Public

PURPOSE STATEMENT

This document is dedicated to the SuiteTax Compatibility Testing initiative. It contains guidelines on how to configure the SuiteTax feature on a NetSuite customer account and how to test compatibility between the SuiteTax feature and partners bundles/SuiteApps.

DISCLAIMER

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle software license and service agreement, which has been executed and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

This document is for informational purposes only and is intended solely to assist you in planning for the implementation and upgrade of the product features described. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described in this document remains at the sole discretion of Oracle.

Due to the nature of the product architecture, it may not be possible to safely include all features described in this document without risking significant destabilization of the code.

DISCLAIMERS FOR PRE-RELEASE, PRE-GA PRODUCTS

The **revenue recognition disclaimer** on this page is required for any white paper that addresses future functionality or for products that are not yet generally available (GA). If you are unsure whether your statement of direction needs the disclaimer, read the [revenue recognition policy](#). If you have further questions about your content and the disclaimer requirements, e-mail REVREC_US@oracle.com.

The **testing disclaimer** in the copyright section on the last page (highlighted in yellow) is provided by the FCC for hardware products. It must appear in the copyright section for all pre-release, pre-GA hardware products. Be sure to remove the yellow highlighting before publishing. When the product becomes GA, update your collateral by removing the disclaimer from the copyright section. If your product is already GA or if you are writing about a software product, delete the disclaimer from the copyright section.

Important: If your product is not GA, then you cannot include any regulatory compliance information in the statement of direction. Regulatory compliance information may be included for GA products only if you have completed all required safety and emissions testing, and you have received the certificates issued by the testing organization

INTRODUCTION

What is SuiteTax?

SuiteTax is a feature in NetSuite ERP that provides the calculation and storage of indirect taxes (e.g. Sales Tax, GST/PST, VAT, etc) charged to transactions. It is tightly integrated with ERP transactions and offers the following benefits over Legacy Tax:

Flexibility to support country-specific needs in indirect tax calculation and reporting

Support for third party tax engines supplied through authorized SuiteTax vendors using the SuiteTax API

It is important to note that SuiteTax and Legacy Tax cannot be enabled at the same time on the same customer account. When a customer with Legacy Tax calculation upgrades their account to use SuiteTax, their existing ERP data must be migrated. Once SuiteTax is enabled, the account cannot be reverted to Legacy Tax.

SuiteTax will eventually become the default tax environment for newly provisioned accounts mitigating the need for data migration.

For more information see [General SuiteTax Topics](#) in the Help Center.

About SuiteTax Compatibility Testing

Legacy Tax is tightly integrated with transactions, entities and other NetSuite records. Most Legacy Tax fields and records are deprecated and not available in SuiteTax (see [SuiteTax Compatibility Testing Consideration](#)).

As SuiteTax is not backwards compatible with Legacy Tax, existing bundles or SuiteApps may also not be compatible with SuiteTax.

As the **ERP: Tax - Brno** team, we want to ensure as smooth a transition to SuiteTax as possible for our customers. The sheer number of existing bundles and SuiteApps, makes it impossible for our team to test the compatibility of all bundles and SuiteApps with SuiteTax alone. However, we must ensure that only compatible bundles and SuiteApps are installed on SuiteTax accounts and only customer accounts with compatible bundles and SuiteApps are migrated. We must also track incompatible or partially compatible bundles and SuiteApps and either fix the incompatibility, or marked them discontinued.

We need your help as the owners of these bundles and SuiteApps to test their compatibility and make the decision to fix them or mark them as discontinued.

We understand that you cannot be expected to have a deep knowledge of how taxes are calculated in NetSuite, so we've prepared detailed documentation which will guide you through configuring SuiteTax on your account and how to test your bundles of SuiteApps compatibility against SuiteTax.

The entire testing activity can usually be completed in a couple of days, depending on the complexity of the sanity tests you apply to your bundles or SuiteApps.

You can either test compatibility manually as per the test cases included in this document or install the **SuiteTax Compatibility Testing Tool** SuiteApp which automates most of the configuration and test cases.

What we need from your team

1 Consider compatibility testing

Compatibility testing is not required for every bundle or SuiteApp. Firstly, refer to this page [SuiteTax Compatibility Testing Consideration](#) to see if your bundle or SuiteApp requires testing. If in doubt, we strongly recommend compatibility testing.

2 Proceed with compatibility testing

Before you proceed, make sure SuiteTax is enabled and configure your account as described in [Test Environment & SuiteTax Configuration](#). Once configured, perform the sanity tests for your bundle or SuiteApp. Sanity tests should cover the main workflows and functionality of the bundle or SuiteApp. Next, perform the prepared SuiteTax test cases to ensure that SuiteTax and the SuiteTax Engine are also working as expected. The compatibility testing process is described in [SuiteTax Compatibility Testing](#).

3 Provide feedback

Please send an email message to SuiteTaxCompatibilityTesting@NetSuite.com including the following:

- Bundle ID
- Bundle Name
- Contact Person
- Compatibility Results (Compatible/Partially compatible/Incompatible)
- Notes
- Answers to the questions below

When compatible

-  Send an email message to SuiteTaxCompatibilityTesting@NetSuite.com marking the compatibility result as **Compatible**.

When partially compatible

When marked **partially compatible**, we allow migration to proceed, informing the customer of the bundle/SuiteApp's limited functionality.

- First, consider if the bundle or SuiteApp with limited functionality should really be allowed to be installed on the SuiteTax account, or if it's safer to mark it as **Incompatible**.
-  Send an email message to SuiteTaxCompatibilityTesting@NetSuite.com with compatibility result as **Partially Compatible**, completing these questions:
 - Is the bundle or SuiteApp discontinued?
 - If yes:
 - Is there a planned replacement for this discontinued bundle or SuiteApp?
 - If no:
 - When will the bundle or SuiteApp be fully compatible?
 - Which parts or functions are **incompatible** with SuiteTax? (it's helpful to confirm which parts *are* compatible, to avoid doubt).
 -  Consider updating your bundle or SuiteApp's description and documentation to reflect which functions are not supported in SuiteTax.
 -  Please add resolving compatibility issues to your backlog.
 -  Let us know when all compatibility issues have been fully resolved.

When incompatible

When bundles or SuiteApps are marked **incompatible**, we don't allow migration to proceed, and inform the customer regarding the incompatible bundles or SuiteApps..

-  Send an email message to SuiteTaxCompatibilityTesting@NetSuite.com with compatibility result as **Incompatible**, answering these questions:
 - Is the bundle/SuiteApp discontinued?
 - If yes:
 - Is there a planned replacement for this discontinued bundle or SuiteApp?
 - If no:
 - When will the bundle or SuiteApp be compatible?
-  Consider updating the bundle or SuiteApp to prevent installation on accounts with SuiteTax enabled. Provide updates to your documentation
-  Please add resolving your compatibility issues to your backlog.
-  Let us know when all compatibility issues have been fully resolved.

SUITETAX COMPATIBILITY TESTING CONSIDERATION

General Considerations

Please consider testing the compatibility with SuiteTax in the following cases:

- The Bundle/SuiteApp creates taxable transactions (like Sales Orders, Invoices, Purchase Orders, ...) and especially sets any field related to taxes:
 - Transactions fields:
 - ◆ Custom Form
 - ◆ Customer
 - ◆ Date
 - ◆ Location
 - ◆ Nexus
 - ◆ Posting Period
 - ◆ Project
 - ◆ Shipping/Billing Address
 - ◆ Subsidiary
 - ◆ Tax Registration Number
 - Items:
 - ◆ Item
 - ◆ Quantity
 - ◆ Price Level
 - ◆ Rate
 - ◆ Amount
 - ◆ Gross Amount
 - ◆ Gift Certificate
 - ◆ Charge Type
 - ◆ Charge
 - Billable Items:
 - ◆ Discount/Markup
 - ◆ Tax Code
 - ◆ Rate
 - ◆ Apply
 - ◆ Date
 - ◆ Item
 - ◆ Location
 - ◆ Quantity
 - ◆ Rate
 - ◆ Amount
 - ◆ Gross Amount
 - Billable Expenses:
 - ◆ Discount/Markup
 - ◆ Tax Code
 - ◆ Rate
 - ◆ Apply
 - ◆ Date
 - ◆ Employee
 - ◆ Category
 - ◆ Location
 - ◆ Rate
 - ◆ Amount
 - ◆ Gross Amount
 - Billable Time:
 - ◆ Discount/Markup
 - ◆ Tax Code
 - ◆ Rate
 - ◆ Apply
 - ◆ Date
 - ◆ Employee
 - ◆ Item
 - ◆ Hours

- ◆ Units
- ◆ Rate
- ◆ Amount
- ◆ Gross Amount
- Taxable sales transactions (like Sales Orders, Invoices, Cash Sales, ...) > **Accounting** tab > **Tax Information** fields
- Also see all the deprecated legacy fields as well as new SuiteTax fields described below.
- The Bundle/SuiteApp creates tax codes (salestaxitem) records. (ex. SuiteApp has items or services with custom tax rates, so custom tax code records are created and/or bundled together).
- The Bundle/SuiteApp sources / searches for tax related records (ex. legacy tax reports, saved search, Tax Field used in SuiteApp custom record, Dynamic field added in SuiteLet, etc.).

