This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Supply Chain Management SuiteApp

Supply Chain Management SuiteApp consolidates real-time data for supply chain processes. Enabling subsidiaries access to shared information, which improves efficiency and transactions workflow.

When you install the SuiteApp, you can print the following supply chain form and reports:

- **Inventory Count Sheet** – This form provides information about items that need to be counted. Warehouse personnel can use the inventory count sheet to perform physical inventory counts and inspections. For more information, see [Inventory Count Sheet](#).
- **Daily Shipment Detail Report** – This report provides daily high-level visibility into shipment activities in the warehouse. It lists recipients and shipping information for each package with summary totals and daily information about new shipments per status. For more information, see [Daily Shipment Detail Report](#).
- **Manufacturing Dispatch List** – This report consolidates manufacturing operation tasks and provides details of outstanding operations by work center. For more information, see [Manufacturing Dispatch List](#).
- **Manufacturing Traveler** – This report provides information about products that need to be created or repaired, and the specific tasks required to create a product. This report is passed to the next work center as each manufacturing task is completed. For more information, see [Manufacturing Traveler](#).

The SuiteApp also includes the following features that must be set up individually:

- **Customer Part Number** – Assigns customer part numbers to item records. For more information, see the help topic [Customer Part Number](#).
- **Estimated Landed Cost** – Automates the calculation of landed cost estimates for each transaction line item. For more information, see the help topic [Estimated Landed Cost](#).
- **Engineering Change Order** – Generates Engineering Change Order (ECO) records. These records document changes to your Bill of Materials (BOMs) and authorize the implementation of those changes. For more information, see the help topic [Engineering Change Order](#).
- **Item Substitution on Sales Orders** – Creates substitute items for supported item types. For more information, see the help topic [Item Substitution on Sales Orders](#).

Before installing the Supply Chain Management SuiteApp, read the following topics:

- [Supply Chain Management SuiteApp Prerequisites](#)
- [Installing the Supply Chain Management SuiteApp](#)
- [Supply Chain Management Limitations](#)

To start using the SuiteApp, read the following topics:

- [Setting Up the Supply Chain Management SuiteApp](#)
- [Supply Chain Management Roles and Permissions](#)
- [Setting Up Supply Chain Preferences](#)
- [Setting Up the Script Deployment Schedule for Supply Chain Management](#)
- [Printing Supply Chain Management Reports](#)

Supply Chain Management SuiteApp Prerequisites

You must enable additional features in your NetSuite account before installing the Supply Chain Management SuiteApp. To enable features, go to Setup > Company > Enable Features. For more information, see the help topic [Enabling Features](#).

Enable Features Subtab	Features
Transactions	Advanced Shipping
Items & Inventory	Bar Coding and Item Labels
	Serialized Inventory
	Lot Tracking
	Bin Management
	Inventory Count
	Manufacturing Routing and Work Center
	Manufacturing Work in Process
CRM	Online Forms
	 Note: This feature is required to avoid errors related to the Available Without Login URL. For more information, see the help topic Errors Related to the Available Without Login URL.
SuiteCloud	Advanced PDF/HTML Templates

To access the Supply Chain Management reports, make sure that Advanced Inventory is provisioned in your NetSuite account. For more information about the reports, see [Printing Supply Chain Management Reports](#).

Installing the Supply Chain Management SuiteApp

The Supply Chain Management SuiteApp is a paid and managed SuiteApp that automatically updates with new features or enhancements.

Before you install the SuiteApp, contact your NetSuite account manager to get access to the SuiteApp.

To install the Supply Chain Management SuiteApp:

1. Go to Customization > SuiteBundler > Search & Install Bundles.
2. In the **Keywords** field, use the following information to search for the SuiteApp:
 - Bundle Name: Supply Chain Management
 - Bundle ID: 47193
3. On the Bundle Details page, click **Install**.

For more information about installing SuiteApps, see the help topic [Installing a Bundle](#).

Note: Supply Chain Management supports the **e Multi-Language** feature. If you've enabled this feature, you can choose from the list of system-supported languages to use in your NetSuite user interface. For more information, see the help topics [Configuring Multiple Languages](#) and [Choosing a Language for Your NetSuite User Interface](#).

