If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Subscription Metrics

The Subscription Metrics SuiteApp lets you track key metrics like ARR, MRR, churn, and bookings in NetSuite with live dashboards, filters, and detailed reports. The SuiteApp is designed to help users manage and analyze their subscription-based services. It includes several key components such as the SaaS 360 Dashboard, which provide comprehensive insights into subscription performance.

Use this guide to get started with the Subscription Metrics SuiteApp:

1. **Check the prerequisites** – Ensure you have NetSuite 2025.2 or higher, OneWorld account, and SaaS Metrics & Advanced Billing features enabled. If you need currency conversion, enable the Multi-Currency and Currency Exchange Rate Type features. For more information, see [Prerequisites for Subscription Metrics SuiteApp](#).
2. **Install the SuiteApp**– Go to the SuiteApp Marketplace search for **Subscription Metrics**, and click **Install**.
3. **Set up permissions** – Verify the required permissions for your roles to access and use the dashboard.
4. **Enable SaaS metrics** – Enable SaaS Metrics on your item and service records.
5. **Open your dashboard** – Go to the **SaaS 360 Dashboard** tab.
6. **Explore your data** – Use filters to analyze the key business metrics that you want.

Read the following help topics for detailed setup, configuration, and using the SuiteApp:

- [Overview](#)
- [Installing and Setting Up the Subscription Metrics SuiteApp](#)
- [Setting Up KPI Formulas and Currency Exchange Rate Type](#)
- [Accessing and Working with the Subscription Metrics SuiteApp](#)
- [Best Practices for Subscription Metrics SuiteApp](#)

Overview

The Subscription Metrics SuiteApp lets you track, analyze, and report on key SaaS metrics with an interactive dashboard. Key metrics include annual recurring revenue (ARR), monthly recurring revenue (MRR), customer acquisition cost (CAC), lifetime value (LTV), total contract value (TCV), retention, churn, and bookings.

This dashboard shows key metrics and reports to help guide your business strategy, cash management, forecasting, and planning.

The SuiteApp uses the SaaS Metrics feature, which automatically generates the impacts of new businesses, upsells, downsells, and churn for tracked items on transactions and subscriptions.

For more information about the SaaS Metrics feature, see the help topic [SaaS Metric Reporting](#).

These insights are then used to display monthly and annual recurring revenue across NetSuite on the SaaS 360 dashboard.

The SuiteApp also provides summary and detailed views of recurring revenue through charts and roll forward reports.

Features

The Subscription Metrics SuiteApp lets you:

- Track detailed changes in ARR and MRR with a 12-month rolling forecast.
- Visualize new and churned customers, retention rates, acquisition trends, and MRR growth.
- Filter and drill down by subsidiary, class, item, department, customer, or location.
- Compare current KPIs with previous months, quarters, or years to identify trends.
- Export data to a CSV file for further analysis.
- Review metrics for both individual and consolidated subsidiaries.
- Customize KPI formulas.

The Subscription Metrics SuiteApp contains the following pages:

- [Setting Up KPI Formulas and Currency Exchange Rate Type](#)
- [Accessing and Working with the Subscription Metrics SuiteApp](#)

To access and use the SaaS 360 dashboard, you must install and set up the Subscription Metrics SuiteApp first.

For more information, read the following help topics:

- [Installing and Setting Up the Subscription Metrics SuiteApp](#)
- [Setting Up KPI Formulas and Currency Exchange Rate Type](#)
- [Accessing and Working with the Subscription Metrics SuiteApp](#)

Supported Transactions

The supported transactions for recurring revenue includes the following:

- Cash Sales
- Contract Renewal
- Invoices
- Sales Order
- Subscription

The supported transactions for financial metrics includes the following:

- Customer Charge (Statement Charge)
- Credit Memo
- Deposit
- Expense Reports
- Journal Entries
- Sales Order with Billing Schedule(s)
- Vendor Bill

- Vendor Credit

Best Practices for Subscription Metrics SuiteApp

To ensure optimal performance and accuracy when using the Subscription Metrics SuiteApp, follow these best practices.

