Calendar Navigation Bar in NetSuite for Android

The Calendar Navigation bar offers options for viewing, adding items to, and configuring your calendar.

- **1. Week** - Tap to switch between calendar views. There are two view options:
 - **Week** - The default view is the Week view. The Week view displays a complete week with items grouped into days. All items for the corresponding day are displayed and can be accessed by tapping. You can move between weeks by tapping the arrow icons.
 - **List** - The List view displays a scrollable chronological list starting from the current date. Items display under the corresponding date. This view is useful when you need to quickly scan upcoming items, for example when arranging meetings.

- **2. Add icon** - Tap the Add icon to display a list of items you can add to the selected date. The options are:
 - **Event**
 - **Task**
 - **Phone Call**
- **3. Today icon** - Tap the today icon to return to the current date.
- **4. More icon** - Tap the More icon to display additional options:
 - **Customize** - Tap to go to the Customize Calendar screen.
 - **Go to date** - Tap to display a calendar in which you can access a specific date. The Go to date option is only available while using the Week view.

Note: To display phone calls and tasks in the NetSuite for Android calendar that do not have a specified time against them, first amend your Calendar preference in your NetSuite account. Go to setup on the required calendar portlet, and check non-blocking tasks and show non-blocking phone calls.

Calendar Icons in NetSuite for Android

The following table gives an overview of calendar icons for available calendar item types. The type of icon is determined by the item type and the current status of that item.

Event icons

Accepted	
Tentative	
Awaiting Response	

Task icons

Completed	
In progress	
Not started	

Phone Call icons

Completed	
Scheduled	

Note: Cancelled events do not appear in the app.

Adding a Calendar Item in NetSuite for Android

Follow this procedure to add an item to your calendar.

To add a calendar item:

1. Tap the Navigation Menu icon  and then tap **Calendar**.
2. Go to the date you want to add the item.
3. Tap the Add icon .

Note: Tapping the day in the calendar view below the Calendar Navigation bar has the same effect.

4. Select the type of item you want to add:
 - Event
 - Phone Call
 - Task
5. Fill out the required information for your item. This may vary depending on the type of item you choose.
6. To add the item to your calendar, tap the Tick icon .

Editing a Calendar Item in NetSuite for Android

Follow this procedure to edit an item in your calendar.

To edit a calendar item:

1. Tap the Navigation Menu icon  and then tap **Calendar**.
2. Navigate to the item you want to edit.
3. Tap the required event to access the event detail screen.
4. Tap the More icon , and then tap **Edit**.

Note: Only the event organizer can edit an event.

5. Edit the item as required.
6. To save your changes, tap the Tick icon .

Responding to an Event in NetSuite for Android

Follow this procedure to respond to an event.

To respond to an event:

1. Tap the Navigation Menu icon  and then tap **Calendar**.
2. Tap the required event to access the event detail screen.
3. Tap the More icon .
4. Tap one of the following options to choose your response to an event:
 - **Edit** (event organizer only)
 - **Quick Accept** - No further action is needed if you choose this option.
 - **Accept** - Tapping this option takes you to the Response screen.
 - **Decline** - Tapping this option takes you to the Response screen.
 - **Tentative** - Tapping this option takes you to the Response screen.
5. (Optional) Edit and customize your response to the event organizer in the Response screen:
 - Select **Send a response** or **Do not send a response** to either attach a response message or not.
 - You can add and edit your message in the **Message Text** window.
 - To set up a reminder for the event:
 - Tap **Reminder**.
 - From the time picker, tap the time of your reminder.
 - To choose the type of your reminder:
 - Tap **Reminder type**.
 - Select your reminder type.
6. To save and send your response, tap **OK**.

The event status is updated, and confirmed by the updated event icon in the calendar view.

Deleting a Calendar Item in NetSuite for Android

You can use this procedure to delete items from your calendar.

To delete an item:

1. Tap the Navigation Menu icon  and then tap **Calendar**.
2. Tap the required item to access the item detail screen.
3. Tap the More icon  and then tap **Edit**.
4. After the edit screen loads, tap the More icon again, and then tap **Delete**.
5. Confirm the action by tapping **Yes**.

