Creating StickyNotes on Record Pages

2025.2

September 3, 2025

Copyright © 2005, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Creating StickyNotes on Record Pages

The StickyNotes SuiteApp lets you add notes to record pages and keep track of your notes and others' replies.

You can make it easier to communicate by adding recipients, so only certain people see your notes. They'll get an email when you tag them in a note or when someone adds a reply. You can also make your note public if you want everyone with access to the record page to see it.

With StickyNotes, you can highlight important info or action items on a record with custom-colored notes. See [Customizing StickyNotes from Record Pages](#) for more information.

You can snap a note to a field to highlight it on a record page. See [Adding a New Note](#) for more information.

Limitation of StickyNotes

StickyNotes only works on records and transactions in the old NetSuite UI. Be sure to turn off the preference to show the project in the new NetSuite UI.

Go to Setup > Company > General Preferences and make sure the **Show Project In New UI** box isn't checked.

Installing StickyNotes

Prerequisite

Before you install the StickyNotes SuiteApp, go to Setup > Company > Enable Features. For more information, [Enabling Features](#).

Make sure that the following features are enabled on your account:

Subtab	Section	Feature
SuiteCloud	SuiteScript	Client SuiteScript
		Server SuiteScript
	SuiteBuilder	Custom Records

Installation

 **Note:** Only users with the Administrator role can install and set up the StickyNotes SuiteApp.

To install the StickyNotes SuiteApp, go to Customization > SuiteBundler > Search & Install Bundles, and then click **Advanced**.

Use the following information to search for the SuiteApp:

- **Bundle Name:** StickyNotes

- **Bundle ID:** 49018
- **Location:** Production (Account ID 3849685)

StickyNotes is a managed SuiteApp, and we automatically update it whenever there are changes. You'll get these fixes and enhancements as soon as the SuiteApp updates in your account.

For information about installing SuiteApps, see the help topic [Installing a Bundle](#).

Configuring StickyNotes

Read the following topics for information about how you can configure StickyNotes:

- [Setting Account-Level StickyNotes Preferences](#)
- [Setting User-Level StickyNotes Preferences](#)

Setting Account-Level StickyNotes Preferences

Account administrators can set up StickyNotes for everyone from Setup > Customization > StickyNotes Setup.

Read the following topics to learn more about account-level StickyNotes settings:

- [Enabling Email Capture for StickyNotes](#)
- [Setting General StickyNotes Settings](#)
- [Enabling StickyNotes on Record Types](#)
- [Configuring StickyNotes Access](#)

Enabling Email Capture for StickyNotes

Users get an email when you add them to a note or when someone replies to their note. When email capture's on for StickyNotes, users can reply to notes right from their email.

To enable email capture for StickyNotes:

1. Go to Customization > Plug-ins > Manage Plug-ins.
2. Check the **StickyNotes Email Capture** box.

Important: Make sure you note the email address shown below this setting. You'll use it to set up the email capture address in [Setting General StickyNotes Settings](#).

3. Click **Save**.

Setting General StickyNotes Settings

Manage general StickyNotes settings for your account.

To configure general settings for all users:

1. Go to Setup > Customization > StickyNotes Setup.
 2. Under Admin Setup, set values for the following:
 - **Enable Tutorials** – Check this box to enable the StickyNotes tutorial on record pages and on the StickyNotes Board, for all users on this account.
 - **Send Email Notifications** – Check this box to notify users through email when:
 - They are added as a recipient in a note
 - Someone replied to a note that they created, or they are a recipient of
 - Someone replied to a note that they have previously replied to
 - **Allow File Attachments** – Check this box to enable users to attach files to StickyNotes.
 - **View Historical Notes on Transformed Records** – Check this box if you want notes to carry over to transformed records. For example, if you generate an estimate from an opportunity, those notes carry over to the estimate. Notes attached to specific fields on the opportunity aren't included. Notes added to the estimate won't be available on the opportunity record.
 - **Preview Images on Record Notes (All Users)** – Check this box to preview an image attached to a note when it's expanded on the record page. If this setting's off, you'll see the image icon and file name on the note. This setting won't work if users have turned off image preview in their account.
 - **Preview Images on StickyNotes Board (All Users)** – Check this box to preview an image attached to a note when it's expanded on the StickyNotes Board. If this setting's off, you'll see the image icon and filename on the note. This setting won't work if users have turned off image preview in their account.
-  **Note:** Only JPG and PNG images can be previewed on the note. Other file types are displayed as an icon with a link to the attached file.
3. Click **Save**.

