This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. SuiteApp Marketplace in NetSuite

Review the following video to learn how to install your first SuiteApp using the SuiteApp Marketplace:

 [Installing Your First SuiteApp Using SuiteApp Marketplace](#)

The SuiteApp Marketplace is a location in NetSuite where you can find and install SuiteApps created using the SuiteCloud Development Framework (also referred to as SDF SuiteApps), and SuiteApp bundles created using SuiteBundler. SuiteApps can include customizations and configuration settings useful to your organization. This documentation is intended for users with the Administrator role or SuiteApp Marketplace permission to install SuiteApps in their accounts.

If you're a developer interested in creating SDF SuiteApps, see the help topic [SuiteApp Projects](#).

For information about using the SuiteApp Marketplace, see the following topics:

- [Viewing SuiteApps in the SuiteApp Marketplace](#)
- [SuiteApp Installation](#)

Viewing SuiteApps in the SuiteApp Marketplace

You can view all SuiteApps in the SuiteApp Marketplace. To view SuiteApp listings, do one of the following:

- Go to [SuiteApp.com](#).
- Go to Customization > SuiteCloud Development > SuiteApp Marketplace.

The list of available SuiteApps appears.

 **Note:** The SuiteApps menu isn't available for the following centers:

- Advanced Partner Center
- Customer Center
- Employee Center
- Partner Center
- Support Center
- Vendor Center

The following is an example of how SuiteApps can be listed in the SuiteApp Marketplace:

Each SuiteApp is shown as a SuiteApp tile with the following information:

- **SuiteApp Name** – name of the SuiteApp, as provided by the publisher or solution provider.
You can search for a SuiteApp by entering its name or publisher in the Search Apps field.
- **Publisher** – publisher name that identifies the SuiteApp publisher or solution provider.
- **First Release Date** – date when the SuiteApp was first released on the SuiteApp Marketplace.

You can also sort the SuiteApp tiles by SuiteApp Name, Publisher, or First Release Date.

Click a SuiteApp tile to view its details. Here's an example of the SuiteApp details page in the SuiteApp Marketplace:

Here's what you'll find on the SuiteApp details page for each SuiteApp:

- **Action** – the following actions can be performed for the SuiteApp:
 - **Install** – install the SuiteApp on your account. For more information, see [Installing from the SuiteApp Marketplace](#).
 - **Upgrade** – upgrade the SuiteApp version in your account. For more information, see [Upgrading from the SuiteApp Marketplace](#).
- **Installation Status** – current state of the SuiteApp installation or uninstallation. The installation status first appears on the SuiteApp details page after you click Install. For the list of possible states, see [Viewing SuiteApp Installation or Uninstallation Status](#).
- **Additional Information** – the following details are shown for the SuiteApp:
 - **Publisher** – SuiteApp publisher or solution provider.
 - **First Release Date** – when the SuiteApp was first released on the SuiteApp Marketplace.
 - **Installed Version** – version of the SuiteApp that is installed in your account.
 - **Latest Version** – latest version of the SuiteApp that is available for installation.
 - **Upgrades** – upgrade type of the SuiteApp, which is one of:
 - **Unmanaged** – you manually upgrade the SuiteApp in your account.
 - **Managed** – upgrades for the SuiteApp are managed by the publisher or solution provider at any time.

For SuiteApp bundles, there's less information in the Additional Information section than for SDF SuiteApps. You can find more information for a SuiteApp bundle on the Bundle Details page.

Note: The SuiteApp thumbnail images you see in the SuiteApp tiles and on the SuiteApp details page are synchronized from the Advanced Partner Center (APC) record.

SuiteApp Installation

From the SuiteApp Marketplace, you can install any SuiteApp that's shared to your account and supports your NetSuite account version.

For information about installation, check out these topics:

- [Installing from the SuiteApp Marketplace](#)
- [Upgrading from the SuiteApp Marketplace](#)
- [Viewing SuiteApp Installation or Uninstallation Status](#)
- [Uninstalling SuiteApps Obtained from the SuiteApp Marketplace](#)

Installing from the SuiteApp Marketplace

You can install SuiteApps to your account to take advantage of customizations and settings that are useful for your organization.

Important: Some SuiteApps installed from the SuiteApp Marketplace can be managed SuiteApps. By installing the managed SuiteApp, you're giving the publisher or solution provider permission to upgrade it at any time. Upgrades for managed SuiteApps are pushed automatically to your account.