- Ensure that your NetSuite edition, features (SaaS Metric Reporting, Advanced Billing), and account (OneWorld) meet the SuiteApp requirements before installation.
- Assign the SaaS Metric permission to roles to enable dashboard access and usage.
- Enable SaaS Metric Reporting and set correct start and end dates on all applicable item and service item records. If you have a large number of items, enable SaaS Metric Tracking for items in small batches. This will help prevent system performance issues.
- Set up and maintain accounting periods for all subsidiaries to ensure accurate ARR and MRR reporting.
- Use dashboard filters (subsidiary, customer, item, and others) to access the data you need.
- Limit date ranges (maximum 36 months) to avoid timeouts or incomplete reports.
- Review custom datasets (for CAC, etc.) for accuracy, naming conventions, and required columns, especially after business or system changes.
- Export and check CSV data for analysis and consistency. To see accurate data in the export, you must have access to all transactions.
- Keep up with automatic updates.
- Document and test any custom KPI formula changes.
- Use filters to manage large data sets and avoid errors.
- Refer to troubleshooting resources for error messages. If you still have issues, contact your NetSuite account administrator or Customer Support.

Installing and Setting Up the Subscription Metrics SuiteApp

This topic includes instructions for installing and setting up the Subscription Metrics SuiteApp.

It is intended for administrators and users with the necessary permissions to work with the SuiteApp.

In this topic, you will find:

1. [Prerequisites for Subscription Metrics SuiteApp](#) – Requirements for NetSuite version, account type, and enabling key features.
2. [Installing the Subscription Metrics SuiteApp](#) – Steps to install the SuiteApp from the SuiteApp Marketplace, including important notes to prevent common installation errors.
3. [Configuring SaaS Metrics Fields on Item or Service Item Records](#) – Steps to configure SaaS metrics fields on item or service item records to ensure accurate tracking of recurring revenue and other key metrics.
4. [Assigning Roles and Permissions for Subscription Metrics](#) – Required permissions and how to assign them to custom roles.

5. [Setting Up KPI Formulas and Currency Exchange Rate Type](#)– Steps to set up and customize KPI formulas, such as Customer Acquisition Cost (CAC), and configuring the currency exchange rate type to match your business requirements.

Follow the sections in order or refer to specific steps as needed to ensure a smooth setup and optimal use of the Subscription Metrics SuiteApp.

Prerequisites for Subscription Metrics SuiteApp

To use the SuiteApp, ensure the following requirements are met:

- NetSuite 2025.2 or higher
- OneWorld account
- Enable the following features in the specific order:
 1. Advanced Billing
 2. SaaS Metric Reporting
- If currency conversion is required, enable the Multi-Currency and Currency Exchange Rate Type features.

To enable the required features:

1. Go to Setup > Company > Enable Features.
2. Click the **Transactions** tab.
3. In the Billing section, check the **Advanced Billing** box.
4. Click the **Analytics** tab.
 - In the Subscription Metrics section, check the **SaaS Metric Reporting** box.
 - Click **Save**.

Installing the Subscription Metrics SuiteApp

The Subscription Metrics SuiteApp is a managed SuiteApp, which automatically updates whenever there are new features or enhancements. You can install the Subscription Metrics SuiteApp from the SuiteApp Marketplace using the Administrator role.

 **Note:** Before installing the SuiteApp, go to Setup > Company > Enable Features and enable the SaaS Metrics feature. If this feature is not enabled, the SuiteApp will display an error message. The error message displays in English, regardless of your account's language setting.

To install the SuiteApp:

1. Go to SuiteApps.
2. In the Search box, enter **Subscription Metrics**.
3. Click the SuiteApp tile.
4. Click **Install**.

The installation process begins. The installation of a SuiteApp may take some time. To check the installation status, see the help topic [Viewing SuiteApp Installation or Uninstallation Status](#).

Configuring SaaS Metrics Fields on Item or Service Item Records

To track SaaS metrics for specific items or services, configure the following fields on each item or service item record.

Note: If you have a large number of items, enable SaaS Metrics for items in small batches. This will help prevent system performance issues.

- **SaaS Metric Tracking** – Check this box to include items or service items recurring revenue in SaaS metrics when used in subscriptions or transactions (such as sales orders, cash sales, or invoices).
- **SaaS Metric Start Date** – Enter the date when tracking for SaaS metrics should begin for this item. Only transactions or subscriptions with a start date on or after this date will be included in SaaS metrics.
- **SaaS Metric End Date** – Enter the date when tracking for SaaS metrics should end for this item. Transactions or subscriptions with a start date after this date will not be included in SaaS metrics. This information is optional.

Assigning Roles and Permissions for Subscription Metrics

To let your custom roles access the SuiteApp, assign the following permissions to those roles. The following table lists the required permissions and their minimum access levels.

