Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Payment Automation SuiteApp

The Payment Automation SuiteApp lets you automate all your vendor payments from within NetSuite, and pay your suppliers by checks, virtual cards, and ACH.

Benefits of the Payment Automation SuiteApp:

1. **Enjoy one integrated solution**
 - Manage your AP processes in your NetSuite account
 - Better control of outgoing cash flows
 - Easily scale end-to-end AP processes
2. **Save time and money**
 - Cut back on manual processing time
 - Replace manual data entry
 - Streamline AP processes
3. **Improve working capital with Virtual Card payments**
 - Optimize cash flow by making payments through extended credit
 - Earn 1% cash back on all eligible Virtual Card spend
4. **Reduce fraud and human error**
 - Define and apply strict rules and approval workflows
 - Helps you catch fraudulent invoices before they are paid
 - Avoid sharing sensitive financial data with suppliers
5. **Improve visibility and control**
 - Monitor, track, and analyze each stage of the AP process
 - Gain insights to make better decisions
6. **Automate reconciliation processes and reduce errors**
 - Eliminate error-prone manual reconciliation
 - Enable a faster financial close

Read the following topics to learn more about the Payment Automation SuiteApp:

- [Overview](#)
- [Setting Up Payment Automation](#)
- [Making Money Transfers](#)
- [Processing Payments](#)
- [Statements and Reconciliation](#)
- [Frequently Asked Questions about Payment Automation](#)

Overview

Payment Automation is a powerful combination of technology automation provided by NetSuite and banking services provided by HSBC for capturing and paying vendor bills.

Payment Automation is a part of the AP Automation paid module. For information about enabling Payment Automation, contact your account representative.

The Payment Automation SuiteApp is available on the Marketplace, and it's free to download. For more information, see the help topic [Installing from the SuiteApp Marketplace](#).

Note: Provisioning from Bill team is not needed to install the SuiteApp.

For an overview of transaction charges associated with using Payment Automation, see [HSBC Processing Fees](#).

Payment Automation provides the following benefits:

- Time savings – process vendor payments faster. You can stay in NetSuite and don't have to use another application to enter payments details and process payments.
- Increased transparency – track payment status through payment processing stages.
- Early payment discounts – use different payment options to simplify the process of paying suppliers. For financial savings, take advantage of early payment discounts offered by suppliers.
- Increase supplier satisfaction – automate payment results to achieve faster payment processing cycles. Your suppliers get paid promptly, which helps build strong relationships.
- Extended payment terms – with virtual cards, you can extend the credit terms for up to 55 days depending on when payments are processed in the billing cycle. For more information, see [Virtual Card Billing Cycle](#).

Key Features

Payment Automation Dashboard

Get a complete overview of all bank and virtual card activity, and see the real-time account balances. Your company gains unprecedented visibility and control of your bank accounts and Virtual Cards.

Set up and manage account details, monitor the status of vendor payments, review transaction history, and keep track of current balances with daily and real-time updates.

Access the current bank balance, monthly statements, transaction history, payment status, and other account details.

Track the status of your payments. The payment status is continuously updated. For more information about payment statuses, see [Overview of Payment Statuses](#).

For more information, see [Payment Automation Dashboard](#).

Multiple Payment Options

You can pay your vendors with electronic payment (Automated Clearing House (ACH)), virtual card, and check. The vendor must accept these payment methods and the payment methods must be set up on the vendor record.

For information about onboarding vendors to use with Payment Automation, see [Setting Up Vendors](#).

For information about supported modes of payment, see [Payment Options](#).

Automated End-to-End Workflow

Payment Automation saves you time and effort by reconciling HSBC bank and Virtual Card accounts with NetSuite.

Bank and card data are automatically imported and matched daily, which simplifies the traditional tedious task of reconciling bank and Virtual Card statements. Payment Automation handles daily bank downloads, and automatically matches transactions to bank account details. Discrepancies are flagged for further review.

You can download monthly statements for your review within NetSuite. For more information, see the following topics:

- [Statements and Reconciliation](#)
- [Statement and Auto-Debit Payment Schedules](#)
- [Transaction Fees Statement Schedule](#)

Multi-Subsidiary Support

The Payment Automation SuiteApp supports multiple subsidiaries. OneWorld users with multiple US subsidiaries can apply for HSBC accounts in each US subsidiary and can process payments from each US subsidiary.

For more information, see [Multi-Subsidiary Support](#).

Payment Automation Current Limitations

- Only companies located in the United States can use Payment Automation to pay suppliers in the United States.
- Multi-Subsidiary support is limited to US operations.
- The only supported currency is USD.
- You can manage the HSBC Online Account only from the NetSuite platform. Services outside of the NetSuite platform, such as branch services, and deposits of checks and cash, are unauthorized and HSBC is not liable for such transactions.
- You can't import bill payments by CSV.
- You can't edit vendors using Web Services or SuiteScript.
- You can't select more than 400 bills for payment at a time.
- If issued cards are not used, then they are not reflected in the calculation of available balance and outstanding cards. The cards are not displayed in the statements.
- You can't use multiple source accounts to auto-fund the HSBC Online Account at the same time.
- Payment Automation isn't compatible with sandbox accounts. Do not install the Payment Automation SuiteApp on a sandbox account because the SuiteApp is directly integrated with an HSBC production account.
- You can't enter more than 140 characters in the Memo field on the bill payment record.
- Bulk payment processing doesn't support selection of classification fields such as Department, Class and Location.
- Expense reports and customer refunds aren't supported.
- The Auto Place Decimal preference isn't supported. Go to Home > Set Preferences > General. In the **Formatting** subtab, make sure the **Auto Place Decimal** box is cleared. Enabling this preference may cause unwanted updates to transaction amounts calculated during money transfer requests in payment processing.
- Bulk bill payment processing and batch payment approval support up to 5000 bills and are limited to 400 bills per vendor.

Payment Automation Dashboard

You must install the Payment Automation SuiteApp before you can access the Payment Automation dashboard. For instructions, see [Installing the Payment Automation SuiteApp](#).

For more information about accessing a subsidiary account or switching between subsidiaries accounts, see [Switching Dashboards Between Subsidiaries](#).

Overview page

- The HSBC Online Account portlet shows the current account balance, account number, routing number, the daily transaction limit, and the remaining daily transaction limit. For more information, see [HSBC Online Account Portlet](#).
- The HSBC Virtual Card portlet shows the current account balance, account ID, total credit limit, unsettled amount and the scheduled payment date. For more information, see [HSBC Virtual Card Portlet](#).
- The Payments portlet shows the amounts that have been approved and paid to vendors each month through ACH, checks, and by virtual cards.
- The Payables portlet displays the open balance of bills to be paid, and the amount due this week and next week. When applicable, a highlighted overdue amount line is displayed. The Payables portlet displays the payable balance of vendors that were flagged for Payment Automation.
- The Reminder portlet gives you an overview of:
 - Payments pending for approval if vendor payment approval routing is enabled.
 - Canceled payments.
 - Virtual cards expiring in seven days or fewer.

Navigation pane

In the navigation pane on the left side of the dashboard:

- To submit a bulk bill for payment processing, click **Bills**. For instructions, see [Processing Payments](#).
- For an overview of your payments and their current status, click **Payments**.
- To determine the status of your issued virtual cards, click **Cards**.
- For a list of eligible vendors, vendors requiring approval, and SuiteBanking vendors, click **Vendors**.

Note: You can search for payments using the check number on the Payments page of the dashboard.

HSBC Online Account Portlet

The HSBC Online Account portlet shows the current account balance, account number, routing number, the daily transaction limit, and the remaining daily transaction limit.

Click **Account Details** in the portlet or **Bank Accounts** on the navigation pane to:

- Set up auto-funding. For instructions, see [Auto-Funding](#).
- Match bank data. For instructions, see [Statements and Reconciliation](#).
- Download monthly statements and invoices, see [Statements and Reconciliation](#).
- View the account registry, see [Account Registry for HSBC Online Account](#).

Account Registry for HSBC Online Account

The account registry displays all the posted transactions for the bank account. It provides a comprehensive view of account activities, cash flow movement and current status of payments similar to

account registry of GL. The transactions will include adding money, withdrawing money, payments, auto funding, and reversed payments.

The Account Registry is represented as <GL Name> + <Register Number>.

You can use the quick search and date filters to display specific transactions. The following information is available for a transaction:

- Date
- Number
- Type
- Payee
- Memo
- Status
- Payment
- Deposit
- Balance

You can export the payments into CSV from the Dashboard by clicking the **Export CSV** button.

 **Note:** Go to Home > Set Preferences > General. In the **Formatting** subtab, you can change the **Date Format** and the **Time Format**.

HSBC Virtual Card Portlet

The HSBC Virtual Card portlet shows the current account balance, account ID, total credit limit, unsettled amount and the scheduled payment date. Unsettled amount is the sum of issued cards that have not been used yet.

Click **Card Details** in the portlet or **Cards** on the navigation pane to:

- Match bank data. For instructions, see [Statements and Reconciliation](#).
- Access a list of all issued virtual cards and statements. For more information, see [To download a virtual card statement](#).
- View the account registry. For more information, see [Account Registry for HSBC Virtual Card](#).

Account Registry for HSBC Virtual Card

The account registry displays all the posted transactions for the virtual card. It provides a comprehensive view of account activities, cash flow movement and current status of payments similar to account registry of GL. The transactions will include adding money, withdrawing money, payments, auto funding, and reversed payments.

The Account Registry is represented as <GL Name> + <Register Number>.

You can use the quick search and date filters to display specific transactions. The following information is available for a transaction:

- Date
- Number
- Type

- Payee
- Memo
- Status
- Charge
- Credit
- Balance

You can export the payments into CSV from the Dashboard by clicking the **Export CSV** button.

Note: Go to Home > Set Preferences > General. In the **Formatting** subtab, you can change the **Date Format** and the **Time Format**.

Payment Options

Payment Automation supports the following modes of payments:

- [ACH](#)
- [Virtual Card](#)
- [Check](#)

ACH

Connect your HSBC Online Account to your source bank account, and payment funding will be transferred automatically through ACH direct debit.

ACH payments are deducted from your HSBC Online Account and deposited directly to the vendor's bank account.

Total value of ACH and check payments in a given day may be transacted up to the daily ACH limit. HSBC communicates the daily ACH limit to you after your onboarding is successfully completed. You can see your ACH limit in the HSBC Online Account portlet on the Payment Automation dashboard.

Payments are submitted in batches and typically take three business days to settle.

The ACH batch cut-off time is 8 pm Eastern Time. Payments initiated after 8 pm Eastern Time will be sent at 5 am the next business day.

Virtual Card

After a payment request, a single-use virtual card is generated from the HSBC virtual card account within 15 minutes after being sent for processing. Then, the vendor uses the virtual card number to pay the bills. With the virtual card mode of payment, your HSBC virtual card account is automatically updated and debited to reflect the payment.

The 16-digit virtual card number required to process a payment is communicated to the vendor in the remittance email that is automatically generated. For details, see [Reviewing Remittance Email](#). For more information, see [Setting Up Vendors](#).

A virtual card expires after 30 days. The vendor will receive an automatic email reminder after 7, 14, and 21 days. If a virtual card expires, you'll receive an email notification, a cancellation email, and the payment will be voided.

You can have up to 55 days to repay the virtual card depending on when payments are processed in the billing cycle. For more information, see [Virtual Card Billing Cycle](#).

Annual Virtual Card Statement Credit

On your one-year anniversary, you'll receive back 1% of the amount of eligible virtual card posted transactions from that period.

The annual statement credit has no upper limit. Transactions that were returned or reported as fraudulent are not eligible.

The balance is accumulated for 12 months. On your one-year anniversary, the credit appears on your virtual card statement.

You can:

- use the credit to reduce your virtual card balance for the current month.
- contact virtual card customer support at 1-800-411-9264 to request a transfer of your credit to your HSBC Online Account.

Check

Connect your HSBC Online Account to your source bank account and payment funding will be transferred automatically through ACH direct debit. Total value of ACH and check payments in a given day may be transacted up to the daily ACH limit.

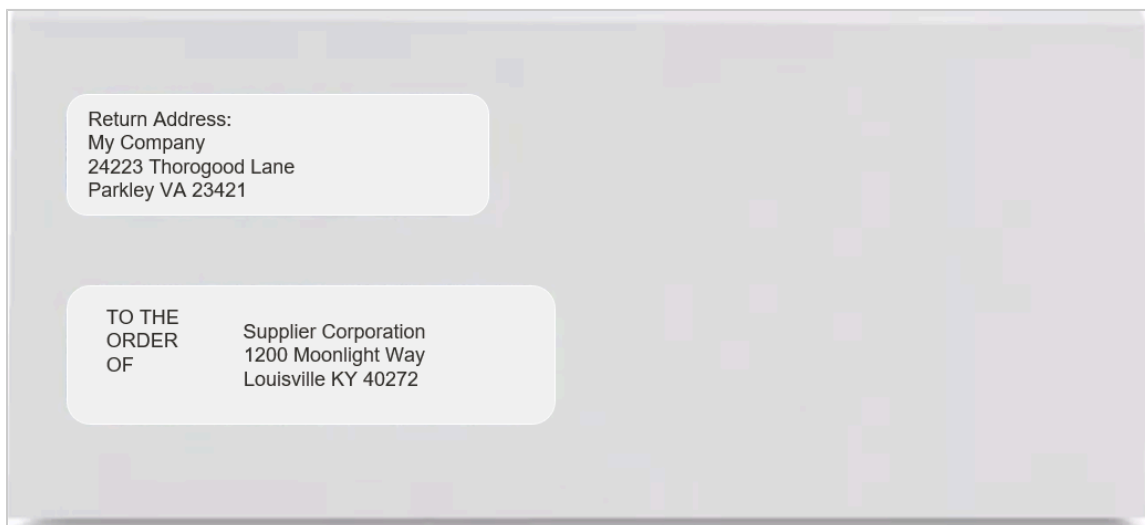

Use this mode of payment to pay your vendors by check. HSBC will print and mail the physical checks from their Jacksonville, FL facility. Checks are sent to your vendors through USPS First Class Mail service.

HSBC check payments are on standard check stock and don't include your logo or digitized signature.

Note: Checks don't include printed remittance information. The remittance notifications are sent using email. For more information, see [Reviewing Remittance Email](#)

Check payments submitted by 8 pm Eastern Time will be printed and mailed on the second business day.

Payment Batch Cut-Off Times Overview

Payments are sent for processing every hour on the hour. A payment has the For Submission status until the payment is sent to the payment processor.

Note: If a timeout error occurs during payment submission to payment processor, the transaction is removed from the current batch and processed in the next batch.

The table in this section provides an overview of the payment batch cut-off times in the Eastern Time Zone (ET) for each mode of payment.

This cut-off time refers to the latest time you can submit and, if applicable, authorize a payment on the Payment Automation dashboard for processing on that same day.

ACH and check payments submitted and authorized after the cut-off time will be processed at 5 am the next business day. A business day is any day except Saturday, Sunday or a US federal holiday observed by the Federal Reserve Banks. A list of Federal Reserve holidays can be accessed on [Federal Reserve Board - Holidays Observed - K.8](#). Payments are deducted from the daily ACH limit for the day in which they are processed.

Transaction Type	NetSuite Last Batch Included (ET)
Check	8:00 pm
ACH	8:00 pm

Virtual card processing is available at all times.

Transaction Settlement

Before you make any payments, you must set up auto-funding. Auto-funding is required to automatically fund the HSBC Online Account and settle your monthly HSBC transaction processing fees statement and virtual card bill.

After you set up your auto-funding account, funds are automatically pulled from your source bank account prior to the date the payments are made to the payees, so funds availability is ensured.

For more information about transaction settlement with auto-funding, see [Funding Cycle](#).

HSBC Processing Fees

For information about ACH processing fees and check processing fees, check the 'HSBC Terms and Charges' section within the Oracle NetSuite Platform HSBC Terms PDF file provided by HSBC [Embedded Banking Useful Documents and Links](#).

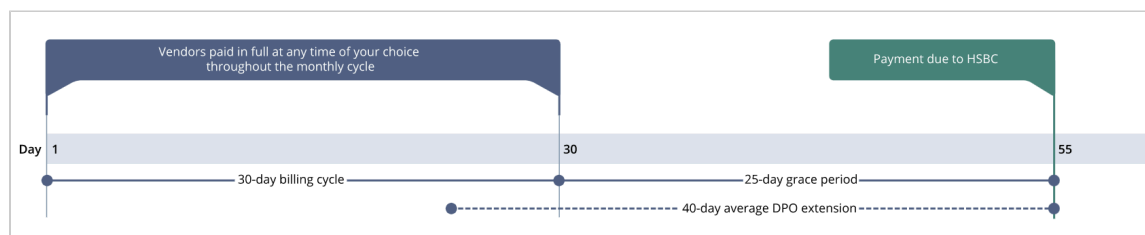

No fee is associated with virtual card payments.