Consider the following information regarding SuiteApp installation:

- The most recent version of the SuiteApp that works with your account is installed.
- If you don't want a SuiteApp after it's installed, you can uninstall it from the Installed SuiteApps page.
- Objects included in the SuiteApp are created in your NetSuite account.
- Validation is performed before installation. For more information, see the help topic [SuiteCloud Project Validation](#).
- You can start installing more SuiteApps while others are still in progress. SuiteApps install in the order you click Install.
- Although SuiteApp bundles are listed in the SuiteApp Marketplace, you must install them from the Bundle Details page.
- For the SuiteApp to install successfully, your role needs the necessary permissions for any custom components in the SuiteApp. If you get a Permission Violation error, switch to a role with those permissions and try again.
- The SuiteApp that you want to install might include terms of service (ToS). To continue with the installation, you are required to read and accept the terms of service.

To install a SuiteApp from the SuiteApp Marketplace:

1. Go to SuiteApps.

 **Note:** The SuiteApps menu isn't available for these centers:

- Advanced Partner Center
- Customer Center
- Employee Center
- Partner Center
- Support Center
- Vendor Center

2. From the list, find the SuiteApp you want to install and click its tile. The SuiteApp details page appears.
3. In the top right of the SuiteApp details page, click one of the these actions:
 - **Install** (for SDF SuiteApps)
(Optional) SuiteApp Terms of Service window appears. To continue with the installation process, you are required to read and accept the terms of service.
 - **View SuiteApp** (for SuiteApp Bundles)
The installation process begins.
Installation of a SuiteApp may take some time.
To check the installation status, see [Viewing SuiteApp Installation or Uninstallation Status](#).

 **Important:** Although SuiteApp bundles are listed in the SuiteApp Marketplace, you must install them from the Bundle Details page. When viewing a SuiteApp bundle on the SuiteApp details page, click **View SuiteApp** to view and install it from the Bundle Details page. For more information, see the help topic [Installing a Bundle](#).

Note that you might see these messages instead of the Install action:

- If you see Not Compatible instead of Install, your NetSuite account doesn't support the SuiteApp. This usually means the SuiteApp doesn't support your NetSuite version.
- If you see Limited Access instead of Install, you don't have permission to install the SuiteApp.

Upgrading from the SuiteApp Marketplace

You can upgrade SuiteApps installed on your account when a new version is available. You can only upgrade SuiteApps that are shared to your account and support your NetSuite version. Upgrading a SuiteApp gives you new customizations and settings that might be useful for your organization.

 **Note:** For managed SuiteApps, upgrades are handled by the publisher or solution provider. Upgrades are pushed automatically, and you can't manually start the upgrade. The Upgrade action isn't available for managed SuiteApps.

To upgrade a SuiteApp from the SuiteApp Marketplace:

1. Go to SuiteApps.

2. From the list, find the SuiteApp that you want to upgrade, and click its tile. The SuiteApp details page appears.

For information about the SuiteApp details page, see [Viewing SuiteApps in the SuiteApp Marketplace](#).

3. In the top right of the SuiteApp details page, click one of these actions:

- **Upgrade** (for SDF SuiteApps)
- **View SuiteApp** (for SuiteApp Bundles)

You might see a choice of SuiteApp versions if:

- There are two released versions of the SuiteApp, and both support your current NetSuite version.
- Both available versions are newer than the SuiteApp version you currently have installed.

The upgrade installation process begins.

Installation of a SuiteApp may take some time.

To check the installation status, see [Viewing SuiteApp Installation or Uninstallation Status](#).

Important: Although SuiteApp bundles are listed in the SuiteApp Marketplace, you must upgrade them from the Bundle Details page. When viewing a SuiteApp bundle on the SuiteApp details page, click **View SuiteApp** to view and upgrade it from the Bundle Details page. For more information, see the help topic [Installing a Bundle](#).

Viewing SuiteApp Installation or Uninstallation Status

The SuiteApp status shows the current state of the SuiteApp workflow after you start an install, upgrade, or uninstall.

You can see some SuiteApp states in the SuiteApp Marketplace, but all states are visible on the Installed SuiteApps page.

To check the SuiteApp installation status in the SuiteApp Marketplace, go to SuiteApps. Click the SuiteApp tile you want, and you'll see the status in the top right of the details page.