Records & Fields Availability in SuiteTax

When some of the listed records are customized or used by your SuiteApp/Bundle, the compatibility testing is highly recommended.

- **Entity** (see NetSuite Help: [Entity Records in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax
- **Item** (see NetSuite Help: [Item Records in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax
- **Nexus** (see NetSuite Help: [Nexus Records in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax
- **Set Up Taxes** - The configuration page 'Setup > Accounting > Set Up Taxes' is no longer available in SuiteTax. The tax configuration in SuiteTax should be done on SuiteTax Engine side
- **Shipping Item** (see NetSuite Help: [Shipping Item Records in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax
- **Subsidiary / Company Information** (see NetSuite Help: [Subsidiary or Company Information in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer used in SuiteTax
- **Tax Code** (see NetSuite Help: [Tax Code Records in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax
- **Tax Control Account** - The record type 'Setup > Accounting > Tax Control Accounts' is no longer available in core NetSuite when SuiteTax is enabled
- **Tax Group** - The record type 'Setup > Accounting > Tax Groups' is no longer available in core NetSuite when SuiteTax is enabled
- **Tax Period** - The record type 'Setup > Accounting > Manage Tax Periods' is no longer available in core NetSuite when SuiteTax is enabled
- **Tax Schedule** - The record type 'Setup > Accounting > Tax Schedules' is no longer available in core NetSuite when SuiteTax is enabled
- **Tax Type** (see NetSuite Help: [Tax Type Records in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax
- **Taxable Transactions** (see NetSuite Help: [Transactions in SuiteTax](#)) - The record type and entry form were redesigned in SuiteTax. Some record fields are no longer available in SuiteTax. Here is the list of taxable transactions in Legacy/SuiteTax:
 - Bill (type = VendBill)
 - Bill Credit (type = VendCred)
 - Cash Refund (type = CashRfnd)
 - Cash Sale (type = CashSale)
 - Card Refund (type = CardRfnd)
 - Check (type = Check)
 - Credit Card (type = CardChrg)
 - Credit Memo (type = CustCred)
 - Estimate (type = Estimate)
 - Expense Report (type = ExpRept)
 - Invoice (type = CustInvc)
 - Journal (type = Journal)
 - Opportunity (type = Opprtnty)
 - Purchase Order (type = PurchOrd)
 - Purchase-Type Custom Transaction (type = CuTrPrch)
 - Return Authorization (type = RtnAuth)
 - Revenue Commitment (type = RevComm)
 - Revenue Commitment Reversal (type = RevComRv)
 - Sales Order (type = SalesOrd)

- Sales-Type Custom Transaction (type = CuTrSale)
- Vendor Return Authorization (type = VendAuth)

Incompatible Features/Bundles/Preferences

Not all features/bundles/preferences are currently supported by the SuiteTax. If your SuiteApp/Bundle depends on such features/bundles/preferences, it is probably incompatible with SuiteTax.

Please see [Known Limitations of SuiteTax](#).

TEST ENVIRONMENT & SUITETAX CONFIGURATION

Introduction

This page describes which accounts should be used for SuiteTax compatibility testing and how to configure them. SuiteTax is currently a hidden feature. Also, SuiteTax Engine bundles cannot be installed without approval.

Test Environment

 **Enabling SuiteTax feature is an irreversible operation.** 

We recommend doing SuiteTax compatibility testing from a test or SandBox account(s), particularly if you think your bundle or SuiteApp might be incompatible, as your account may become unusable.

When using the **SuiteTax Compatibility Testing Tool**, you must use **cloned or non-production accounts (e.g. sandbox, test drives)** as the tool can change the configuration of the account, potentially causing issues if done directly on production environments.

SuiteTax and SuiteTax Engine provisioning

1. Customers or partners who wish to use SuiteTax are required to complete a qualification questionnaire (accessible via NetSuite Support). Enablement requests can be sent via the Support or Account Management teams
 1. Account Managers ask the customer/partner to complete the SuiteTax Qualifying Questionnaire
 2. Customers/partners must file a NetSuite Support Case with the following details:
 1. Subject: SuiteTax Enable Hidden Feature
 2. Customer/ partner name
 3. NetSuite Account ID
 4. Reason: "Test SuiteTax compatibility with SuiteApp(s): <Customer/ partner SuiteApp(s) - name and ID>"
 5. Product Area: Advanced Accounting and OneWorld
 6. Feature: Tax integrations
 7. Attach the completed Qualification Questionnaire
 3. Once the request is approved, the Support Team will update the issue and case and notify the customer/partner. SuiteTax will then be available from *Setup > Company > Enable Features > Tax tab > SuiteTax*
2. NetSuite Product Localization partners should send an email message to SuiteTaxEnablementRequests@netsuite.com requesting access and quoting their Account ID.

Account Configuration

Migration testing - Installation of your Bundle/SuiteApp

We highly recommend that you install and configure your bundle or SuiteApp on, at least, one account before SuiteTax is enabled and meet the following criteria:

- The bundle or SuiteApp supports both Legacy Tax and SuiteTax
- The installation scripts create custom fields, searches, customize records, etc. based on whether SuiteTax feature is enabled or disabled, and there is no trigger which could recreate them after migration to SuiteTax.

Please install your bundle or SuiteApp and configure the account in accordance with the above before proceeding to the next steps.

Enabling SuiteTax

1. Go to Setup > Site Builder > Set Up Web Site
2. Inactivate all listed websites if they are not compatible with SuiteTax. Otherwise, you cannot enable the SuiteTax feature
 1. Click **Edit** next to Website
 2. Check the **Inactive** box

3. Click **Save**
3. Go to Setup > Company > Enable Features. Then, click the **Tax** subtab
4. Check the **SuiteTax** box

You might get an alert saying "You cannot enable SuiteTax if you have an active SiteBuilder site that displays prices. For more information, see *Known Limitations of SuiteTax in the Help Center*."

In case you have not inactivated any websites in step 2 because you don't have the page Setup > Site Builder > Set Up Web Site, then please follow the steps marked Optional below:

1. Optional - On the **Enable Features** page, go to the **Web Presence** subtab.
2. Optional - Check the **Website** box and click **Submit**.
3. Optional - Go to Setup > Site Builder > Set Up Web. Note: If you still don't have access to this page, then log out and log in again.
4. Optional - Inactivate all listed web sites as described in steps 2a - 2c.
5. Return to the **Enable Features** page, then to the **Web Presence** subtab.
6. Uncheck the **Website** box.
7. Click on the **Tax** subtab and check the **SuiteTax** box.
5. Click on the **Items & Inventory** subtab and check the **Drop Shipments & Special Orders** box.
6. Click on the **SuiteCloud** subtab and enable the following features:
 - Custom Records
 - Client SuiteScript
 - Server SuiteScript.
7. Click **Submit**
The migration process starts in the background. It can take from a few minutes for empty accounts to a few hours for accounts with large numbers of transactions/entities.
8. Using an Administrator role, Go to Setup > Tax > SuiteTax Migration.
9. Once the migration has finished, click the **Confirm SuiteTax Setup** button.

SuiteTax Bundles Installation

1. Go to Customization > SuiteBundler > Search & Install Bundles
2. Find and install these bundles in the following order:
 1. SuiteTax Engine 237702
 2. SuiteTax Data Records 239499
 3. Tax Reporting Framework 237699
3. Go to Customization > Plug-ins > Manage Plug-ins
4. Check the **SuiteTax Engine** box
5. Click **Submit**

Bundle or SuiteApp installation

Once the SuiteTax feature is configured, please install your bundle or SuiteApp and configure the account as needed.

SUITETAX COMPATIBILITY TESTING

Introduction

Due to the sheer number of bundles and SuiteApps, it is impossible for the ERP: Tax - Brno team to test the compatibility of all bundles and SuiteApps alone.

For this reason, all tests (SuiteTax test cases and bundle or SuiteApp specific tests) should be performed by the owners of the bundle or SuiteApp.

Bundles/SuiteApp Test Cases

Please perform sanity tests (manual or automated) on the main workflows of your bundle or SuiteApp to ensure they function as expected.

SuiteTax Compatibility Testing

There are currently two options to test compatibility with SuiteTax.

1. Using the [Manual Testing](#) guide, which walks you step-by-step through the account configuration and testing process.
2. Using the [SuiteTax Compatibility Testing Tool](#) which automates the account configuration and the majority of tests described in the [Manual Testing](#) guide.

We recommend you first try the **SuiteTax Compatibility Testing Tool**. In the unlikely event that the tool is unable to run tests, you can revert to manual testing.

Given that NetSuite is highly customizable, there is always a possibility that tests are failing due to some customization.

Test Results

When you finish testing, please send us email with test results as it is described in chapter [3 Give us feedback](#).

In case that your bundle, SuiteApp or feature is NOT compatible with SuiteTax and you know that other bundles, SuiteApp or features are dependent on it, please [contact us](#).

Manual Testing

Configuration

Before you can begin testing, please configure your account as described in [Basic SuiteTax Configuration](#).

SuiteTax Test Cases

The test cases below cover the main areas and workflows of SuiteTax.