Permission	Subtab	Minimum Access Level
Analytical Impact	Lists	View
Bills	Transactions	View
Cash Sale	Transactions	View
Cash Refund	Transactions	View
Check	Transactions	View
Credit Memo	Transactions	View
Credit Card	Transactions	View
Credit Returns	Transactions	View
Customer Deposit	Transactions	View
Customer Payment	Transactions	View
Deposit	Transactions	View
Enter Vendor Credits	Transactions	View
Expense Report	Transactions	View

Permission	Subtab	Minimum Access Level
Find Transaction	Transactions	View
Invoice	Transactions	View
Item Receipt	Transactions	View
Make Journal Entry	Transactions	View
Purchase Order	Transactions	View
Return Authorization	Transactions	View
SaaS Metrics	Lists	View
Vendor Returns	Transactions	View
Vendor Return Authorization	Transactions	View

To assign permissions to your custom roles:

1. Go to Setup > User/Roles > Manage Roles.
2. Click **Edit** next to the role you want to assign permission to.
3. On the **Permissions** subtab, assign the required permissions and set their access levels.
4. Click **Add**.
5. Click **Save**.

After setting up the SuiteApp, you can start navigating and using the SaaS 360 Dashboard. For more information, see [Accessing and Working with the Subscription Metrics SuiteApp](#).

If you want to set up KPI formulas and currency exchange rate type, read the following topics:

- [KPI Formulas](#)
- [Setting the Currency Exchange Rate Type](#)

Setting Up KPI Formulas and Currency Exchange Rate Type

Only users with the SaaS Metric permission can edit KPI formulas or set up the currency exchange rate type. Currently, only the customer acquisition cost (CAC) formula is editable. You can set up both your KPI formulas and your desired currency exchange rate type. For details, read the following topics:

- [KPI Formulas](#)
- [Setting the Currency Exchange Rate Type](#)

To set up the currency exchange rate type, enable the Multi-Currency and Currency Exchange Rate Type features by going to Setup > Company > Enable Features.

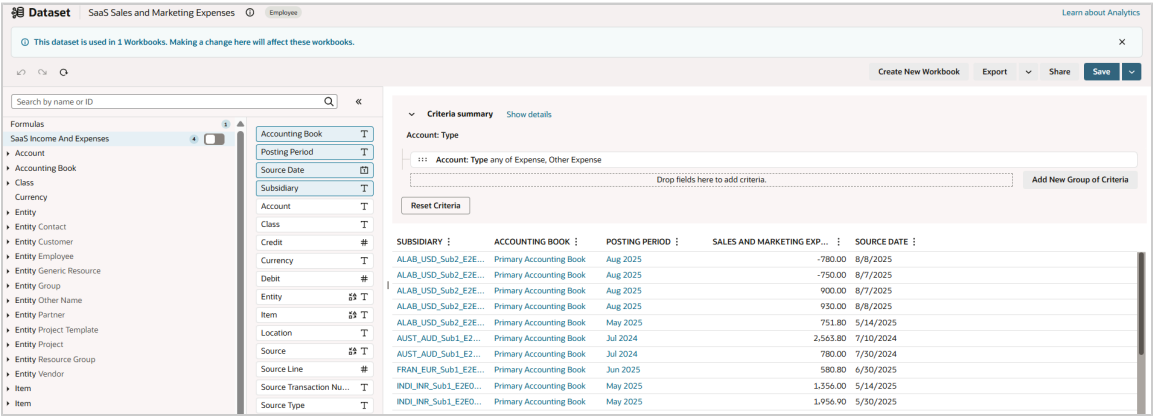

SaaS Sales and Marketing Expenses Dataset

The SaaS Sales and Marketing Expenses Dataset provides default criterion and formula used to aggregate sales and marketing expenses for customer acquisition cost (CAC) calculations. The default formula takes 30% of expenses posted in **Expenses** and **Other Expenses** account types.

Customer Acquisition Cost = Sales and Marketing Expenses ÷ New Customers Acquired

Dataset Configuration

To find the dataset, go to the **Analytics** tab and search for **SaaS Sales and Marketing Expenses**. You can edit this dataset to refine which transactions and criteria are included, but the following limitations apply to maintain compatibility with the SaaS 360 dashboard. The following screenshot shows the SaaS Sales and Marketing Expenses dataset.

- Edit the dataset's criteria and formula, but do not change the output type or remove required columns.
- Ensure the output type remains **FLOAT** when editing the formula.
- Edit only the formula; don't alter the output type.
- Adjust the criteria to refine which transactions are included as sales and marketing expenses.
- Maintain the dataset's accuracy in representing CAC related expenses.
- Always name the dataset with the prefix **SaaS**.
- Avoid renaming the dataset or removing the required prefix.
- Keep all columns to ensure the dashboard functions properly. Don't remove or delete any column from the dataset.

