This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. NetSuite SuiteApps

SuiteApps are applications or bundles that extend NetSuite for specific industry and business needs. They are developed by Oracle NetSuite, or by members of the SuiteCloud Developer Network (SDN), a third-party developer program. NetSuite customers can also build custom SuiteApps to meet their needs, or hire Professional Services to do it for them.

NetSuite SuiteApps are developed on the SuiteCloud platform, and are distributed and supported by Oracle NetSuite. Your company may also have custom SuiteApps developed and distributed through paid Professional Services engagements. To check the SuiteApps installed in your account, see the help topic [Reviewing the Installed Bundles List](#). On the Installed Bundles page, the Owner column shows the name of the SuiteApp developer.

You can find and install SuiteApps through Customization > SuiteBundler > Search & Install Bundles. Some SuiteApps are also available from the SuiteApp Marketplace, a location in NetSuite for SuiteApps created using the SuiteCloud Development Framework (SDF), and SuiteApp bundles created using SuiteBundler. For more information, see the help topic [SuiteApp Marketplace in NetSuite](#).

SuiteApp projects can be uploaded to the SuiteApp Control Center, a platform for defining and managing the SuiteApp distribution process. For more information, see the help topic [SuiteApp Control Center Overview](#).

For information about SuiteApps developed and supported by SDN Partners and other third parties, see [Third-party SuiteApps \(not provided by Oracle\)](#).

Rebates and Trade Promotions	SuiteApp Marketplace	Provides projected incentives through real-time rebate calculation for items on a sales transaction. See the help topic Rebates and Trade Promotions	See the help topic Installing the Rebates and Trade Promotions SuiteApp

Updating SuiteApps

Most SuiteApps are automatically updated in your account whenever there are changes. Issue fixes and enhancements become available after the update.

Some NetSuite SuiteApps don't update automatically, giving you the flexibility to choose when to apply the updates. These NetSuite SuiteApps are:

- Reference Checkout
- Reference My Account
- Reference My Account Premium
- Reference Shopflow
- Content Delivery Service
- Product Merchandising

See the help topic [Installed Bundle Updates](#) for instructions about updating an installed bundle.

Displaying SuiteApps on Your Dashboard

You can use some SuiteApps installed in your account as dashboard portlets. These SuiteApps need a dashboard component to work as a portlet.

To add a SuiteApp portlet to your dashboard, see the help topic [SuiteApp Portlets](#).

 **Note:** You can't add SuiteApp portlets to custom dashboards.

Third-party SuiteApps (not provided by Oracle)

Third-party SuiteApps are developed and supported by SuiteCloud Developer Network (SDN) partners and other third parties. They are built on the platform and bundled using SuiteBundler, similar to NetSuite SuiteApps.

The following are examples of third-party SuiteApps:

- Box for NetSuite
- Celigo Integrator
- SPS Integration

For information about third party SuiteApps, see [SuiteApp.com](#). On [SuiteApp.com](#), you can search for third party SuiteApps by industry, business need, or keyword. You can also read customer reviews, try out solutions, and find out where to buy these SuiteApps.