 **Note:** Only the event organizer can delete an event.

Adding a Shared Calendar in NetSuite for Android

Follow this procedure to add a shared calendar in your app.

 **Note:** You can only view one calendar at a time.

To add a shared calendar:

1. Tap the Navigation Menu icon , and then tap **Calendar**.
2. Tap the More icon , and then tap **Customize**.
3. Tap the Add icon .
4. Tap the type of calendar you want to view the available calendars for that type.
5. Tap the calendar you want to add.
6. This adds the selected calendar to the **Calendars** list in the Customize Calendar screen, and sets it as the currently selected calendar in the calendar view.
7. Tap the Back icon  to return to view the selected calendar.

 **Note:** You can confirm the currently selected calendar by choosing a radio button in the **Customize Calendar**.

NetSuite for Mobile Record Management

The types of records you can view and edit depends on the role with which you log in.

The following sections cover information on managing records in NetSuite for Mobile.

- [Viewing a Record in NetSuite for Mobile](#)
- [Creating a Record in NetSuite for Mobile](#)
- [Editing a Record in NetSuite for Mobile](#)
- [Customizing a List in NetSuite for Android](#)
- [Adding a Record List to Favorites in NetSuite for Android](#)
- [Taking Quick Actions on Records in NetSuite for Android](#)
- [Attaching Files To a Record in NetSuite for Mobile](#)

Viewing a Record in NetSuite for Mobile

Follow this procedure to view a record in NetSuite for Mobile.

To view a record:

1. To access the list of available record types:
 - **For iOS**, on the Tab bar, tap **Records**.
 - **For Android**, tap the Navigation Menu icon , and then tap **Records**.
2. (Optional) To access a list of recently opened records, tap **Recents**.
3. From the list, tap the record type you want to access.
4. (Optional) You can apply filters and set view options for the list.
 - **For iOS**, see the following instructions.

1. From the record list, tap **View** at the top of the list.
 2. Configure the view options and set filters you want to use.
 3. To apply your changes, tap **Done**.
 - **For Android**, see the following instructions.
 1. Tap the More icon , and then tap **Customize List**.
 2. On the Customize List screen, you can set custom settings and filters for your list.
-  **Note:** The available options depend on the record type and your other customizations.
3. To save your customizations, tap the Back icon . Your customizations apply automatically.
 5. From the list, tap the record you want to view.
 6. The record opens in summary view.
 7. A predefined selection of Record sublists are displayed below the summary view. Tap the Record Menu icon  to reveal additional sublists. See [NetSuite for Mobile Sublist Management](#).

Creating a Record in NetSuite for Mobile

Follow this procedure to create a new record in NetSuite for Mobile.

To create a record:

1. Go to the records view:
 - **For iOS**, on the Tab bar, tap **Records**.
 - **For Android**, tap the Navigation Menu icon , and then tap **Records**.
2. To create a new record, tap the Add icon  next to the record type you want to create.
3. Edit the record details.
4. To save your record, tap **Save** on iOS or the tick icon on Android.

Editing a Record in NetSuite for Mobile

Follow this procedure to edit a record.

To edit a record:

1. Access the list of available record types:
 - **For iOS**, on the Tab bar, tap **Records**.
 - **For Android**, tap the Navigation Menu icon , and then tap **Records**.
2. (Optional) To access a list of recently opened records, tap **Recents**.
3. From the list, tap the record type you want to access.
4. Tap the record you want to edit.
5. To edit the record:
 - **For iOS**, tap **Edit**.

- **For Android**, tap the More icon  and then tap **Edit**.
- 6. Tap the Record Menu icon  to browse the record.
- 7. Edit the record details.
- 8. To save your changes:
 - **For iOS**, tap **Save**.
 - **For Android**, tap the Tick icon .

Customizing a List in NetSuite for Android

NetSuite for Android supports list customizations for standard and custom record types, including records you set as your favorites.

To customize a list in NetSuite for Android:

1. Tap the Navigation Menu icon , and then tap **Records**.
2. Tap the record type you want to customize.
3. On the record list screen, tap the More icon , and then tap **Customize List**.
4. On the Customize List screen, you can set custom settings and filters for your list.