1. [SuiteTax Engine Data Provisioning](#)
2. [Sales Tax Rates Update](#)
3. [Sales Transactions Lookup](#)
4. [Purchase Transactions Lookup](#)
5. [Sales Workflow](#)
6. [Tax Point Date Workflows](#)
7. [Tax Schedules Workflows](#)
8. [Non-taxability Rules](#)
9. [US Exemption Certificate](#)

Basic SuiteTax Configuration

SuiteTax configurations may vary depending on how your test or sandbox account is set up. The following instructions show how to create records in an empty account.

If your account already has some of these records, you don't need to create new ones, just check that the configuration is as described below:

Nexus Configuration

To create U.S. nexuses:

1. Go to Setup > Tax > Nexuses > New and configure as follows:
 - **Country** = United States
 - **State/Province/County** = Hawaii
2. Click **Save**.

To create Canada nexuses:

1. Go to Setup > Tax > Nexuses > New and configure as follows:
 - **Country** = Canada
2. Click **Save**.
3. Go to Setup > Tax > Nexuses > New and configure as follows:
 - **Country** = Canada
 - **State/Province/County** = Manitoba
 - **Parent Nexus** = Canada
4. Click **Save**.

To create VAT nexuses:

1. Go to Setup > Tax > Nexuses > New and configure as follows:
 - **Country** = Czech Republic
2. Click **Save**.

Subsidiary Configuration

For configuration purposes, we require at least one U.S. subsidiary. All SuiteTax test cases take this into consideration. The U.S. subsidiary will be referred to as 'US Subsidiary'.

One World accounts

Configure the SuiteTax Engine on each subsidiary as described in the steps below:

1. Go to Setup > Company > Subsidiaries.
2. Click the **Edit** link next to the subsidiary.
3. On the subsidiary record, click the **Tax Registrations** subtab.
4. Add a tax registration for the U.S. nexus:
 - **Country** = United States
 - **Nexus** = United States - Hawaii
 - **Tax Reg. Number** = US-HI-123456
 - **Tax Engine** = SuiteTax Engine
 - **Effective From** = <Any Date>, see [note 1](#)
5. Click **Add**.
6. Add a tax registration for the Canada nexus:
 - **Country** = Canada
 - **Nexus** = Canada - Manitoba
 - **Tax Reg. Number** = CA-MA-123456
 - **Tax Engine** = SuiteTax Engine
 - **Effective From** = <Any Date>, see [note 1](#)
7. Click **Add**.
8. Add a tax registration for the CZ nexus:
 - **Country** = Czech Republic
 - **Nexus** = Czech Republic
 - **Tax Reg. Number** = CZ-123456

- **Tax Engine** = SuiteTax Engine
- **Effective From** = <Any Date>, see [note 1](#)
- 9. Click **Add**.
- 10. In case you already have some nexus(es) without a tax engine on the subsidiary record:
 1. Click the **Tax Engine** column for the tax registration line that you want to edit
 2. Click the **Tax Engine** dropdown list and select a tax engine for the nexus
 3. Set **Effective From**
 4. Click **OK**
 5. Repeat Steps a. through d. for each tax registration without a tax engine on the subsidiary record
- 11. Click **Save**. The data provisioning is started in the background. Provisioning takes a few minutes for VAT countries and smaller U.S. states, but can take up to an hour for larger U.S. states

Single Instance accounts

1. Go Setup > Company > Company Information
2. On the company record, click the **Tax Registrations** subtab
3. Add a tax registration for the U.S. nexus:
 - **Country** = United States
 - **Nexus** = United States - Hawaii
 - **Tax Reg. Number** = US-HI-123456
 - **Tax Engine** = SuiteTax Engine
 - **Effective From** = <Any Date> see [note 1](#)
4. Click **Add**.
5. Add a tax registration for the Canada nexus:
 - **Country** = Canada
 - **Nexus** = Canada - Manitoba
 - **Tax Reg. Number** = CA-MA-123456
 - **Tax Engine** = SuiteTax Engine
 - **Effective From** = <Any Date>, see [note 1](#)
6. Click **Add**.
7. Add a tax registration for the CZ nexus:
 - **Country** = Czech Republic
 - **Nexus** = Czech Republic
 - **Tax Reg. Number** = CZ-123456
 - **Tax Engine** = SuiteTax Engine
 - **Effective From** = <Any Date>, see [note 1](#)
8. Click **Add**.
9. In case you already have some nexus(es) without a tax engine on the company record:
 1. Click the **Tax Engine** column for the tax registration line that you want to edit
 2. Click the **Tax Engine** dropdown list and select a tax engine for the nexus
 3. Set **Effective From**
 4. Click **OK**
 5. Repeat Steps a. through d. for each tax registration without a tax engine on the company record
10. Click **Save**.
11. Go to Setup > SuiteTax Engine > Tax Engine Data Provisioning
Note: you should see a list of nexuses which have been configured in the previous steps
12. Mark all the listed nexuses
13. Click **Run Data Provisioning** and the data provisioning is started in the background. The provisioning takes a few minutes for VAT countries and smaller U.S. states, but can take up to an hour for larger U.S. states

note 1: You won't be able to create or edit a transaction if the transaction date does not belong to any tax registration validity range.

Location Configuration

To create a U.S. location:

1. Go to Setup > Company > Locations > New. Complete as follows:
 - **Name** = Test Location US-HI
 - **Subsidiary** = US Subsidiary
 - Edit the **Address** field as follows:

- **Country** = United States
 - **State** = Hawaii
 - Click **Ok**
2. Click **Save**

To create a CA location:

1. Go to Setup > Company > Locations > New and fill it out as follows:
 - **Name** = Location CA-MA
 - **Subsidiary** = US Subsidiary
 - Edit the **Address** field as follows:
 - **Country** = Canada
 - **State** = Manitoba
 - Click **Ok**
2. Click **Save**

To create a CZ location:

1. Go to Setup > Company > Locations > New and fill it out as follows:
 - **Name** = Test Location CZ
 - **Subsidiary** = US Subsidiary
 - Edit the **Address** field and change the **Country** to the Czech Republic
2. Click **Save**

Items Configuration

To create a non-inventory item 1:

1. Go to Lists > Accounting > Items > New > Non-inventory Item > For Resale
2. Enter 'Test Non-inventory item 1' as **Item Name/Number**
3. Check the **Include Children** box
4. On the **Purchasing** subtab, enter 100 as **Purchase Price**
5. On the **Sales/Pricing** subtab, enter 200 as **Base Price** on every **Currency** subtab
6. Click **Save**

To create a non-inventory item 2:

1. Go to Lists > Accounting > Items > New > Non-inventory Item > For Resale
2. Enter 'Test Non-inventory item 2' as **Item Name/Number**
3. Check the **Include Children** box
4. On the **Purchasing** subtab, enter 100 as **Purchase Price**
5. On the **Sales/Pricing** subtab, enter 200 as **Base Price** on every **Currency** subtab
6. Click **Save**

To create a service item:

1. Go to Lists > Accounting > Items > New > Service Item > For Resale
2. Enter 'Test Service item 1' as **Item Name/Number**
3. Check the **Include Children** box
4. On the **Purchasing** subtab, enter 10 as **Purchase Price**
5. On the **Sales/Pricing** subtab, enter 20 as **Base Price** on every **Currency** subtab
6. Click **Save**

To create an expense category:

1. Go to Setup > Accounting > Expense Categories > New and enter 'Test Category 1' as **Name**
2. Click **Save**

Shipping/Handling Configuration

To enable Shipping/Handling:

1. Go to Setup > Accounting > Shipping
2. Check the **Charge for Shipping** box
3. Check the **Charge Handling Separate from Shipping** box
4. Click **Save**

To create a shipping method for a parent subsidiary:

1. Go to Lists > Accounting > Shipping Items > New
2. Enter 'Test Shipping Method (US sub) 1' in the **Ship Name** field
3. Enter 'Test Shipping Method (US sub) 1' in the **Display Name/Code** field
4. Click the **Subsidiaries** dropdown list and select the 'US Subsidiary'
5. Go to the **Shipping Rate** subtab
6. Click the **Account (shipping)** dropdown list and select any account
7. Check the **Flat Rate** box and enter 17
8. Go to the **Handling Rate** subtab
9. Click the **Account (handling)** dropdown list and select any account
10. Check the **Handling--Flat Rate** box and enter 13
11. Click **Save**.

Vendor Configuration

To create a US vendor:

1. Go to Lists > Relationships > Vendors > New and fill it out as follows:
 - **Company Name** = Test Vendor US 1
 - **Primary Subsidiary** = US Subsidiary
2. Go to the **Address** subtab and add address:
 - **Country** = United States
 - **City** = Ewa Beach
 - **State** = Hawaii
 - **ZIP** = 96706
 - Click **OK**
3. Click **Save**

To create a Canada vendor:

1. Go to Lists > Relationships > Vendors > New and fill it out as follows:
 - **Company Name** = Test Vendor CA 1
 - **Primary Subsidiary** = US Subsidiary
2. Go to the **Address** subtab and add address:
 - **Country** = Canada
 - **State** = Manitoba
 - **ZIP** = R7A 1G7
 - Click **OK**
3. Click **Save**

To create a CZ vendor:

1. Go to Lists > Relationships > Vendors > New and fill it out as follows:
 - **Company Name** = Test Vendor CZ 1
 - **Primary Subsidiary** = US Subsidiary
2. Go to the **Address** subtab and add address:
 - **Country** = Czech Republic
 - Click **OK**.
3. Go to the **Financial** subtab > **Tax Registrations** tab and add one tax registration:
 - **Country** = Czech Republic
 - **Nexus** = Czech Republic

- **Tax Reg. Number** = Vend-CZ-123456
 - **Default Tax Code/Group** = CZ_RR
 - Click **Add**.
4. Click **Save**.