Setting Up the Supply Chain Management SuiteApp

This chapter describes the actions required to use the Supply Chain Management SuiteApp and how to enable its features.

- [Supply Chain Management Roles and Permissions](#)
- [Setting Up Supply Chain Preferences](#)
- [Setting Up the Script Deployment Schedule for Supply Chain Management](#)

Supply Chain Management Roles and Permissions

Administrators can create or customize roles for the Supply Chain Management SuiteApp. For more information, see the help topics [Assigning Roles to an Employee](#) and [Customizing or Creating NetSuite Roles](#).

By default, these roles have full permissions to the Supply Chain Management SuiteApp's reports:

- Accountant
- Accountant (Reviewer)
- Bookkeeper
- CEO
- CFO
- Sales Vice President
- Warehouse Manager

Other roles for Supply Chain Management require CRM groups permission to generate the Manufacturing Dispatch List and Manufacturing Traveler reports.

To grant the CRM groups permission to custom roles:

1. Go to Setup > Users/Roles > Manage Roles.
2. Click **Edit** next to the role that you want to grant permission to generate reports.
3. On the **Permissions** subtab, go the **Lists** subtab.
4. From the **Permission** list, select **CRM Groups**.
5. In the Level column, select **View**.
6. Click **Add**, and then click **Save**.

The following table shows the different navigation to view specific pages using different roles:

Page	Role	Navigation
Supply Chain Management	Administrator	Transaction > Management > Supply Chain Management

Page	Role	Navigation
	Warehouse Manager	Inventory > Other > Supply Chain Management
	CEO, CFO, Accountant, and Accountant (Reviewer)	Financial > Other > Supply Chain Management
Inventory Count	Administrator	Transaction > Inventory > Print Inventory Count Sheet
	Warehouse Manager	Inventory > Inventory > Print Inventory Count Sheet
	CEO and CFO	Financial > Adjustments > Print Inventory Count Sheet
	Accountant and Accountant (Reviewer)	Financial > Inventory > Print Inventory Count Sheet
Manufacturing Dispatch List	Administrator	Transaction > Manufacturing > Print Dispatch List
	Warehouse Manager	Inventory > Manufacturing > Print Dispatch List
	CEO, CFO, Accountant, and Accountant (Reviewer)	Financial > Manufacturing > Print Dispatch List
Manufacturing Traveler	Administrator	Transaction > Manufacturing > Print Traveler
	Warehouse Manager	Inventory > Manufacturing > Print Traveler
	CEO, CFO, Accountant, and Accountant (Reviewer)	Financial > Manufacturing > Print Traveler
Daily Shipment Detail Report	Administrator	Transaction > Management > Supply Chain Management > Daily Shipment Detail
	Warehouse Manager	Inventory > Other > Print Supply Chain Forms > Daily Shipment Detail
	CEO, CFO, Accountant, and Accountant (Reviewer)	Financial > Other > Print Supply Chain Forms > Daily Shipment Detail

Setting Up Supply Chain Preferences

You can set preferences to customize the report appearance and specify which details to include.

To set up supply chain preferences:

1. Go to Transactions > Management > Supply Chain Management.
2. On the Supply Chain Management page, click **Preferences**.
3. Click **Edit**.
4. To enable other Supply Chain Management features, read the following topics:
 - [Enabling Customer Part Number](#)
 - [Enabling Engineering Change Order](#)
 - [Enabling Estimated Landed Cost](#)
 - [Enabling Item Substitution on Sales Orders](#)

5. On the **General** subtab, select a value and check the following boxes as needed:
 - a. **Print Barcode** – Check this box if you want to print the barcode on the report.
 - b. **Send Form Generation Email Notification** – Check this box if you want to receive email notifications when supply chain management forms or reports have been generated.
 - c. **Item Barcode** – Select whether you want the barcode to display the **Item Name** or **UPC Code** when generating it.
6. On the **Inventory** subtab, select or enter values for the following fields:
 - a. **Sort Inventory Count Sheet By** – Select whether to sort the inventory count sheet by **Item** or **Bin**.
 - b. **No. of Line for Serial/Lot Number** – Enter the number of lines you want to allot for the serial or lot number.
7. Click **Save**.