 **Note:** The available options depend on the record type and your other customizations.

5. To save your customizations, tap the Back icon .
- Your customizations apply automatically.

Adding a Record List to Favorites in NetSuite for Android

NetSuite for Android enables you to select a list of favorite record lists that you can access from the Navigation Menu.

To add a record list to Favorites:

1. Tap the Navigation Menu icon , and then tap **Records**.
2. Tap the record type you want to customize.

 **Note:** If you want to add customizations to your list, add them before setting the list as your favorite. For more information, see [Customizing a List in NetSuite for Android](#).

3. On the record list screen, tap the More icon , and then tap **Add to Favorites**.
4. In the confirmation message, enter a name for your list.
5. Tap **OK**.

You can now access the list from the Favorites list in the Navigation Menu.

Taking Quick Actions on Records in NetSuite for Android

NetSuite for Android enables you to take quick actions on records in your record lists.

To take quick action on a record:

1. Tap the Navigation Menu icon  and then tap **Records**.
2. Tap the record type you want to access.
3. Touch and hold a record. A message with available quick actions appears.

 **Note:** The available quick actions depend on the record type and your role.

4. Tap the quick action you want to take.

Attaching Files To a Record in NetSuite for Mobile

Follow this procedure to attach files to a record in NetSuite for Mobile.

To attach files to a record:

1. Open the required record for editing, or create a new record.
2. Tap the Record Menu icon  to navigate the record.
3. Navigate to the required screen.
4. Tap the Add icon  to add a new file to the selected record.
5. Fill in any required fields.

 **Note:** The fields available are dependent on your current role and preferred form setup.

6. Tap **Folder** to change the location where the uploaded file will be stored.
7. Tap **Select File**, and then select an image. You can also take a new photo.

 **Note:** Take note of the following:

- You can only attach images in JPG or PNG file format.
- Images are reduced to a maximum resolution of 1024x1024 pixels, maintaining aspect ratio.

8. To save your changes:
 - **For iOS**, tap **Save**.
 - **For Android**, tap the Tick icon .

NetSuite for Mobile Sublist Management

When you view a record, a predefined selection of sublists displays below the summary view. You can navigate available sublists by tapping the Record Menu icon .

See the following sections for more information on managing sublist.

- [Viewing a Sublist Item](#)
- [Adding an Item to a Sublist](#)

Viewing a Sublist Item

Follow this procedure to view items in a sublist.

To view a sublist item:

1. Navigate to the required record. See [Viewing a Record in NetSuite for Mobile](#).
2. Tap the Record Menu icon  to navigate the available sublists.
3. Tap the sublist you want to access.
4. Tap the item you want to view.

Adding an Item to a Sublist

Follow this procedure to add items to a sublist.

To add an item to a sublist:

1. Navigate to the required record. See [Viewing a Record in NetSuite for Mobile](#).
2. To edit the record:
 - **For iOS**, tap **Edit**.
 - **For Android**, tap the More icon  and then tap **Edit**.
3. Tap the Record Menu icon  to navigate available sublists.
4. Tap the sublist you want to add an item to.
5. Tap the Add icon .

 **Note:** NetSuite for Mobile does not fully support all record types. In such cases, the Add icon is not displayed.

6. Enter the item data.
7. To save your changes:
 - **For iOS**, tap **Save**.
 - **For Android**, tap the Tick icon .

Tracking Calls with Phone Call Logging in NetSuite for iOS

 **Note:** Please note this feature is unavailable on Android due to API restrictions enforced by Google.

Phone Call Logging lets you track all calls initiated from the iOS version of the app. Phone Call logging can also remind you to log your last call. As soon as a call ends, a popup alert reminds you to log the call. The feature is on by default. To configure the Phone Call logging feature see [Configuring Phone Call Logging in NetSuite for iOS](#).

If you enable Phone Call Logging the Recent Calls portlet displays on your dashboard. This portlet lists your most recent outbound calls and provides a simple route to accessing all unlogged calls. See [NetSuite for Mobile Dashboards](#).

See the following sections for more information on phone call logging with NetSuite for iOS.

- [Logging a Phone Call in NetSuite for iOS](#)
- [Viewing a List of Recent Calls in NetSuite for iOS](#)
- [Viewing a List of Logged Phone Calls in NetSuite for iOS](#)

Logging a Phone Call in NetSuite for iOS

Follow this procedure to log a phone call.