Only these states can show up on the SuiteApp details page in the SuiteApp Marketplace:

- **Installation Failed** – The SuiteApp failed to install. Check the installation log for details. For more information, see the help topic [Deployment Logs for SuiteCloud Projects](#).
- **Installing** – The SuiteApp is currently being installed.
- **Installed** – The SuiteApp was installed successfully. If an upgrade fails validation, you'll still see this state because the previous version is still working.
- **Validation Failed** – The SuiteApp didn't pass validation, so it wasn't installed. If it's a new install, nothing changes in your account. If it's an upgrade, the previous version is still installed and working. Check the installation log for more info. For more information, see the help topic [Deployment Logs for SuiteCloud Projects](#).

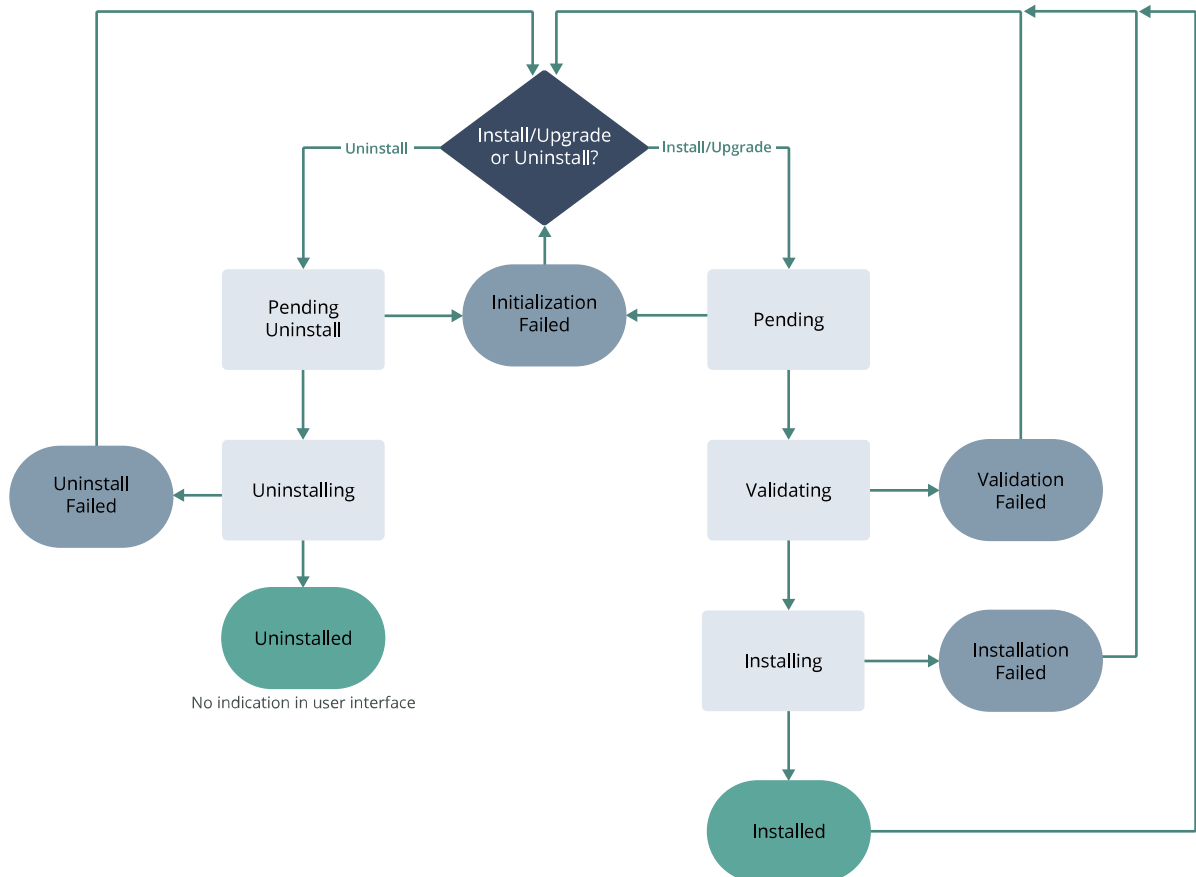

You can see more intermediate states on the Installed SuiteApps page by going to Customization > SuiteCloud Development > Installed SuiteApp List. For more information, see the help topics [Viewing and Uninstalling SDF SuiteApps in a NetSuite Account](#) and [Deployment Logs for SuiteCloud Projects](#).