Root Record Type	Joined Record Type(s)	Custom Formula Field(s)	Data Grid	Criteria Filters
SaaS Income and Expenses	Account	Formula Field: SMExpenses Formula: 0.3 × ({debit} - {credit})	The following record fields are included in the dataset: ■ Accounting Book ■ Posting Period ■ Sales and Marketing Expenses ■ Source Date ■ Subsidiary	The following criteria is used to filter the database: Account: Type any of Expense, Other Expense

After you make changes, ensure the dataset shows the results you expect, and that CAC metrics display correctly in the dashboard.

KPI Formulas

Currently, only the CAC formula is editable. Users with the SaaS Metric permission can edit the formula.

KPI	Description	Formula	Applicable Filters	Editable
Revenue	Total recognized revenue in the period.	Credit – Debit	- Class - Customer - Department - Item - Location - Subsidiary	No
Growth Rate (MRR/ARR)	Total percentage growth during a specified time frame.	$\frac{(\text{Sum (Ending MRR Balance)} - \text{Beginning MRR Balance})}{\text{Sum (Beginning MRR Balance)}} \times 100.$  Note: Following are the formulas for MRR and ARR growth rate. - Only for Beginning MRR Revenue month end date = Period starting month end date + filters - Only for Ending MRR Revenue month end date = Period ending month end date + filters - All filters applicable If numerator value is zero = 0 % (result) If denominator value is zero = Not Applicable (result)	- Class - Customer - Department - Item - Location - Subsidiary	No
Net Revenue Retention (NRR)	Percentage of recurring revenue retained from existing customers, including upsells and downsells.	$\frac{(\text{Sum (Ending MRR Balance)} - \text{Sum (New MRR)})}{\text{Sum (Beginning MRR Balance)}} \times 100$	- Class - Customer - Department - Item - Location - Subsidiary	No
Gross Revenue Retention (GRR)	Percentage of recurring revenue retained from	$\frac{(\text{Sum (Beginning MRR Balance)} - \text{Sum (Downsell MRR + Churn)})}{\text{Sum (Beginning MRR Balance)}} \times 100$	Class	No

KPI	Description	Formula	Applicable Filters	Editable
	existing customers, excluding upsells.	$MRR) \div \text{Sum (Beginning MRR Balance)} \times 100$	- Customer - Department - Item - Location - Subsidiary	
Churn Rate	Percentage of recurring revenue lost due to churn and downsell.	$(\text{Sum (Churn MRR + Downsell MRR)} \div \text{Sum (Beginning MRR Balance)}) \times 100$	- Class - Customer - Department - Item - Location - Subsidiary	No
Total Contract Value (TCV)	Total value of all contracts, including renewals and new bookings.	Sum (Bookings)	- Class - Customer - Department - Item - Location - Subsidiary	N
Lifetime Value (LTV)	Estimated total revenue from a customer over their lifetime.	$(\text{Sum (Ending MRR Balance)} \div \text{Sum (Customers)} \times ((\text{Revenue} - \text{Sum (Debit - Credit)}) \div \text{Revenue})) \div (\text{Sum (Churn MRR + Downsell MRR)} \div \text{Sum (Beginning MRR Balance)})$  Note: Sum (Debit - Credit). This refers to COGS accounts	- Class - Customer - Department - Item - Location - Subsidiary	No
Customer Acquisition Cost (CAC)	Average cost to acquire a new customer.	$\text{Sum}(0.3(\text{Debit} - \text{Credit})) \div \text{New customers}$	Subsidiary	Yes
CAC Payback Period	Number of months it takes for a company to recover its customer acquisition cost (CAC) from the gross profit generated by a new customer.	$\text{CAC} \div (\text{Sum}(\text{New MRR}) / \text{Count}(\text{distinct New Customers})) \times ((\text{Revenue} - \text{Sum (Debit - Credit)}) \div \text{Revenue})$  Note: Sum (Debit - Credit) - Refers to COGS accounts	Subsidiary	No
LTV/CAC Ratio	Measures the relationship between the lifetime value (LTV) of a customer and the cost to acquire that customer (CAC)	$\text{LTV} \div \text{CAC}$	Filters applicable as per LTV and CAC	No

To edit the CAC formula:

1. Log in to NetSuite.

2. On the **SaaS 360 Dashboard** tab, go to **Setup**, and click **View**.
3. On the **KPI Formulas** subtab, click the edit icon beside **Customer Acquisition Cost (CAC)**.
4. In the Edit Formula popup window, select a dataset.
5. Click **Save**.

For more information, see [SaaS Sales and Marketing Expenses Dataset](#).