For information about what happens in case of insufficient funds in the HSBC Online Account and how funds move after a payment is submitted, see [Auto-Funding](#).

For billing schedules, see [Statement and Auto-Debit Payment Schedules](#).

Virtual Card Billing Cycle

The following figure illustrates how credit terms with virtual cards can be extended for up to 55 days, depending on when payments are processed.

You can't make changes to the billing cycle.

Debit Blocking

Your HSBC Online Account is automatically configured to block ACH debits initiated by parties other than you and HSBC.

An additional security feature to your HSBC Online Account allows certain transactions such as:

- automatic debits for the amount due on your virtual card billing statement. For more information, see [Virtual Card Statement Schedule](#) and [Virtual Card Billing Cycle](#).
- automatic debits for the amount due for processing fees. For more information, see [Transaction Fees Statement Schedule](#).
- any returns of the auto-funding requests to your source bank account.
- any system debits initiated by HSBC to correct processing errors or make other adjustments.

Multi-Subsidiary Support

The Payment Automation SuiteApp supports multiple subsidiaries. OneWorld users with multiple US subsidiaries can apply for HSBC accounts in each US subsidiary and can process payments from each US subsidiary.

In your NetSuite One World Account, go to SuiteBanking > HSBC Application > Apply > New Application and select the subsidiary to apply for HSBC Online Account. For more information, see [Applying for an HSBC Online Account](#).

You'll need to perform the following actions for all subsidiaries at the NetSuite level:

- [Generating Payment Tokens](#)
- [GUID Setup](#)

You'll need to perform the following actions separately for each subsidiary:

- [Auto-Funding](#)
- [Setting Up Vendors](#)
- [Setting Up Vendor Payment Approval Routing](#)
- [Setting Up Batch Approval Routing](#)
- [Setting Up Two-Factor Authentication \(2FA\)](#)
- [Setting Up Roles and Permissions](#)
- [Setting up a Custom Role to Make Money Transfers](#)
- [Setting Default Department, Class, and Location Values](#)
- [Setting Email Preference](#)
- [Setting Default Bank Fees Account](#)

Switching Dashboards Between Subsidiaries

To access a subsidiary account or switch between subsidiaries accounts, go to SuiteBanking > Payment Automation > Dashboard. You can change the subsidiary from the drop-down list in the left navigation panel, if you have the required permissions to view it. For more information, see [Payment Automation Dashboard](#).

Customer Off-boarding

If your company decides to off-board and close their account at HSBC, you need to submit a request by contacting the NetSuite Support team. Upon receipt of the request, you may be contacted by HSBC by email for additional information, documentation, or both.

If you uninstall the SuiteApp, all saved data will be lost. In a multi-subsidiary account, if one subsidiary wants to off-board, the SuiteApp should not be uninstalled because the other active subsidiaries still need to initiate payments. An administrator has the ability to remove access for roles (such as AP Payment Clerk, AP Payment Manager, Vendor Master Clerk, or Vendor Master Approver) for users who are off-boarding.

Uninstalling the Payment Automation SuiteApp

 **Note:** If you uninstall the SuiteApp, all saved data will be lost.

If you're uninstalling the Payment Automation SuiteApp, take the following information into consideration:

- Format profiles enable you to configure settings necessary for manual or automatic import of financial institution data. You can use the format profiles created from the Payment Automation SuiteApp to import data from HSBC to NetSuite. You can create a format profile record to link your HSBC and NetSuite accounts and trigger the data import for reconciliation. For more information about a format profile, see the help topic [Format Profile](#). Format profiles created from the Payment Automation SuiteApp can access HSBC account data even after you uninstall the Payment Automation SuiteApp. After uninstalling the SuiteApp, the format profile record is stored in your NetSuite account and you cannot import transactions from HSBC to NetSuite.

- Your GL Bank Accounts will still be accessible, but fields related to Payment Automation will be removed.
- Audit trail records will be deleted. The audit trail record is a Payment Automation custom record that is not referenced by any other records.

To uninstall the Payment Automation SuiteApp:

1. Go to Customization > SuiteCloud Development > Installed SuiteApp List.
2. On the line with the com.netsuite.paymentautomation App ID, click **Uninstall** in the **Action** column.

Terms and Conditions

To learn how your personal and other information is treated, and about your rights regarding this information, read the HSBC Embedded Banking Privacy Notice and HSBC terms and conditions.

The NetSuite platform is subject to Oracle NetSuite terms and conditions.

HSBC and NetSuite have agreed to provide HSBC banking services and products on the NetSuite platform. You'll pay fees for banking services directly to HSBC. For more information, see [HSBC Processing Fees](#).

Customer Support

Contact NetSuite Customer Support with any inquiries regarding Payment Automation, with the exception of virtual cards.

If needed, NetSuite Customer Support will pass the inquiry to HSBC for resolution of banking issues.

Contact Virtual Card Customer Support available 24/7 at 1-800-411-9264 with any queries regarding Virtual Card payments.

HSBC offices and HSBC help lines **cannot** provide assistance with Payment Automation issues.

Payment Automation SuiteApp Maintenance Schedule

You can see scheduled and past outages for the Payment Automation SuiteApp from the [Payment Automation SuiteApp Maintenance Schedule](#). Upcoming Payment Automation outages are also included in SuiteAnswers announcements.

Payment Automation SuiteApp Videos

For an overview of the videos available for the Payment Automation SuiteApp, see [Payment Automation Videos](#).

Setting Up Payment Automation

To set up Payment Automation, follow the instructions in the following sections:

- [Installing the Payment Automation SuiteApp](#)

- [License Validation](#)
- [Multi-Subsidiary Support](#)
- [Applying for an HSBC Online Account](#)
- [Generating Payment Tokens](#)
- [Setting Up Auto-Funding](#)
- [Setting Up Vendors](#)
- [Setting Up Vendor Payment Approval Routing](#)
- [Setting Up Batch Approval Routing](#)
- [Setting Up Two-Factor Authentication \(2FA\)](#)
- [Setting Up Roles and Permissions](#)
- [Setting up a Custom Role to Make Money Transfers](#)
- [Setting Default Department, Class, and Location Values](#)
- [Setting Email Preference](#)
- [Setting Default Bank Fees Account](#)

Installing the Payment Automation SuiteApp

The Payment Automation SuiteApp is available on the Marketplace, and it's free to download. For more information, see the help topic [Installing from the SuiteApp Marketplace](#).

Note: Provisioning from Bill team is not needed to install the SuiteApp.

The Payment Automation SuiteApp is a managed SuiteApp and is upgraded automatically.

Before you install the Payment Automation SuiteApp, enable the following features:

- A/P
- Accounting Period
- Custom Records
- Client SuiteScript
- SDF
- Server SuiteScript
- SuiteFlow
- Advanced PDF/HTML Templates

After you install the Payment Automation SuiteApp:

1. Assign the respective roles to the users. For more information, see [Setting Up Roles and Permissions](#).
2. Apply for an HSBC Online account. For more information, see [Setting Up Payment Automation](#).
3. Once the account is approved, generate the Payment Tokens. For more information, see [Generating Payment Tokens](#)
4. Set up source bank account. For more information, see [Setting Up Auto-Funding](#).
5. Generate the GUID in step 4.
6. Onboard the vendors. For more information, see [Setting Up Vendors](#).
7. Verify the vendor bank account if the account number is imported correctly or not.

 **Note:** To avoid payment failures, onboard vendors after generating the GUID and the payment tokens. Follow the setup steps in the given sequence.

License Validation

Payment Automation SuiteApp validates your **AP Automation** license and access to payment automation features.

To use the features of the SuiteApp, you need to purchase the AP Automation license and download the **NetSuite SuiteApps License Client**. The License Client will validate the latest AP Automation license information. If no valid license exists for your company, you will need to purchase a license to use the Payment Automation SuiteApp.

 **Note:** Provisioning from Bill team is not needed to install the SuiteApp.

If you have a valid license, you can do the following:

- [Applying for an HSBC Online Account](#)
- [Paying a Single Vendor](#)
- [Processing Bulk Payments](#)
- [Vendor Prepayment](#)
- [Making Money Transfers](#)

 **Important:** You have to install the **NetSuite SuiteApps License Client** to apply for a new HSBC account.

The Payment Automation SuiteApp allowed processing of payments without installing the **NetSuite SuiteApps License Client** until October 31, 2024. From November 01, 2024, payment processing requires installation of the **NetSuite SuiteApps License Client** and a valid AP Automation license.

To install the NetSuite SuiteApps License Client:

1. Go to Customization > SuiteBundler > Search & Install Bundles.
2. In the **Keywords** field, enter NetSuite SuiteApps License Client.
3. Click **Search**.
4. Click the link of the bundle with the following details:
 - Name: NetSuite SuiteApps License Client
 - Bundle ID: 116144
5. On the Bundle Details page, click **Install**.

After installation, the NetSuite SuiteApps License automatically connects with NetSuite to obtain your license information.

Only users with the Administrator role can install SuiteApps in your account. For more information, see the help topic [NetSuite SuiteApps License Client Guide for Administrators](#).

To check the status of the license:

1. Go to SuiteBanking > Setup > Preferences.
2. Click **View** for the preference record.
3. In the Preferences subtab, click **License Details**.
4. View the **License Status** and the **License Expiry Date**. The status could be **Active** or **Expired**.

The license details in the SuiteBanking Preferences are refreshed based on the Time to Live (TTL). If your license is renewed, but you still see the license expired error when trying to process payments from the HSBC Bank Account, you can manually fetch the license from the License server. Go to Setup > License Client > Manual License Request to fetch the license. If an active license is available, the License Dashboard in Setup > License Client > License Dashboard is updated with the **Active** status.

 **Important:** Don't uninstall the License client Bundle.

Applying for an HSBC Online Account

After you install the Payment Automation SuiteApp, apply for an HSBC Online Account. To apply for an HSBC Online Account, go to SuiteBanking > HSBC Application > Apply. If you are applying from NetSuite One World account then list of US subsidiaries are shown, choose the subsidiary you are applying for from the **Which Subsidiary are you applying for?** list.

If you want to apply for another HSBC account from another subsidiary, in your NetSuite One World Account go to SuiteBanking > HSBC Application > Apply > New Application, you can choose the subsidiary to apply for HSBC Online Account. For more information, see [Multi-Subsidiary Support](#).

To learn what permissions are required to access the HSBC application page, go to [Permissions for Role Customization](#).

Oracle NetSuite is a technology service provider and is not an FDIC-insured depository institution. FDIC deposit insurance only protects against failure of an FDIC-insured depository institution. HSBC Bank USA, N.A., Member FDIC, provides banking services on the NetSuite platform.

 **Important:** Before you start the application process, go to Setup > Company > Company Information.

The details in the **Return Email Address** and **Return Address** fields, including the phone, must be the same as the email, phone, and billing address that you will provide when submitting the application. To provide a phone number on the Company Information page, click **Edit** next to the **Return Address** field, and enter the number in the **Phone** field.

These details, along with the company logo set on Company Information page, will also be used in remittance vouchers. For more information, see [Reviewing Remittance Email](#). Use a company logo that is 250 × 150 pixels or smaller. A larger size will cause the logo to be formatted incorrectly on your remittance voucher. For more information, see [Updating Information Included in the Remittance Voucher](#)

The Payment Automation SuiteApp is used in alliance with HSBC. Before you can start using Payment Automation, you must be approved for an HSBC Online Account, and for virtual card payments you will need a provisioned credit limit.

Everywhere a document is requested, you'll need to upload it to complete your application – even if you can proceed to the next step.

HSBC accepts only files that are 10 MB or smaller and have one of the following extensions:

- .bmp
- .doc
- .docx
- .gif
- .jpeg
- .jpg
- .pdf
- .pptx
- .tiff
- .xls
- .xlsx

 **Note:** PNG files aren't accepted.

The HSBC application process consists of the following stages:

- Register
 - Fill out a short form to determine if your company is eligible to sign up for an HSBC Online Account and an HSBC Virtual Card Account. Only companies in certain industries and regions are eligible for Payment Automation. Existing HSBC customers are currently not eligible.
- Account application
 - Provide required information and documents in the account application steps that HSBC will review. If additional information is required, HSBC will contact you.
 - Required documents:
 - W9 Tax form
 - Ownership Chart – if there are trusts or entities in your company's ownership structure.
 - Copy of identification documents, such as passport or driver's license, of owners or controllers may be required.
- Credit application
 - Provide required information that HSBC will use to determine your eligibility for an ACH daily settlement limit and virtual card credit line.
 - HSBC will send you a set of documents for your review and electronic signature using Adobe Acrobat technology. After you sign and return all documents, HSBC will complete the review, and process the application. Adobe and Acrobat are either registered trademarks or trademarks of Adobe in the United States or other countries.
 - HSBC will notify you about the outcome of your application. You may be approved only for an HSBC Online Account for ACH and check payments, and no HSBC Virtual Card account. In this case, you will be able to:
 - pay vendors with ACH and check payments.
 - use the same features without access to the Virtual Card account:
 - Payment Automation dashboard
 - Bulk and single payment processing
 - Bank transfers
 - Approval routing

- Automated reconciliation

The HSBC review process usually takes between five and seven business days to complete. Oracle NetSuite does not influence the result of the application process in any way.

You will receive an email message whenever the application status changes. You can follow the status of your application at any time on the Payment Automation dashboard on the NetSuite platform.

If your application is inactive for 60 days, it will be declined for incompleteness. To return to an unfinished HSBC application, go to SuiteBanking > HSBC Application > Apply.

Important: If your application is declined, you cannot submit another one.

You can access your HSBC Online Account only through NetSuite. For information about getting assistance, see [Customer Support](#).

Status of HSBC Applications

You can track the application status from the Status page. Go to SuiteBanking > HSBC Application > Apply to check the list of applications and their statuses. The sublist displays the **Application ID**, **Subsidiary**, **Submitted By**, **Account Application Status**, **Credit Application Status**, and **Action**.

The status of the application could be:

Status	Description
Submitted	The application has been submitted for review.
Completed	The application has been approved by HSBC.
Pending Review	The application is pending review by HSBC.
Cancelled	The application has been cancelled by HSBC due to improper or incorrect data.
Ineligible	You have not met eligible criteria for opening a HSBC bank account.

In Actions column, click **Resume** to continue working on the application or click **Show Details** to see more information about the application. The Verification page is displayed for a completed application.

Note: You need to have access to the subsidiary for which the application is raised to view the details of the respective subsidiary.

Generating Payment Tokens

Before you can start initiating and processing payments, you must generate payment tokens that the payment processor will use. This is a one-time setup and can be handled by the Administrator.

Payment tokens are generated once for all subsidiaries in a multi-subsidiary setup at the NetSuite account level.

Prerequisites:

- Before you generate payment tokens, enable two-factor authentication (2FA) with one-time password (OTP). For information about setting 2FA, see the help topic [Set up Your Preferences for Two-Factor Authentication \(2FA\)](#)
- Users with [AP Integration Manager](#) role can generate tokens.

Important: The AP Integration Manager role must not be deleted or deactivated. Access to the AP Integration Manager role must not be removed for the user that generated the payment tokens.

To generate payment tokens:

1. Go to SuiteBanking > Setup > Payment Tokens.
2. Enter your NetSuite password in the **Password** field.

Regeneration of Payment Tokens

Tokens don't expire. However, for security reasons, you should regenerate payment tokens every 24 months.

The payment audit trail indicates the user that has generated payment tokens.

If the user that has generated the payment tokens during the initial setup leaves the company, another user must regenerate the tokens.

Note: The user regenerating the tokens must be assigned to the AP Integration Manager role.

To regenerate payment tokens:

1. Go to SuiteBanking > Setup > Tokens.
2. If tokens are already generated, a banner is displayed: **The payment tokens have already been generated. To re-generate tokens please click here.** Click on **here** to regenerate tokens.

Auto-Funding

Auto-funding lets you streamline your accounts payable workflow. You can't make any payments before you set up auto-funding.

Excess balances in the HSBC Online Account can't be used to fund payments directly. When you initiate a payment, auto-funding transfers money from the source account regardless of the current balance of the HSBC Online Account.

In a multi-subsidiary setup, you'll need to create a separate Auto-Funding setup for each onboarded subsidiary.