Customer Configuration

To create a U.S. customer:

1. Go to Lists > Relationships > Customers > New and fill it out as follows:
 - **Company Name** = Test Customer US 1
 - **Primary Subsidiary** = US Subsidiary
2. Go to the **Address** subtab and add address:
 - **Country** = United States
 - **Address 1** = Hoio St
 - **City** = Aiea
 - **State** = Hawaii
 - **ZIP** = 96701
3. Go to the **Financial** subtab > **Tax Registrations** tab and add one tax registration:
 - **Country** = United States
 - **State** = Hawaii
 - **Nexus** = United States - Hawaii
 - **Tax Reg. Number** = Cust-US-HI-123456
 - **Default Tax Code/Group** = <Select any Tax Group>, Note: Tax Group names looks as follows: US0100300000
4. Click **Save**.

To create a Canada customer:

1. Go to Lists > Relationships > Customers > New and fill it out as follows:
 - **Company Name** = Test Customer CA 1
 - **Primary Subsidiary** = US Subsidiary
2. Go to the **Address** subtab and add address:
 - **Country** = Canada
 - **Address 1** = Sauger Crescent 7
 - **City** = Thomson
 - **State** = Manitoba
 - **ZIP** = R8N 1B5
3. Click **Save**.

To create a CZ customer:

1. Go to Lists > Relationships > Customers > New and fill it out as follows:
 - **Company Name** = 'Test Customer CZ 1
 - **Primary Subsidiary** = US Subsidiary
2. Go to the **Address** subtab and add address:
 - **Country** = Czech Republic
 - **Address 1** = Kounicova 10
 - **City** = Brno
 - **ZIP** = 63500
3. Go to the **Financial** subtab > **Tax Registrations** tab and add one tax registration:
 - **Country** = Czech Republic
 - **Nexus** = Czech Republic
 - **Tax Reg. Number** = Cust-CZ-123456
 - **Default Tax Code/Group** = CZ_RR
4. Select 'CZ-123456' as **Default Tax Reg**.
5. Click **Save**.

SuiteTax Engine Data Provisioning

Introduction

The test cases below expect that you have added the tax registrations for US Hawaii, Canada Manitoba and Czech Republic nexuses in the **US Subsidiary** record, and the account is configured as described in [Test Environment & SuiteTax Configuration](#). The purpose of these test cases is to ensure that all necessary records are provisioned by the engine.

Test Case: Data Provisioning for the United States

- Go to Lists > Accounting > Accounts → Verify that two accounts are created for Hawaii:
 - Sales Tax Payable Hawaii
 - Sales Tax Expense Hawaii
- Go to Lists > Relationships > Vendors → Verify that the tax agency 'Hawaii Department of Revenue' is created
- Go to Setup > Tax > Nexuses. Find and open the 'United States - Hawaii' nexus → Verify that the **Tax Agency** field is set to 'Hawaii Department of Revenue'
- Go to Setup > Tax > Tax Types. Under **Filters**, set the **Country** field to 'United States' and open the US_NL tax type → Under the **Accounts** subtab, verify that the account line is added for the 'United States - Hawaii' nexus and the following columns are configured as follows:
 - Payables Account** = Sales Tax Payable Hawaii
 - Receivables Account** = Sales Tax Expense Hawaii
- Go to Setup > Tax > Tax Codes. Under **Filters**, set the **Country** field to 'United States' and order the tax codes by clicking the **STE TAX STATE** list → Verify that US tax codes are created (US Hawaii tax codes starts with 'US_HI_*')
- Go to Setup > SuiteTax Engine > Tax Groups. Under **Filters**, set the **Country** field to 'United States' and order the tax groups by clicking the **Nexus** list → Verify that 'United States - Hawaii' tax groups are created. Note: US Hawaii has only a few tax groups - approx. 6, but for example Alabama has more than 1000 tax groups

Test Case: Data Provisioning for Canada

- Go to Lists > Accounting > Accounts → Verify that six accounts are created for Canada:
 - Tax on Sales Canada
 - Tax on Sales Canada - Manitoba
 - Tax on Purchases Canada
 - Tax on Purchases Canada - Manitoba
 - Tax Liability Canada
 - Tax Liability Canada - Manitoba
- Go to Lists > Relationships > Vendors → Verify that the tax agencies 'Canada Revenue Agency' and 'Manitoba Finance' are created
- Go to Setup > Tax > Nexuses. Find and open the 'Canada - Manitoba' nexus → Verify that the **Tax Agency** field is set to 'Manitoba Finance'
- Go to Setup > Tax > Tax Types. Under **Filters**, set the **Country** field to 'Canada' and open the CA_RST tax type. → Under the **Accounts** subtab, verify that the account line is added for the 'Canada - Manitoba' nexus and the following two columns are configured as follows:
 - Payables Account** = Tax on Sales Canada - Manitoba
 - Receivables Account** = Tax on Purchases Canada - Manitoba
 - Note: CA_RST tax type is provisioned only for British Columbia, Manitoba and Saskatchewan. For other provinces, please choose CA_HST tax type
- Go to Setup > Tax > Tax Codes. Under **Filters**, set the **Country** field to 'Canada' → Verify that CA tax codes are created (e.g. CA_MB_RST and CA_GST)
- Go to Setup > SuiteTax Engine > Tax Groups. Under **Filters**, set the **Country** field to 'Canada' and order the tax groups by clicking the **Nexus** list → Verify that 'Canada - Manitoba' tax groups are created - currently there are two tax groups - CA_MB_GST/RST, CA_MB_GST/RST_RC
 - Note: Tax Groups records are created only for these provinces: British Columbia, Manitoba, Quebec, and Saskatchewan

Test Case: Data Provisioning for the Czech Republic

- Go to Lists > Accounting > Accounts → Verify that three accounts are created for the Czech Republic:
 - Tax on Sales Czech Republic
 - Tax on Purchases Czech Republic

- Tax Liability Czech Republic
2. Go to Lists > Relationships > Vendors → Verify that the tax agency 'Ministerstvo financí' is created
 3. Go to Setup > Tax > Nexuses. Find and open the 'Czech Republic' nexus → Verify that the **Tax Agency** field is set to 'Ministerstvo financí'
 4. Go to Setup > Tax > Tax Types. Under the **Filters**, set the **Country** field to 'Czech Republic' → Verify that three tax types are created:
 - VAT_CZ
 - VAT_CZ_RC
 - VAT_CZ_RCS
 5. Open the VAT_CZ tax type → Under the **Accounts** subtab, verify that the account line is added for the nexus 'Czech Republic' with the following two columns configured as follows:
 - Payables Account = Tax on Sales Czech Republic
 - Receivables Account = Tax on Purchases Czech Republic
 6. Go to Setup > Tax > Tax Codes. Under **Filters**, set the **Country** field to 'Czech Republic' and order the tax codes by clicking the **STE TAX STATE** list → Verify that CZ tax codes are created (e.g. CZ_SR and CZ_RR)

Sales Tax Rates Update

Introduction

Sales tax rates update normally runs automatically. However, for the testing purpose, the update has to be triggered manually as described in the steps below.

Test Case: Sales Tax Rates Update for the United States, Canada and the Czech Republic

To change the tax rate for one of CZ, US and CA tax codes:

1. Go to Customization > Lists, Records, & Fields > Record Types
2. Under **Filters**, select 237702 in the **From Bundle** field
3. Find the custom record 'STE Tax Code Rate' and click the **List** button
4. Order the **Tax Code** column by clicking the **STE Tax Code Rate** list
5. Find and edit a valid **STE Tax Code Rate** record for the CZ_SR tax code. Note: a valid tax code rate has the **Valid Until** field empty or the field value is greater than the current date
6. Fill in the current value for the CZ_SR tax code in the **Tax Rate** field
7. Change the **Tax Rate** field to 0.30 and click the **Save** button
8. Find and edit a valid STE Tax Code Rate record for the US_HI_STATE_SALES_1 tax code. Note: a valid tax code rate has the **Valid Until** field empty or the field value is greater than the current date
9. Fill in the current value for the US_HI_STATE_SALES_1 tax code in the **Tax Rate** field
10. Change the **Tax Rate** field to 0.30 and click the **Save** button
11. Find and edit a valid STE Tax Code Rate record for the CA_MB_RST tax code. Note: a valid tax code rate has the **Valid Until** field empty or the field value is greater than the current date
12. Fill in the current value for the CA_MB_RST tax code in the **Tax Rate** field
13. Change the **Tax Rate** field to 0.30 and click the **Save** button
14. Go to Setup > Tax > Tax Codes
15. Under **Filters**, set the **Country** field to 'Czech Republic'
16. Find the CZ_SR tax code and open it on a separate browser tab
17. Ensure that the **Tax Rate** field is 30 %. If not, probably an incorrect STE Tax Code Rate record was edited in step #7
18. Go to Setup > Tax > Tax Codes
19. Under **Filters**, set the **Country** field to 'United States'
20. Find the US_HI_STATE_SALES_1 tax code and open it on a separate browser tab
21. Ensure that the **Tax Rate** field is 30 % If not, probably an incorrect STE Tax Code Rate record was edited in step #10
22. Find the CA_MB_RST tax code and open it on a separate browser tab
23. Ensure that the **Tax Rate** field is 30 %. If not, probably an incorrect STE Tax Code Rate record was edited in step #13

