Project Cost-to-Cost Percent Complete

2025.2

September 3, 2025

Copyright © 2005, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Project Cost-to-Cost Percent Complete

The Project Cost-to-Cost Percent Complete SuiteApp is a cost-based percent complete approach to recognize revenue on projects. It provides you the flexibility to define the basis for budget and cost on your projects. It also lets you calculate your project's completion percentage based on the budget and cost.

Watch the following video for information about the Project Cost-to-Cost Percent Complete SuiteApp.

 [Project Cost-to-Cost Percent Complete SuiteApp - Overview](#)

Features

The Project Cost-to-Cost Percent Complete SuiteApp enables you to:

- Use a cost-based percent complete approach to recognize revenue on project contracts.
- Define the basis of the cost budget and real cost for the project cost percent complete rule.
- Preview project details and calculations before start.
- Change the percent complete calculation based on your business requirements.
- Provide detailed audit trails for every step.
- Skip extracting and calculating percentages manually.
- Get accurate and up-to-date revenue numbers.

Installing the Project Cost-to-Cost Percent Complete SuiteApp

You can install the Project Cost-to-Cost Percent Complete SuiteApp from the [Installing from the SuiteApp Marketplace](#).

To install the Project Cost-to-Cost Percent Complete SuiteApp:

1. Go to **SuiteApps**.
2. In the **Search Apps** field, enter **Project Cost-to-Cost Percent Complete SuiteApp**.
3. Click the **Project Cost-to-Cost Percent Complete** tile.
4. In the top right of the Project Cost-to-Cost Percent Complete SuiteApp details page, click **Install**.

The Project Cost-to-Cost Percent Complete SuiteApp is managed and updates automatically whenever there are new features or improvements.

Prerequisites for Installing the Project Cost-to-Cost Percent Complete SuiteApp

You must have the following modules and features to use the Project Cost-to-Cost Percent Complete SuiteApp:

Note: You can use the Project Cost-to-Cost Percent Complete SuiteApp only in [NetSuite OneWorld](#) accounts.

Required Modules

You must have the following modules in your account to use the Project Cost-to-Cost Percent Complete SuiteApp:

- Project Management SKU
- Project Accounting and Management Module
- Advanced Revenue Management (Essentials) Module

If you don't have these modules, contact NetSuite Customer Support.

Enable Features

You must enable the following features using the Administrator role:

1. Go to Setup > Company > Enable Features.
2. Check the box for each of the following features.

Subtab	Feature Name
Company	■ Projects ■ Project Management
Accounting	■ Accounting ■ Accounting Periods ■ Advanced Revenue Management (Essentials)
Analytics	■ SuiteAnalytics Workbook
SuiteCloud	■ Custom Records ■ Client SuiteScript ■ Server SuiteScript

3. Click **Save**.

Roles and Permissions

By default, employees with the Administrator and Accountant roles in the Accounting Center can work with the Project Cost-to-Cost Percent Complete SuiteApp.

Role	Permissions	Access Level
■ Administrator ■ Accountant	Employees with the Administrator and Accountant roles can access the following pages: ■ Project Cost Percent Complete Rule ■ Update Project Cost Percent Complete	Full

Role	Permissions	Access Level
	Project Percent Complete Execution Log	

Note: You need an active Accountant role to install the Project Cost-to-Cost Percent Complete SuiteApp.

Administrators can give the required permissions to custom roles in their organization so they can use the Project Cost-to-Cost Percent Complete SuiteApp.

If you want to give other roles permission to work with the SuiteApp, complete the following steps.

Note: You can't add permissions to a standard role. Create a custom role based on the standard role, then add the necessary permissions to the custom role.

To give access to other standard or custom roles to the Project Cost Percent Complete Rule page:

1. Go to Setup > Users/Roles > Manage Roles.
2. Choose a role.
 - Click **Edit** to add permissions to a custom role.
 - Click **Customize** to create a custom role from a standard role.
3. Click the **Permissions** subtab.
4. Click the **Custom Record** subtab.
5. From the **Record** list, select **Project Cost Percent Complete Rule**.
6. From the **Level** list, select **Full**.
7. Click **Add**.
8. Click **Save**.