Enabling StickyNotes on Record Types

Account administrators can enable StickyNotes on specific record pages or all record pages. When enabled, the StickyNotes toolbar shows up at the top of the record page so you can add notes.

To enable StickyNotes on all or selected record types:

1. Go to Setup > Customization > StickyNotes Setup.
2. On the Record Types subtab, do one of the following:
 - To enable StickyNotes on all record types, check the **Enable on All Record Types** box.
 - To enable StickyNotes on selected record types, clear the **Enable on All Record Types** box, and add a record type to the Enabled Record Type sublist. When the Enable on All Record Types setting is enabled, the system will ignore entries in the Enabled Record Types sublist.
3. Click **Save**.

Configuring StickyNotes Access

By default, the StickyNotes Toolbar and Board are available to all roles after installation. Account administrators can limit access to StickyNotes, so only certain roles can view the Board and toolbar on

record pages. Administrators can also let certain users search for all public notes from the StickyNotes Board.

To configure access to StickyNotes

1. Go to Setup > Customization > StickyNotes Setup.
2. On the Access subtab, set values for the following:
 - **Enable All Roles** — Check this box to enable StickyNotes for all roles on the account. If you leave this box unchecked, only selected StickyNotes roles can see the toolbar and Board.
 - **StickyNotes Roles** — Select which roles can access StickyNotes on the account. If you've checked Enable All Roles, the system ignores the selected roles.
 - **Global Search Users** — Select users who can view all public notes on the account. By default, users can only see notes they've created or where they're a recipient.
3. Click **Save**.

Setting User-Level StickyNotes Preferences

To set StickyNotes preferences:

1. Go to Setup > Customization > StickyNotes Setup.
2. Under User Preferences, set the values for the following:
 - **Enable StickyNotes on Record Pages** – Check this box to enable the StickyNotes toolbar on record pages.
 - **Preview Images on Record Notes** – Check this box to preview an image attached to a note when it's expanded on the record page. If this setting's off, you'll see the image icon and filename on the note. This setting won't work if the administrator turned off image preview on the account.
 - **Preview Images on StickyNotes Board** – Check this box to preview an image attached to a note when it's expanded on the StickyNotes Board. If this setting's off, you'll see the image icon and filename on the note. This setting won't work if the administrator turned off image preview on the account.

 **Note:** Only JPG and PNG images can be previewed in the note. Other file types show up as an icon with a link to the attached file.

 - **Hide Notes on Record Pages** – Check this box to hide all notes across record pages. When this setting's on, you'll get a pop-up alert about hidden notes when you open a record. You can click Show Notes from the StickyNotes menu on the record page to see the notes.
 - **Suppress Tutorial on Record Pages** – Check this box to turn off the tutorial on record pages.
 - **Suppress Tutorial on StickyNotes Board** – Check this box to turn off the tutorial on the StickyNotes Board.

 **Note:** You'll see a tutorial when you open the StickyNotes Board or a record page where it's enabled. You can hide the tutorial by clicking **Don't show this message again**. If you want to view the tutorial again, you can enable it on this page.

 - **Shortcut Key for Posting Notes** – Select a keyboard shortcut that you want to use to post notes on record pages.
 - **Font Size** – Select your preferred font size.
 - **Note Size** – Select your preferred note size.

3. Click **Save**.

Using StickyNotes

The StickyNotes toolbar shows up at the top of a record page when it's enabled.