Setting the Currency Exchange Rate Type

You can use different exchange rates for different dates and currency exchange rate types. Before using this feature, ensure that both the Multi-Currency and Currency Exchange Rate Type features are enabled.

Only users with the Administrator role can set the currency exchange rate type.

- **Override Effective Date** – This date determines which currency exchange rate is applied. By default, the SuiteApp uses the current date. However, you can select any date to fit your requirements. If you leave the date field blank during setup, your preferences are saved without a date. The SuiteApp will automatically use the latest exchange rate effective as of the current date.
- **Exchange Rate Type** – By default, the SuiteApp uses the standard currency exchange rate type. To use another type of exchange rate, create a new one at Lists > Accounting > Currency Exchange Rate Types > New and select it during setup.

To set the currency exchange rate type:

1. Log in to NetSuite.
2. On the SaaS 360 Dashboard tab, go to Setup, click **View**.
3. Click the **Currency Constant Exchange Rate Type** subtab.
4. In the **Exchange Rate Type** field, select an exchange rate type.
5. In the **Override Effective Date** field, select a date.
6. Click **Save**.

Accessing and Working with the Subscription Metrics SuiteApp

Any role with the required permissions can access the SaaS 360 dashboard. For the full list, see Assigning Roles and Permissions

By default, the dashboard is available for Accounting, Classic, Executive, and Sales centers.

To access the SaaS 360 dashboard:

1. Log in to NetSuite.
2. On the **SaaS 360 Dashboard** tab, go to **Revenue Metrics**.
3. Click **View**.

When the dashboard loads, it shows data based on your role's access to subsidiaries and transactions. The Subscription Metrics automatically uses the fiscal calendar assigned to subsidiaries you can access,

ensuring all metrics and reports match your permissions and the correct fiscal periods. The dashboard shows amounts in your lowest common parent company's base currency. To learn how this works, see the help topic [Currency for Multiple Subsidiary Search Results](#).

On the SaaS 360 dashboard, you can:

- Filter data based on subsidiary, customer, item, location, class, department, and date range.
- Review portlets for ARR, MRR, Bookings, Revenue, and SaaS Metrics.
- Click on any value in the Roll Forward Report to drill down to transaction-level details.
- View trends, spikes, and dips in metrics like MRR, ARR, churn, retention, and bookings using graphs.

Working with SaaS 360 Dashboard Filters

You can combine multiple filters—such as subsidiary, customer, and date range—to further refine your view. As you adjust your filter selections, the dashboard updates in real time. All portlets, reports, and charts will reflect the active filters. You can reset the filters at any time if needed. To reset the filters, click **Reset Filters**.

 **Note:** Filters only display options for data you are permitted to view based on your NetSuite role and permissions. Currently, can't save or share custom filter sets or dashboard views.

You can filter data on the dashboard by the following criteria.

Filter Type	Description
Subsidiary	View data for a specific subsidiary or consolidated group. The filter supports both individual subsidiaries and consolidated (group) views. Individual – Shows data for a single subsidiary. Consolidated – Aggregates data across multiple subsidiaries, based on your access permissions. Subsidiaries that are inactive or marked for elimination are excluded from the filter options. If the Multiple Calendars feature is enabled, the reporting periods shown in the dashboard are as per the fiscal calendar of the lowest common parent. If the Multiple Calendars feature is disabled, the reporting periods shown in the dashboard are determined by the standard fiscal calendars.
Customer	Focus on metrics for a specific customer or group of customers. Only active customers appear in the filter options.
Item	Analyze data for specific products or services. Only active items appear in the filter options.
Location	Filter by business location or region. Only active locations appear in the filter options.
Department	View metrics for a particular department such as sales, marketing, or support. Only active departments appear in the filter options.
Class	Segment data by class, such as product line or business unit. Only active classes appear in the filter options.

To use filters on the SaaS Metrics dashboard:

1. Log in to NetSuite.
2. On the **SaaS 360 Dashboard** tab, go to Revenue Metrics, click **View**.

3. In the Filters section, fill out any or all the following fields.
 - a. In the **Subsidiary** field, select a subsidiary.
 When you select one or more subsidiaries, the dashboard consolidates and displays data for the parent subsidiary and its associated child subsidiaries. If the parent and child subsidiaries have different transaction currencies, transactions are converted to the lowest common parent company's currency using the posting month's consolidated exchange rate.
 For more information about viewing the consolidated exchange rates, see the help topic [Viewing Consolidated Exchange Rates](#).
 - b. In the **Customer** field, select the customer.
 The field options depend on the subsidiary filter that you select.
 - c. In the **Item** field, select the item.
 The field options depend on the subsidiary filter that you select.
 - d. In the **Department** field, select the department.
 The field options depend on the subsidiary filter that you select.
 - e. In the **Class** field, select the class.
 The field options depend on the subsidiary filter that you select.
 - f. In the **Location** field, select the location.
 The field options depend on the subsidiary filter that you select.
4. Click **Apply Filters**.