Note: Permission limits don't apply to the owner of the custom record type. The owner can always access it in any role.

To give access to other standard or custom roles to the Update Project Cost Percent Complete page and Project Percent Complete Execution Log pages:

1. Go to Setup > Users/Roles > Manage Roles.
2. Choose a role.
 - Click **Edit** to add permissions to a custom role.
 - Click **Customize** to create a custom role from a standard role.
3. Click the **Permissions** subtab.
4. Click the **Custom Record** subtab.
5. From the **Record** list, select **Project Percent Complete Execution Log**.
6. From the **Level** list, select **Full**.
7. Click **Add**.
8. Click **Save**.

To give access to the Project Cost Percent Complete page links for other centers:

1. Go to Customization > Scripting > Single Page Applications.
2. Select the required single page application.
3. Click **Configuration**.
4. On the **Center Links** subtab, click **Add Link...**
5. In the popup window, select the center where you want to add the link from the **Menu Location** list.
6. Enter the label name in the **Label** field.
7. To set the single page application in a specific order, select a value from the **Insert Before** list.
8. Click **Save**.

To add custom record links for other centers:

1. Go to Customization > Centers and Tabs > Center Categories > New.
2. Enter the name of the center category in the **Label** field.
3. Select the **Center Tab** and **Center Type**.
4. On the **Values** tab, select **Record Name (Project Cost Percent Complete Rule or Percent Complete Execution Log)** in the **Link** list.
5. Enter the label name in the **Label** field.
6. Click **Add**.
7. Click **Save**.

Note: Access to the Project Percent Complete Execution and Project Percent Complete Execution Log pages is limited by role. Irrespective of your access level, you can only access:

- The Project Percent Complete Execution Log page in **View** mode.
- The Update Project Cost Percent Complete page in **Create** mode.

Supported Languages in Project Cost-to-Cost Percent Complete SuiteApp

You can view the Project Cost-to-Cost Percent Complete pages in the following languages:

- Chinese (Simplified)
- Chinese (Traditional)
- Czech
- Danish
- Dutch
- English (U.S.)
- Finnish
- French
- French (Canada)

- German
- Indonesian
- Italian
- Japanese
- Korean
- Norwegian
- Portuguese (Brazilian)
- Russian
- Spanish
- Spanish (Latin America)
- Swedish
- Thai
- Turkish
- Vietnamese

Note: The Project Cost-to-Cost Percent Complete SuiteApp supports the **Multi-Language** feature. If it's enabled in your account, you can select any of the supported languages for your NetSuite interface.

For more information, see the help topics [Configuring Multiple Languages](#) and [Choosing a Language for Your NetSuite User Interface](#).

Working with the Project Cost-to-Cost Percent Complete SuiteApp

Using the Project Cost-to-Cost Percent Complete SuiteApp, you can perform the following:

- [Creating a Project Cost Percent Complete Rule](#)
- [Adding a Rule to a Project Record](#)
- [Updating Project Cost Percent Complete](#)
- [Updating the Percent Complete at Project Level](#)
- [Viewing a Project Complete Execution Log](#)
- [Creating and Updating a Project Cost Percent Complete Dataset](#)

Creating a Project Cost Percent Complete Rule

Create a new project cost-to-cost percent complete rule from the Project Cost Percent Complete Rule page:

To create a Project Cost Percent Complete rule:

1. Go to Setup > Accounting > Project Cost Percent Complete > New.
2. Enter a unique **Name** for the rule.
3. (Optional) Check the **Default** box to make this the default rule for your project's cost-to-cost percent complete rule.

 **Note:** If there is an existing default rule, checking the **Default** box will replace it with this rule.

4. In the **Budget Basis** list, select the method to get the project's cost budget: **Estimate at Completion (EAC)**, **Pre-defined Value from Project**, or **Custom Criteria**.