Auto-Funding Flow

With auto-funding, your source bank account is automatically debited, and the money is deposited in your HSBC Online Account. This process is initiated by the payment processor after NetSuite submits the payment. The payment processor is a third party that NetSuite uses to process payments. The payment processor will then check to confirm that there are sufficient funds in the HSBC Online Account before submitting ACH and check payments to HSBC.

Insufficient Funds in Your HSBC Online Account

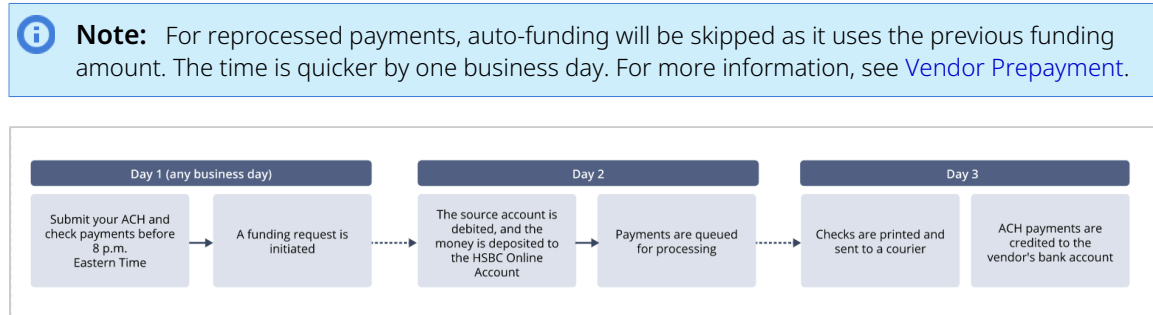

Before initiating payments, you should ensure that your source bank account has enough balance, and allocated funds have not been withdrawn from your HSBC Online Account.

If after processing the batch payment your source bank account returns the auto funded direct debit or the funds have been withdrawn from your HSBC Online Account, you will not have sufficient funds in your HSBC Online Account, which will cause your HSBC Online Account to be overdrawn.

HSBC will contact you on the next business day to manually fund your account with a one-time ACH or wire payment sent from your source bank account. For instructions about how to make a one-time payment to fund your HSBC Online Account, see [Making Money Transfers](#).

Funding Cycle

The following diagram illustrates how funds move and when transactions are settled with auto-funding.

Setting Up the Source Bank Account for Auto-Funding

Before you set up auto-funding, set up your source GL account that will be used to fund the HSBC Online Account. You can only have one auto-funding source account at a time. You cannot use multiple source accounts to auto-fund the HSBC Online Account at the same time.

In a multi-subsidiary setup, you need to set up a separate source bank account for auto-funding for each onboarded subsidiary. There can be only be one primary bank for each vendor at the vendor bank level.

Important: The HSBC Bank and Credit Card GL are automatically created upon approval of the bank account. It is important not to modify the account names to prevent any potential errors during payment processing.

For instructions on creating a new account, see the help topic [Creating Accounts](#).

To set up an existing account for Payment Automation:

1. Go to Setup > Accounting > Chart of Accounts.
2. On the line of the bank account you want to set up, click **Edit**.
3. Set the following fields:
 - **Payment Automation Bank Name** – this name will be used on the Payment Automation dashboard.
 - **Payment Automation Bank Routing Number** – you can use only domestic US accounts. The routing number will be validated by the system.
 - **Payment Automation Bank Account Type**
 - **Payment Automation Bank Account**
4. Click **Save**. If this is your first time setting a source account, you will be automatically redirected to the GUID setup page:

- a. Provide a 16-character passphrase, which will be used to set up NACHA encryption rules for the ACH account number. The bank account number will be masked in NetSuite. This is a one-time setup. After the GUID page is set up, it will not be displayed again.
- b. After you submit the GUID, you will be redirected back to GL setup. To save the record, click **Save** again.

To change an auto-funding account for Payment Automation:

1. Go to SuiteBanking> Payment Automation > Dashboard.
2. Click **Bank Accounts**.
3. Click **View Auto-Funding Details**.
4. Click **Remove** to remove the existing auto-funding bank account.

 **Note:** **Remove** will only be enabled if there are no bill payments or vendor prepayments are in pending state.

5. To add a new auto-funding bank account, see [Setting Up the Source Bank Account for Auto-Funding](#).

Allowing Automatic Debit of Your Source Account

For auto-funding to work, you must permit HSBC to automatically debit your source bank account. To allow funds to be transferred, contact your GL source account bank.

If there is a debit block on the source bank account held with your bank, you will be required to provide your HSBC Account Number, which is required to authorize auto debit.

To determine your HSBC Account Number:

1. Go to Setup > Accounting > Chart of Accounts.
2. On the HSBC Bank Account line, click **View**.
3. Write down the number in the **Payment Automation Bank Account** field.

If your source bank requires a HSBC ACH Company ID, refer to your Welcome Letter that was received when your HSBC application was approved. If you do not have access to your Welcome Letter or the ACH Company ID is not available on the Welcome Letter, please contact the NetSuite Support team.

If you set a maximum debit value for this authorization, align the value with your **Daily Transaction Limit** displayed in the Payment Automation dashboard. For more information, see [Daily Transaction ACH Limit](#).

Setting Up Auto-Funding

You must set up your source account for auto-funding before you can start initiating payments.

Important: After you set up auto-funding, wait at least one hour after setup before processing any payments to allow the system configuration to be completed.

If your GL source account changes, you must set up auto-funding again before initiating new payments.

Prerequisites:

- Set up the GL source account, which will be used to fund the HSBC Online Account. For instructions, see [Setting Up the Source Bank Account for Auto-Funding](#).

- Permit HSBC to debit your source account automatically. For instructions, see [Allowing Automatic Debit of Your Source Account](#).

To set up auto-funding:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left-pane, click **Bank Account**.
3. Click **Set up Auto-Funding**.
4. From the Auto-Fund list, select the auto-funding source account. For more information, see [Setting Up the Source Bank Account for Auto-Funding](#).
5. Check the boxes to certify that this account is exclusively owned for the benefit of your organization, and to authorize HSBC to automatically debit your source bank account.
6. Click **Submit**.

Vendors

Before you make a first payment, set up the payment methods accepted by your vendors.

Set up vendors for Payment Automation on the vendor record.

To manage vendors, go to SuiteBanking > Payment Automation > Dashboard, and on the left pane click Vendors. The following subtabs are available on the Vendors page:

- **Approved Vendors** – lists vendors that have been already approved for Payment Automation.
- **Vendors Pending Approval** – lists vendors that are waiting for approval for Payment Automation.
- **Eligible Vendors** – lists vendors that can be eligible for Payment Automation.

New vendor records or changes to vendor records and vendor bank records go through approval routing. For more information, see [Setting Up Roles and Permissions](#), [Vendor Approval Routing](#), and [Approving Vendors](#).

To create a new vendor, go to Lists > Relationships > Vendors > New. For more information, see the help topic [Creating a Vendor Record](#).

For information about modifying a vendor, see the help topic [Editing a Vendor Record](#).

For information about modes of payment available in Payment Automation, see [Payment Options](#).

Setting Up Vendors

Vendors with multiple subsidiaries attached can process payments with any subsidiary, provided the primary bank is the same for all subsidiaries. Otherwise, you have to change the primary bank whenever you want to process with a different bank and subsidiary.

To set up a vendor for Payment Automation:

1. Go to Lists > Relationships > Vendors, and then click View on the line with the vendor you want to set up for Payment Automation.
2. On the SuiteBanking subtab:
 - Check the **Automated Payments** box.

Note: Automated payments with HSBC Bank and virtual card are only available to vendors in the United States.

- Select modes of payment in the **Accepted Modes of Payment** list.

- Select a mode of payment in the **Preferred Mode of Payment** list.
- Enter an email address in the **Remittance Email** field. Remittance email messages will be sent to this email address when a payment is made. You can enter two email addresses separated by a semicolon. A carbon copy of all future payment instructions will be sent to the second email address.

 **Note:** The remittance email address on the vendor record is not necessary for check or ACH payment types, but it is required for virtual card payments. However, it is advisable to update the remittance email address to send remittance notification emails to your vendors for ACH and check payments.

3. On the Financial subtab:
 - Select a payment account from the Default Vendor Payment Account list.
 - Select USD from the Primary Currency list. Payment Automation currently supports only USD.
4. Click **Save**.

Vendor Approval Routing

Vendor approval routing ensures that the details required for successful vendor payments are accurate. The approver must be a different user with access to the vendor record.

To learn how to set up vendors for Payment Automation, see [Setting Up Vendors](#).

Vendor approval routing is available by default without any setup. To approve any changes, log in to NetSuite with the Vendor Master Approver role, the Administrator role, or a custom role with access to the vendor record.

A vendor approval is required:

- to create a new vendor for AP Automation.
- to enable an existing vendor for AP Automation.
- to modify the following fields related to payment automation processing:
 - Vendor Bank Details
 - Billing Address
 - Preferred Mode of Payment
 - Remittance Email
 - Accepted Modes of Payment

The status is reflected in the AP Automation Status field on the SuiteBanking subtab of the vendor record:

- Pending Approval – you can't submit payments for processing or edit the vendor record.
- Approved – changes to the vendor record have been approved, and payments can now be submitted for processing.
- Rejected – changes to the vendor have been rejected, will not be reversed, and the vendor will not be paid through Payment Automation. Review the vendor record with the rejected status, and resubmit the record for approval.

You must have the Administrator, Master Approver, or a custom role with access to the vendor record to enter a bank account number in the Bank Account Number field on the Vendor Bank Account page when the vendor is in Pending Approval state.

Changes to standard and custom fields don't trigger vendor approval.

Approving Vendors

Note: Vendors are approved by a different user with access to vendor record. The user who modified the vendor cannot approve the same vendor record.

To approve a vendors or changes to vendor records in bulk:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. In the Payables section on the left pane, click **Vendors**.
3. Click the **Vendors Pending Approval** subtab.
4. Select the vendors that you want to approve, and click **Approve**. Note that if you bulk-approve a large number of vendors, the action may take some time to take effect.

To approve a single vendor:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. In the Payables section on the left pane, click **Vendors**.
3. Click the **Vendors Pending Approval** subtab.
4. Click the link in the **Name** column of a particular vendor.
5. On the vendor record page, click **Approve**.

To reject a single vendor:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. In the Payables section on the left pane, click **Vendors**.
3. Click the **Vendors Pending Approval** subtab.
4. Click the link in the **Name** column of a particular vendor.
5. On the vendor record page, click **Reject**.

Importing CSV with Vendors and Vendor Banks

Prerequisites:

- Prepare a CSV file with to be imported:
 - In a CSV file with vendors, include the following information in the specified order:
 - Inactive, First Name, Last Name, Company Name, Category, Primary Subsidiary, Address 1, Address 2, City, State/Province, Zip Code, Automated Payment, Accepted Modes of Payment, Preferred Mode of Payment, Remittance Email.
 - In a CSV file with vendor banks, include the following information in the specified order:
 - Primary Bank Account, Bank Name, Bank Account Type, Vendor, Bank Account Number, Bank Routing Number

Important: If a CSV file includes the full names of states or provinces rather than short names, the import job may be complete, but state or province values may not be saved correctly. To avoid errors, use short names.

To import a CSV file:

1. Go to Setup > Import/Export > Import CSV Records.
2. Select Relationships from the **Import Type** list.
3. Select Vendors from the **Record Type** list.
4. Set the **CSV Column Delimiter** that you used in your CSV file.
5. Click **Next**.
6. Follow the steps in the Import Assistant.

Important: While importing data, make sure the Run SuiteScript and trigger workflows boxes are enabled, along with required custom fields.

Managing Vendors

On the Vendors page of the Payment Automation Dashboard, you can see a list of all eligible vendors and all SuiteBanking vendors.

Vendor Bank Data

Vendor Bank data is required when the preferred mode of payment is ACH.

To set up the vendor bank account:

1. Go to Lists > Relationships > Vendors, and then click View on the line with the vendor for whom you want to set up the Vendor Bank Account.
2. In the **SuiteBanking** subtab, click **New Vendor Bank Account**.
3. Enter the **Bank Name**, **Bank Account Number**, and **Bank Routing Number** fields.

Note: The account number is stored in an encrypted form and only visible in the Edit mode. It appears masked in the View mode.

4. Select the type of bank account from the **Bank Account Type** list.
5. (Optional) Check the **Primary Bank Account** box to make this bank account primary.

Note: There can be only one primary bank account. All other bank records will be secondary.

6. (Optional) Check the **Inactive** box to mark this bank account as inactive.
7. Click **Save**.

Migrating Vendor Bank Data to Payment Automation

The migration of the vendor bank data from Electronic Bank Payments and Coastal Features to Payment Automation can be automated. This can be done by the administrator.

Details such as bank name, bank account number, and routing number are migrated, and the bank is made the Primary bank.

To automate migration of the vendor bank data to Payment Automation:

1. Go to SuiteBanking > Setup > Vendor Bank Data Migration.

2. From the **Migration Type** list, select **Electronic Bank Payments Vendor Bank Data** or **Coastal Vendor Bank Data**.
3. From the **Subsidiary** list, select the subsidiary.
4. Click **Migrate**.

After the migration process is complete, the user who initiated the process will receive an email. To check the status of the migration, you can refer to the logs for more details. In case of any errors, you can rectify them and re-initiate the migration process. The administrator can perform this process, and if the migration is run multiple times, previously migrated data will be skipped.

Setting Up Vendor Payment Approval Routing

Starting with Payment Automation version 2.0, batch approval routing is required, and setting up your own approval routing is optional. For more information, see [Setting Up Batch Approval Routing](#).

In a typical Payment Automation workflow with approval routing enabled, a Payment Clerk creates payments, and an AP Payment Manager approves them.

If NetSuite approval routing is enabled, payments created after batch approval will be routed for additional approval routing. You can disable the NetSuite approval routing, as it is optional, so batches approved will create payments and be sent for processing immediately.

For information about Payment Automation roles, see [Setting Up Roles and Permissions](#).

Enabling approval routing affects the whole payment processing. You should set up a custom workflow or a script to identify the user who will approve the payments. For instructions, see the help topic [SuiteFlow Overview](#).

For information about the approval routing feature and its setup, see the help topic [Approval Routing](#).

To disable NetSuite approval routing:

1. Go to Setup > Company > Setup Tasks > Enable Features.
2. In the **Employees** subtab, clear the **Approval Routing** box.
3. Click **Save**.

Note: You can only disable approval routing if there are no pending vendor payments for approval.

Setting Up Batch Approval Routing

Starting with Payment Automation 2.0, all payments submitted for processing in batches on the Bulk Payments page require approval. A payment batch is sent for processing only after it is approved. By using batch approval routing, you can help prevent the submission of unauthorized payments.

Important: If you set up a payment approval workflow, payments created after payments are approved through batch approval will still require approval based on the workflow you have set up.

Batch Approval Routing:

- helps accelerate and improve decision making.
- improves spending visibility.

- minimizes the risk of fraudulent payments.

For more information, see [Approving Payment Batches](#).

 **Note:** Batch payment approval supports up to 5000 bills and is limited to 400 bills per vendor.

To set up batch approval routing:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, expand the Set Up section, and click **Approval Routing**.
3. Click **Setup**.
4. On the Setup page, set values for the following fields:
 - **Approval Type** – choose one of the following options to indicate how approval routing should be triggered:
 - **Bill Payment** – payment amount limit for each bill in a batch.
 - **Vendor Payment** – payment amount limit for each vendor in a batch.
 - **Batch Payment** – total payment amount limit of a batch payment.

The approval type is the basis for determining the value in the **Amount for Approval** field on the Bill Payment Batch page.
 - **Payment Limit** – enter the maximum amount for a bill payment, , or batch payment that can be processed without approval. If the payment exceeds this amount, it is automatically routed for approval.
 - **Level** – set the approval level for each payment approver. Start with the level 1 approver. Note: You can select multiple approvers for one level, but only one approver is required to approve. After an employee is selected as an approver for a level, you cannot select the same employee as an approver for another level higher than the previous one.
 - **Payment Approver** – select the payment approver for each approval level. The selected approver will receive email notification whenever there is a payment batch that requires their approval.
 - **Payment Approval Limit** – Enter the maximum amount that a payment approver can approve for a bill payment, vendor payment, or batch payment. If you leave this field blank, the approver can approve any amount. When you set up an approval hierarchy, the limit of the last approver must be left blank.
5. Click **Save**.