Viewing the SaaS 360 Dashboard Tiles

The Subscription Metrics displays the following KPIs as tiles in the Bookings and Revenue portlet. KPI values depend on your selected filters, period, and comparison period. You can also see the percentage variance between these periods.

- Annual recurring revenue (ARR)
- Monthly recurring revenue (MRR)
- Bookings
- Revenue

You can drill down into ARR, MRR, and bookings by clicking their amounts and export the report as a CSV file. Click **Export to CSV** in the upper left corner of the table to export.

 **Note:** Your role determines the data you can access on the dashboard.

Setting the Comparison Period

By default, the Period field is set to **This Month**, and the Comparison Period field is set to **Last Month**. You can compare the values for a period against the comparison period.

The following table lists the options available for the **Period** and **Comparison Period** fields.

Period	Comparison Period
This Month	■ Last Month ■ Month Before Last

Period	Comparison Period
	Same Last Year
This Quarter	- Last Quarter - Same Last Year - Quarter before last
This Year	- Last Year - Year Before Last
Last Month	Month Before Last
Last Quarter	Quarter Before Last
Last Year	Year Before Last

To View SaaS 360 Dashboard Tiles

1. Log in to NetSuite.
2. On the **SaaS 360 Dashboard** tab, go to Revenue Metrics, click **View**.
3. (Optional) Set filters for the dashboard reports. For more information, see [Accessing and Working with the Subscription Metrics SuiteApp](#).
4. Go to the Bookings and Revenue portlet on the dashboard. The following information appears as tiles:
 - MRR** – The tile displays the monthly recurring revenue for the current month from active subscriptions or service contracts.
 This value is the same as the total for the current month as seen in the MRR roll forward report.
 MRR for the current month is compared against the MRR for the comparison period and the percentage difference is displayed. Click the amount to see detailed MRR and export as CSV.
 - ARR** – The tile displays the annual recurring revenue for the current month from active subscriptions or service contracts.
 This value is the same as the Ending Balance for the current month as seen in the ARR roll forward report. Click the amount to see detailed ARR and export as CSV.
 ARR for the current month is compared against the ARR for the comparison period and the percentage difference is displayed.
 - Bookings** – The tile displays the total value of new contracts, expansions, and renewals for the selected period.
 Booking for the current month is compared against the bookings for the comparison period and the percentage difference is displayed. Click the amount to see booking details and export as CSV.
 - Revenue** – This tile displays the total revenue for the current month from active subscriptions or service contracts. Revenue for the current month is compared against the revenue for the comparison period and the percentage difference is displayed.

Viewing ARR and MRR Roll Forward Reports

On the SaaS 360 dashboard, view MRR and ARR roll forward reports to see monthly and annual recurring revenue changes over up to 36 months. Detailed ARR and MRR reports are also available when you click on the new, upsell, downsell, beginning balance, ending balance, and churn amounts.

You can also customize the view by choosing **Start Period** and **End Period** fields.

Access Requirements

To drill down into the roll forward reports, you require the following:

- You must have permissions for the following:
 - Analytical Impact
 - Currency
 - SaaS Metrics
 - Transactions
- Revenue KPI reports require additional permissions for the following:
 - Cash Sale
 - Invoice
 - Credit Memo transactions
- To view reports with more than 100,000 rows, SuiteAnalytics Connect access is required. For more information, see the help topic [SuiteAnalytics Connect](#).

Note: When generating the report, note the following:

- Reports include SaaS records with inactive items if they match the user's selected subsidiary, customer, class, department, or location. Inactive items cannot be filtered through the Item filter.
- If you encounter errors during CSV import, try reducing data size with dashboard filters.