For information about possible states, see:

- SuiteApp Workflow
- SuiteApp States

SuiteApp Workflow

These are the possible states for a SuiteApp during the installation, upgrade, or uninstallation process:

Uninstalling SuiteApps Obtained from the SuiteApp Marketplace

You can uninstall SuiteApps when you don't need them anymore. To uninstall a SuiteApp, make sure you're logged into the account where it's installed.

To uninstall a SuiteApp:

1. Go to Customization > SuiteCloud Development > Installed SuiteApp List.

2. In the Installed SuiteApps list, find the SuiteApp you want to uninstall.
3. For that SuiteApp, select **Uninstall** from its action menu. The uninstallation process starts.

Uninstalling a SuiteApp may take some time. To check the status, see [Viewing SuiteApp Installation or Uninstallation Status](#).

When the uninstall completes, the SuiteApp is removed from the Installed SuiteApps list.

Managing Single Page Applications Included in SuiteApps

You can install Single Page Applications (SPAs) in your account as part of a SuiteApp from the SuiteApp Marketplace.

You can manage some settings for these SPAs on the SPA management page, if you have Edit or Full level SuiteScript permission.

To access the SPA management page and change the settings:

1. Go to Customization > Scripting > Single Page Applications. The system shows a list of all of the SPAs in your account with these columns:
 - **Name** – Name of the SPA and link to the access the SPA URL.
 - **Description** – Description for the SPA.
 - **SuiteApp** – The name of the SuiteApp that the SPA is part of.
 - **SPA ID** – The ID of the SPA.
 - **Last Updated** – Date the SPA was last updated (not yet in use).
2. In the list, click the **SPA Name** to open its management page.
3. On the **Basic Info** tab, you can view basic information for the SPA (such as **Name**, **ID**, **Description**, **SuiteApp** name, and **URL**).
4. On the **Configuration** tab, you can change your SPA's settings. Here are the fields you'll find:

Field	Description	How to Configure
Execute As	Sets the permissions and restrictions applied when executing the SPA based on the selected role. By default, this field is set to Current Role. For more information, see the help topic Executing Scripts Using a Specific Role .	To change the role, click the edit icon, pick a role from the list, and click Save .
Log Level	Filters the log entries shown on the Logs tab. The default log level is Debug. Other log level options include Audit, Error, and Emergency. For more information, see the help topic Setting Script Execution Log Levels .	To change the log level, click the edit icon, pick a value, and click Save .
Release Audience	Determines who can run the SPA. When the SPA is created, it runs only in the accounts of the roles selected in this field. If no role is specified, the SPA is accessible only to the script owner.	To change the audience, click Set Up Audience to see the current roles selected and other possible options. You can filter by role name. Audience roles are shown in two separate multiselect fields: Internal Roles and External Roles .

Field	Description	How to Configure
		■ To make the SPA available to all internal roles, check the All Internal Roles box. ■ To add roles, check the boxes for each role on the left, then click the right arrow. ■ To remove roles, check the boxes for each role on the right, then click the left arrow. Click Save to save your selection.
Center Links	Lets you create, edit, or delete center links for the SPA. Center links are used to specify a menu path that lets users access the SPA directly from that location.	■ To create a center link, click Add Link. In the Center Link window: □ In the Menu Location, pick the center and tab where you want to add the SPA link. By default, the new link is added at the bottom of the list. If you want it before an existing element, pick a value in Insert Before. □ In Label, enter the label for the SPA link. Click Save. Reload the page to see the new link in the menu. You can only add one link per menu location. ■ To edit a center link, click the edit icon, update the fields, and click Save. ■ To delete a center link, click the delete icon, then click Delete Link.
Error Notification	Indicates who is notified about errors. By default, the script owner is selected.	To set up the list of users who receive notifications, click Set Up Notifications and pick from these options: ■ Current User – Notifies the user running the SPA. ■ Script Owner – Notifies the script owner. ■ Notify All Admins – Notifies all users with the Administrator role. ■ Groups – Notifies all users in the selected group. To define new groups, go to Lists > Relationships > Groups > New. In the Specific Email Addresses field, enter a comma-separated list of email addresses for other users who should be notified.

5. On the **Logs** tab, you can view the logs for the SPA. Click **Refresh** to reload the list and see new logs after running the SPA.
6. On the **System Notes** tab, you can view the changes to the SPA (creation and updates), including date/time, user, role of the user, type of action, object changed, and old and new values. The information about deletion actions is also kept. For more information, see the help topic [System Notes v2 Overview](#).

 **Note:** Updates to **Audience**, **Center Links**, and **Error Notifications** aren't tracked yet.