Budget Basis	Required Features	Budget Calculation Basis
Estimate at Completion (EAC)	Enable the Advanced Project Budgets feature in Setup > Company > Enable Features > Company > Projects.	Calculated from the Total Sum row in the Budgeted Cost column under the Budget subtab in Lists > Relationship > Projects.
Pre-defined Value from Project	—	Calculated by adding the Labor Cost Budget and Non Labor Cost Budget fields on the Financial subtab in Lists > Relationship > Projects.
Custom Criteria	Enable the SuiteAnalytics Workbook feature in Setup > Company > Enable Features > Analytics > SuiteAnalytics Workbook.	Calculated using the value selected from the Labor Budget list, Non Labor Budget list, or Additional Cost Budget Dataset list.

 **Note:** If you select the incorrect option in any of these lists, you'll see an error message. An option is incorrect if it doesn't meet the alias requirements.

You should have the **Percent Complete Project**, **Percent Complete Date**, and **Percent Complete Amount** aliases. Map these aliases to the project type, date type, and amount type dataset columns respectively.

For more information, see [Creating and Updating a Project Cost Percent Complete Dataset](#).

5. In the **Actual Cost Basis** list, select the method to get the real cost of the project. You can select either **Project Profitability**, or **Custom Criteria**.

Actual Cost Basis	Required Features	Actual Cost Calculation Basis
Project Profitability	Enable the Advanced Project Profitability feature in Setup > Company > Enable Features > Company > Projects	Calculated from the P&L subtab under Lists > Relationship > Projects.
Custom Criteria	Enable the SuiteAnalytics Workbook feature in Setup > Company > Enable Features	Calculated using the value you select from the Actual Labor Cost list, Actual Non Labor Cost list, or Additional Actual Cost Dataset list.

 **Important:** The **Actual Cost** column name should always include the language-specific label in the **Project Profitability** setup in Setup > Accounting > Project Profitability.

For more information, see [Language Specific Actual Cost Label](#).

Actual Cost Basis	Required Features	Actual Cost Calculation Basis
	> Analytics > SuiteAnalytics Workbook.	Note: If you select the incorrect option in any of these lists, you'll see an error message. An option is incorrect if it doesn't meet the alias requirements. You should have the Percent Complete Project, Percent Complete Date, and Percent Complete Amount aliases. Map these aliases to the project type, date type, and amount type dataset columns respectively. For more information, see Creating and Updating a Project Cost Percent Complete Dataset.

6. Click **Save**.

Note: On the Project Cost Percent Complete Rule page, go to Customize > Customize Form > Fields to customize the visible and hidden fields.

Besides the labor and nonlabor datasets, you can use additional datasets too. The **Additional Cost Budget Dataset** and **Additional Actual Cost Dataset** fields are hidden by default, but you can add them if you want to use more datasets.

Note: The SuiteApp includes the **Default Project Cost Percent Complete Rule** with default datasets for Cost Budget and Actual Cost:

- Project Percent Complete Actual Labor
- Project Percent Complete Actual Non Labor
- Project Percent Complete Budget Labor
- Project Percent Complete Budget Non Labor

Adding a Rule to a Project Record

Add a project cost-to-cost percent complete rule to a project record.

To add a Project Cost Percent Complete rule to a project record:

1. Go to Lists > Relationship > Projects > New.
2. On the **Financial** subtab, click the **Project Cost-to-Cost Percent Complete** subtab.

3. (Optional) Enter a valid non negative amount for the estimated **Labor Cost Budget** and **Non Labor Cost Budget** fields for this project.

 **Note:** You must do this step if you selected **Pre-defined Value from Project** in the **Budget Basis** list on the Project Cost Percent Complete Rule page.

4. Check the **Enable Project Cost-to-Cost Percent Complete** box to run the project.
5. In the **Project Cost Percent Complete Rule** list, select the rule you want to use to calculate the project completion percentage.

 **Note:** The default rule is selected automatically, but you can change it after you check the **Enable Project Cost-to-Cost Percent Complete** box.

6. Click **Save**.

Updating Project Cost Percent Complete

To run a project from the Update Project Cost Percent Complete page, complete the following steps.