To view the ARR and MRR roll forward reports:

1. Log in to NetSuite.
2. On the **SaaS 360 Dashboard** tab, go to Revenue Metrics, click **View**.
3. (Optional) Set filters for the dashboard reports. For more information, see [Accessing and Working with the Subscription Metrics SuiteApp](#).
4. Go to the Roll Forward Report portlet. Click the **ARR** or **MRR** subtab to display the following reports.
 - **ARR roll forward report** – This report shows the ARR beginning balance, new, upsell, downsell, churn, and ending balance amounts per month for the current year. Amounts are shown in the subsidiary's currency. ARR amounts are annualized. For contracts with terms that are less than or equal to 12 months, the ARR amount is the contract amount. For contracts with terms greater than 12 months, the ARR amount is computed as the contract amount, divided by the term, and multiplied by 12.
 - **MRR roll forward report** – This report shows the MRR new, renewal, upsell, downsell, and churn amounts per month for the current year. Amounts are shown in the subsidiary's currency. MRR amounts are computed monthly. For example, if you have a contract in January amounting to \$12,000 USD with a 12-month term, this amount appears as \$1,000 USD every month from January to December. MRR is computed as the contract amount divided by the term in months. If the contract term is less than one month, the MRR is the contract amount.
5. (Optional) Click new, upsell, downsell, beginning balance, ending balance, or churn amounts in the ARR and MRR roll forward report to see details. The detailed ARR and MRR reports show the transactions that contribute to the computation of the amount.

To export the report as a CSV file, click the **Export to CSV** link at the upper right corner of the ARR Details or MRR Details table.

The following table shows the information in the ARR and MRR detailed report.

Columns	Descriptions
SaaS Metric ID	This column displays the SaaS metric record ID.
Revenue Month End Date	This column displays the last day of the month in which revenue was most recently generated for this metric.
Subsidiary	This column displays the subsidiary of the transaction.
Customer	This column displays the customer for the transaction.
Item	This column displays the renewable item in the transaction.
Department	This column displays the department for the transaction.
Class	This column displays the class for the transaction.
Location	This column displays the location for the transaction.
Start Date	This column displays the start date of the transaction.
End Date	This column displays the end date of the transaction.
Term (Months)	This column displays the contract term in months.
Source Transaction	This column displays the transaction ID.
Source Line	This column displays the transaction line ID
Source Record Type	This column displays the transaction type.
Source Currency	This column displays the currency used in the transaction.
Beginning Balance (Source Currency)	This column displays the balance amount in the currency of the transaction.
Beginning Balance	This column displays the balance amount in the subsidiary's currency.

ARR and MRR Metrics Definitions

The ARR and MRR roll forward report includes the following metrics:

Metric	Definition	Formula
Beginning Balance	Total MRR amount at the start of the period. SaaS metric records making up the total balance for selected period.	MRR or ARR ending balance from the earlier period.
New	Total revenue from new business in the selected period. You can select from the following options: - Monthly - Quarterly - Yearly	New MRR or ARR in the selected period.

Upsell	Total revenue from upsells in the selected period.	Upsell MRR or ARR from existing customers.
Downsell	Total revenue from downsells in the selected period.	Downsell MRR or ARR from existing customers.
Churn	Total revenue lost from cancelled contracts or subscriptions	—
Ending Balance	Total MRR lost from cancellations in the selected period.	Beginning Balance MRR or ARR + New Business + Upsell – Downsell – Churn
Net New	Total new additions for the selected period after subtracting losses or reductions.	(New MRR + Upsell MRR) – (Churn MRR + Downsell MRR)

Viewing SaaS Metrics KPIs

You can view the following KPIs for the current month on the SaaS 360 dashboard. KPI values depend on your selected filters, period, and comparison period. You can also see the percentage variance between periods for these metrics.

- Revenue
- Growth Rate (MRR/ARR)
- Net Revenue Retention (NRR)
- Gross Revenue Retention (GRR)
- Churn Rate
- Total Contract Value (TCV)
- Lifetime Value (LTV)
- Customer Acquisition Cost (CAC)
- CAC Payback Period
- LTV/CAC Ratio

Click the **Revenue** value in the SaaS Metric report to see a detailed breakdown and export it to CSV. For information about the KPI formulas, definitions, and filters applicable, see [KPI Formulas](#).

Viewing SaaS Metric Charts

The SaaS 360 dashboard includes a range of graphs to give you insights into business performance. Following are the graphs you'll see on the dashboard.

Chart / Graph	Description
MRR Composition by Class	The MRR Composition by Class chart shows ending MRR balance by class on the Y axis and period on the X axis.
	Supported period types are monthly, quarterly, and yearly.
	For each period type, the MRR is ending MRR at the end of the period.
	For monthly, the MRR is ending MRR balance at the end of the month.
	For quarterly, the MRR is ending MRR balance at the last month of the quarter.