To run the Sales Tax Rates Update manually:

1. Go to Customization > Scripting > Script Deployments
2. Under **Filters**, set the **Type** field to 'Map/Reduce' and the **Script** field to 'STE MR Data Update'
3. Edit the deployment 'customdeploy_ste_data_update'
4. Click the **Save and Execute** button. You will be redirected to the page 'Map/Reduce Script Status'. Please wait until the script is finished
5. **Note:** The update takes a few minutes for VAT countries and small US states, but it can take up to an hour for big US states
6. Stay on the page 'Map/Reduce Script Status'. Change the filter as follows:
7. **Script** = STE MR Data Provisioning
8. **Deployment ID** = All
9. **Status** = Unfinished
10. Wait until the 'STE MR Data Provisioning' script is finished
11. Open a browser tab with the tax code CZ_SR and refresh the page → **Verify that tax rate is changed back to the original value**
12. Open a browser tab with the tax code US_HI_STATE_SALES_1 and refresh the page → **Verify that tax rate is changed back to the original value**
13. Open a browser tab with the tax code CA_MB_RST and refresh the page → **Verify that tax rate is changed back to the original value**

Sales Transactions Lookup

Introduction

The test cases below only test three types of sales transactions (Sales Order, Invoice, Cash Sale). If your bundle/SuiteApp also customizes different sales transactions, you should consider testing them as well.

US Transaction

Test Case: Create/edit a Sales Order

- Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - Customer** = Test Customer US 1 → Under the **Tax Details** subtab, verify that the **Nexus** field is 'United States - Hawaii' (see the [Help Center](#)) and the **Subsidiary Tax Reg. Number** field is 'US-HI-123456 (...)'
 - Under the **Items** subtab, add one item 'Test Non-inventory item 1'
 - Go to the **Shipping** subtab and set:
 - Shipping Carrier** = More
 - Shipping Method** = Test Shipping Method (US sub) 1
- Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined:
 - Go to the **Shipping** subtab and check that **Shipping Tax Amount** and **Handling Tax Amount** are calculated
 - Go to the **Tax Details** subtab
 - Nexus** is 'United States - Hawaii'. See the [Help Center](#)
 - Subsidiary Tax Reg. Number** is 'US-HI-123456 (...)'
 - Customer Tax Reg. Number** is empty
 - Tax Point Date** is the same as the **Date** field
 - Check the **Taxes** list. It should contain 6 tax lines in total. Per each line type (item, shipping and handling), there are two tax lines with a different tax type (US_COUNTY_USE, US_STATE_USE)
 - Note: Count of tax lines can differ for different US states/Ship To address

TAX DETAILS REFERENCE*	LINE TYPE	NAME	NET AMOUNT	TAX TYPE*	TAX CODE*	TAX BASIS*	TAX RATE*	TAX AMOUNT*	DETAILS
NEW1	Item	Test Non-inventory item 1	200.00	US_COUNTY_USE	US_HI_HONOLULU_COUNTY_COUNTY_USE_1	200.00	0.50	1.00	
NEW1	Item	Test Non-inventory item 1	200.00	US_STATE_USE	US_HI_STATE_USE_1	200.00	4.00	8.00	
SHIPPING	Shipping	Test Shipping Method (US sub) 1, Shipping Cost	17.00	US_COUNTY_USE	US_HI_HONOLULU_COUNTY_COUNTY_USE_1	17.00	0.50	0.09	
SHIPPING	Shipping	Test Shipping Method (US sub) 1, Shipping Cost	17.00	US_STATE_USE	US_HI_STATE_USE_1	17.00	4.00	0.68	
HANDLING	Handling	Test Shipping Method (US sub) 1, Handling Cost	13.00	US_COUNTY_USE	US_HI_HONOLULU_COUNTY_COUNTY_USE_1	13.00	0.50	0.07	
HANDLING	Handling	Test Shipping Method (US sub) 1, Handling Cost	13.00	US_STATE_USE	US_HI_STATE_USE_1	13.00	4.00	0.52	

- Check that all the tax types listed in the **Taxes** list under the **Tax Details** subtab are added to the **Summary Box**

Summary	
SUBTOTAL	200.00
DISCOUNT ITEM	0.00
TAX TOTAL	10.36
US_STATE_USE	9.20
US_COUNTY_USE	1.16
SHIPPING COST	17.00
HANDLING COST	13.00
TOTAL	240.36

- Click the **Edit** button and go to the **Items** subtab
- Change the **Quantity** of 'Test Non-inventory item 1' to 2 → Verify that the taxes are invalidated:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are 0.00

- Go to the **Tax Details** subtab, verify that only the **Tax Point Date** field and the **Taxes** list are empty. The **Nexus** and the **Subsidiary Tax Reg. Number** fields are unchanged
 - All the tax type lines are removed from the **Summary Box** and the **Tax Total** is 0.00
5. Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined (see step #2) and the tax amounts are doubled on the **Tax Details** subtab
 6. Go to the **Tax Details** subtab and make a screenshot of the transaction
 7. Click the **Edit** button
 8. Click the **Save** button (without any modification of the transaction) → Verify that the transaction is successfully saved. Go to the **Tax Details** subtab and verify that no field value is changed (compare it with the screenshot created in step #6)

Test Case: Create/edit a Sales Order with the Preview Tax button verification

1. Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - **Customer** = Test Customer US 1 → Under the **Tax Details** subtab, verify that the **Nexus** field is 'United States - Hawaii' (see the [Help Center](#)) and the **Subsidiary Tax Reg. Number** field is 'US-HI-123456 (...)'
 - Under the **Items** subtab, add one item 'Test Non-inventory item 1'
 - Go to the **Shipping** subtab and set:
 - **Shipping Carrier** = More
 - **Shipping Method** = Test Shipping Method (US sub) 1
2. Click the **Preview Tax** button → Verify that the nexus and taxes are determined:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are calculated
 - Go to the **Tax Details** subtab
 - **Nexus** is 'United States - Hawaii'. See the [Help Center](#)
 - **Subsidiary Tax Reg. Number** is 'US-HI-123456 (...)'
 - **Customer Tax Reg. Number** is empty
 - **Tax Point Date** is same as the **Date** field
 - Check the **Taxes** list. It should contain 6 tax lines in total. Per each line type (item, shipping and handling), there are two tax lines with a different tax type (US_COUNTY_USE, US_STATE_USE)
 - Note: Count of tax lines can differ for different US states/Ship To address

TAX DETAILS REFERENCE	LINE TYPE	NAME	NET AMOUNT	TAX TYPE	TAX CODE	TAX BASIS	TAX RATE	TAX AMOUNT	DETAILS

- Check that all the tax types listed in the **Taxes** list under the **Tax Details** subtab are added to the **Summary Box**

Summary	
SUBTOTAL	200.00
DISCOUNT ITEM	0.00
TAX TOTAL	10.36
US_STATE_USE	9.20
US_COUNTY_USE	1.16
SHIPPING COST	17.00
HANDLING COST	13.00
TOTAL	240.36

3. Click the **Save** button → Verify that the transaction is successfully saved

4. Click the **Edit** button and go to the **Tax Details** subtab
5. Click the Customer Tax Reg. Number dropdown list and select 'Cust-US-HI-123456' → Verify that the taxes are invalidated:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are 0.00
 - Go to the **Tax Details** subtab, verify that only the **Tax Point Date** field and the **Taxes** list are empty. The **Nexus** and the **Subsidiary Tax Reg. Number** fields are unchanged
 - All tax type lines are removed from the **Summary Box** and the **Tax Total** is 0.00
6. Click the **Preview Tax** button → Verify that the nexus and taxes are determined:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are calculated
 - Go to the **Tax Details** subtab
 - **Nexus** is 'United States - Hawaii'. See the [Help Center](#)
 - **Subsidiary Tax Reg. Number** is 'US-HI-123456 (...)'
 - **Customer Tax Reg. Number** is empty
 - **Tax Point Date** is same as the **Date** field
 - Check that the **Taxes** list contains different tax lines than in step #2 (tax group is used for selected customer's registration)

Canada Transaction

Test Case: Create/edit an Invoice

1. Go to Transactions > Sales > Create Invoices and fill it in as follows:
 - **Customer** = Test Customer CA 1
 - **Location** = Test Location US, note: Location (= Shipping From) affects nexus determination. The tax transaction type is domestic sales for US location and Canada shipping address. → **Under the Tax**

Details subtab, verify that the **Nexus** field is 'Canada - Manitoba' (see the [Help Center](#)) and the **Subsidiary Tax Reg. Number** field is 'CA-MA-123456 (...)'