To update a Project Cost Percent Complete in the UI:

1. Go to the Update Project Cost Percent Complete page.
 - a. (Administrator) Go to Transactions > Customers > Project Cost Percent Complete.
 - b. (Accountant) Go to Financial > Lists > Project Cost Percent Complete.
2. On the **Project Filters** subtab, from the **Subsidiary** list select the required subsidiaries.

 **Note:** Subsidiaries for your role are available and selected automatically.

3. (Optional) Select **Project**, **Customer**, and **Project Manager**.

 **Note:** The project list is filtered by the **Subsidiary**, **Customer**, and the **Project Manager** selected.

Projects with **Pending** or **In Progress** status appear on the Updating Project Cost Percent Complete page if you've checked **Enable Project Cost-to-Cost Percent Complete** on their Project page.

 **Note:** Only employees with the **Project Manager** box checked in Lists > Employees > Employees > Human Resources appear in the **Project Manager** list.

4. In the **Period** list, select the accounting period.
5. Check the **Allow Reexecution** box to show only projects run in the selected period. This applies to all projects in the **Project Details** sublist.

Note: A project is reconsidered for processing when:

- The **Percent Complete Override** sublist under the **Financial** subtab in the Project record is updated manually with the correct accounting period, with or without the **Cumulative Percent Complete** value.
- The project is submitted for processing with a **Percent Complete** value (not an em-dash) from the Update Project Cost Percent Complete page.

Note: The **Allow Reexecution** box is checked by default. If it's not checked, you'll only see projects that haven't been run before for that accounting period.

If **Allow Reexecution** is checked and there's no accounting period entry, the period was either deleted from the project or the project hasn't been processed yet.

6. Check the **Allow Percent Complete Override** box so you can edit the **Percent Complete** and **Override Reason** columns in the **Project Details** sublist.
7. Submit the projects.
 - a. Click **Submit** to submit the selected projects in the **Project Details** sublist. You must select at least one project.
 - b. Click **Submit All** to submit all the projects in the **Project Details** sublist.

The **Project Details** sublist provides a detailed view of each project with the following columns:

- Project
- Customer
- Subsidiary

Note: You can sort project details by **Project**, **Subsidiary**, and **Customer** columns.

- Last Execution Period
- Last Percent Complete

Note: The **Last Execution Period** and **Last Percent Complete** columns are populated using the **Accounting Period** and **Cumulative Percent Complete** columns in the **Percent Complete Override** sublist.

You can find the sublist on the **Project Cost-to-Cost Percent Complete** subtab under Lists > Relationship > Projects > Financial.

- Cost Budget
- Actual Cost

Note: If you select **Custom Criteria** in the **Budget Basis** or **Actual Cost Basis** list, ensure the **Percent Complete Project**, **Percent Complete Date**, and **Percent Complete Amount** aliases are present. Map these aliases to the project type, date type, and amount type columns. For more information, see [Creating and Updating a Project Cost Percent Complete Dataset](#).

If the mapping is incorrect, you'll see an em dash (—) in the **Actual Cost** and **Cost Budget** columns, or a value based on other datasets.

Note: If you select an inactive rule is selected for a project in the Projects page, you'll see an em dash (—) in the **Actual Cost** and **Cost Budget** columns.

■ Percent Complete

Note: The **Percent Complete** is calculated as:

Percent Complete = Actual Cost till Date/ Cost Budget

Percent complete is based on the actual cost and cost budget for the project. You can edit the field if the **Allow Percent Complete Override** box is checked. The value must be numeric and from 0 to 100.

Note: If the **Percent Complete** column for a submitted project contains an em dash (—), the **Percent Complete Override** sublist isn't updated for that accounting period in the project record. Since the sublist isn't updated in the project record, the project will not be considered for further processing.

■ Override Reason

Note: Enter your reason for overriding the project completion percentage (up to 99 characters).

An email is sent to the user after processing, with details of which projects succeeded and which failed.