To log a phone call:

1. Tap on the call in the Recent Calls portlet. See [NetSuite for Mobile Dashboards](#).
2. In the Log New Phone Call screen, enter details about the call. You can edit populated fields can if required.
3. After you enter the call details, tap **Save** to log the record. This removes the call from the list of unlogged calls in the Recent Calls portlet.

Note: Your administrator decides which fields you see and if they're required.

Logged calls are displayed in the Phone Calls list. If a call you recently logged is not showing in the list, refresh the screen data and check the filters you have set for that list. See [Viewing a List of Logged Phone Calls in NetSuite for iOS](#).

Viewing a List of Recent Calls in NetSuite for iOS

Follow this procedure to view a list of recent calls.

To view a list of recent calls:

1. In the Phone Calls portlet on the Dashboard, tap the Arrow icon . For more information, see [My Dashboard in NetSuite for iOS](#).
2. (Optional) Tap **All / Unlogged** to switch between viewing all recent calls and viewing only those that have not been logged.
3. (Optional) Tap **Clear** to clear all calls or clear only logged calls.

Viewing a List of Logged Phone Calls in NetSuite for iOS

Follow this procedure to view a list of logged phone calls.

To view a list of logged phone calls:

1. On the Tab bar, tap **More**.
2. Tap **Phone Calls**.

3. Control the order, filter, and view options by tapping the icons at the top of the screen.

Viewing Customer Activity Logs in NetSuite for Mobile

NetSuite for Mobile enables you to view recent activities related to a customer such as calls, events, invoices, and other interactions. This enables you to view different types of activities in one place instead of navigating to multiple screens to see certain activities.

To view the activity for a customer in NetSuite for iOS:

1. Go to Records > Customers. Swipe left on a customer.
2. Tap the Activity Log icon.
3. To view details for a certain activity, tap the record of this activity.

To view the activity for a customer in NetSuite for Android:

1. Go to Records > Customers. Tap the More icon on a customer.
2. Tap **Activity**.
3. To view details for a certain activity, tap the record of this activity.

Important: Transactions are ordered by their date of creation or date of last modification.

Note the following:

- Activities show up as a time line and are ordered from newest to oldest.
- Only interactions from the last four weeks are listed.
- Activity Log is available only for Customer records.

Creating and Attaching Notes to Customer Records in NetSuite for iOS

NetSuite for iOS enables you to attach notes to customer records. You can create these notes both offline and when you are logged in.

To create a note from within the app, from Records, tap Customers, swipe on a customer name, and then tap the note icon (pencil icon). You can select from existing notes or create a new note. The note is then attached to this customer record, and it shows in the Memo field. You can also view this note if you go to the customer name and then tap Communication > User Notes.

To create a note offline, on the login screen, tap the plus icon, tap Notes, and then tap the plus icon. You can attach this note to a customer after you have logged into the app.

My Approvals in NetSuite for Mobile

The My Approvals portlet provides a reminder of any outstanding expenses, purchase orders, time entries, and time sheets awaiting your authorization. Whenever you log in with a role with expense report,

purchase order, or track time permissions enabled, NetSuite for Mobile adds the My Approvals portlet to My Dashboard. You also need to have subordinates reporting to you.

 **Tip:** The My Approvals portlet removes the need for users to set up separate Purchase Orders or Expense Report approval reminders on their Reminders portlet. If you still wish to see these reminders on your desktop application, simply reorder them so that purchase orders and expense reports do not appear in the first three items on the list (the current maximum number of reminders displayed on the Reminders portlet in the app). You can still view all of your reminders by tapping View list on the Reminders portlet.

Tapping any of the approval types displays a list containing the items awaiting your approval. From the approval list screen, you can approve both individual and multiple requests. You can search through a list of items pending approval by using the context search field at the top of the list.

 **Note:** Take note of the following:

- NetSuite for Mobile supports Approval Routing
- Custom SuiteFlow workflows are not supported

See the following topics for more information on working with the My Approvals portlet.