From the toolbar, you can add a note, change preferences, and open the StickyNotes Board. If there are notes on a record page, you can filter them by priority by clicking the priority colors on the toolbar.

Note: If you don't see the StickyNotes Toolbar, it might be disabled on the record you're viewing. Contact your account administrator to have StickyNotes enabled on the record page.

Read the following topics for more information about how to use StickyNotes:

- [Understanding StickyNotes Actions and Icons](#)
- [Adding a New Note](#)
- [Deleting Notes](#)
- [Customizing StickyNotes from Record Pages](#)
- [Navigating the StickyNotes Board](#)

Understanding StickyNotes Actions and Icons

StickyNotes Actions

When you're viewing notes on a record page or the StickyNotes Board, hover over a note to see the Actions menu in the upper-right corner. From the **Actions** menu, you can do any of the following:

Note: Some actions aren't available when you view a note from the StickyNotes Board.

- **Mark as Done** – Crosses out the note to show the action items are done. Anyone with access to the note can mark it as done.
- **Reply** – Opens a new reply note. Type your message in the space provided. Anyone with access to the note can reply.
- **Expand Replies** – Expands a note to see all replies.
- **Compile Replies** – Collapses note replies.

- **Delete Note** – Deletes the current note. You can only delete notes you created.
- **Archive Note** – Archives the current note. Archived notes won't show up on the record page, but you can still see them on the StickyNotes Board. You can only archive notes you've created.

StickyNotes Icons

You'll see icons at the bottom of the original note showing if it's public or private, or if it has replies and attachments.

Icon	Description
	This icon means there are replies to the note.
	This icon means the note is private. Only the note owner and recipients can see private notes.
	This icon means the note is public. Everyone with access to the record page can see public notes.
	This icon means there's a file attached to the note or its replies.

Working with StickyNotes on Record Pages

Notes on the record page let you highlight important info or track pending tasks for the record. You can also attach supporting documents or related files to a note you're creating or replying to. For more information about supported file types, see [Supported File Attachments for StickyNotes](#).

Depending on your account setup, StickyNotes may carry over when a record changes to another type. For example, if you create an estimate from an opportunity, those notes carry over to the estimate. Notes attached to specific fields on the opportunity aren't included. Notes added to the estimate won't show up on the opportunity record.

Supported File Attachments for StickyNotes

You can drag and drop a file to a note to add it as an attachment. The following table shows the file types and the corresponding icons that will be displayed on the note:

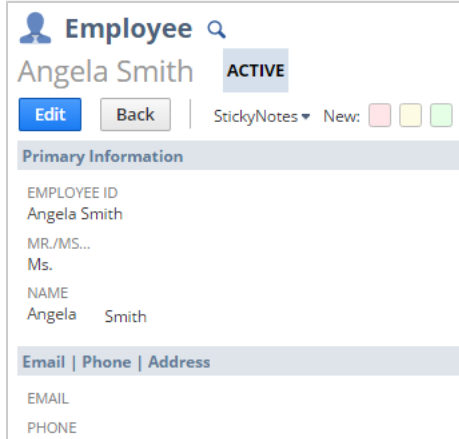

Icon	File Type
	HTML files
	XML files
	Excel files
	Word documents
	Powerpoint presentations

Icon	File Type
	Text files
	Unknown file types
	PDF files
	Compressed file types (.zip and .rar)
	Image files
	Note: This icon is displayed for JPG, JPEG, PNG, and BMP image files when the option to preview images is not enabled. Other image files are displayed as an icon with a link to the attached file.

