Time-Off Management

2025.2

September 3, 2025

Copyright © 2005, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Time-Off Management

The NetSuite Time-Off Management feature lets Human Resources define and manage time-off plans based on your company's policies. You can then assign these plans to employees based on location, department, class, or with NetSuite OneWorld subsidiary. For more information, see the following topics:

- [Time-Off Management Overview](#)
- [Prerequisites for Using Time-Off Management](#)
- [Time-Off Management Setup](#)
- [Time-Off Management Integration With SuitePeople U.S. Payroll](#)
- [Viewing an Employee's Time-Off Balance](#)
- [Time-Off Changes](#)
- [Submitting Time-Off Requests on Behalf of Employees as an Administrator](#)
- [Approving or Rejecting a Time-Off Request as an Administrator](#)
- [Time-Off Management for Employees or Managers](#)
- [Time-Off Reports](#)

Time-Off Management Overview

The NetSuite Time-Off Management feature enables Human Resources to define and manage time-off plans according to company policies. Then, assign them to employees based on location, department, class, or with NetSuite OneWorld subsidiary.

This includes the ability to:

- Create time-off types for the different categories of leave your employees can take.
- Set up time-off rules to match your company's policies.
- Configure how NetSuite handles rule changes at specific employee milestones.
- Set up who's eligible and what they're entitled to.
- Set up accruals based on a fixed amount per period or hours worked.
- Set up balance and carryover limits.
- Review and adjust employees' time-off balances.

Employees on a time-off plan need access to the Employee Center so they can submit time-off requests. Managers can review and approve time-off requests from an email or from the Employee Center. For more information, see [Time-Off Management for Employees or Managers](#).

The Time-Off Management feature can be integrated with other features in NetSuite, including Time Tracking, SuitePeople U.S. Payroll, Projects, and Resource Allocations:

- [Time Tracking and Time-Off Management](#)
- [Payroll and Time-Off Management](#)
- [Projects and Time-Off Management](#)
- [Project Management, Resource Allocations, and Time-Off Management](#)

Time Tracking and Time-Off Management

You need to enable Time Tracking to use Time-Off Management. If you track employee time and bill it to projects, NetSuite creates time entry records when a time-off request is approved. If you use SuitePeople U.S. Payroll, time off appears in Payroll. You can see these time entry records under the Time Tracking subtab on the employee record. For more information, see the help topic [Time Tracking](#).

Note: If you check the **Require Approvals** box on **Time Records**, you can't edit time-off entries from approved requests. You'll find this preference on the Time & Expenses subtab. To let employees make updates, clear the box.

Payroll and Time-Off Management

Time-Off Management and SuitePeople U.S. Payroll work together to make sure employees get the time off they're entitled to and get paid correctly. For more information about how to set up Payroll and Time-Off Management to work together, see [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

Projects and Time-Off Management

You can associate different types of time off to projects and tasks. When a request for project-related time off is approved, the project information appears on the **Time Details** subtab on the time tracking record.

Project Management, Resource Allocations, and Time-Off Management

When you enable Project Management and Resource Allocations features, they work with Time-Off Management in the following ways:

- If a project manager assigns someone to a project and they have approved time off that conflicts, NetSuite shows a warning on the allocation record and on the Time-Off Conflicts subtab.
- If someone already assigned to a project requests time off that conflicts and it's approved, the project manager gets an email with the conflict details.

For more information, see the help topic [Resource Allocations and Time-Off Management](#).

Prerequisites for Using Time-Off Management

This section outlines the prerequisites for using the Time-Off Management feature:

- [Install the Time-Off Tracking SuiteApp](#)
- [Assign Work Calendars to Employees](#)
- [Time-Off Management Roles and Permissions Requirements](#)

Note: Currently, the Time-Off Tracking SuiteApp supports only US and UK English languages.

Install the Time-Off Tracking SuiteApp

Important: To install the Time-Off Tracking SuiteApp, you need to have Time-Off Management enabled. Go to Setup > Company > Enable Features. On the Employees subtab, under HR Information System, check the Time-Off Management box. If you don't see this feature on the Enable Features page, you need SuitePeople HR on your account. For more information, see the help topic [SuitePeople Overview](#).

With the Time-Off Tracking SuiteApp, employees can request time off using their Employee Center role. Requests go to their supervisor for approval, and the SuiteApp includes saved searches you can use as reports. For more information, see the help topic [Time-Off Tracking Reports](#).

For more information about installing SuiteApps, see the help topic [Installing a Bundle](#). You can search for the Time-Off Tracking Suite App using the following information:

- Bundle Name: **Time-Off Tracking**
- Bundle ID: 112449

The Time-Off Tracking SuiteApp is a managed bundle that updates automatically whenever fixes and enhancements are available.

 **Note:** The Time-Off Tracking SuiteApp uses the time-off request record. Custom fields on the time-off request record don't appear when employees create time-off requests. If you add custom fields to the time-off request record, make sure they aren't required, or set default values if they are.

Assign Work Calendars to Employees

When you use the Time-Off Management feature, you'll need to assign a work calendar to each employee. This way, NetSuite knows which days are working days and can calculate how many hours to deduct for each time-off request. For more information, see the help topics [Setting Up a Work Calendar](#) and [Assigning a Time-Off Plan to an Employee](#).

Time-Off Management Roles and Permissions Requirements

You'll need the Time-Off Administration permission to set up Time-Off Management. Standard roles with this permission are HR Generalist, Administrator, and Chief People Officer (CPO). For details, see the help topic [Time-Off Management Permission Requirements](#).

You can also create custom roles with this permission. For more information, see the help topic [Customizing or Creating NetSuite Roles](#).

If your role has the right permission, you can review, approve, or reject time-off requests before employees take time off.