- [Approving Individual Requests in NetSuite for Mobile](#)
- [Rejecting Individual Requests in NetSuite for Mobile](#)
- [Approving Multiple Requests in NetSuite for Mobile](#)
- [Rejecting Multiple Requests in NetSuite for Mobile](#)
- [Viewing a Request Detail in NetSuite for Mobile](#)
- [Accessing the Full Record of a Request in NetSuite for Mobile](#)

Approving Individual Requests in NetSuite for Mobile

Follow this procedure to approve an individual request.

To approve an individual request:

1. From My Dashboard, on the My Approvals portlet, tap a category (for example Expense Reports).
2. Do one of the following:
 - **For iOS**, swipe right to left alongside the relevant entry, and then tap **Approve**.
 - **For Android**, tap the More icon  alongside each entry, and then tap **Approve**.

Rejecting Individual Requests in NetSuite for Mobile

Follow this procedure to reject an individual request.

To reject an individual request:

1. From My Dashboard, tap a category (for example Expense Reports) on the My Approvals portlet.
2. Do one of the following:

- **For iOS**, swipe right to left alongside the relevant entry, and then tap **Reject**.
- **For Android**, tap the More icon  alongside each entry, and then tap **Reject**.

Approving Multiple Requests in NetSuite for Mobile

You can approve multiple requests at once.

To approve multiple requests:

1. From My Dashboard, tap a category (for example Expense Reports) on the My Approvals portlet.
2. Do one of the following:
 - **For iOS**, tap **Select**.
 - **For Android**, tap the Multi-Select icon .
3. Select the requests you want to approve.
4. To approve the selected requests:
 - **For iOS**, tap **Approve**.
 - **For Android**, tap the Tick icon .
5. (Optional) To approve all requests at once:
 - **For iOS**, tap **Approve All**, and then tap **Confirm**.
 - **For Android**, tap the Select All icon  and then tap the Tick icon.

Rejecting Multiple Requests in NetSuite for Mobile

Follow this procedure to reject multiple requests.

 **Note:** Rejecting multiple requests is only available for Timesheets and Time Entries.

To reject multiple requests

1. From My Dashboard, tap a category (for example Timesheets) on the My Approvals portlet.
2. Tap **Select**.
3. (Optional) To reject all requests at once, tap **Reject All**, and then tap **Confirm**.
4. Select the requests you want to reject.
5. Tap **Reject** to confirm.

 **Note:** A pop-up window may prompt you to specify a reason for rejection.

Viewing a Request Detail in NetSuite for Mobile

The detailed view displays a summary of a request. You can approve or reject requests from this view. You can also access attachments or the full record.

To view a request detail:

1. From My Dashboard, tap a category (for example Expense Reports) on the My Approvals portlet.
2. Tap a request you want to view.
3. (Optional) Tap an individual entry under the **Items** subtab to view any attachments associated with that entry.

 **Note:** Image previews automatically load up to 5 MB on Wi-Fi connections, and 2 MB on cellular connections. You receive a prompt to continue, for files larger than these thresholds.

4. (Optional) You can approve or reject the request.
 - **For iOS**, tap **Approve** or **Reject**.
 - **For Android**, tap the Tick icon  to approve or the Cancel icon  to reject the request.
5. (Optional) You can view the full record.
 - **For iOS**, tap **Full Record**.
 - **For Android**, tap the More icon  and then tap **Full Record**.

Accessing the Full Record of a Request in NetSuite for Mobile

You can access the complete record from NetSuite and displays it within the app.

To access the full record of a request:

1. From My Dashboard, tap a category (for example Expense Reports) on the My Approvals portlet.
2. To access the full record for a request:
 - **For iOS**, swipe right to left alongside the relevant request, and then tap **Full Record**.
 - **For Android**, tap the More icon , and then tap **Full Record**.
3. You can navigate the full record by tapping the Record Menu icon .
4. You can approve or reject the request.
 - **For iOS**, tap **Approve** or tap the Arrow icon , and then tap **Reject**.
 - **For Android**, tap the More icon , and then tap **Approve** or **Reject**.

 **Note:** Administrator and Accountant roles can also edit requests from this view:

- **For iOS**, tap **Edit**.
- **For Android**, tap the More icon, and then tap **Edit**.

Accessing Saved Searches in the App

If you add the Custom Searches portlet to your Home dashboard in a browser session, it also appears on your app's Home dashboard. See [NetSuite for Mobile Dashboards](#).