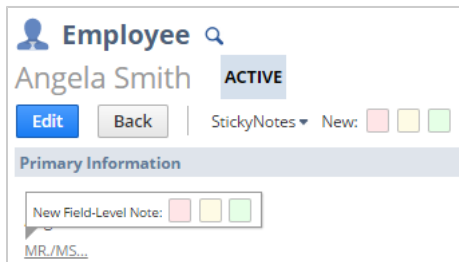

Adding a New Note

To add a note to record pages:

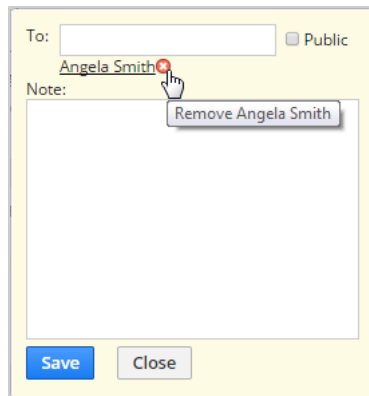

1. Open the record page where you want to add a note.
2. From the StickyNotes Toolbar, click on any of the note icons to create a new note.

You can also add a note to specific fields. Point to the field label and, in the tooltip, pick the note you want to create. Field-level notes show up below the field they're attached to. If the field's hidden, the note shows up in the upper-right part of the page.

3. A new note window appears. To add the note to a field or record page, do the following:

- a. In the **To** field, you can enter recipient names to make the note visible to specific people or leave the field blank to make the note visible only to you.

Recipients will receive an email notification when they are tagged in a new note and when replies are posted on the note.

Note: Auto-complete suggestions show up when you type part of a first or last name.

- b. To remove a recipient, point to the recipient's name, and then click the delete icon that appears.
- c. Click the **Public** box to make the note visible to everyone with access to the record.
- d. Type your message in the space provided.
- e. To add file attachments, drag and drop a file to the note.
- f. Click **Save** to attach the note to the record.

Note: Icons on the note indicate if the note is public or private, or if the note has replies or file attachments. For more information about note icons, see [StickyNotes Icons](#).

Replying to a Note

You can reply to a note either from the record page where it's attached or by replying to the email notification. You'll get an email if someone replies to a note you created, received, or already replied to.

Note: Supported email applications only include iMail (on Mac and mobile), Outlook, and Gmail.

To reply to a note on a record page:

1. Open the record where the note is attached.
2. Point to the note to display the Actions menu, and then click **Reply**.
3. Type your message on the space provided.
4. If you want to attach files to your reply, drag and drop a file to the note.
5. Click **Save** to add your reply.

Deleting Notes

To delete notes and replies:

1. Open the record page where the note is attached.
2. Point to the note to display the actions menu. Do one of the following:
 - To delete the original note, click **Delete Note** from the Action menu.
 - To delete replies, click **Expand Replies** from the Action menu. Point to the reply that you want to delete, and then click the delete icon that appears on the upper right corner of the note.
3. On the confirmation window that appears, click **Yes**.

Customizing StickyNotes from Record Pages

To customize notes from the record page:

1. Open any record page where StickyNotes is enabled.
2. From the StickyNotes Toolbar, click or point to the **StickyNotes** dropdown menu, and then select **Preferences**.

Note: You can also set your preferred font and note size in Setup > Customization > StickyNotes Setup.

3. In the StickyNotes Preference window, you can do the following:
 - Change the colors for high, medium, and low priority notes by choosing from predefined color sets or by entering the hexadecimal color value.
 - Set the font and note size.
 - Click **Reset to Default** to restore the default StickyNotes preferences defined by your administrator.
 - Check the **Hide Notes** box to hide notes across record pages. When this setting is enabled, a pop-up alert will notify you about the hidden notes the next time you load the record page.
4. Click **Save**.