 **Note:** For more information, see [Approving Payment Batches](#).

Setting Up Two-Factor Authentication (2FA)

 **Important:** To reduce the risk of unauthorized access to your NetSuite account, which could result in processing unauthorized transactions, set your Idle Session Timeout to 60 minutes. This means that you will be required to log back in if your NetSuite UI is inactive for over 60 minutes. For more information, please see [User Interface \(UI\) Sessions](#).

When using Payment Automation, use two-factor authentication (2FA) with the device trusted duration set to Per session. The following default roles that are provided with Payment Automation have 2FA enabled Per session by default:

- AP Payment Clerk
- AP Payment Manager
- Vendor Master Clerk
- Vendor Master Approver

If you do not have 2FA enabled with the device trusted duration set to Per session on your NetSuite role, access to the following features and pages is restricted:

- Auto-funding setup
- Money transfer
- Vendor record
- Bill payments
- Creating and editing a vendor bank account
- Generating payment tokens
- Bulk Bill Payments page

In a multi-subsidiary setup, all users need to enable 2FA who want to initiate payments from the newly created subsidiary.

If you are using a custom role, you must enable 2FA for that role, and set the device trusted duration to Per session. For instructions, see the help topic [Set up Your Preferences for Two-Factor Authentication \(2FA\)](#).

You should always log into NetSuite with 2FA when you use Payment Automation.

Setting Up Roles and Permissions

The following roles are added to your account after you install the Payment Automation SuiteApp:

- [AP Payment Clerk](#)
- [AP Payment Manager](#)
- [Vendor Master Clerk](#)
- [Vendor Master Approver](#)
- [AP Integration Manager](#)

Important: These product roles should not be made inactive. SuiteApp updates will fail, and functionality will break when made inactive.

Assign the default roles to users who'll process payments with Payment Automation. Don't edit the default roles because your changes may be overwritten by a future SuiteApp update.

The AP Payment Clerk and AP Payment Manager roles are for the users who processes Payment Automation frequently.

Vendor Master Clerk and Vendor Master Approver roles are used to maintain the Vendor Master File (VMF) which includes the information needed to process the payments.

AP Integration Manager roles are responsible for setting up payment tokens.

The default roles have Two-Factor Authentication (2FA) enabled per session.

AP Payment Clerk

The AP Payment Clerk role lets you pay supplier invoices. This role ensures that payments are authorized, paid correctly, and on time. The AP Payment Clerk keeps track and reconciles payments to ensure they reflect accurately in both NetSuite and in HSBC system. This identifies the irregularities that might be caused by fraud, encoding and accounting errors.

The AP Payment Clerk role has 2FA enabled per session.

When creating payments, you must validate if the 2FA is enabled. If it isn't enabled, then an error message is displayed to prevent you from saving the payment record.

The following table has the AP Payment Clerk role permissions required to use the Payment Automation SuiteApp:

Group	Permission	Level	Group	Permission	Level	Group	Permission	Level

AP Payment Manager

The AP Payment Manager is a supervisory role responsible for authorizing supplier payments. To conform with internal control's best practices, this role will not include permissions to create or edit transaction records related to Bill Payments. This role should be assigned to the person who approves payments. This role has 2FA Authentication enabled per session.

The following table has the AP Payment Manager role permissions required to use the Payment Automation SuiteApp:

Group	Permission	Level	Group	Permission	Level	Group	Permission	Level
Transactions	Bills	View	Reports	Accounts Payable	View	List	Accounts	Edit
	Check	Edit		Accounts Payable Graphing	View		Accounts Payable Register	View

	—	—		—	—		License Details	Edit
	—	—		—	—		Preferences	Edit

Vendor Master Clerk

This role is assigned to an employee who is allowed to create and edit vendor files. Preferably this role must be assigned only to one employee to ensure that all vendors are valid and vetted.

If you check the **For AP Automation** box when creating or editing vendor records, NetSuite validates if the user is using this role and 2FA is enabled. If not, then an error is displayed, and you cannot save the record. This role has 2FA Authentication enabled per session.

The following table has the Vendor Master Clerk role permissions required to use the Payment Automation SuiteApp:

Group	Permission	Level	Group	Permission	Level
List	Accounts	View	Setup	Accounting List	View
	Bank Account Registers	View		Deleted Records	View
	Classes	View		SuiteScript	View
	Currency	View		SuiteScript Scheduling	Full

	Subsidiaries	View		Federal Holidays	View
	Vendors	Edit		License Details	Edit
	—	—		Preferences	View

Vendor Master Approver

This role is assigned to a user to approve the changes in the vendor master file and add new vendors with AP Automation flag. Preferably this user should be different from Vendor Master Clerk.

This role has 2FA Authentication enabled per session.

The following table has the Vendor Master Approver role permissions required to use the Payment Automation SuiteApp:

Group	Permission	Level	Group	Permission	Level
List	Accounts	View	Setup	Accounting List	View
	Bank Account Registers	View		Deleted Records	View
	Classes	View		SuiteScript	View

Custom Record	HSBC Customer Information	View
	Vendor Bank Account	Edit

Setting up a Custom Role to Make Money Transfers

In addition to the AP Payment Clerk, AP Payment Manager, and the Administrator role, you can set up a custom role to be able to initiate Money transfers. Use the permissions listed in the following table to set up your custom role.

Group	Permission	Level
Transactions	Make Journal Entry	Create
	System Journal	View
	Find Transaction	View
Lists	Accounts	View

Group	Permission	Level
Setup	Custom Lists	View
Custom Record	CSI Credentials	View
	HSBC Customer Information	View
	Payment Audit Trail	View
	Auto-Funding Information	Full

Setting Default Department, Class, and Location Values

In the accounts where preferences for department, class, and location values are required, you need to enter the respective values while creating any bill or journal entry. With this, when an auto funding Journal or money transfer journal is created automatically from Payment Automation, Journal creation will fail as department, class, and location values were not captured.

The preference page includes three fields: **Department**, **Class**, and **Location**. An administrator sets these values and they will be used as default values for creating journals for all payments with auto funding, money transfers, and monthly invoice funding. If any of these values are made inactive, journal creation will fail.

This setup is a one-time process and applies only to the autocreation of journals within Payment Automation.

In a multi-subsidiary setup, you need to setup the preferences for department, class, and location for each subsidiary separately.

To set the default values:

1. Go to SuiteBanking > Setup > Preferences > View.
2. In the **Preferences** subtab, click **New Account Preference**.
3. Select the **Department**, **Class**, and **Location** from their respective lists.
4. Click **Save**.

Setting Email Preference

Set the default email address to receive notifications from the Payment Automation SuiteApp. Multiple email addresses should be separated by a comma.

In a multi-subsidiary setup, for each subsidiary, email preferences needs to be setup.

To set the email preference:

1. Go to SuiteBanking > Setup > Preferences > View.
2. Click **New Account Preference**.
3. In the **Email Notification Recipients** field, enter the email address to which the notifications will be sent.

Note: If this field is not set, email notifications will be sent to the user who submitted the HSBC application.

4. Click **Save**.

Setting Default Bank Fees Account

The recording of transaction fees has been automated. This automation will save more time, allowing you to focus on other important tasks.

To automate recording of bank fees:

1. Go to SuiteBanking > Setup > Preferences > View Preference record > New Account Preference.
2. In the **Bank Fees Expense Account** list, select a default expense account.
3. Click **Save**.

A journal is auto-created when HSBC confirms posting of the monthly invoice payment, typically every 21st of the month or the next business day.

 **Note:** If Journal Entry Approval Routing is enabled, the journal is routed for approval. The journal is posted only after approval. For more information, see [Auto-Funding and Money Transfers Journal Entry Statuses](#).

Processing Payments

This section provides the following information about how to process payments with Payment Automation:

- [Daily Transaction ACH Limit](#)
- [Paying a Single Vendor](#)
- [Overriding the Preferred Mode of Payment](#)
- [Processing Bulk Payments](#)
- [Vendor Prepayment](#)
- [Approving Payment Batches](#)
- [Tracking Delayed Payments](#)
- [Reviewing Failed and Rejected Payments](#)
- [Reviewing Scheduled Payments](#)
- [Reviewing Outstanding Checks](#)
- [Canceling Virtual Cards](#)
- [Reviewing Remittance Email](#)
- [Overview of Payment Statuses](#)

Daily Transaction ACH Limit

Daily transaction limit is the maximum limit for processing ACH and checks payments on any day set by HSBC Bank. Daily transaction limit validation eliminates the need to reprocess failed payments due to limit-exceeding failures. With this validation:

- You can only process payments that are within the daily transaction limit. The available daily limit can be viewed for processing bill payments from a pay single vendor, bulk bill payments, vendor prepayments, and money transfers.
- You can only submit payments on business days. Payment processing and money transfers cannot be initiated on weekends or bank holidays.

Note: Payment cannot be created or rejected on weekends or holidays. However, they can be approved. When approved on weekends, these approved payments will be sent to HSBC on the next business day.

- You can better plan and prioritize the payments to be processed for any day based on the remaining daily limit available.

In a multi-subsidiary setup, daily ACH and credit card limits are set separately per subsidiary or approved account.

The following fields have been added for [Making Money Transfers](#), [Paying a Single Vendor](#), [Processing Bulk Payments](#), and [Vendor Prepayment](#):

- **Daily Transaction Limit:** It is the maximum limit for processing ACH and checks payments on any given day, set by HSBC Bank
- **Daily Transaction Limit Available:** It is the available limit after processing payments of the present day and the payments initiated post cutoff of the previous day.
- **Payments Pending Approval:** This is the total amount of payments submitted and pending approval.

Incoming and Outgoing Limit Validations

- **Incoming Limit Validation:** The daily limit is validated for payments initiated from pay single vendor, bulk payment processing, and add money requests.

Incoming ACH Available Limit for incoming payments = ACH Daily Limit - Incoming Previously Submitted Payments and Approved

- **Outgoing Limit Validation:** The daily limit is validated during withdraw money requests.
Outgoing ACH available limit for outgoing payments = ACH Daily Limit - Outgoing previously submitted payments (Withdraw requests + ACH payments of previous day)

Pending Approval Batches

ACH daily limit validations will take place during the submission of payments and after approving the payment. Additionally, the validation is performed when the batch is edited, transactions are removed, or the batch is approved. The ACH limit calculation considers the current day's limit for batches with current and past-dated payments.

If you submit or approve a payment after the 8 pm ET cutoff, the next business day's daily limit will be applied. If a transaction is sent after 8 pm, it will be included in the first batch of the next business day, and the daily limits for that day will be applied.

Daily Limit Exceeded

When the daily limit is exceeded, an error message will be displayed. To submit payments, you need to ensure that you stay within your remaining daily transaction limit.

If you're paying a single vendor and processing bulk payments, and exceed the limit, unselect some bills or change the payment date to a future date before submitting the payment.

If you're making money transfers and exceed the limit, initiate the transaction on the next business day.

Paying a Single Vendor

Prerequisites:

- Generate Payment Tokens

- Set up Two-Factor Authentication (2FA)
- Set up Auto-Funding
- Set the Preferred Mode of Payment for the vendor that you want to pay

Note: To restrict users from creating bill payments with a duplicate check number, go to Setup > Accounting > Accounting preferences > Item/Transactions. In the **Other Transaction Preferences** subtab, choose **Warn and Block** in the **Duplicate Number Warnings** list.

Daily transaction ACH limit validations will occur before submitting and approving the payment. For more information, refer to [Daily Transaction ACH Limit](#).

Note: Payments can only be submitted on business days. Payment processing and money transfers can't be initiated on weekends or bank holidays.

To pay a single vendor:

1. Go to the Transactions > Payables > Pay Single Vendor
2. Select a vendor from the **Payee** list.
3. In the **Account** field, select HSBC Bank Account or HSBC Credit Card.
4. On the **Apply** subtab, check the **Apply** box for the bills you want to pay. You can select only bills with a reference number. You can select bill credits to offset the total amount. If a reference number is longer than 35 characters, the excess characters are truncated.
5. On the **Payee Address** subtab, select the vendor address in the **Address to Select** list.

Note: If the default billing address isn't in the United States, then select a United States address of the vendor from the **Address to Select** list or select **-Custom-** to add a new vendor billing address in the United States.

6. Click **Save**.

Note: If you select multiple bills to pay, only one payment is created for the total amount of the bills selected.

The Check Number field is disabled to ensure you can't override the number generated by the system.

For information about the payment approval process, see the help topic [Using the Approval Routing Feature](#).

Overriding the Preferred Mode of Payment

When paying a single vendor, you can override the preferred mode of payment.

To override the preferred mode of payment:

1. On the vendor page, click **Make Payment**.
2. On the Bill Payment page, select the subsidiary. The **Account** field is automatically set to HSBC Bank Account.
3. Click the **SuiteBanking** subtab, and select a **Preferred Mode of Payment**. You can select from vendor's accepted modes of payments.
4. Click **Save**.

Changing the preferred mode of payment on the payment record will not impact the vendor record. Overriding the preferred mode of payment on the Bill Payment page is limited to that particular payment.

Processing Bulk Payments

Prerequisites:

- Set up auto-funding
- Set up Two-Factor Authentication (2FA)
- Set the Preferred Mode of Payment for the vendor that you want to pay
- Generate payment tokens
- Approval routing setup

Note: Bulk bill payment processing supports up to 5000 bills and is limited to 400 bills per vendor.

Daily transaction ACH limit validations will occur before submitting and approving the payment. For more information, refer to [Daily Transaction ACH Limit](#).

Note: Payments can only be submitted on business days. Payment processing and money transfers can't be initiated on weekends or bank holidays.

To process payments in bulk:

1. Go to SuiteBanking > Payments Automation > Dashboard.
2. On the left pane, click **Bills**.
3. In the **GL Account** list, select either the HSBC Bank Account or HSBC Credit Card Account to display all bill payments to vendors with Payments Automation set up.

Note: If you use NetSuite OneWorld and have multiple HSBC accounts, bills associated with subsidiary where the HSBC bank account is opened will be displayed in the list.

4. Select the **A/P Account**.
5. Select the **Vendor**.

Note: Only bills for vendors with a default billing address in the United States will be displayed for payment processing.

6. (Optional) Filter the displayed bills based on the due date or the vendor.
7. Select the bills to process. You can select only bills with a reference number. If a reference number is longer than 35 characters, the transaction will fail.
8. Click **Submit**.

Note: If you select multiple bills to pay, only one payment is created for the total amount of the bills selected per vendor.

Note: After the payments are processed, a batch will be created and routed for approval. When the batch is approved, payment records will be created.

If the Vendor Payments Approval Routing approval is enabled, these payments created from the batch will go for another level of approval. This Vendor Payments Approval Routing is optional, and the user can turn the feature on or off as needed. For information about the payment approval process, see the help topic [Using the Approval Routing Feature](#).

For information about the payment approval process, see [Setting Up Batch Approval Routing](#).

Discount Calculation for Bulk Bill Payments

The Payment Automation SuiteApp supports discount calculations for transactions with standard and date-driven terms. In the Bulk Bill Payment Processing page, the following columns are available in the **Transactions** sublist:

- **Disc. Avail:** It is the discount available and is based on the terms of the purchase order. NetSuite automatically enters the amount discounted on this bill.
- **Disc. Date:** It is the discount date and is calculated based on the terms of the bill, and it automatically shows up in this field. This date is the last day you can pay this bill to receive a discount.

 **Note:** The **Disc. Avail** and **Disc. Date** fields will be blank for a record if a valid discount term is not attached to the bill record.

The **Payment Amount** field for a record is calculated by taking the difference between the **Balance Due** and **Discount** fields. The bill amount cannot exceed the **Payment Amount**.

Adding custom fields in Bulk Payments Page

The Payment Processing page can be customized. You can add up to six standard or custom transaction fields. This enables you to view more transaction details, to help you to prioritize bills for payment. This can be done by the administrator.

To add custom transaction fields:

1. Go to Customization > Lists, Records, & Fields > Record Types.
2. Click **List** link on the line with **Bulk Bill Batch Payment Custom Fields List**.
3. Click **New Bulk Bill Batch Payment Custom Fields List**.
4. Enter the **Field Name** and **Internal Field ID**.
5. Click **Save**.

 **Note:** Adding these fields is optional, and you can choose which values to include based on what you need so that only those can be added.

Only the fields that are available in the view mode of bill records can be added. Fields with special permissions or fields that are displayed in edit mode cannot be added.

Vendor Prepayment

 **Important:** There is a greater fraud risk, for example, through business email compromise when making a payment not linked to an invoice or purchase order. When creating and authorizing a vendor prepayment, make sure you verify both the authenticity of the payment as well as the payment beneficiary account.