- Under the **Items** subtab, add one item 'Test Non-inventory item 1'
- Go to the **Shipping** subtab and set:
 - **Shipping Carrier** = More
 - **Shipping Method** = Test Shipping Method (US sub) 1
- 2. Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are calculated
 - Go to the **Tax Details** subtab
 - **Nexus** is 'Canada - Manitoba'. See the [Help Center](#)
 - **Tax Transaction Type** is 'Domestic Sales'
 - **Subsidiary Tax Reg. Number** is 'CA-MA-123456 (...)'
 - **Customer Tax Reg. Number** is empty
 - **Tax Point Date** is the same as the **Date** field
 - Check the **Taxes** list. It should contain 6 tax lines in total. Per each line type (item, shipping and handling), there are two tax lines with a different tax type (CA_GST, CA_RST)
 - Note: Count of tax lines can differ for different Canada provinces/Ship To address

- Change the **Quantity** field of 'Test Non-inventory item 1' to 2 → Verify that the taxes are invalidated:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are 0.00
 - Go to the **Tax Details** subtab, verify that only the **Tax Point Date** field and the **Taxes** list are empty. The **Nexus** and the **Subsidiary Tax Reg. Number** fields are unchanged
 - All the tax type lines are removed from the **Summary Box** and the **Tax Total** is 0.00
- Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined (see step #2) and the tax amounts are doubled for 'Test Non-inventory item 1' on the **Tax Details** subtab
- Go to the **Tax Details** subtab and make a screenshot of the transaction
- Click the **Edit** button

8. Click the **Save** button (without any modification of the transaction) → Verify that the transaction is successfully saved. Go to the **Tax Details** subtab and verify that no field value is changed (compare it with the screenshot created in step #6)

Purchase Transactions Lookup

Introduction

The test cases below only test two types of purchase transactions (Purchase Order, Vendor Return Authorization). If your bundle/SuiteApp also customizes different purchase transactions, you should consider testing them as well.

Please notice that the current version of SuiteTax Engine does not support taxes on US purchases. If you bundle/SuiteApp has a customization for US purchases, please [contact us](#).

Canada Transaction

Test Case: Create/edit a Purchase Order

- Go to Transactions > Purchases > Enter Purchase Orders and fill in it as follows:
 - Vendor** = Test Vendor CA 1
 - Location** = Test Location CA-MA → Under the **Tax Details** subtab, verify that the **Nexus** field is 'Canada - Manitoba' (see the [Help Center](#)) and the **Subsidiary Tax Reg. Number** field is 'CA-MA-123456 (...)'
 - Under the **Items** subtab, add one item 'Test Non-inventory item 1'
- Click the **Save** button → Verify that the transaction is successfully saved, nexus and taxes are determined as follows:
 - Go to the **Tax Details** subtab
 - Nexus** is 'Canada - Manitoba'. See the [Help Center](#)
 - Tax Transaction Type** is Domestic Purchases
 - Subsidiary Tax Reg. Number** is 'CA-MA-123456 (...)'
 - Vendor Tax Reg. Number** is empty
 - Tax Point Date** is the same as the **Date** field
 - Check the **Taxes** list. It should contain two tax lines for the 'Test Non-inventory item 1' item. One line with **Tax Code** = CA_GST, and the second one with **Tax Code** = CA_MB_RST_NC
 - Note: Count of tax lines can differ for different Canada provinces/Ship To address

TAX DETAILS REFERENCE *	LINE TYPE	NAME	NET AMOUNT	TAX TYPE *	TAX CODE *	TAX BASIS *	TAX RATE *	TAX AMOUNT *	DETAILS
3903_1	Item	Test Non-inventory item 1	100.00	CA_GST	CA_GST	100.00	5.0%	5.00	
3903_1	Item	Test Non-inventory item 1	100.00	CA_RST_NC	CA_MB_RST_NC	100.00	7.0%	7.00	

- Check that all tax types listed in the **Taxes** list under the **Tax Details** subtab are added to the **Summary Box**
-
- | Summary | |
|-----------|--------|
| SUBTOTAL | 100.00 |
| TAX TOTAL | 12.00 |
| CA_GST | 5.00 |
| CA_RST_NC | 7.00 |
| TOTAL | 112.00 |
- Click the **Edit** button and go to the **Items** subtab
 - Change **Quantity** of 'Test Non-inventory item 1' to 2 → Verify that taxes are invalidated:
 - Under the **Tax Details** subtab, verify that only the **Tax Point Date** field and the **Taxes** list are empty. The **Nexus** and the **Subsidiary Tax Reg. Number** fields are unchanged
 - All tax type lines are removed from the **Summary Box** and **Tax Total** is 0.00
 - Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined (see step #2) and tax amounts are doubled on the **Tax Details** subtab
 - Go to the **Tax Details** subtab and make a screenshot of the transaction
 - Click the **Edit** button

8. Click the **Save** button (without any modification of the transaction) → Verify that the transaction is successfully saved. Go to the **Tax Details** subtab and verify that no field value is changed (compare it with the screenshot created in step #6)

Test Case: Create/edit a Purchase Order with the Preview Tax button verification

1. Go to Transactions > Purchases > Enter Purchase Orders and fill in it as follows:
 - **Vendor** = Test Vendor CA 1
 - **Location** = Test Location CA-MA → Under the **Tax Details** subtab, verify that the **Nexus** field is 'Canada - Manitoba' (see the [Help Center](#)) and the **Subsidiary Tax Reg. Number** field is 'CA-MA-123456 (...)'
 - Under the **Items** subtab, add one item 'Test Non-inventory item 1'
2. Click the **Preview Tax** button → Verify that nexus and taxes are determined:
 - Go to the **Tax Details** subtab
 - **Nexus** is 'Canada - Manitoba'. See the [Help Center](#)
 - **Tax Transaction Type** is Domestic Purchases
 - **Subsidiary Tax Reg. Number** is 'CA-MA-123456 (...)'
 - **Vendor Tax Reg. Number** is empty
 - **Tax Point Date** is same as the **Date** field
 - Check the **Taxes** list. It should contain two tax lines of tax type CA_GST and CA_RST_NC
 - Note: Count of tax lines can differ for different Canada provinces/Ship To address

TAX DETAILS REFERENCE *	LINE TYPE	NAME	NET AMOUNT	TAX TYPE *	TAX CODE *	TAX BASIS *	TAX RATE *	TAX AMOUNT *	DETAILS
3903_1	Item	Test Non-inventory Item 1	100.00	CA_GST	CA_GST	100.00	5.0%	5.00	
3903_1	Item	Test Non-inventory Item 1	100.00	CA_RST_NC	CA_MB_RST_NC	100.00	7.0%	7.00	

- Check that all the tax types listed in the **Taxes** list under the **Tax Details** subtab are added to the **Summary Box**

Summary	
SUBTOTAL	100.00
TAX TOTAL	12.00
CA_GST	5.00
CA_RST_NC	7.00
TOTAL	112.00

3. Click the **Save** button → Verify that the transaction is successfully saved
4. Click the **Edit** button and go to the **Items** subtab
5. Change **Quantity** of 'Test Non-inventory item 1' to 2 → Verify that the taxes are invalidated:
 - Under the **Tax Details** subtab, verify that only the **Tax Point Date** field and the **Taxes** list are empty. The **Nexus** and the **Subsidiary Tax Reg. Number** fields are unchanged
 - All the tax type lines are removed from the **Summary Box** and **Tax Total** is 0.00
6. Click the **Preview Tax** button → Verify that the nexus and taxes are determined (see step #2) and tax amounts are doubled on the **Tax Details** subtab
7. Click the **Save** button → Verify that the transaction is successfully saved

VAT Transaction

Test Case: Create/edit a Vendor Return Authorization

1. Go to Transactions > Purchases > Enter Vendor Return Authorization and fill it in as follows:
 - **Vendor** = Test Vendor CZ 1
 - **Location** = Test Location CZ → Under the **Tax Details** subtab, verify that the **Nexus** field is 'Czech Republic' (see the [Help Center](#)) and the **Subsidiary Tax Reg. Number** field is 'CZ-123456 (...)'
 - Under the **Items** subtab, add one item 'Test Non-inventory item 1'

2. Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined:
 - Go to the **Tax Details** subtab
 - **Nexus** is 'Czech Republic'. See the [Help Center](#)
 - **Subsidiary Tax Reg. Number** is 'CZ-123456 (...)'
 - **Tax Point Date** is same as the **Date** field
 - Check that the **Taxes** list contains one tax line with **Tax Code** = CZ_SR
 - The **Tax** field (Main Header) is the same as the **Tax Amount** column for item 'Test Non-inventory item 1' under the **Tax Details** subtab

- Click the **Save** button → Verify that the transaction is successfully saved, nexus is determined (see step #2) on the **Tax Details** subtab

Sales Workflow

Prerequisites:

- Go to Transactions > Employees > Track Time and fill it in as follows:
 - Employee** = <Any employee under US subsidiary>
 - Duration** = 1:00
 - Customer** = Test Customer CA 1
 - Service Item** = Test Service item 1
 - Check the **Billable** box
 - Location** = Test Location CA-MA
- Click the **Save** button
- Go to Transactions > Payables > Enter Bills and fill it in as follows:
 - Vendor** = Test Vendor CA 1
 - Approval Status** = Approved
- Go to the **Expenses and Items** subtab > **Expenses** tab and add one expense. Configure the columns in the following way:
 - Category** = Test Category 1
 - Amount** = 80
 - Location** = Location CA-MA
 - Customer** = Test Customer CA 1
 - Click the **Add** button
- Go to **Expenses and Items** subtab > **Items** tab and add one item. Configure the columns in the following way:
 - Item** = Test Non-inventory item 2
 - Rate** = 200
 - Location** = Location CA-MA

- **Customer** = Test Customer CA 1
 - Click the **Add** button
6. Under the **Tax Details** subtab, check the **Nexus Override** box. The **Nexus** field is set to 'Canada - Manitoba'
 7. Click the **Save** button

Test Case: Sales Workflow

1. Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - **Customer** = Test Customer CA 1
 - **Location** = Test Location US-HI
 - Under the **Items** subtab
 - add three 'Test Non-inventory item 1' items
 - add three 'Test Non-inventory item 2' items
 - Go to the **Shipping** subtab and set the following:
 - **Shipping Carrier** = More
 - **Shipping Method** = Test Shipping Method (US sub) 1
2. Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined:
 - Go to the **Shipping** subtab and check that the **Shipping Tax Amount** field and the **Handling Tax Amount** field are calculated
 - Go to the **Tax Details** subtab
 - **Nexus** is 'Canada - Manitoba'
 - **Tax Transaction Type** is 'Domestic Sales'
 - **Subsidiary Tax Reg. Number** is 'CA-MA-123456 (...)'
 - **Customer Tax Reg. Number** is empty
 - **Tax Point Date** is the same as the **Date** field
 - Check the **Taxes** list. It should contain 8 tax lines in total. Per each line type (item, shipping and handling), there are two tax lines with different tax types (CA_GST, CA_RST)
 - Check that all the tax types listed in the **Taxes** list under the **Tax Details** subtab are added to the **Summary Box**

17. Click the **Accept Payment** button → a payment is opened
18. Under the **Apply** subtab, click the **Pay All** button and click the **Save** button → Verify that the transaction is successfully saved
19. Open the SO created in step #2 and click the **Authorize Return** button → Return Authorization is opened
20. Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined:
 - Go to the **Tax Details** subtab
 - Nexus is 'Canada - Manitoba'
 - Subsidiary Tax Reg. Number is 'CA-MA-123456 (...)'
 - Customer Tax Reg. Number is empty
 - Tax Point Date is the same as the **Date** field
 - Check the **Taxes** list. It should contain 4 tax lines in total. Per each item, there are two tax lines with different tax type (CA_GST, CA_RST)
 - Check that all the tax types listed in the **Taxes** list under the **Tax Details** subtab are added to the **Summary Box**

Tax Point Date Workflows

Test Case: Tax Point Date, nexus override, and nexus preference

1. Go to Setup > Tax > Nexuses and click the **Edit** button for the 'Canada - Manitoba' nexus
2. Check the **Use Fulfillment to Modify Tax Point Date** box
3. Click the **Save** button
4. Go to Setup > Tax > Nexuses and click the **View** button for the 'Czech Republic' nexus
5. Ensure that the **Use Fulfillment to Modify Tax Point Date** box is unchecked
6. Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - o **Customer** = 6 Test Customer CA 1
 - o **Status** = Pending Fulfillment
 - o **Date** = Today
 - o **Location** = Test Location CA
 - o Under the **Items** subtab, add one 'Test Non-inventory item 1' item
7. Click the **Save** button
8. Click the **Fulfill** button and fill it in as follows:
 - o **Date** = Tomorrow
 - o **Status** = Shipped
9. Click the **Save** button
10. Click the **Bill** button
11. Set the **Date** field to 'yesterday' and click the **Preview Tax** button → Under the **Tax Details** subtab, verify that the **Tax Point Date** field value is the same as the **Date** on the invoice (yesterday)
12. Set the **Date** field to the 'day after tomorrow' and click the **Preview Tax** button → Under the **Tax Details** subtab, verify that the **Tax Point Date** field value is the same as the fulfillment **Date** field (tomorrow)
13. Under the **Tax Details** subtab, check the **Nexus Override** box and set the **Nexus** field to Czech Republic
14. Click the **Preview Tax** button → Under the **Tax Details** subtab, verify that the **Tax Point Date** field value is the same as **Date** field on the invoice (the day after tomorrow)

Clean up

1. Go to Setup > Tax > Nexuses and click the **Edit** button for the 'Canada - Manitoba' nexus
2. Uncheck the **Use Fulfillment to Modify Tax Point Date** box
3. Click the **Save** button

Test Case: Tax Point Date and Tax Point Date Override fields on Journal transaction

1. Go to Transactions > Financial > Make Journal Entries and fill it in as follows:
 - o **Subsidiary** = US Subsidiary
 - o **Nexus** = Czech Republic
 - o **Date** = Today
 - o Check the **Override** box
 - o **Tax Point Date** = Yesterday
 - o Under the **Lines** subtab, add a line and configure its columns in the following way:
 - **Account** = <Any Account>
 - **Debit** = 100
 - **Tax Account** = Tax on Sales Czech Republic
 - **Tax Code** = CZ_SR
 - **Tax Rate** = 10%
 - **Debit Tax** = 10
 - o Under the **Lines** subtab, add a line and configure its columns in the following way:
 - **Account** = <Any Account>
 - **Credit** = 100
 - **Tax Account** = Tax on Sales Czech Republic
 - **Tax Code** = CZ_SR
 - **Tax Rate** = 10%
 - **Credit Tax** = 10
2. Click the **Save** button → Verify that the transaction is successfully saved. The Tax Point Date is set to 'yesterday'

Test Case: Tax Point Date and Tax Point Date Override fields on Expense Report transaction

1. Go to Transactions > Employees > Enter Expense Reports and fill it in as follows:
 - **Employee** = <Any Employee under US Subsidiary>
 - Under the **Expenses** subtab, add one expense and configure the columns in the following way:
 - **Category** = Test Category 1
 - **Amount** = 100
 - Click the **Add** button
2. Go to the **Tax Details** subtab → Verify that **Nexus**, **Tax Transaction Type** and **Tax Reg. Number** fields are visible
3. Set the **Nexus** field to United States - Hawaii → Verify that the **Tax Transaction Type** is hidden, and the **Tax Reg. Number** is determined as 'US-HW-123456 (...)'
4. Under the **Taxes** list, add one tax line and configure the columns in the following way:
 - **Tax Details Reference** = NEW1
 - **Tax Type** = US_STATE_SALES
 - **Tax Code** = <Any Tax Code>
 - **Tax Basis** = 100
 - **Tax Rate** = 10%
 - **Tax Amount** = 10
 - Click the **Add** button → Under the **Expenses** subtab, verify that **Tax Amount** is 10.00
5. Open your browser console and run the commands below:
 - `nlapiSetFieldValue('taxpointdateoverride', 'T')`
 - `nlapiSetFieldValue('taxpointdate', '<tomorrow date>'); e.g. '7/15/2020'`
6. Click the **Save** button → Verify that the transaction is successfully saved
7. Click the **Edit** button, then open your browser console and run the command: `nlapiGetFieldValue('taxpointdate');` → the **Date** set in step #5 is returned (tomorrow date)

Test Case: US Exemption Certificate and Tax Point Date

Tested here: [US Exemption Certificate](#)

Test Case: Non-taxability Rules and Tax Point Date

Tested here: [Non-taxability Rules](#)

Tax Schedules Workflows

Test Case: Tax Schedule for Canada transactions

- Go to Setup > SuiteTax Engine > Tax Schedules page and click the **New** button
- In the **Name** field, enter "Test Tax Schedule 1"
- Under the **Nexus** subtab, add a line with the two following columns:
 - Nexus** = Canada - Manitoba
 - Domestic Sales** = CA_NL
- Under the **Items** subtab, add the "Test Non-inventory item 1" item
- Click the **Save** button
- Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - Customer** = Test Customer CA 1
 - Under the **Items** subtab, add the "Test Non-inventory item 1" and "Test Non-inventory item 2" items.
 - Go to the **Shipping** subtab and set the following:
 - Shipping Carrier** = More
 - Shipping Method** = Test Shipping Method (US sub) 1
- Click the **Save** button → Verify that the transaction is successfully saved, the nexus and taxes are determined:
 - Go to the **Shipping** subtab and check that **Shipping Tax Amount** and **Handling Tax Amount** are calculated
 - Go to the **Tax Details** subtab
 - Nexus** is 'Canada - Manitoba'
 - Tax Transaction Type** is 'Domestic Sales'
 - Subsidiary Tax Reg. Number** is 'CA-MA-123456 (...)'
 - Customer Tax Reg. Number** is empty
 - Tax Point Date** is the same as the **Date** field
 - Under the **Taxes** subtab, ensure that there is only one tax line for the 'Test Non-inventory item 1' item with CA_NL tax code