To access a saved search in the app:

1. Do one of the following:
 - **For iOS**, from your Home dashboard in your Custom Searches portlet, tap the Arrow icon .
 - **For Android**, from your Home dashboard in your Custom Searches portlet, tap **View List**.

 **Note:** NetSuite for Mobile enables you to configure the Custom Searches portlet for any web dashboard or pin it to My Dashboard. For more information, see [NetSuite for Mobile Dashboards](#).

2. (Optional) If you do not have access to the Custom Searches portlet, do one of the following:
 - **For iOS**, on the Navigation Tab bar, tap **More**, and then tap **Saved Searches**.
 - **For Android**, tap the Navigation Menu icon , and then tap **Saved Searches**.
3. Scroll down the list to find the saved search you want to access.

 **Note:** Take note of the following:

- You can scroll to the bottom of the list to load additional searches.
- NetSuite for Android enables you to search the saved searches list by tapping the Search icon .

4. Tap the required saved search.

 **Note:** Filters for saved searches are not available in the app. You can use a browser session if you require filters for saved searches.

NetSuite for Mobile FAQ

The following sections cover frequently asked questions related to the NetSuite for Mobile application.

- [Setup and Login](#)
- [Security](#)
- [Usability](#)
- [Expense Features](#)
- [Working with Records](#)

Setup and Login

Frequently asked questions related to setup and login.

[Where do I download the app from?](#)

You can download the app for free from Apple's App Store or the Google Play Store.

Update notifications are provided within the app.

[What are the system requirements for running the app?](#)

For iOS, version 16 or greater. For Android, version Android version 11 or higher.

[Can I use the app on my iPad and tablet?](#)

Yes, but because the app was primarily designed for smart phones, it will run in 2 x mode on these devices.

[Can I reset my forgotten password?](#)

Yes. Password reset is available from the login screen. See [Resetting a Forgotten Password from NetSuite for Mobile](#).

[I am an Administrator, can I reset my users' passwords?](#)

Yes. you have the same access to employee records as you have with the NetSuite web application. See [Editing a Record in NetSuite for Mobile](#) and [Changing a User's NetSuite Password](#).

[Do you support Single Sign-on login?](#)

Yes. Your role should have SAML Single Sign-on and Mobile Device Access permissions added. The first time you log in with SSO on the app you will also need to enter your NetSuite company Account ID. For more information, see [Logging into NetSuite for Mobile with Single Sign-on](#).

[Do you support login with biometric authentication?](#)

Yes, to enable logging in with biometric authentication see [NetSuite for Mobile Biometric ID Login](#).

[What does 'You do not have permission to log in using this role on a mobile device. Please contact your NetSuite administrator.' mean?](#)

The role you are using does not have the Mobile Device Access permission enabled. Only standard roles are enabled by default. Customized roles require the Mobile Device Access permission to be added. See [Mobile Device Access Permission](#).

Why am I unable to log in with my Administrator role?

If you require NetSuite access from a mobile device using a non-standard role, you need to add the Mobile Device Access permission to this role. This permission can be added to the System Administrator and customized roles. This permission cannot be added to the Administrator role.

If you are an administrator and require mobile access for the Administrator role, you can assign yourself a custom role that has mobile access enabled. See [Mobile Device Access Permission](#).

Important: We do not recommend accessing your NetSuite account on a mobile device using roles that have full access to your data.

Can I use NetSuite for Mobile with a VPN connection?

Yes. The app requires no configuration to work with a VPN.

Security

Frequently asked questions related to security concerns.

Is the Remember Me function secure?

Your login details are stored using Apple's Keychain security functionality for iOS or Android's KeyStore security for Android. See [Saving your Login Details in NetSuite for Mobile](#).

Is any of my confidential information being stored on my mobile device?

None of your NetSuite data is stored on your mobile device unless you choose to enable Remember Me, in which case your login details will be encrypted and stored using Apple's Keychain security functionality for iOS or Android's KeyStore security for Android. See [Mobile Data Security](#) and [Saving your Login Details in NetSuite for Mobile](#).

How secure is data transfer between the NetSuite Mobile app and NetSuite?