Note: For processing through the UI channel, enter a **From Email Address** in Home > Set Preferences. The entered email in **From Email Address** is used as the author, and the logged-in user's email remains the recipient. If left blank, the logged-in user's email is used as both the author and recipient.

Note: All projects for an execution ID will fail to process in the following scenarios:

- The project's execution mode is set to other channels and the accounting period isn't available.
- Only 20 users can submit project execution at one time. The remaining executions will fail, and no email will be sent for the remaining executions.

To update a Project Cost Percent Complete through other channels:

1. Go to Customization > Scripting > Script Deployments.

2. Click **Edit** for the **customdeploy_c2c_scheduled_mr_script** ID.
3. Click the **Parameters** subtab.
4. In the **Employee** list, select an employee whose email will be used to send the notification after project processing.

 **Note:** If there's no email address, no email will be sent.

5. Click **Save**.

For more information, refer to [Deploying a Script by using the Script Deployment Record](#).

Updating the Percent Complete at Project Level

The **Accounting Period** and **Cumulative Percent Complete** columns in the **Percent Complete Override** sublist in the **Project Cost-to-Cost Percent Complete** subtab in Lists > Relationship > Projects > Financial update based on the **Period** and **Percent Complete** fields in the Updating Project Cost Percent Complete page.

- If data already exists for that accounting period and project, it gets overwritten by what you enter on the Updating Project Cost Percent Complete page.
- If the accounting period doesn't exist for a project, a new row is added for it in the **Percent Complete Override** sublist.

 **Note:** On the Update Project Cost Percent Complete page, if the **Percent Complete** column of a submitted project contains an em dash (—), the **Percent Complete Override** sublist isn't updated for that period in the project record. Since the sublist isn't updated, the project won't be considered again for processing.

- If the accounting period was deleted for the project, there won't be any entry for that project for the accounting period when you check the **Allow Reexecution** box on the Updating Project Cost Percent Complete page.

Viewing a Project Complete Execution Log

You can view a project complete execution log from the Project Percent Complete Execution Log List page, which shows the audit trails.

To view a project complete execution log:

1. Go to the Project Percent Complete Execution Log List page.
 - a. (Administrator) Go to Transactions > Customers > Percent Complete Execution Log.
 - b. (Accountant) Go to Financial > Lists > Percent Complete Execution Log.
2. The log shows details such as **Name**, **ID**, **Executed By**, **Executed On**, **Progress**, and **Context**.

Note: The progress status could be:

- Failed
- Completed
- Not Started
- In Progress

The progress status is **Completed** after the total or partial success of the execution of projects. The status is **Failed** if the execution of all projects fails.

You can see read-only details after the status is **Completed**.

Note: **Executed By** column will be empty if the project ran through other channels.

Note: **Context** is the channel of execution of the project. It displays one of the following options:

- UI
- Other Channels

For more information about the other channels, see the help topics [CSV Imports](#), [REST Web Services](#), and [SOAP Web Services Traffic Health](#).

3. Click **View** to view the project complete execution log.

The **Project Filters** subtab and **Project Details** sublist displays for the project complete execution log.

Note: The **Project Filters** subtab is similar to the one on the Update Project Cost Percent Complete page. The following fields are added to the Project Execution Log page:

- **Name** – This is automatically generated and includes the accounting period plus a variable that goes up each time projects run for the same period.
- **Log ID** – This is the execution log ID, and you'll also get it in the email notification after execution.

Creating and Updating a Project Cost Percent Complete Dataset

To create or update a project cost percent complete dataset from the Analytics page:

To create or update a project cost percent complete dataset:

1. Go to Analytics.
2. Click the **Datasets** tab to edit or create a new dataset.

 **Note:** For more information, refer to [Custom Workbooks and Datasets](#).

3. Select the required dataset.
4. Click the information icon next to the name of the dataset.
5. Click **See Dataset Column Details**.
6. Add the **Percent Complete Project**, **Percent Complete Date**, and **Percent Complete Amount** aliases. You should map the aliases to the project type, date type, and amount type dataset columns, respectively.
7. Click **Apply**.