Clean up

- Go to Setup > SuiteTax Engine > Tax Schedules page and click the **Edit** button next to 'Test Tax Schedule 1'
- Under the **Items** subtab, remove all items and click **Save**
- Click the **Edit** button next to 'Test Tax Schedule 1'
- Click the **Delete** button

Non-taxability Rules

Test Case: Non-Taxability Rules and Tax Point Date

- Go to Setup > SuiteTax Engine > Non-Taxability Rules. Click the **New Rule** button and fill it in as follows:
 - Country** = United States
 - Nexus** = United States - Hawaii
- Go to the **Items** subtab and check the **Validity Dates** box and set dates as follows:
 - Valid From** = <Today's date>
 - Valid Until** = <Tomorrow's date>
- Add item 'Test Non-inventory item 2' in the **Items** list
- Click the **Save** button
- Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - Customer** = Test Customer US 1
 - Under the **Items** subtab:
 - add one 'Test Non-inventory item 1' item
 - add one 'Test Non-inventory item 2' item
 - Go to the **Shipping** subtab and set:
 - Shipping Carrier** = More
 - Shipping Method** = Test Shipping Method (US sub) 1
- Click the **Preview Tax** button → Verify that the nexus and taxes are determined:
 - Go to the **Tax Details** subtab
 - Nexus** is 'United States - Hawaii'
 - Subsidiary Tax Reg. Number** is 'US-HI-123456 (...)'
 - Customer Tax Reg. Number** is empty
 - Tax Point Date** is the same as the **Date** field
 - Check the **Taxes** list:
 - The **Tax Amount** is 0.00 for 'Test Non-inventory item 2' due to the non-taxability rule
 - There are two tax lines with different tax types (US_COUNTY_USE, US_STATE_USE) for other items ('Test Non-inventory item 1', shipping and handling)
- Check the **Override** box and change the **Tax Point Date** field to yesterday
- Click the **Preview Tax** button → Verify that the nexus and taxes are determined:
 - Go to the **Tax Details** subtab
 - Nexus** is 'United States - Hawaii'
 - Subsidiary Tax Reg. Number** is 'US-HI-123456 (...)'
 - Customer Tax Reg. Number** is empty
 - Check the **Taxes** list. There should be two tax lines with different tax types (US_COUNTY_USE, US_STATE_USE) for every item ('Test Non-inventory item 1', 'Test Non-inventory item 2', shipping and handling)

 - Valid From** = <Today's date>
 - Valid Until** = <Tomorrow's date>
- Go to the **Items** subtab and uncheck the **Apply Exemption to All Items** box
- Add the item 'Test Non-inventory item 1' in the **Items** list
- Click the **Save** button
- Go to Transactions > Sales > Enter Sales Orders and fill it in as follows:
 - Customer** = Test Customer US 1
 - Under the **Items** subtab:
 - add one 'Test Non-inventory item 1' item
 - add one 'Test Non-inventory item 2' item
 - Go to the **Shipping** subtab and set the following:
 - Shipping Carrier** = More
 - Shipping Method** = Test Shipping Method (US sub) 1
- Click the **Preview Tax** button → Verify that the nexus and taxes are determined:
 - Go to the **Tax Details** subtab
 - Nexus** is 'United States - Hawaii'
 - Subsidiary Tax Reg. Number** is 'US-HI-123456 (...)'
 - Customer Tax Reg. Number** is empty
 - Tax Point Date** is the same as the **Date** field
 - Check the **Taxes** list:
 - The **Tax Amount** is 0.00 for 'Test Non-inventory item 1' due to the exemption certificate
 - There are two tax lines with different tax types (US_COUNTY_USE, US_STATE_USE) for other items ('Test Non-inventory item 2', shipping and handling)

Clean up

1. Go to Setup > SuiteTax Engine > US Exemption
2. Click the **Edit** button next to the created exemption certificate
3. Click the **Delete** button

SUITETAX COMPATIBILITY TESTING TOOL

Setup

The tool can only run on non-production accounts (e.g. sandbox, test drives) as it can alter the configuration of the account, which may cause issues if applied directly to production environments.

The tool can currently only be configured for U.S. subsidiaries. This limitation will be removed in the near future.

- **One World account without a U.S. subsidiary:** You must create a new U.S. subsidiary as described in Setup chapter below.
- **Single Instance account for non-U.S. countries:** Unfortunately, you won't be able to use the tool on such accounts. Please request a One World account or manually test for compatibility as per the [Manual Testing](#) guide.

We recommend to inactivate/uninstall all unnecessary customizations (SuiteScripts, workflows, bundles, SuiteApps etc.) as these customizations can cause test failures. If this is not possible and the tool is unable to run tests, then please test manually according to the [Manual Testing](#) guide.

Prerequisites

The account is already configured and all necessary bundles are installed as described in [2 Test Environment & SuiteTax Configuration](#).

Installation

1. Use a **non-production account**.
2. Go to SuiteApps.
3. Find and open the SuiteTax Compatibility Testing Tool.

4. Click **Install** and confirm the installation dialog.

Setup

Subsidiary

If your account contains a U.S. subsidiary, you may skip this configuration.

1. Go to Setup > Company > Subsidiaries > New and complete as follows:
 - Name = US Subsidiary
 - Country = United States
 - County/State/Province = <Any state>, e.g. Alaska
2. Click **Save**.

Shipping/Handling Configuration

To enable Shipping/Handling:

1. Go to Setup > Accounting > Shipping.
2. Check the **Charge for Shipping** box.
3. Check the **Charge Handling Separate from Shipping** box.
4. Click **Save**.

SuiteTax Compatibility Testing Tool Setup

1. Go to Setup > SuiteTax Compatibility Testing > Testing Manager
2. Click **Edit** and complete as follows:
 - Subsidiary = <US Subsidiary>, Note: The field is available only on One Word accounts
 - Check the **Ignore Mandatory Fields** box
3. Click **Save**.

When the field **Ignore Mandatory Fields** is checked, the tool will be able to save a record even when mandatory field(s) are not filled.

Testing

How to run tests

1. Go to Setup > SuiteTax Compatibility Testing > Testing Manager
2. Click **Run Tests**.

When testing begins, a new test run is created and listed in the **Test Runs** sublist. An info banner is displayed with the link to the Scheduled Script Status page where you can watch the testing progress.

Testing In Progress
Account testing is in progress.

Testing phases

Testing is split into three phases:

Configuration

The tool in this phase backs up subsidiary configuration, configures SuiteTax and creates all necessary records needed for the tests.

To see the phase status and log, go to Customization > Scripting > Scheduled Script Status page and filter as follows:

- Date = Today
- Script = SCTT Test Runner
- Deployment ID = CUSTOMDEPLOY_SCTT_SS_TEST_CONFIGURATOR
- Status = All
- API Version = All

Testing

In the testing phase, the tool runs all available tests sequentially. Additional records created by the tests are deleted upon completion.

To see the phase status and log, go to Customization > Scripting > Scheduled Script Status page and filter as follows:

- Date = Today
- Script = SCTT Test Runner
- Deployment ID = CUSTOMDEPLOY_SCTT_SS_TEST_RUNNER
- Status = All
- API Version = All

Cleaning

The last testing phase is cleaning. The tool deletes all records created during the configuration and restores the subsidiary to its original configuration.

Failing this phase does not influence the compatibility status in most cases.

To see the phase status and log, go to Customization > Scripting > Scheduled Script Status page and filter as follows:

- Date = Today
- Script = SCTT Test Runner
- Deployment ID = CUSTOMDEPLOY_SCTT_SS_TEST_CLEANER
- Status = All
- API Version = All

Test Run Statuses

Test runs have several statuses which can be monitored in the **Test Runs** subtab on the **Testing Manager** page.

- **Started:** the test configuration phase is scheduled but not yet started.
- **Configuration in progress:** account configuration is in progress.
- **Configuration finished:** account configuration finished successfully. The testing phase is queued to run next.
- **Configuration failed:** account configuration failed due to an unexpected error. Please open the log for details. The cleaning phase is queued to run next.
- **Testing in progress:** the testing phase is in progress. Tests are running sequentially.
- **Testing finished:** the testing phase finished successfully. The cleaning phase is queued to run next.
- **Testing failed:** The testing phase terminated prematurely due to an unexpected error. The cleaning phase is queued to run next.
- **Clean up in progress:** the cleaning phase is in progress.
- **Error:** The status of a test run is Error when an unexpected error occurs during any phase.
- **Done:** The status of a test run is Done when all testing phases have completed successfully.

Test Compatibility Results

You can check the status of a test run in the **Test Runs** subtab on Setup > SuiteTax Compatibility Testing > Testing Manager page. Click **Refresh** to ensure that all test run details are displayed.

When the account is compatible with the SuiteTax

The account is compatible with the SuiteTax when **all** tests passed without failures.

						09:45.299				

Account is compatible

Account is incompatible

When the account is incompatible with the SuiteTax

The account is likely to be incompatible with SuiteTax if some tests failed. However, tests can fail due to account customizations or configuration. It is important to thoroughly investigate why tests failed.

Click **View** to see a list of a test run's failed tests. On the **Test Results** subtab, you can see the list of all tests.