Chart / Graph	Description
	For each period, the ending MRR balance at the end of period is aggregated by class.
MRR Growth	The MRR Growth Chart shows new, upsell, downsell, churn, and net new on the Y axis and period on the X axis. Supported period types are monthly, quarterly, and yearly. For each period, MRRs are totaled by impact categories — New, Upsell, Downsell, and Churn. Net New equals ending MRR minus beginning MRR for the period. Calculation of New, Upsell, Downsell, and churn: - For monthly, this is the total MRR for the month for the impact categories — New, Upsell, Downsell, and Churn. - For quarterly, this is the total MRR for the months in the quarter for the impact categories — New, Upsell, Downsell, and Churn. - For yearly, this is the total MRR for the month in the year for the impact categories — New, Upsell, Downsell, and Churn. Calculation of Net New: - For monthly, this is the ending MRR balance minus beginning MRR balance for the month. - For quarterly, this is the ending MRR balance for the last month of the quarter minus beginning MRR balance for the first month of the quarter. - For yearly, this is the ending MRR balance for the last month of the year minus beginning MRR balance for the first month of the year.
Top 5 MRR	The Top 5 MRR chart shows the ending MRR balance for your top 5 customers as a donut chart for the following period types — This Month, Last Month, This Quarter, Last Quarter, This Year, Last Year, Before Last Month. The Customer filter on the SaaS 360 dashboard is not applicable for this graph.
CAC Trend	The CAC Trend graph shows customer acquisition costs on the Y axis and period on the X axis for the selected periods — monthly, quarterly, and yearly.
Gross and Net Revenue Retention	The Gross and Net Revenue Retention graph shows GRR and NRR on the Y axis and period on the X axis. Supported period types are monthly, quarterly, and yearly.
Recurring Revenue Trend	The Recurring Revenue Trend graph shows the ending MRR balance on the Y axis and the period on the X axis for the selected periods — monthly, quarterly, and yearly.

Troubleshooting

If you encounter issues or error messages while using the Subscription Metrics SuiteApp, refer to the table below for common problems, their causes, and suggested solutions. If the issue persists, contact your account administrator or NetSuite Customer Support.

Error Code/Message	Possible Cause	Resolution	Contact
Start Period must be earlier than End Period.	An incorrect start or end period was selected.	Select a start period that is earlier than the selected end period.	NetSuite Administrator

Error Code/Message	Possible Cause	Resolution	Contact
The selected date range cannot exceed {1} months.	A date range that exceeded 36 months was selected.	Select a date range that is within 36 months.	NetSuite Administrator
No accounting periods set.	An attempt is being made to generate ARR or MRR report without setting up any accounting periods.	To set up accounting periods, go to Setup > Accounting > Manage Accounting Periods.	NetSuite Administrator
The data cannot be displayed because no accounting periods are set for the subsidiary. To set up accounting periods, go to Setup > Accounting > Manage Accounting Periods.	An attempt is being made to generate ARR or MRR report without setting up any accounting periods.	Set up accounting periods at Setup > Accounting > Manage Accounting Periods.	NetSuite Administrator
Access to the page is unavailable for your role. Contact a user with the Administrator role for assistance.	SaaS metric feature or permission is not enabled in your account.	Enable required features at Setup > Company > Enable Features.	NetSuite Administrator
Loading data timed out. Try again.	A timeout occurred while loading data in the roll forward report.	Try again later.	NetSuite Administrator
Enable the SaaS Metrics feature to install the SuiteApp. To enable, go to Setup > Company > Enable Features.	SaaS Metrics feature is not enabled.	Enable the required features from Setup > Company > Enable Features.	NetSuite Administrator
<System generate error>. To reduce the file size, apply filters on the dashboard and try again.	An error occurred during the CSV import of reports.	Use a smaller filter range to reduce the file size. Adjust the filters on the SaaS 360 dashboard.	NetSuite Administrator
Incorrect dataset.	Dataset selected for the CAC KPI is incompatible and cannot be used.	Check the selected dataset and make sure you're using the right columns. Find the dataset under the Analytics tab and the Datasets subtab.	NetSuite Administrator

Uninstalling the Subscription Metrics SuiteApp

You can uninstall SuiteApps when you no longer need them. To uninstall a SuiteApp, make sure you're logged into the account where it's installed.

To uninstall the Subscription Metrics SuiteApp:

1. Go to Customization > SuiteCloud Development > Installed SuiteApp List (Administrator).
2. In the Installed SuiteApps list, find the SuiteApp you want to uninstall.
3. For that SuiteApp, select Uninstall from its action menu. The uninstallation process starts.

Uninstalling a SuiteApp might take a while. To check the status, see the help topic [Viewing SuiteApp Installation or Uninstallation Status](#).

When the uninstallation completes, the SuiteApp is removed from the Installed SuiteApps list.