You can create and process vendor prepayments to pay vendors. The SuiteBanking subtab in the vendor prepayment record populates the details from the vendor record. Payments processed with HSBC GL are processed with Payment Automation SuiteApp. The **Automated Payment** box will be enabled in the SuiteBanking subtab.

You can process vendor prepayments with ACH, Check and VCard payments. The vendor prepayment will be sent for processing in the next hourly batch during business days. For more information, see [Payment Batch Cut-Off Times Overview](#).

The validations that apply when creating a bill payment: ACH limit, weekend and holiday validation, and role requirement for 2FA per session.

To enter vendor prepayment information, see the help topic [Entering Vendor Prepayments](#).

To enter vendor prepayment details:

1. Go to the Transactions > Payables > Enter Vendor Prepayment.
2. Select a vendor from the **Payee** list.
3. In the **Account** field, select HSBC Bank Account or HSBC Credit Card.
4. On the **Payee Address** subtab, select the vendor address in the **Address to Select** list.

Note: If the default billing address is not in the United States, then select a United States address of the vendor from the **Address to Select** list or select **-Custom-** to add a new vendor billing address in the United States.

5. Click **Save**.

Status tracking can be done through the SuiteBanking tab. For more information see, [Overview of Payment Statuses](#).

Note: Apply vendor prepayment only when payment status is marked **Paid**.

In case of **Failed** payments, if the record status is **Paid**, the vendor prepayment will be automatically voided and the voiding journal will be automatically created. If the record status is **Partially Applied** or **Fully Applied**, the vendor prepayment can't be voided and the user has to manually delete the Vendor Prepayment Application, then void the vendor prepayment.

In case of **Data Error** or **ACH Payment Return** payments, if the record status is **Paid**, the reprocessing payments is allowed. Vendor prepayment will be auto-voided and a new vendor prepayment is created. If the record status is **Partially Applied** or **Fully Applied**, reprocessing payments isn't allowed. The user has to manually delete the Vendor Prepayment Application before reprocessing payment to void the vendor prepayment.

Payment Status	Record Status	Action
Failed	Paid	The vendor prepayment will be automatically voided and the voiding journal will be automatically created.
	Partially Applied or Fully Applied	The vendor prepayment can't be voided and the user has to manually delete the Vendor Prepayment Application, then void the vendor prepayment.
Data Error or ACH Payment Return	Paid	Reprocessing the payments is allowed. Vendor prepayment will be auto-voided and a new vendor prepayment is created.
	Partially Applied or Fully Applied	Reprocessing payments isn't allowed. The user has to manually delete the Vendor Prepayment Application before reprocessing payment to void the vendor prepayment.

For more information about payment statuses, see [Overview of Payment Statuses](#).

Approving Payment Batches

When a payment batch requires your approval, you'll receive a pending batch approval e-mail notification.

A payment batch isn't submitted for processing until it is approved.

For instructions on how to modify the setup of approving payment batches, see [Setting Up Batch Approval Routing](#). For example, add an approver or change the limit for approval.

Important: If you set up a payment approval workflow, payments created after payments are approved through batch approval will still require approval based on the workflow you have set up.

To approve or reject a payment batch:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. In the Payables section on the left pane, click **Payments**.
3. Click the **Open Batches** subtab.
4. Click on the Batch ID link on a line with the Pending Approval status.
5. (Optional) To change the payment batch information or remove transactions, click **Edit**.
6. On the Bill Payment Batch Page, click **Approve** to approve the payment batch or click **Reject** to reject it. Only people on the approver list will see these buttons. Payments will be created after the batch is approved. If the batch is rejected, the bills will be removed and will be in the open state for processing in a later batch.

Daily transaction ACH limit validations will occur before submitting and approving the batch payment. For more information, refer to [Daily Transaction ACH Limit](#).

Note: Payments can only be submitted on business days. Payment processing and money transfers can't be initiated on weekends or bank holidays.

Tracking Delayed Payments

Delayed payments are the list of payments that require your urgent attention as these payments were not processed successfully due to errors.

You can designate email recipients to receive all notifications from the Payment Automation SuiteApp, such as reminder emails.

An email notification will be sent at 2 PM ET daily to alert users when payments are delayed for processing due to errors in the past 24 hours. This includes payments with **Failed**, **Data Error**, and **ACH Payment Return** statuses.

Reviewing Failed and Rejected Payments

To review failed and rejected payments:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Payments**.
3. Click the **Canceled** subtab.
4. Click the Reference No. link of the transaction you want to investigate.
5. Click the **SuiteBanking** subtab.
6. On the **Payment Audit Trail** subtab, click the Name link on the transaction line you want to review.

To determine the reason of a payment failure, go to the bill payment record and see the value of the **Failed Reason** field.

Reviewing Scheduled Payments

Scheduled payments help you track future-dated payments that are yet to be submitted to HSBC Bank for processing.

To review scheduled payments:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Payments**.
3. Click the **Scheduled** subtab.
4. Click the Reference No. link of the transaction you want to investigate.

Reviewing Outstanding Checks

Outstanding checks help you monitor checks that are yet to clear your bank.

To review outstanding checks:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Payments**.
3. Click the **Outstanding Checks** subtab.
4. Click the Reference No. link of the transaction you want to investigate.

Click **Export to CSV** to export the outstanding check payments in CSV format from the Dashboard. Use the quick search and date filters to display specific transactions. Select the date range from the date fields for the export.

Canceling Virtual Cards

If a vendor is not able to process a virtual card payment, the vendor may request to be paid by other means. In this case, cancel the issued virtual card. You can make the cancellation only if the payment status is VCard Sent or VCard Decline.

To cancel a one-off virtual card:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Virtual Card**.
3. On the Activity pane, click the Date link on the transaction of the virtual card you want to cancel.
4. Click **Cancel Virtual Card**. The payment will be voided, and you will need to submit another payment.

Reviewing Remittance Email

After a payment is processed, the vendor receives a remittance email message with information about the payment: a list of bills, the payment amount, payment date, reference number, and other payment details.

The Payment Automation SuiteApp uses the **Advanced PDF/HTML Templates** feature to send email remittance notifications to vendors for ACH and check payments. You can resend remittance notifications to your vendors, track when they're sent, and include accurate payment details that contain vendor credits applied to bills.

Remittance notifications for virtual card payments continue to use the earlier process. The payment details are shown in the HTML body of the email remittance. The remittance email sender address is no-reply@payment-automation.netsuite.com.

Enabling the Advanced PDF/HTML Templates Feature

It is required to enable the **Advanced PDF/HTML Templates** feature. If this is not enabled, the Payment Automation SuiteApp upgrade to version 5.0 will fail and no further updates will be received by the account.

To enable the Advanced PDF/HTML Templates Feature:

1. Login using the Administrator role.
2. Go to Setup > Company > Enable Features.
3. Click **SuiteCloud** subtab.
4. In the **SuiteBuilder** subtab, enable **Advanced PDF/HTML Templates**.
5. Click **Save**.

Viewing and Sending the Remittance Voucher

On the Bill Payment page, the **Remittance Voucher** and **Resend Remittance** buttons appear after the payment status changes to **Payment Sent**.

The remittance email will include a PDF copy of the payment voucher. To update the information in the remittance voucher, see [Updating Information Included in the Remittance Voucher](#).

The email notification will use the email address of the user who initiated the payment.

Note: In the case of bulk bill payment processing, if batch approval routing is enabled, the email is sent from the approver's email address.

If an email address is specified in Home > Set preferences > General > User profile > From Email Address, then the email is sent from this address.

To download and resend the remittance voucher:

- To download a PDF copy of the remittance email message for your review, go to the bill payment record, and click **Remittance Voucher**.
- To resend the remittance email, click **Resend Remittance**.

Note: These actions are only available for ACH and Check bill payments, when remittance email is defined in Vendor SuiteBanking subtab.

- On the Bill Payment page, go to the **Communication** subtab to view the details of the remittance notifications that have been sent. You can view and download a PDF copy of the remittance voucher as well.

The pop-up blocker in your browser may prevent you from downloading the remittance email PDF. If you have issues with downloading the file, disable the pop-up blocker in your browser.

Note: By default, only A/P Manager and A/P Clerk are authorized to access remittance vouchers. For information about the required permissions, see [Setting Up Roles and Permissions](#).

Getting the Unmasked Virtual Card Number

If the remittance email is sent using the transport layer security (TLS) protocol, the Virtual Card number is not masked in the remittance email.

TLS encryption increases user security and privacy. Not using TLS makes sensitive information transferred over the internet vulnerable to theft.

If TLS is not used, the Virtual Card number is masked. To get the full card number, follow the instructions in the remittance email.

Updating Information Included in the Remittance Voucher

You should use only one billing information record.

To add information included in the remittance voucher:

1. Go to SuiteBanking > Setup > Account Information > New.
2. Enter the following fields:
 - Company Address
 - Logo
 - Return Email
 - Phone Number
 - Name
3. Click **Save**.

If your address, e-mail, phone, or logo changes in the future, update the remittance voucher information.

Note: The Payment Automation SuiteApp uses the company information and company logo in the remittance email sent to the vendors.

To remove the logo from the remittance email, edit the **Logo** field for ACH and Check payments. However, for virtual cards, you will need to submit a support case to the NetSuite Customer Support team. Please note that it may take up to five business days to complete this request.

To change information included in the remittance voucher:

1. Go to SuiteBanking > Setup > Account Information.
2. On the account information record line, click **Edit**.
3. Update the fields as needed.
4. Click **Save**.

Overview of Payment Statuses

The following table provides an overview of payment statuses used in Payment Automation.

ACH and Check Statuses

Status	Description
For Submission	The payment is created in NetSuite but hasn't been sent to the payment processor yet, and a transaction is not yet created at the payment processor. Waiting to be sent to the payment processor. With approval routing enabled, only approved payments are sent for processing.

Status	Description
Pending	The payment processor confirms the payment is created in their system and is waiting for funds from the source bank to be credited into the HSBC Online Account.
Processing	ACH Funding from source bank is credited to HSBC Online Account. Payment is sent to HSBC for processing and is waiting now for HSBC confirmation.
Payment Sent	The payment is in queue for HSBC processing. Checks are printed and mailed at this stage.
Paid	Received confirmation from the payment processor that payment initiation was successful. The ACH or check payment has been settled and cleared in your HSBC Online Account.
Data Error	Payment information contains erroneous data like incorrect address formatting or special characters in payment details. You can see the reason for failure in the Failed Reason field on the SuiteBanking subtab of the bill payment record. For more information, see Addressing the Data Error Status .
Failed	Payment processing failed, and payment was voided. A new payment transaction needs to be initiated. You can see the reason for failure in the Failed Reason field on the SuiteBanking subtab of the bill payment record.
ACH Payment Return	The payment was returned by the vendor's bank due to incorrect bank details or another error. For more information, see Addressing the ACH Payment Return Status .
For Resubmission	ACH funding from the source bank is credited to the HSBC Online Account. However, initial attempts in sending the payment to HSBC failed. The system will automatically queue the payment for next day execution.

Important: if the payments to vendors end up with an **ACH Payment Return** or **Data Error** status, you will be able to reprocess those payments. There is no need to void the payment and then re-initiate it manually. In addition, no new funding request will be created for reprocessed payments. Existing funds at the HSBC Online Account will be used for the reprocessed payments. With one click, payments are reprocessed and sent to HSBC for processing.

Addressing the Data Error Status

Payments with incorrect or missing data are updated with the Data Error status along with an error code and description. When this happens, you can:

- **Reprocess the payment** – Choose this option after correcting the error; this option will resubmit the payment for processing without new funding. If reprocessing is performed without correcting the error, the reprocessed payment will result in the same data error again. If approval routing is enabled in the account, the reprocessed payment will be submitted to HSBC for processing once approved.
- **Void the payment** – Choose this option if you prefer to submit another payment instead. The payment status will change to Failed and the record will be voided. You will be asked if you want to withdraw the funding money from HSBC. If so, you'll be redirected to the Withdrawal page.

You can see the reason for failure in the Failed Reason field on the SuiteBanking subtab of the bill payment record.

Addressing the ACH Payment Return Status

The return payment is updated with information from the reconciliation report when the money is credited back to HSBC Online Account. The Failure Reason will be empty because this information is not available in the reconciliation report. You will receive an e-mail notification from HSBC about why the payment was returned.

The following table includes few of the common errors and how they can be resolved:

Note: The return reason is listed on the report that is sent to you by HSBC listing the items returned. If the amount returned is listed as **Total Credit Amount**, this return was related to a payment to a vendor. If the amount returned is listed as **Total Debit Amount**, this return was related to funding request.

Reason Code	Title	Description	Next Steps
R01	Insufficient Funds	Insufficient funds in the customer account to process this debit request.	Your source bank account doesn't have enough balance to cover the auto-funding request for your payments. Please add money to your HSBC account. For more information, see Making Money Transfers . Ensure that you have enough balance before submitting payments or making money transfers.
R02	Account Closed	The beneficiary's account is closed.	Contact your vendor to confirm their bank account details. Then, update the vendor's primary bank account before reprocessing the payment. For more information, see Addressing the ACH Payment Return Status .
R03	No Account/ Unable to Locate Account	Unable to locate beneficiary account.	Contact your vendor to confirm their bank account details. Then, update the vendor's primary bank account before reprocessing the payment. For more information, see Addressing the ACH Payment Return Status .
R04	Invalid Account Number Structure	The account number structure is not valid. (Example: Not enough digits).	Contact your vendor to confirm their bank account details. Then, update the vendor's primary bank account before reprocessing the payment. For more information, see Addressing the ACH Payment Return Status .
R08	Payment Stopped	The receiver has placed a stop payment order on this debit entry.	Auto-funding request from your source bank was rejected. Contact your source bank to remove the stop payment order and allow auto-funding requests from HSBC before submitting payments or bank transfers.
R09	Uncollected Funds	Insufficient funds in the customer account.	Your source bank account does not have enough balance to cover the auto-funding request for your payments. Please add money to you HSBC account. For more information, see Making Money Transfers . Ensure that you have enough balance before submitting payments or making money transfers.
R13	Invalid ACH Routing Number	Invalid ACH Routing Number.	Contact your vendor to confirm their bank account details. Then, update the vendor's primary bank account before reprocessing the payment. For more information, see Addressing the ACH Payment Return Status .
R20	Non-Transaction Account	The beneficiary's account is a Non-Transaction Account for ACH.	Contact your vendor to confirm their bank account details. Then, update the vendor's primary bank account before reprocessing the payment. For more information, see Addressing the ACH Payment Return Status .

Reason Code	Title	Description	Next Steps
R23	Credit Entry Refused by Receiver	Any credit entry that is refused by the receiver.	Contact your vendor to discuss the return reason. You have the option to void or reprocess the payment. For more information, see Addressing the ACH Payment Return Status .
R29	Corporate Customer Advises Not Authorized	Corporate Customer Advises not authorized.	Auto-funding request from your source bank was rejected. Contact your source bank to remove the stop payment order and allow auto-funding requests from HSBC before submitting payments or bank transfers.
R32	RDFI Non-Settlement	The Receiving Financial Institution is not able to settle the Entry.	Contact your vendor to discuss the return reason. You have the option to void or reprocess the payment. For more information, see Addressing the ACH Payment Return Status .

For information about other return codes and reasons, contact the NetSuite Support team.

When a payment is returned, you can void it in NetSuite. The payment status will change to Failed and the record will be voided. You will be asked if you want to withdraw the funding money from HSBC. If so, you'll be redirected to the Withdrawal page. After you void the payment, make changes to prevent the error from occurring, and submit another payment.

You can choose to reprocess the payment. Reprocessing ACH returned payment will not initiate new funding and existing funds will be used. Resubmit the payment for processing only after correcting the error.

Auto-Funding and Money Transfers Journal Entry Statuses

Status	Description
Sent to Bank	Status for auto-funding request Journal Entries. ACH funding request is sent to the HSBC for processing.
Completed	Bank transfer request is complete, and that money has settled and cleared in your HSBC Online Account. This is for Add Money, Withdrawal and Funding journal entries.
Failed	Error in transferring money to your HSBC Online Account – the transfer request has failed. You can see the reason for failure in the Failed Reason field on the SuiteBanking subtab of the bill payment record.

Virtual Card Statuses

Status	Description
For Submission	Payment is created in NetSuite but hasn't been sent to the payment processor yet and a transaction is not yet created at the payment processor. Waiting to be sent to the payment processor. With approval routing enabled, only approved payments are sent for processing.
Pending	The payment processor confirms the payment is created in their system and is waiting for funds from the source bank to be credited into the HSBC Online Account.
Processing	Transaction belongs to a batch that was published successfully. Waiting for the payment processor and HSBC to confirm successful payment initiation.