Data transfer between the NetSuite Mobile app and NetSuite is secured by SSL encryption by default and valid certificates with strong keys are required.

Usability

Frequently asked questions related to general usability of the app.

What's the maximum PDF file size I can attach to an expense?

The maximum file size for PDF attachments is 2 MB.

Note: Attaching PDF files to expenses is only supported on NetSuite for Android. PDF attachments are not supported by any other record.

How much data does the app use?

All communication is compressed and encrypted. On average, the app consumes less than 10 MB of data per month.

How do I shrink large images when uploading through the Android app?

The resolution of receipt images can be managed from the settings menu. There are three options:

- 960 x 960
- 1280 x 1280
- 2048 x 2048

 **Note:** Uploading multiple images at this resolution may cause issues on older devices and slow connections.

The maximum file size for each image upload is 5 MB.

Is the app available offline?

Yes. You can capture expenses and use the timer offline. Enable offline features from the login screen, and accept the terms and conditions.

Why is my dashboard empty?

No supported portlets have been configured on your web application dashboard. For more information, see [NetSuite for Mobile Dashboards](#).

How can I change the first (default) screen?

The My Dashboard screen has many configuration options. You can make the following configurations:

- Reorder portlets.
- Define which portlets are displayed.

For more information, see [NetSuite for Mobile Dashboards](#).

You can also reorganize which shortcuts are displayed on the Tab Bar at the bottom of the screen with NetSuite for iOS. For more information, see [Configuring the Tab Bar in NetSuite for iOS](#).

How do I enable file uploads?

For the majority of users, file uploads will work without any configuration. You should make sure **File Cabinet** is enabled at Setup > Company > Enable Features, Data Management column, and a folder location is already defined in NetSuite for expense reports. The app uses this folder as its default image upload folder. If an expense reports folder has not been set up, the app uses the Images folder.

Expense Features

Frequently asked questions related to expense reporting.

When I upload an expense, is it synced to other devices automatically?

Expenses that you have locally on your device are not synced automatically to other devices unless you submit them with an expense report.

What happens to my expenses if I reset the app?

If you reset the app or device without submitting expenses with an expense report, you'll lose them.

How do I get a list of expense reports that are awaiting approval from my manager?

To see expense reports waiting for approval, go to My Expenses on My Dashboard and do one of the following:

- **For iOS**, tap the Arrow icon .
- **For Android**, tap **In Progress**.

For more information, see [NetSuite for Mobile Expense Reporting](#).

How do I view expense reports from my subordinates that are awaiting my approval?

From My Dashboard, on the My Approvals portlet, tap **Expense Reports**. A list of expense reports submitted by your subordinates requiring your displays.

For more information, see [My Approvals in NetSuite for Mobile](#).

How do I attach files to expense reports?

You can attach files to expense reports by adding files to individual expenses.

 **Note:** Take note of the following:

- NetSuite for Mobile does not support PDF attachments in the Communications subtab.
- You can add up to four attachments to an expense.

From the full record of the expense report, tap the More icon , and then tap Edit. Tap the Record Menu icon  to navigate the record. To go to the expenses list, tap Expenses. Tap the expense you want to add a file to. Tap the Attach File field. On the Expenses screen, tap Select File. You can attach a file by taking a photo or by attaching an existing file:

- To capture a new image of a bill or receipt for the expense:
 - **For iOS**, tap the Camera icon , and then tap **Capture using Camera**.
 - **For Android**, tap **Take a Photo**.
- To attach an existing file to the expense:
 - **For iOS**, tap the Camera icon, and then tap **Choose existing from Gallery**.

 **Note:** NetSuite for iOS supports JPG and PNG formats.

- **For Android**, tap **Pick a File**.

 **Note:** NetSuite for Android supports PDF, JPG, and PNG formats.

- To save your changes:
 - **For iOS**, tap **Done**.
 - **For Android**, tap the Tick icon .

For more information, see [Attaching Files To a Record in NetSuite for Mobile](#) and [Logging an Expense with NetSuite for Mobile](#).

What actions are supported?