Setting Up the Script Deployment Schedule for Supply Chain Management

The SuiteApp includes a scheduled script that runs daily to clean up process requests that are terminated unexpectedly. You can change the schedule based on your preferences.

To edit the script deployment schedule:

1. Customization > Scripting > Script Deployments.
2. Click the **Edit** link next to SCM Background Cleanup Process SS.
3. On the **Schedule** subtab, in the **Start Time** field, select a time according to your preference.
4. Click **Save**.

For more information about scheduled scripts, see the help topic [SuiteScript 2.x Scheduled Script Type](#).

Printing Supply Chain Management Reports

Read the following help topics to learn more about printing the supply chain management reports:

- [Inventory Count Sheet](#)
- [Daily Shipment Detail Report](#)
- [Manufacturing Dispatch List](#)
- [Manufacturing Traveler](#)
- [Viewing the Form Printing Status](#)

Inventory Count Sheet

The Inventory Count Sheet generates a list of items that you need for inventory counts and inspections. You can print the Inventory Count Sheet only when Inventory Count status is set to **Started**.

To print an inventory count sheet:

1. Go to Transaction > Management > Supply Chain Management.
Alternatively, you can go to Transaction > Inventory > Print Inventory Count Sheet.
2. On the Supply Chain Management page, under **Inventory**, click the **Inventory Count Sheet** link.
3. On the Print Inventory Count Sheet page, select values for the **Subsidiary** and **Location** filters to refine the list of available forms.
4. To select a form from the table, do one of the following options:
 - In the **Select Inventory Count** field, enter the form number.
The **Print** box for the specified form is automatically checked.
 - Check the **Print** box next to the form you want to print.
 - Click **Mark All** to select all forms.
5. Click **Print** or, to return to the Supply Chain Management page, click **Go to Main**.

For more information about viewing the printing status, see [Viewing the Form Printing Status](#).

Daily Shipment Detail Report

The Daily Shipment Detail Report generates a list of shipments, with packages released from the warehouse within the day. Only **Shipped** items are included in the report.

To print a daily shipment detail report:

1. Go to Transaction > Management > Supply Chain Management.
2. Under **Inventory**, click the **Daily Shipment Detail Report** link.
3. On the Daily Shipment Detail Report page, select values for the following filters to refine the list of available forms:
 - **Subsidiary** – Select a subsidiary.
 - **Location** – Select a location.
 - **From Date** – Select any date, whether it is before the current date, today's date or a future date.
 - **To Date** – Select an end date, which can be the same as the From Date or a future date.

 **Note:** When the Daily Shipment Detail Report page is first loaded, both the **From Date** and **To Date** fields are set to the current date.

4. To select a form from the table, do one of the following options:
 - In the **Select Inventory Count** field, enter the form number.
The **Print** box for the specified form is automatically checked.
 - Check the **Print** box next to the form you want to print.
 - Click **Mark All** to select all forms.
5. Click **Print** or, to return to the Supply Chain Management page, click **Go to Main**.

For more information about viewing the printing status, see [Viewing the Form Printing Status](#).

Manufacturing Dispatch List

The Manufacturing Dispatch List shows outstanding operation tasks that you can give to teams.

On the Manufacturing Operation Task record, the **Dispatched** box is automatically checked after the task is included and printed out on a Dispatch List.

To print a manufacturing dispatch list:

1. Go to Transaction > Management > Supply Chain Management.
Alternatively, you can go to Transaction > Manufacturing > Print Manufacturing Dispatch List.
2. On the Supply Chain Management page, under **Manufacturing**, click the **Dispatch List** link.