Status	Description
Failed	Payment processing failed, and payment was voided. A new payment transaction needs to be initiated. You can see the reason for failure in the Failed Reason field on the SuiteBanking subtab of the bill payment record.
Rejected	Occurs when: - payment initiation or individual transaction included in the payment initiation has been rejected. - ACH Funding is not successful, for example due to a wrong account number or insufficient funds. - When a virtual card limit is exceeded.
Virtual Card Sent	The virtual card is created.
Virtual Card Authorized	The virtual card is authorized.
Virtual Card Declined	The virtual card is declined.
Paid	Received confirmation from the payment processor that payment initiation was successful.
Virtual Card Expired	The virtual card is expired.
Virtual Card Canceled	The virtual card is canceled or blocked and payments cannot be made by the card.

 **Note:** Expired virtual cards cannot be canceled from UI. The payment status will be **Payment Sent**. You need to void the payment and initiate it again.

Payment Status Tracking

The Payment Automation SuiteApp tracks and updates funding requests and payments to provide almost real-time status as transactions are processed by HSBC. The users will have full visibility of the status of the payment and funding, providing you with positive confirmation if the transaction was posted successfully in HSBC, such as a funding request or payment execution. You will also receive information about whether the payment was returned to HSBC from the beneficiary bank.

In addition, the Bill Payment and Vendor Prepayment records now include a visual status tracker, which is handy for checking the status of the payment quickly.

Making Money Transfers

Payment Automation lets you make transfers to add money to your HSBC Online Account from your source account, or withdraw money from your HSBC Online Account.

Daily transaction ACH limit validations will occur before submitting and approving the payment. For more information, refer to [Daily Transaction ACH Limit](#).

 **Note:** Payments can only be submitted on business days. Payment processing, money transfers, and payment can't be initiated on weekends or bank holidays.

Users with the AP Payment Clerk, AP Payment Manager, and the Administrator roles that have logged in to NetSuite with two-factor authentication can make money transfers. In addition, you can set up a

custom role to be able to initiate Money transfers. For instructions, see [Setting up a Custom Role to Make Money Transfers](#).

When a bank transfer is initiated, a journal entry is created in NetSuite to record the transaction. To access the journal entry after you submit a money transfer, click the link in the Reference column on the Bank Account Transfers page.

Enable journal entry approval routing for money transfers to be authorized before they are sent for processing. For more information, see the help topic [Use Journal Entry Approval Routing](#).

If you enable journal entry approvals, money transfer requests are sent to HSBC according to the schedule after a journal entry is approved. The daily scheduler runs at 8 pm Eastern Time, and sends all unsent money transfer requests to HSBC for processing.

If journal entry approval routing is disabled on your account, money transfer requests are sent to HSBC for processing immediately after you create an Add money or Withdraw money request.

Bulk approval of journals for money transfers isn't supported. Each journal created has to be manually approved by the approver.

The Payment Automation SuiteApp prevents excess withdrawal request submission if the total number of withdrawal requests for the day exceeds the current HSBC balance or if there are any pending withdrawals that have yet to be processed at HSBC. You cannot withdraw from your HSBC Online Account more than what is your current available balance.

Bank Transfer Statuses

- For Submission – the Payment is created in NetSuite and will be forwarded to HSBC Online Account for processing.
- Completed – the transfer request has been successful.
- Failed – the transfer request failed. Receiving this status will auto-void the original transfer request.

To make a money transfer:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Transfers**.
3. On the Bank Account Transfers page, choose one of the following options:
 - To transfer money from your source account to the HSBC Online Account, click **Add Money**.
 - To withdraw money from your HSBC Online Account and transfer it to your source account, click **Withdraw Money**.

Note: For withdrawal requests, the journal entries with statuses **For Submission**, **Pending**, and **Sent to Bank** will be considered when calculating the amount allowed for withdrawal.

4. Enter the amount you want to transfer in the **Amount** field.
5. (Optional) Enter details about the transfer in the **Memo** field. The upper limit is 16 characters.
6. Check the obligatory consent and authorization boxes.
7. Click **Submit**.

Transfers and withdrawal requests are sent for processing with the batch at 8 pm Eastern Time. Any money transfer request submitted after the 8 pm Eastern Time cut-off time will be sent for processing on the next business day. It takes one to two business days for your HSBC Online Account to be credited or debited.

Statements and Reconciliation

Use daily and monthly statements for HSBC Online Account and HSBC Virtual Card reconciliation. Bank account monthly statements, virtual card statements, and invoices become automatically available for download as PDF files on the second day of every month.

To access the statements, go to SuiteBanking > Payment Automation > Dashboard, and click **Account Details** in the HSBC Online Account portlet. You can also access the statements by clicking **Card Details** in the HSBC Virtual Card portlet. Click **Refresh** in the Statements portlet to get available new invoices or statements.

Note: Invoices are generally available by the 15th of a month at 5:30 p.m. Eastern Time (UTC – 5). If no new invoices are available by the next working day at 5:30 p.m. Eastern Time (UTC – 5), click **Refresh**. All available invoices will be updated in the Invoices tab of the Statements portlet.

For an overview of dates relevant to bank and virtual card data reconciliation, see [Statement and Auto-Debit Payment Schedules](#).

A format profile is created automatically for your account. For information about format profiles, see the help topic [Format Profile](#).

Journal entries for transaction fees are automatically created based on the monthly statement on the 15th day of every month. The transfer status of the journal entry is "Sent to the Bank" and the Memo is "Monthly Invoice Fee". The journal entry is created to record the bank transfer from the source bank to HSBC to pay the fees.

On the second day of every month, statement files of posted transactions are automatically retrieved from HSBC. NetSuite existing auto matching rules match the transactions from the files with bill payments in NetSuite. For more information, see the help topic [Matching Bank Data](#).

The HSBC ACH Reconciliation format profile lets you see individually all the ACH transactions that are posted in each batch.

Billing fees and virtual card payments are automatically debited from HSBC when due:

- Billing fees – debited five days after the statement is generated, which is typically every 20th day of the month.
- Virtual card payments – due every 25th day of the month. Virtual card payments are included in the ACH CSV report. The CSV reconciliation report does not include any Memo information. However, the report includes the payee.

Billing fees and virtual card payments are posted in the HSBC Online Account and are included in the daily reconciliation report.

The daily reconciliation file of the HSBC Virtual Card will include the statement credit as well as any other charges like late fees and penalties imposed by HSBC Bank. These transactions will appear on the Match Bank Data page.

Watch the following help video for information about Reconciliation:

 [Payment Automation SuiteApp - Reconciliation](#)

To download a bank account monthly statement or an invoice:

1. On the left navigation pane, click **Bank Accounts**.
2. In the **Statements** portlet, click the **Statements** subtab or the **Invoices** subtab.
3. Click **Refresh** to get all available statements or invoices.
4. Locate the statement or invoice that you want to download.

5. Click **Download**.

To download a virtual card statement:

1. On the left navigation pane, click **Cards**.
2. In the **Statements** portlet, click **Refresh** to get all available statements.
3. Locate the statement you want to download.
4. Click **Download**.

Manually Refresh Monthly Statements or Invoices

To manually refresh monthly statements or invoices:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. Click **Account Details** in the HSBC Bank Account portlet. Click **Card Details** in the HSBC Virtual Card portlet.
3. To switch between viewing the statements or invoices, click the Statements or Invoices tab in the Statements portal of your bank account.
4. Click **Refresh** to get the statements or invoices.
5. If you still do not see statements or invoices, contact NetSuite Customer Support.

Statement and Auto-Debit Payment Schedules

Virtual Card Statement Schedule

- **Billing period** – covers previous month from second to the last day. All posted transactions during this period are included.
- **Billing cut-off** – the first day of the following month – end of day. If the first of the month is a non-business day, the statement will be generated on the next business day.
- **ACH auto-funding** – automatically initiated from the NetSuite platform every 20th day of the following month to pay the amount due on the Virtual Card statement. The ACH request will follow the T+1 settlement date, meaning next day following payment initiation. If the settlement date is a non-business day, funding will become available on the next business day.
- **Payment due date** – 25th day of the following month. If the due date is a non-business day, the payment will be debited on the next business day. HSBC will debit your HSBC Online Account on the payment due date.

Transaction Fees Statement Schedule

Transaction fees are charges for payments processed through the HSBC bank account. These fees are assessed on a monthly basis.

- **Billing period** – covers previous month from the first to the last day.
- **Billing statement** – the 15th day of the following month.

HSBC Bank generates monthly invoices that are fetched on the 15th day of every month. In case the 15th day is not a business day, the invoice will be fetched on the next business day. An automatic

email notification is sent to the user who initiated the HSBC application when the billing invoice is available. The invoice will be accessible in the dashboard without the need for manual refreshing. If manual refreshing is necessary, please see [Manually Refresh Monthly Statements or Invoices](#).

Note: The Billing Statement will become available the same day the ACH Auto-funding for the monthly invoice is initiated. For any questions regarding fees and charges on the statement, contact NetSuite Customer Support.

To add or change the email preference, see [Setting Email Preference](#).

- **ACH auto-funding for monthly invoice** – automatically initiated from the NetSuite platform after the invoice becomes available on the 15th. In case the 15th is not a business day, the auto-funding will be initiated on the next business day. The ACH request will settle within your account on T+1 settlement day, meaning next day following payment initiation. If the settlement date is a non-business day, funding will become available on the next business day.
- **Payment due date** – the fifth day after the invoice receipt or generation. If the due date is a non-business day, the payment will be due on the next business day. HSBC will debit your HSBC Online Account on the payment due date. For information about autorecording of bank fees, see [Setting Default Bank Fees Account](#).

To access the statements, go to SuiteBanking > Payment Automation > Dashboard, and click Account Details in the HSBC Online Account portlet. Transaction fees are included as separate invoices that you can access from the Invoices tab of the Statements portlet on the HSBC Online Account page.

For more information about HSBC Processing Fees, refer to [HSBC Processing Fees](#).

Reviewing Automatically Matched Transactions

Transactions posted in HSBC bank accounts are imported daily from 4 AM to 7 AM PST.

To review automatically matched transactions:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Bank Account**.
3. Click **Match Bank Data**.
4. In the **Account** list, select HSBC Bank Account or HSBC Virtual Card.
5. Click the **Review** subtab.

For more information, see the help topic [Bank Data Matching and Reconciliation](#).

Matching Bank Data Manually

In cases where the system is unable to automatically match the imported transaction with the recorded NetSuite transaction, you can manually match the transaction. To do this, you need to select the transactions based on imported bank data versus account transactions.

To reconcile HSBC Bank Account and HSBC Credit Card transactions:

1. Go to SuiteBanking > Payment Automation > Dashboard.
2. On the left pane, click **Bank Account**.
3. Click **Match Bank Data**.

4. In the **Account** list, select HSBC Bank Account or HSBC Credit Card.
5. On the **To Be Matched** subtab, select the **Imported Bank Data** transactions on the left, and then select the corresponding GL account entries on the right.
6. Click **Submit**.

Automatic Journal Entry Creation for Auto-Funding Transactions

When a payment batch is sent to the payment processor, a funding request from the source bank is initiated to obtain funding before the payment is processed.

A corresponding journal entry for the funding amount request is created automatically. A journal entry is created for any batch that includes an ACH or check payment. The amount is calculated based on total payments.

A journal entry is created when a payment status changes to Pending. You can use this journal entry to reconcile the credit entry received in the daily bank statement. If a funding request fails, the payment transactions and funding journal will be auto-voided.

When an Auto-Funding request is raised for monthly transaction fees and credit card due, journal entry will be created in NetSuite automatically for the funding amount.

For more information about journal entries, see the help topic [Journal Entries](#).

For more information about classification fields such as Department, Class and Location for journal entries, see [Setting Default Department, Class, and Location Values](#).

For more information about transaction settlement, see [Transaction Settlement](#).

For more information about virtual card statement, see [Virtual Card Statement Schedule](#).

Making Adjustments for Virtual Cards Not Paid In Full

Sometimes, a vendor might charge less than the full amount when using a virtual card, for example if the vendor incorrectly calculates charges like taxes or other fees. This causes an imbalance between Payment Automation and HSBC. The current balance displayed on the Payment Automation dashboard won't match the total amount on the Activity pane of the HSBC Virtual Card page.

To correct this discrepancy, create an adjustment journal entry. The vendor will need to provide a credit note or another document to correct the original bill. You should correct the information in the system by creating a journal entry. Then, the amounts will match on the Match Bank Data page too.

Frequently Asked Questions about Payment Automation

This section contains frequently asked questions related to Payment Automation that concern the following topics:

Bank Account Onboarding

Electronic Signature Attestation and Agreement

- **What is an electronic signature?**
 - The electronic signature process (Esign), powered by Adobe Acrobat technology, is a cloud-based service that replaces the paper and ink signature process with a fully automated electronic signature workflow. Adobe and Acrobat are either registered trademarks or trademarks of Adobe in the United States and/or other countries
 - With Esign, you can easily sign documents anywhere, anytime, and on any device within minutes.
 - After the signing process is complete, you will receive an email message with the signed document, and an audit trail for its records.
- **Is electronic signature secure?**
 - Yes, electronic signature employs industry standard security practices to protect your documents, data, and personal information. Whether related to identity management, data confidentiality, or document integrity, the industry standard security practices are deeply ingrained in the technology and our service operation processes.
- **How does an electronic signature work?**
 - An electronic signature, or e-signature, is a way of signing documents digitally. The advantages of using electronic signatures include:
 - **Signer authentication** – e-signature document requests are emailed to the signers' company email address and for additional security, a One-Time Password (OTP) must be entered. You must obtain an OTP through a cell phone or a land line without an extension.
 - **Final proof** – electronic signature provides an audit trail with clear evidence for each transaction, showing what document was signed and who signed it. Copies of executed documents are automatically sent to all parties.
- **Is electronic signature required or can I use the traditional paper version?**
 - To execute documentation, electronic signature is not required. The sender will ask you during the process if you are able to receive and sign the document electronically. If you are, the document link will be sent to you to start the signing process. However, if you want to opt out of signing electronically at any stage in the process, let the sender know. HSBC will send you a PDF version of the documents in an email message if you are TLS-enabled, or a traditional paper version by mail.
- **Will the email message asking to sign the documents be sent from an HSBC email address?**
 - The email message will be sent from adobesign@adobesign.com and will include the name of the Onboarding Case Manager and an email address that you can use if you have any questions.
- **How long is my One-Time Password (OTP) valid?**
 - The OTP is valid for ten minutes after receipt. If your OTP expires, you will have to request a new OTP by following the link in your email message.

- **How many times can I request a One-Time Password (OTP)?**
 - You can request an OTP up to five times after which you will be required to contact your HSBC Onboarding Case Manager whose contact information will be in your email message received from adobesign@adobesign.com.
- **Which browsers are supported for electronic signature?**
 - You should use Google Chrome, but other browsers such as Edge, Firefox, and Safari are compatible. Internet Explorer 11 and below are not supported.
- **What should I do if I did not receive an email message containing a link to electronic signature?**
 - If you believe you should have received an email message requesting your signature, check your spam and promotions folders, and if you cannot locate the email message, contact your HSBC Onboarding Case Manager.
- **What should I do if the sign function does not work for me?**
 - Try a different browser. If you are using a mobile device, try using a desktop browser.
- **What should I do if I have provided incorrect details?**
 - Contact your HSBC Onboarding Case Manager whose details will be provided in the Esign email message sent to you.
- **How can I change the phone number provided for electronic signature?**
 - To request a change to the phone number provided on the electronic signature request, contact your HSBC Onboarding Case Manager and provide them with the new phone number you want to use. The HSBC Onboarding Case Manager will contact you to confirm the change has been applied, and you can continue with your application.
- **How can I get copies of the signed documents?**
 - You will receive a copy of the signed documents through email. If you misplace a copy of the document, contact NetSuite Customer Support.

SuiteBanking Account Information Change

How can I update my mailing address, registered address, name, entity, ownership structure, and request these changes to be reflected on my HSBC Online Account?

You can submit a request to change your company's account information such as address, name or entity by contacting your NetSuite Support team.

Note that upon receipt of your request, you may be contacted by HSBC by email for additional information, documentation, or both.

After you have submitted all required information, you will receive a confirmation email from HSBC to advise on the status of your request.

Changes to Certificate of Banking Authority

How can I update the names provided on Certificate of Banking Authority?