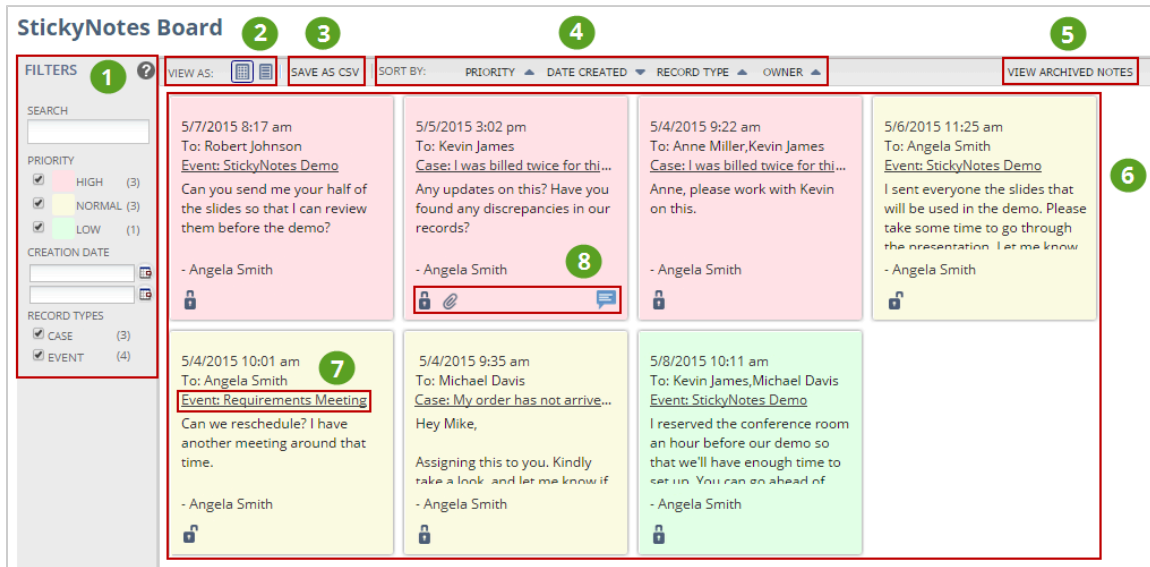

Navigating the StickyNotes Board

The StickyNotes Board is a handy place to view notes (active and archived) from different record pages. The board shows notes you've created or received. You won't see public notes unless you're tagged as a recipient.

Note: The board can display the most recent 100 active and 100 archived notes.

Go to Lists > Productivity > StickyNotes Board. Alternatively, you can also access the Board from the StickyNotes toolbar in record pages.

The following table lists the UI elements of the StickyNotes Board and their corresponding descriptions:

UI Element	Description
1 Display Filters	Define display filters to show only notes that match the specified criteria. ■ Search – Type a keyword in this field to search for it within messages, recipient, and owner. ■ Priority – Select the note priority that you want to display on the board. The number of notes per priority is indicated in the parenthesis. ■ Creation Date – Enter a start and end date to display notes within the specific period. If no end date is provided, StickyNotes will display notes starting from the specified start date up until the present date. ■ Record Type – Select a record type to display notes created or accessible on specific record pages. The number of notes per record type is indicated in the parenthesis. Historical notes also show up on record types where you can access them. For example, notes from estimate records carry over to opportunity records. When you filter notes by record type, you'll see historical notes for opportunity, estimate, or both.
2 View Options	Select whether to view your notes in a list or grid.
3 Save as CSV	Click here to download a CSV file of all notes and their replies matching the filter criteria. You can still access note attachments from the CSV by using a link to the file location.
4 Sort Options	You can sort notes by multiple criteria. To change sorting priority, drag a sorting field to the left. The left-most option takes priority over the others. You can click sorting fields to switch between ascending and descending order. For example, if you sort by Priority, Owner, Record Type, and Date Created: Notes are sorted by Priority first, then Owner, and so on. If you click Priority, the notes will go from high to low priority, or the other way around.
5 Archive View	Click here to view archived notes.
6 Notes Pane	Notes show up in this section of the page. Depending on the view you pick, notes might show up as a list or in a grid.
7 Record Page Link	Click this link to go to the record page where the note's attached. For historical notes, the record page link takes you to where the note was first created.

	UI Element	Description
8	Note Icons	Icons at the bottom of the original note show if it's public or private, or if it has replies or attachments. For more information, see StickyNotes Icons .