In iOS, swiping from right to left on an item reveals the actions menu. The following options are available:

All record types	Edit
Contacts, Customers, Leads, and Prospects	Call, Map, Email, Text, Edit
Phone Calls	Complete, Call, Text, Edit
Tasks	Complete, Edit
Approvals	Approve, Complete

Working with Records

Frequently asked questions related to record management.

What records are supported?

See the help topic [Mobile Supported Record Types](#).

Does the app support custom records?

Yes. Users have complete access to custom records including support for view, edit, create, and delete (for any custom records already accessible through the NetSuite web application). You can access Saved Searches based on custom records. You can also use the Global Search feature (including view, edit, create, and delete) to search for any custom records already accessible through the NetSuite desktop application.

I would like to modify the entry form used for customer records. How do I change the entry form for a specific record type?

The app uses the preferred form defined for your role. To change the entry form for a specific record type, open a browser session and define your preferred form. See the help topic [Defining Preferred Forms](#).

How do I change which fields are displayed on the Summary screen of a record?

Modify the QuickView fields for your preferred view. See the help topic [Configuring QuickViews](#).

I cannot access some of my custom records. How do I make all custom records visible on my app?

To be accessible from a mobile device, custom record types must have both the Allow UI Access and the Allow Mobile Access boxes checked. See the help topics [Creating Custom Record Types](#) and [Prevent Access to a Custom Record Type through the User Interface](#).

My Saved Search is not showing up as a view?

Make sure that you have checked Available as List view when configuring the Saved Search. See the help topic [Using a Saved Search as a View](#).

How do I add more filters for a specific list?

Only filters which have been exposed as Available Filters on the Saved Search/View are available on NetSuite for iOS. Check that the Saved Search/View is configured with the required filters. See the help topic [Customizing List Views](#).

NetSuite for Mobile Troubleshooting

Try these troubleshooting tips before reaching out to support.

- [NetSuite for Mobile No Data Returned Error](#)
- [Cannot Log into NetSuite for Mobile](#)
- [NetSuite for Mobile Cannot Capture Image from Expenses Screen Error](#)
- [Contacting Support About Your NetSuite for Mobile App](#)

NetSuite for Mobile No Data Returned Error

You may receive a No Data Returned error message. This may be due to a lost internet connection. Follow the steps in this procedure to correct the error.

To clear a connection error:

1. Reposition the device to restore the internet signal.
2. When connectivity is restored, refresh the screen to reload the data.

Cannot Log into NetSuite for Mobile

If you cannot log in, it could be due to any of the following:

- A connection error - see [NetSuite for Mobile No Data Returned Error](#).
- An invalid email address or password - check your login details and try again. Make sure your entry is not changed by auto-correct. If you are sure that you are entering the correct details, contact your account administrator.

NetSuite for Mobile Cannot Capture Image from Expenses Screen Error

You may experience compatibility issues with the default camera app with some Motorola phones. If you are experiencing issues while trying to capture an image from the expenses screen, Try switching to a third-party camera app. Make sure you set the third party camera app as the default camera app. The following camera app may work as a substitute:

- Open Camera

Known Issues when Sharing Files to NetSuite for iOS

When sharing files or images to NetSuite for iOS from your Photos app or Files app, be aware of the following known issues:

- It's not possible to share JPEG images from Safari to NetSuite for iOS.
- It's not possible to share a PDF from Messenger to NetSuite for iOS.
- When you are logging an expense from within NetSuite for iOS, and you tap and hold on a file, iOS offers you the Share option again. The Share option in this context is not supported.

Contacting Support About Your NetSuite for Mobile App

If you cannot find the answer to your problem here, you might need to contact support. The following advice will save you time when speaking to support.

 **Note:** Before contacting customer support, try logging out of the app and back in again. This will renew your session. If the error persists, please contact NetSuite Customer Support.

 **Note:** Take note of the following:

- Make a note of the sequence of actions that caused the error
- If you receive an error dialog on the screen, make a note of it. It may be useful to take a screenshot of the error dialog.

To contact Support from within the app:

- **For iOS**, go to the Account Menu  > About > Contact Support.
- **For Android** go to Navigation Menu  > About > Contact Support.

Go to the About screen to display information that could assist the support representative.

- **For iOS**, tap the Account Menu icon, and then tap **About**.
- **For Android** tap the Menu icon, and then tap **About**.