Request to change the Certificate of Banking Authority must be submitted by an Authorized Person only. Please submit the request by contacting your NetSuite Support Team.

The request needs to come from those authorized in the manner stated in the Certificate of Banking Authority. Please consult your internal company records for this information.

Reapplying for a HSBC Virtual Card

How can I re-apply for a HSBC Virtual Card if I now only have the HSBC Online Account?

It is currently not possible to re-apply for a HSBC Virtual Card.

Request for Audit Confirmation from HSBC

How can I request an audit confirmation to verify my HSBC Online Account for credit reviews, quality control audits, loan applications, and so on?

HSBC uses confirmation.com as the mechanism to receive all audit confirmation requests sent by auditors.

Confirmation.com is an online confirmation solution from US-based Capital Confirmation Inc., which lets banks respond to auditors directly for requests raised on behalf of customers.

Auditors must register with confirmation.com to use this service. After registration, confirmation.com will validate both the audit firm and the individual auditor. There is no registration fee, it is a "pay-as-you-go" service.

After the registration, the auditor sets up a company account. The account requires the name of an individual listed on the Certificate of Banking Authority. The individual will receive an email message from systems.administrator@confirmation.com, seeking permission for the auditor to request the information through confirmation.com. After this individual has provided authority, the auditor is notified through an email message and can initiate a request to HSBC.

After the confirmation is completed by HSBC, the auditor receives an email message notifying them that the confirmation is available on confirmation.com.

Request Bank Reference Letter Confirming Accounts with HSBC

How can I request a bank reference letter that would confirm that our company holds an account with HSBC Bank USA, N.A., as requested by a supplier we will be paying from this account?

You can submit a request for a bank reference letter by contacting NetSuite Customer Support. You will be asked to provide the following information:

- Account name
- Account number
- Account address

Your request will be reviewed by HSBC and a bank reference letter will be sent to the email address HSBC holds on your account.

Handling an Unprocessed Returned Check

What should I do if I have made a check payment and have received a returned check in the mail? What action is required to complete or void the payment?

If your check payment is returned to you unprocessed, and you still want to send it to the recipient, verify the recipient's address is correct, affix proper postage, and mail the check to the recipient.

To void a check if necessary:

1. Write "VOID" in large letters across the front of the check. After the check is voided, it can no longer be used to make payments.
2. Manually void the payment on your Payment Automation dashboard. For more information, see [Tracking Delayed Payments](#).
3. Transfer the funds from your HSBC Online Account back to the funding financial institution. For instructions, see [Making Money Transfers](#).

Handling a Returned Check Due to Insufficient Funds

What should I do if I have been notified that there were insufficient funds in my account when the recipient tried to deposit the check?

You will receive an email notification from HSBC that will include the check payment details being held because of insufficient funds in your HSBC Online Account, including a deadline of when the account must be funded to support settlement.

For instructions about how to make a one-time payment to fund your HSBC Online Account, see [Making Money Transfers](#).

For rejected payments, you'll need to manually void the payment on your Payment Automation dashboard and submit a new payment. To void a payment, click the Payments tab on the left navigation pane, select a payment, and click **Void**.

Retrieving a Check Image

What should I do if I want to request a copy of an issued or paid check to provide proof of payment to the beneficiary who is claiming non-receipt?

Contact NetSuite Customer Support to request a copy of a check from HSBC that has been issued or paid.

To process your request, you will have to provide the following information:

- Account number
- Check number
- Date when the check has been posted

HSBC will send you an email message with a copy of the check image requested.

Stopping a Check Request

What should I do if I want to request a stop check because the payment is incorrect, I made an error, or I received a returned check in the mail and want to stop the payment?

A stop check can be applied only on a check payment that hasn't cleared. Contact NetSuite Customer Support to request a stop payment on your check.

To process the request, you will have to provide the following details:

- HSBC Online Account number
- Payee name
- Date on the check
- Amount on the check

- Check number

HSBC needs a reasonable amount of time to verify that the check has not already been paid and apply the stop on the payment.

Your stop payment request takes effect when confirmed by HSBC.

A stop payment is valid for 6 months as per Uniform Commercial Code guidelines, after which you will be required to re-apply the stop for each additional 6-month period.

If your request is successful, you will be required to manually void the payment on your payment automation dashboard and withdraw the funds from your HSBC Online Account. To void a payment, click the Payments tab on the left navigation pane, select a payment, and click **Void**. For instructions about withdrawing funds, see [Making Money Transfers](#).

Handling an ACH Payment Failure or a Beneficiary Claiming Non-Receipt

What should I do if I have made an ACH payment, but I do not see this payment deducted from my account and would like to confirm that the payment was successful?

HSBC will assist you with investigating payments made from your HSBC Online Account. Contact NetSuite Customer Support, and provide the following information:

- The date of the payment
- Transaction amount
- Customer account number
- Any associated message on the payment

HSBC will investigate and contact you with a response to your query.

Handling an ACH Payment Returns

What should I do if an ACH payment I authorized has been returned.

HSBC will assist with investigations on payments made from your HSBC Online Account. HSBC sends PEPCAR report through email with details of the ACH Return. Contact NetSuite Customer Support, and provide the following information:

- The date of the incoming returned payment
- Transaction amount
- Customer account number
- Any associate message on payment return

HSBC will investigate and contact you with a response to your query.

For more information see, [Addressing the ACH Payment Return Status](#).

Handling Suspected Fraudulent ACH or Check Transactions

What should I do if I want to report suspected fraud on my account because funds have left my account and my intended recipient is claiming non-receipt, or I did not authorize this payment?

If you suspect fraud on your HSBC Online Account, contact NetSuite Customer Support immediately.

Requesting an ACH Payment Amendment, Reversal, or Deletion

What should I do if I want to amend, reverse, or delete a payment?

The Payment Automation SuiteApp doesn't support payment amendments.

You can request a payment reversal with HSBC within 5 days post settlement. Contact NetSuite Customer Support and someone from HSBC Platforms Service Support will contact you regarding your request.

HSBC will contact the beneficiary bank to request they return the funds to your HSBC Online Account. Wait for 3 days following a credit for an ACH reversal before manually voiding the payment and requesting a transfer of the funds. For details, see [Making Money Transfers](#).

The 3-day period allows for a possible return of the reversal by the beneficiary bank. If a reversal is returned to the beneficiary bank, you will have to contact the payee directly to arrange for the return of funds.

If the payment is more than 5 days post settlement, you should contact the payee and request they return the funds to your HSBC Online Account. Then, manually void the payment and request and transfer the funds. For details, see [Making Money Transfers](#).

Making a One-Time Payment to Top up the HSBC Online Account

What should I do if I want to make a one-time payment to fund my HSBC Online Account?

If you have a pending outgoing payment that is unable to be processed due to funding that has been canceled or returned after the payment was executed on your HSBC Online account, you should transfer funds to the account. For instructions, see [Making Money Transfers](#).

Transferring Funds to and from the HSBC Online Account

What should I do if I want to request funds be moved from my HSBC Online Account into another account because the funds are no longer required?

For information about topping up the HSBC Online Account or moving funds to another account, see [Making Money Transfers](#).

Why can't I withdraw funds from my HSBC Online Account?

The Payment Automation SuiteApp prevents excess withdrawal request submission if the total number of withdrawal requests for the day exceeds the current HSBC balance or if there are any pending withdrawals that have yet to be processed at HSBC.

Payment Status

What do I do if my payment status shows Data Error?

Payments with incorrect or missing data are updated with the Data Error status along with an error code and description. When this happens, you can:

- **Reprocess the payment** – Choose this option after correcting the error; this option will resubmit the payment for processing without new funding. If reprocessing is performed without correcting the

error, the reprocessed payment will result in the same data error again. If approval routing is enabled in the account, the reprocessed payment will be submitted to HSBC for processing once approved.

- **Void the payment** – Choose this option if you prefer to submit another payment instead. The payment status will change to Failed and the record will be voided. You will be asked if you want to withdraw the funding money from HSBC. If so, you'll be redirected to the Withdrawal page.

You can see why a payment failed in the Failed Reason field on the SuiteBanking subtab of the bill payment record.

What do I do if my payment status shows ACH Payment Return?

The return payment is updated with information from the reconciliation report when the money is credited back to HSBC Online Account. The Failure Reason will be empty because this information is not available in the reconciliation report. You will receive an e-mail notification from HSBC about why the payment was returned.

When a payment is returned, you can void the payment in NetSuite. The payment status will change to Failed and the record will be voided. You will be asked if you want to withdraw the funding money from HSBC. If so, you'll be redirected to the Withdrawal page. After you void the payment, make changes to prevent the error from occurring, and submit another payment.

You can choose to reprocess the payment. Reprocessing ACH returned payment will not initiate new funding and existing funds will be used. Resubmit the payment for processing only after correcting the error.

Vendor Prepayment

How do I make a Vendor Prepayment?

Go to Transactions > Payables > Enter Vendor Prepayment. Enter the information and click Save and click Submit for Approval. For more information, see [Vendor Prepayment](#).

How do I apply my Vendor Prepayment to the existing bill for my vendor?

When the vendor prepayment status is **Paid** in the SuiteBanking subtab of the record, you should apply the funds to the existing bill for your vendor.

Go to SuiteBanking > Vendor Prepayments > Apply. Choose from list of bills available for the vendor and enter the amount you want to apply.

Daily Limit Validation

What is Daily limit validation, and who will set this limit?

Daily transaction limit is the maximum limit for processing ACH and checks payments on any day set by HSBC Bank. Daily transaction limit validation eliminates the need to reprocess failed payments due to limit-exceeding failures.

Determining the Available Balance

What should I do if I want to determine the available balance within my HSBC daily ACH settlement limit to avoid initiating payments that would exceed my daily limit?

The following fields have been added for [Making Money Transfers](#), [Paying a Single Vendor](#) and [Processing Bulk Payments](#):

- **Daily Transaction Limit:** It is the maximum limit for processing ACH and checks payments on any given day, set by HSBC Bank
- **Daily Transaction Limit Available:** It is the available limit after processing payments of the present day and the payments initiated post cutoff of the previous day.
- **Payments Pending Approval:** This is the total amount of payments submitted and pending approval.

You can only process payments that are within the daily transaction limit. The SuiteApp will give an alert while processing the payments that exceed the daily transaction limit.

You can better plan and prioritize the payments to be processed for any day based on the remaining daily limit available.

For more information, see [Daily Transaction ACH Limit](#).

Where to see the remaining daily limit of the day?

You can refer to the **Remaining Daily Transaction Limit** field on the HSBC Bank Account portlet under the overview page of SuiteBanking Dashboard. Alternatively, the Pay Single Vendor and Bulk Bills pages will display the limit values, which are visible when HSBC Bank GL is selected.

Increasing or Decreasing Daily Limit

How can the Daily Transaction Limit and Virtual Card limit be increased or decreased?

You need to reach out to the NetSuite Support Team for queries related to the Daily Transaction Limit and Virtual Card Limit.

Daily Limit Exceeded

What to do in case of an urgent payment and the daily limit is exceeded?

If no payments are pending approval and the daily limit is exceeded, then no payments can be processed for that day. You can pay the vendor using a virtual card, provided the vendor accepts payments in virtual cards. Otherwise, create the payment for the next business day.

How to approve a payment when it is pending approval and the daily limit is exceeded?

Edit the payment and change the payment date to the next business day.

What to do in case the outgoing limit is exceeded and a money request withdrawal request cannot be initiated?

Wait until the next business day to initiate the withdrawal request.

What to do in case you are unable to approve the payment batch created from bulk bills with limit exceeded error?

Edit the payment batch and change the payment date to a future date, or remove some bills, or reject the batch.

Payment on Bank Holiday

Is it possible to create a payment on a bank holiday?

You can only submit payments on business days. Payment processing and money transfers can't be initiated on weekends or bank holidays. Change the payment date to a future date and create the payment.

Processing Virtual Card Remittances

What do my vendors do with the remittances they receive?

Your vendors will process the virtual card payment. They must only process the payment for the total amount displayed on the remittance.

Processing Payments for Different Amounts Than On The Remittance

Can my vendor process the payment for a different amount than indicated on the remittance?

No, single-use virtual cards can only be used for the total authorized amount. If your vendor processes the virtual card for a different amount, it will be declined. If your vendor needs to open the card for additional transactions (for example, per invoice or account), they should contact your accounts payable department.

Why do vendors have to run the virtual card for the exact amount?

This is a security feature associated with the service. Vendors can only process the payment for the total authorized amount.

Lost Card Information

What should my vendor do if they lose the card information provided in the remittance?

You can email a copy of the remittance email to the vendor. You can also cancel the virtual card and issue a new one. See [Canceling Virtual Cards](#) for more information.

In addition, your vendor can contact your accounts payable department if they've lost the virtual card's information. For more information, see [Reviewing Remittance Email](#).

Virtual Card Decline

What can my vendor do if the virtual card number does not work?

Your vendor should confirm that they have entered the correct card number, expiration date, CVC, and dollar amount. Then, they should try to process the payment again. If they continue to receive a decline code, they should contact your accounts payable department.

Notifications When Virtual Cards Are Assigned To Invoices

How will my vendors be notified when a virtual card has been assigned to an invoice?

Your vendors will receive a remittance email when a virtual card is assigned to an invoice.

Due to industry requirements, we can only send detailed card data (the 16-digit card number, CVC, and expiration date) if your vendor's email system uses the TLS (transport layer security) protocol. The TLS protocol uses a higher level of cryptography to encrypt data in emails and prevent the undetected loss or alteration of data.

If your vendor's email does not have TLS security, they'll receive a less detailed remittance email. This email contains basic payment information (for example, payment date, amount, check number, and

invoice number), but it does not include the full card details. Instead, the email directs your vendor to access a Vendor Portal. For more information, see [Reviewing Remittance Email](#).

Handling Multiple Invoices For a Payment

If my vendor has multiple invoices for a payment, will a virtual card account number be assigned to each invoice?

No, each time payments are submitted, the system aggregates all records by vendor code. This results in the creation of a single virtual card account number that is issued for the total amount listed on the remittance.

Virtual Card Refunds or Credit Chargebacks

Can my vendor refund the virtual card, or can they charge back a credit?

Your vendor should contact your accounts payable department for assistance in these situations.

Overdue Balances

My vendor is claiming a balance that is overdue. When will the payment be sent?

Your vendor should contact your accounts payable department to discuss the status of the payment. For more information, see [Virtual Card Statuses](#).

Virtual cards are usually sent to vendors within 15 minutes after the payment has been sent for processing. Vendors should check their spam or junk email folders to ensure they didn't receive the remittance emails.

Remittance emails may arrive from this email address:

- no-reply@payment-automation.netsuite.com

Retaining Virtual Cards on File

Are vendors required to keep card accounts on file?

Vendors are not required to keep a card on file. Every new remittance generates a new virtual card number.

Adding, Removing, or Modifying the Virtual Card Program Administrator

What should I do if I want to change the Program Administrator for my Virtual Card program so that the new appointed person can contact Customer Support?

The Program Administrators are the primary contacts for the administration of your Virtual Card Program with HSBC.

A Program Administrator requesting that a new Program Administrator or Administrators be added to the account must provide all the necessary information to the newly appointed Program Administrator. This includes the Virtual Card account number and the verification ID that is required when calling to speak

with a Virtual Card support specialist. The verification ID is listed under the HSBC Virtual Card account details in the Welcome Letter that was received when your HSBC application was approved.

Existing Program Administrators can call 1-800-411-9264 to reach a Virtual Card support specialist. They'll need to provide their Virtual Card Account ID and Verification ID. After the Program Administrator is verified and the request has been submitted, changes will be made and reflected on the account within 5-10 business days.

If you're not an existing Program Administrator or are requesting a change on behalf of yourself, call 1-800-411-9264 to reach a Virtual Card support specialist. You'll need to provide the name of an Authorized Person on the Certificate of Banking Authority, which should be included in your company records. This person will be contacted by HSBC and required to complete, sign, and return a program administrator change request form.

Resetting the Four-Digit Program Administrator Verification ID

What should I do if I want to request a reset of my four digit verification ID as the one I currently have is difficult for me to remember and I would like to change this to a more memorable code?

Any existing Program Administrator can change their own Verification ID by calling 1-800-411-9264, where they will be directed to a Virtual Card support specialist. The cards support specialist will complete identification and verification and process the change on the account profile. This change will be reflected within three to five business days.

Note: The verification ID was previously referred to as the unique identifier code.

Amending, Canceling, Recalling, or Blocking Virtual Card Payments

What should I do if I authorized a Virtual Card payment that needs to be amended because the amount, supplier, or payment details are incorrect?