 **Note:** When you first open the Print Manufacturing Dispatch List page, the table shows forms with the following Work Order and Task Statuses:

- Work Order Status – In Process (and/or) Released
- Task Status – In Progress (and/or) Not Started

3. On the Print Manufacturing Dispatch List page, select values for the following filters to refine the list of forms:
 - **Subsidiary** – Select a subsidiary.
 - **Location** – Select a location.
 - **Work Center** – Select a work center.
 - **Assembly Item** – Select an assembly item.
 - **Work Order Status** – Select between **Released** or **In Process**.
 - **Task Status** – Select between **In Progress** or **Not Started**.
 - **Dispatched** – Select between **Yes** or **No**.
4. To select a form from the table, do one of the following options:
 - In the **Select Inventory Count** field, enter the form number.
The **Print** box for the specified form is automatically checked.
 - Check the **Print** box next to the form you want to print.
 - Click **Mark All** to select all forms.
5. Click **Print** or, to return to the Supply Chain Management page, click **Go to Main**.

For more information about viewing the printing status, see [Viewing the Form Printing Status](#).

Manufacturing Traveler

The Manufacturing Traveler includes all work orders with **In Process** or **Released** status. For each work order, the operation sequence, name, and other details are provided.

To print a manufacturing traveler:

1. Go to Transaction > Management > Supply Chain Management.
Alternatively, you can go to Transaction > Manufacturing > Print Manufacturing Traveler.
2. If you are on the Supply Chain Management page, under **Manufacturing**, click the **Traveler** link.
3. On the Print Manufacturing Traveler page, select values for the following filters to refine the list of available forms:

- **Subsidiary** – Select a subsidiary.
 - **Location** – Select a location.
 - **Work Order** – Select a work order.
 - **Assembly Item** – Select an assembly item.
 - **Work Order Status** – Select between **Released** and **In Process**.
 - **Start Date From** – Select any date, whether it is before the current date, today's date, or a future date.
 - **Start Date To** – Select an end date, which can be the same as the Start Date From or a future date.
4. To select a form from the table, do one of the following options:
 - In the **Select Inventory Count** field, enter the form number.
The **Print** box for the specified form is automatically checked.
 - Check the **Print** box next to the form you want to print.
 - Click **Mark All** to select all forms.
 5. Click **Print** or, to return to the Supply Chain Management page, click **Go to Main**.

For more information about viewing the printing status, see [Viewing the Form Printing Status](#).

Viewing the Form Printing Status

You can check the status of the forms or reports you printed.

To view the printing status of a form:

1. Go to Transaction > Management > Supply Chain Management, and then click the Form Printing Status link.

The status of a form can be **Pending**, **In Progress**, **Completed**, or **Error**.

The table displays a list of available forms. You can refine the list by specifying values for the following filters:

- **Report Name**
- **Printing Status**
- **Printed By**
- **Print Date From**
- **Print Date To**

Note: Only administrators can use the **Printed By** filter to view forms printed by specific users.

2. Under **File Link**, click the **View** link for the form you want to view.
3. Go to Transaction > Management > Supply Chain Management.
4. On the Supply Chain Management page, click the **Form Printing Status** link.
5. On the Form Printing Status page, select values for the following filters to refine the list of available forms:
 - a. **Report Name** – Select a report name.
 - b. **Printing Status** – Select one of the following statuses:

- Pending
- In Progress
- Completed
- Error

c. **Printed By** – Select the employee who printed the report.

Note: Only administrators can use the **Printed By** filter to view forms printed by a specific employee.

d. **Printed Date From** – The Print Date From can be before the current date or today's date.

e. **Print Date To** – The Print Date To can be the same as the from date or a future's date.

6. In the **File Link** column, click the **View** link next to the report that you want to view.

Supply Chain Management Limitations

Take note of the following limitations when using Supply Chain Management SuiteApp:

- Long text in the report might get cut off to fit in the table.
- The report will not be generated if there's an invalid UPC code error.
- System-generated barcodes with long item barcode names are compressed to fit into the table. Consequently, the barcode may not be readable.
- The **Mark All** and **Unmark All** buttons are only applicable to entries on the current page.
- If you enable the **Send Form Generation Email** Notification, the email includes a link to the report. You can view the link only when you're logged in to your NetSuite account.
- The maximum report file size is 5 MB.