The default workbook is **Project Percent Complete Custom Criteria**, and it's linked to the following default shipped datasets:

- Project Percent Complete Actual Labor

 **Important:** To use the shipped **Project Percent Complete Actual Labor** dataset:

1. Go to Setup > Accounting > Accounting Preferences.
2. Check the box for each of the following features.

Subtab	Feature Name
Time & Expenses	☐ Require Approvals on Time Records
	☐ Advanced Approvals on Time Records

3. Click **Save**.

- Project Percent Complete Actual Non Labor
- Project Percent Complete Budget Labor
- Project Percent Complete Budget Non Labor

 **Note:** For the **Project Percent Complete Budget Non Labor** dataset, go to Formulas > Amount. The default margin is zero, but you can change it as per your business requirements.

 **Note:** The date filter doesn't apply to **Labor Budget**, **Non Labor Budget**, and **Additional Cost Budget Dataset** datasets on the Project Cost Percent Complete Rule page.

The default datasets include filters, can be customized, and can't be deleted.

Important: To use the shipped datasets:

1. Go to Setup > Company > Enable Features.
2. Check the box for each of the following features.

Subtab	Feature Name
Company	■ Job Costing and Project Budgeting

3. Click **Save**.

Language Specific Actual Cost Label

Name of the **Actual Cost** column should always contain the language specific label in the **Project Profitability** configuration in Setup > Accounting > Project Profitability:

Language	Actual Cost
Chinese (Simplified)	实际成本
Chinese (Traditional)	實際成本
Czech	Skutečné náklady
Danish	Faktisk omkostning
Dutch	Werkelijke kosten
English (U.S.)	Actual Cost
Finnish	Toteutuneet kustannukset
French	Coût réel
French (Canada)	Coût réel
German	Istkosten
Indonesian	Biaya Aktual
Italian	Costo effettivo
Japanese	実績原価
Korean	실제 비용
Norwegian	Faktisk kostnad
Portuguese (Brazilian)	Custo real
Russian	Фактические затраты
Spanish	Costo real
Spanish (Latin America)	Costo real
Swedish	Faktisk kostnad

Language	Actual Cost
Thai	ต้นทุนตามจริง
Turkish	Fiili Maliyet
Vietnamese	Chi phí thực tế

Project Cost-to-Cost Percent Complete SuiteApp Limitations

Before using the Project Cost-to-Cost Percent Complete SuiteApp, be aware of the following limitations:

- You can only create the project's cost-to-cost rule in the NetSuite UI.
- The **Actual Cost** column name should always contain the language-specific label in the **Project Profitability** configuration in Setup > Accounting > Project Profitability. For more information, see [Language Specific Actual Cost Label](#).
- Don't select more than about 5,000 (approximately) projects for execution at one time.
- To use the **Project Percent Complete Actual Labor** dataset, enable the **Require Approvals on Time Records** and **Advanced Approvals on Time Records** features in Setup > Accounting > Accounting Preferences > Time & Expenses.
- If the role doesn't have permission to access particular custom records, transactions, and standard permissions, and if you want to access the datasets created from those transactions, you can provide access in the following ways:
 - If the custom records, custom transactions, and standard permissions aren't locked, edit the custom record or transaction and give permission to **Project Cost Percent Complete Internal Role**. Click **Save**.
 - If the custom records, custom transactions, and standard permissions are locked:
 1. Go to Setup > Users/Roles > Manage Roles.
 2. **Customize** the **Project Cost Percent Complete Internal Role**.
 3. Click **Permissions** subtab.
 4. Select the transaction from the **Transactions** sublist and the custom record from the **Custom Record** sublist.
 5. Click **Add**.
 6. Click **Save**.
 7. Go to Customization > Scripting > Script Deployments.
 8. Edit the **C2C_SL_Dataset_Handler** script.
 9. Select the newly customized role as **Execute as Role**.
 10. Click **Save**.
- When a project is executed through other channels, the email notification will always be in English and not translated.
- Projects with inactive customers are not supported.