Virtual Card payments that have been submitted and authorized cannot be amended, canceled, or recalled. If the payment has not yet posted, that is the recipient has not yet redeemed the payment, you can apply a block or stop to the payment. For details, see [Canceling Virtual Cards](#).

After the block or stop has been successfully applied, the invoice will be auto voided.

Setting Up Recurring Virtual Card Payments

What should I do if I want to schedule a recurring Virtual Card payment that can be sent to a supplier because I send the same amount each month to this supplier?

HSBC Virtual Card payments allow you to pay invoices using a secure payment method. Each Virtual Card contains the exact payment amount, for a given supplier in reference to a unique invoice for a specified time period, after which the Virtual Card expires. So, you can't set up recurring payments.

Setting Up Auto-Debit

What should I do if I want to request Virtual Card monthly statement payments be debited from a bank account through auto-debit?

As part of your HSBC Online Account relationship, you have been provided with an HSBC Online Account. Only this account can be used to pay your Virtual Card monthly statement amount.

You do have the ability to submit one-off payments. If you need help, call 1-800-411-9264 to reach a Virtual Card support specialist.

Multiple accounts with HSBC Bank

How can I open additional accounts and or services with HSBC Bank?

You can request for additional accounts or services with HSBC Bank by contacting the NetSuite Support team. Upon receipt of your request, HSBC will contact you by email for additional information.

Multiple Subsidiaries

How can I apply for the other US subsidiaries?

In your NetSuite One World Account, go to SuiteBanking > HSBC Application > Apply > New Application, and select the subsidiary you want to apply for HSBC Online Account. For more information, see [Applying for an HSBC Online Account](#).

How do I see the accounts for the other subsidiaries or switch between subsidiaries?

To access or switch between subsidiaries accounts, go to SuiteBanking > Payment Automation > Dashboard. You can change the subsidiary from the drop-down list in the left navigation panel, if you have role permissions.

Note: The Company Name for the entity will be at the top of your screen. Each entity will have its own Dashboard, Transaction and credit limit, and its own bank transfer history, account activity and Virtual Card activity history.

How do I make payments using the other subsidiaries?

While making a payment, you can choose the respective subsidiary GL account. To access the Payment Automation dashboard, go to SuiteBanking > Payment Automation > Dashboard. You can change the subsidiary from the drop-down list in the left navigation panel, if you have role permissions.

Note: The Company Name for the entity will be at the top of your screen. Each entity will have its own Dashboard and Transaction and credit limit displayed. You will have a bank transfer history, account activity and Virtual Card activity history on an entity level.

I previously applied for an HSBC Payment Automation account but canceled or failed to complete the application. I want to re-apply for Payment Automation through one or many subsidiaries.

You can go to SuiteBanking > HSBC Application > Apply and Resume application from the status page. If you are not able to complete the application within 90 days from the application initiation or a subsidiary is not listed, contact NetSuite Support team.

Status of HSBC Applications

How do I see the status for the subsidiaries for the HSBC Application I applied for?

Go to SuiteBanking > HSBC Application > Apply to check the list of applications and their statuses. The sublist displays the **Application ID**, **Subsidiary**, **Submitted By**, **Account Application Status**, **Credit Application Status**, and **Action**. To see more information about an application, click **Show Details** in

the **Actions** column for the required application. The Verification page is displayed for a completed application.

Note: You need to have access to the subsidiary for which the application is raised to view the details of the respective subsidiary.

NetSuite SuiteApps License Client not installed

What will happen if I don't install the NetSuite SuiteApps License Client before July 24, 2024?

Existing customers could process payments and initiate Add Money or Withdrawal until October 31, 2024. However, they won't be able to apply for new HSBC accounts without installing the NetSuite SuiteApps License Client.

What will happen if I don't install the NetSuite SuiteApps License Client by October 31, 2024?

You won't be able to submit payments for processing with HSBC from November 1, 2024.

License Expired

My license expired, can I process payments with HSBC Bank?

No, you need a valid AP Automation license to process payments with HSBC Account. Please contact your account manager.

My license is renewed, still I am facing license expired error when trying to process payments from HSBC Bank Account.

Go to Setup > License Client > License Dashboard and check the **Status** of the **AP Automation** license in the License Dashboard.

If the status is **Expired** or **Stale**, manually fetch the license from License server. Go to Setup > License Client > Manual License Request to fetch the license. After the manual license request, renewed license details are shown in NetSuite SuiteApp Licenses. If the **AP Automation license** is active, the License Dashboard is updated with the **Active** status. Now you shall be able to process the payments. Please contact Customer Support if your license status is not updated.

License Validation Failed

What will happen if license validation fails?

If the license validation fails, you won't be able to process payments from your HSBC bank account and you cannot apply for a new HSBC bank account.

Ad Hoc Mid-Cycle Payment to Pay off the Virtual Card Balance

What should I do if I submitted a mid-cycle payment that I do not see on my HSBC Virtual Card account, and I would like to understand if this payment has been credited to my account?

Payments can take up to five business days to post to your account. If the payment is not reflected in your account after five business days, call 1-800-411-9264 to reach a Virtual Card support specialist for assistance.

Making an Ad Hoc Mid-Cycle Payment to Clear the Virtual Card Balance

What should I do if I want to submit a mid-cycle payment to free up part or all of my Virtual Card credit line?

A Program Administrator can call 1-800-411-9264 to reach a Virtual Card support specialist and request to make a one-time payment from a preferred bank account. Support will request details of the debiting account.

Initiating a Non-Fraud Virtual Card Payment Dispute

What should I do if I want to initiate a Virtual Card non-fraud dispute because I have a disagreement on the goods, services, or both, received with the recipient of the payment?

Contact your supplier to review the items in dispute. If you are unable to resolve the issue, call 1-800-411-9264 to reach a Virtual Card support specialist who can conduct a formal investigation on your behalf.

Accessing an Older Virtual Card Statement Not Available on the Payment Automation Dashboard

What should I do if I want to access an older Virtual Card billing statement that is not available on the Payment Automation dashboard?

You can view, download, and print your Virtual Card statements from your Payment Automation dashboard for the last six months. The Program Administrator can request a paper copy of the statement older than six months to be mailed to the company's billing address. To raise the request for a paper copy of the statement, call 1-800-411-9264 to reach a Virtual Card support specialist.

Disagreeing with the Annual Statement Credit Amount

What should I do if I have received an annual statement credit to my Virtual Card account, and I disagree with the amount received?

You will receive an Annual Statement Credit of 1% on all eligible purchases, as detailed in the Pricing Addendum to your Virtual Corporate Cards Services Schedule. This will show up on your Virtual Card statement following your annual account opening anniversary.

For example, if your HSBC Online Account was opened in September 2022, you will see the credit on your October 2023 statement. If you have any further questions, call 1-800-411-9264 to reach a Virtual Card support specialist.

Requesting an Investigation Non-Receipt of Annual Credit

What should I do if I have not received an annual statement credit to my Virtual Card account and would like further information?

You will receive an Annual Statement Credit of 1% on all eligible purchases, as detailed in the Pricing Addendum to your Virtual Corporate Cards Services Schedule. This information will be displayed on your Virtual Card statement following your annual account opening anniversary date.

For example, if your account was opened in September 2022, you will see this reflected on your October 2023 statement. If you have any questions, call 1-800-411-9264, where you will be directed to a Virtual Card support specialist.

Clearing Virtual Card Account Delinquency and Reactivating the Account

What should I do if I am unable to make a Virtual Card payment because the account appears to be deactivated?

If your account is delinquent by more than 60 days, you will no longer be able to create Virtual Cards to pay your suppliers. Your Virtual Card has been set up with auto pay to automatically deduct your last statement balance in full from your HSBC Online Account.

Ensure there are sufficient funds in the account to pay off the outstanding balance on your Virtual Card statement. You can also make a one-time payment over the phone by calling 1-800-411-9264 to reach a Virtual Card support specialist.

After the account has been paid in full, the Virtual Card support specialist will reactivate your account so that you can resume using your Virtual Card account.

Submitting a Notice of Suspected Virtual Card Fraudulent Activity

What should I do if I have identified activity on my Virtual Card account that I do not recognize and would like to report this as potential fraud on my Virtual Card account?

If you suspect fraud on your Virtual Card account, immediately call 1-800-411-9264 to reach a Virtual Card support specialist who are available 24/7.

Acting Upon a Remittance Email

What should I do with a remittance email I have received?

Process the Virtual Card in the same way you process all payment cards transactions, but only for the **Total** amount displayed on the remittance.

Processing a Different Virtual Card Amount

Can I process a virtual card payment for a different amount than the Total amount on the remittance email that I have received?

For security reasons, single-use Virtual Cards can only be used for the total authorized amount. Trying to process a virtual card for a different amount will result in a failure.

Dealing with Lost Virtual Card Information

What should I do if I lose virtual card information?

If you lose the Virtual Card information provided in the remittance email, view the Remittance Voucher to see the Virtual Card details. For more information, see [Reviewing Remittance Email](#).

You can contact the Virtual Card Customer Support available 24/7 at 1-800-411-9264 to obtain the account information for that specific invoice.

Dealing with Virtual Card Number Not Working

What should I do if the Virtual Card number I enter does not work?

Confirm that you have entered the correct 16-digit Virtual Card number, card verification code (CVC) expiration date, and the amount. Then, try to process the payment again. If the payment still cannot be processed, contact Virtual Card Customer Support available 24/7 at 1-800-411-9264.

Virtual Card Remittance Email

How will I be notified when a Virtual Card is assigned to an invoice?

If your server is secure, each email remittance will include all the information needed to process the virtual card payment: the expiration date, card verification code (CVC), invoice details, and the 16-digit virtual card number.

If your server is NOT secure because the transport layer security (TLS) protocol is not used, the virtual card number will be masked in the email remittance.

You will be asked to register at <https://www.csipaysystems.com/payee/auth>. You must register using the email address that the remittance was sent to. This is a one-time registration process, and you will use your login credentials to receive all future payments.

After you log in to the website, you will have access the information needed to process your virtual card payment, including invoice details, the 16-digit virtual card number, expiration date, and card verification code (CVC).

Paying Multiple Invoices from a Single Vendor

If I have multiple invoices for a payment, will a Virtual Card be assigned to each invoice?

No, each time payments are submitted, the system aggregates all records by vendor. A single Virtual Card is issued for the **Total** amount listed on your remittance.

Refunding a Virtual Card

Can I refund a Virtual Card?

Contact Virtual Card Customer Support available 24/7 at 1-800-411-9264 for assistance.

Handling an Overdue Payment

I have a payment that is overdue. When will the payment be sent?

Contact Virtual Card Customer Support available 24/7 at 1-800-411-9264 for assistance.

To understand the Virtual Card processing time-line, see [Virtual Card Billing Cycle](#)

Keeping Virtual Cards on File

Am I required to keep a received Virtual Card on file?

You don't have to keep a card on file. A new unique Virtual Card number is generated for each remittance.

Closing Virtual Card Before Anniversary Date

If I close my virtual card before my anniversary date, will I still get credit for the annual statement credit?

You won't be eligible to receive credits for the annual statement credit if you decide to close your HSBC Virtual Card Account before the card's anniversary date. To ensure you understand the conditions for receiving your annual statement credit, refer to section 3 of the Pricing Addendum for HSBC Virtual Cards offered through Oracle NetSuite AP Automation, which is a part of your HSBC Terms. For more information, see [HSBC Embedded Banking Useful Documents and Links](#).

Submitting a Query Regarding Changes to Fees and Charges on the Statement

What should I do if I disagree with the charges on my monthly billing statement?

For any questions regarding changes to fees and charges on the statement, contact NetSuite Customer Support.

Submitting a Query Regarding Billing Transactions or Charges

What should I do if I disagree with the charges on my monthly billing statement?

For any questions regarding billing transactions or charges, contact NetSuite Customer Support.

Understanding the Billing Statement Calculation

What should I do if I want to learn how the billing statement invoice that I received for my account was calculated?

You can access your invoice and transaction level details from the Payment Automation dashboard. The invoice displays the total of all service charges and includes a detailed summary with unit pricing.

Understanding the Two Billing Statements

Why did I receive two billing statements – one invoice for my Virtual Card account and one for my accounts payable?

Payments made through your Virtual Card account generate a monthly billing statement that is specific to this product. All other charges will be reflected on a separate billing statement.

Requesting a Billing Statement Copy

What should I do if I want to request a copy of a billing statement that is not available for me to access from the Payment Automation dashboard?

You can view and download e-statements from your Payment Automation dashboard for the last six months for Virtual Cards and 12 months for all charges not related to Virtual Cards.

If you want to view an earlier statement, contact NetSuite Customer Support, providing the dates of the statement required and the type of statement: Virtual Card or all other charges. A copy of the statement will be sent to you.

Requesting a Change to the Auto-Debit Account Setup

Is it possible to change the setup of my auto-debit account? I have another bank account that is used to manage other payments on behalf of my business, and I would like all debits to be sent from one account.

As part of the SuiteBanking proposition, you have been provided with an HSBC Online Account. This account can't be changed.

Changing the Allocation of the Credit Limit between ACH and Virtual Cards after Onboarding

What should I do if I want to request a change to the allocation of credit between my ACH and Virtual Card products because I expect to initiate more payments through ACH or Virtual Cards?

Credit allocation between ACH and Virtual Card products can't be interchanged. You may request to decrease either ACH or Virtual Card credit limit by contacting NetSuite Customer Support.

Requesting a Virtual Card Credit Balance Refund

What should I do if I want to request a credit balance refund because a mid-cycle payment to my Virtual Card account was not reflected in my monthly billing statement?

Call 1-800-411-9264 to reach a Virtual Card support specialist for assistance.

Disagreeing the Billing Amount because of Additional Fees

What should I do if I disagree the monthly billing statement that I received for my Virtual Card account because of additional fees?

Late fees are calculated at the rate of 3% of the outstanding balance. You can view your Virtual Card invoice and late fee details through the Payment Automation dashboard. For further assistance, call 1-800-411-9264 to reach a Virtual Card support specialist.

Requesting a Large Print Statement

What should I do if I want to request my statements in large print as the current font size is difficult to view?

To request an ADA-compliant copy of your statement in a larger font size call 1-800-411-9264 to reach a Virtual Card support specialist.

Setting Up Debit Blocks on the HSBC Online Account

Will there be a debit block on my HSBC Online Account to block any attempted ACH Debits?

You can't set up debit blocking on the HSBC Online Account, but the account is automatically configured to allow certain limited debits. For more information, see [Debit Blocking](#).

Remittance Notifications Using Advanced PDF/HTML Templates

What are the functionalities of remittance notifications using Advanced PDF/HTML templates?

Starting version 5.0, the Payment Automation SuiteApp will send email remittance notifications to vendors for ACH and check payments. You can resend notifications, track sent notifications, and include accurate payment details with vendor credits applied to bills.

Customization Capabilities Supported by Advanced PDF/HTML Templates

What are the customization capabilities supported by the Advanced PDF/HTML Template feature?

The Payment Automation SuiteApp currently doesn't support the customization capabilities that Advanced PDF/HTML offers.

Enabling Advanced PDF/HTML Templates Before Upgrade

What happens if the Advanced PDF/HTML Template feature is not enabled before the upgrade?

The Payment Automation SuiteApp upgrade to the version 5.0 will fail and no further updates will be received by the account if the feature is not enabled. You will still be able to use the SuiteApp and process payments.

What happens if I enable the Advanced PDF/HTML Templates feature before the upgrade?

If you enable the feature before the upgrade, the Payment Automation SuiteApp will be upgraded to version 5.0.

Remittance Emails Layout

What do the remittance emails look like?

The remittance emails include a PDF copy of the payment voucher, which contains accurate payment details, including vendor credits applied to bills.

Download Remittance Notifications

Can I download copies of earlier remittance notifications?

You will still be able to download copies of remittance notifications for payments processed before your account is upgraded to the version 5.0.

Email Address for Remittance Notifications

What email address will the vendors receive the remittance notifications from?

For ACH and check payments, your vendors will receive remittance emails from the email address of the user who initiated the payment.

- In the case of bulk bill payment processing, if batch approval routing is enabled, the email is sent from the approver's email address.
- If an email address is specified in Home > Set preferences > General > User profile > From Email Address, then the email is sent from this address.

For virtual card payments, the remittance email is sent from noreply@payment-automation.netsuite.com.

Changing Company Information in Payment Voucher

Can I change my company information that is shown in the payment voucher?

Yes, you can. For more information, see [Updating Information Included in the Remittance Voucher](#).