Employees assigned a time-off plan need access to the Employee Center role so they can submit time-off requests and view their time-off balances.

Managers can review requests from an email or from the Employee Center.

Time-Off Management Setup

 **Important:** If you are using SuitePeople U.S. Payroll, see [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

Before you set up Time-Off Management, think about how your company's time-off policies apply to different employees. For example, consider how much time off they get, how unused time off is handled at year-end, and how time off is accrued. You can create multiple plans to fit these differences.

Time-off plans include the types and rules that match your company's policies. Set up time-off types to match your leave categories, like vacation or sick leave. The rules cover eligibility, entitlements, accruals, and carryover during an employee's time at your company.

Complete the following steps to set up the Time-Off Management feature:

- [Creating a Time-Off Type](#)
- [Creating a Time-Off Plan](#)
- [Creating a Time-Off Rule](#)
- [Assigning a Time-Off Plan to an Employee](#)

The process for setting up Time-Off Management is as follows:

Time-Off Types

Time-off types let you define the different categories of leave your employees can take.

For example, you can create a time-off type for vacation and another time-off type for sick leave. These time-off types should be consistent with your company's policies.

You can create as many time-off types as you need to match your company's policies. You can also add multiple rules to each type for different stages of an employee's tenure. For more information, see [Time-Off Rules](#).

Watch the following help video for information about creating a time-off type:

 [Time-Off Management Overview & Creating Time-Off Types — Video 1 of 4](#)

Creating a Time-Off Type

Use the following procedure to create a time-off type.

To create a time-off type:

1. Go to Setup > HR Information System > Time-Off Type > New.
2. In the **Name** field, enter a unique name for the type. This name appears in time-off lists for requests, plans, and changes.
3. In the **Display Name** field, enter how you want the name to appear to employees. For example, you might have different types for different subsidiaries, departments, or locations, but you want them to look the same to everyone.
4. To track only the usage of this time-off type (with no entitlement or balance), check the **Track Only** box. For example, you can use this if your company offers unlimited sick days.
If you change a time-off type to track only, NetSuite stops calculating future accruals. All previous balance entries stay saved and appear in the time-off changes record. For more information, see [Viewing an Employee's Time-Off Balance](#).
5. If you are using SuitePeople U.S. Payroll, select a **Payroll Item**. For more information, see [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

Important: Each time-off type can be associated to only one payroll item, and it must be an Earning type. For more information, [Setting up Payroll Items to Work With Time-Off Management](#).

6. In the **Minimum Increment** and **Increment Unit** fields, set the smallest amount of time off allowed for this type. Requests must be at least this amount and in multiples of it. Leave it at zero or blank to let employees enter any value.
For example, employees must take time off in half-day increments. Set the **Minimum Increment** field to 0.5, and then, from the **Increment Unit** list, select **Days**.
7. To associate this time-off type with a specific project, select the project from the **Project** list.
When you create a project to associate with a time-off type, consider the following:
 - If you select **Limit Time** and **Expenses to Resources**, employees must have **Project Resource** checked on their record to track time.
 - If you select **Allow Time Entry** and **Classify Time as Exempt** on the Preferences subtab, employees can track time against a project even if **Project Resource** isn't checked.
8. To associate this time-off type with a specific task on the project, select it from the **Project Task** list. When you create a project task to associate with a time-off type, enter a value in the **Estimated Work** field on the Project Task/Milestone page. If you don't enter anything in this field the project task is saved as a milestone. It doesn't appear in the **Project Task** list on the time-off type record. For more information, see the help topic [Project Tasks](#).
If you associate a time-off type to a project and task, reports for tracked time will include time-off entries.
9. Use the color selector to choose a color for this time-off type.
10. Click **Save**.

Next, create the time-off plan and add the new types to it. For more information, see the help topic [Creating a Time-Off Plan](#).

Editing a Time-Off Type

You can edit a time-off type at any time. If you're making changes that affect accruals for many employees, do it at the end of the business day so NetSuite has time to process them. Try not to make changes that affect accruals on the same accrual day.

To edit a time-off type:

1. Go to Setup > HR Information System > Time-Off Type.
2. Click **Edit** next to the time-off type you want to change.
3. When you're done editing, click **Save**.

Inactivating or Deleting a Time-Off Type

When you inactivate a time-off type, it won't appear in lists anymore.

You can't delete a time-off type if it's assigned to a time-off plan or if anyone has used it for a balance change or request. Before deleting, remove it from the plan and delete all related changes and requests.

To inactivate a time-off type:

1. Go to Setup > HR Information System > Time-Off Type.
2. Click **Edit** next to the time-off type you want to inactivate.
3. Check the **Inactive** box.
4. Click **Save**.

If the type-off type is assigned to a time-off plan, you'll need to remove it from the plan before you inactivate it. To see inactive types, go to the list page and check the **Show Inactives** box.

Note: When you inactivate a time-off type, its rules are hidden. All future accruals are deleted, and unused time off expires at year-end with no carryover. If needed, manually remove any changes or approved requests for future dates.

To delete a time-off type:

1. Go to Setup > HR Information System > Time-Off Type.
2. Click **Edit** next to the time-off type you want to delete.
3. Select **Delete** from the **Actions** menu.
4. When you're asked to confirm, click **OK**.

Setting Up Time-Off Type Auto-Approval and Time-Off Self-Approver

You can set a time-off type to be automatically approved when requested, with to an approval threshold.

You can make certain employees self-approvers so their time-off requests are automatically approved. This is helpful for executives, like the Chief Product Officer, whose time off you still want to track.

To set up a time-off type for auto-approval with threshold:

1. Go to Setup > HR Information System > Time-Off Type.
2. Click **Edit** next to the time-off type you want to change.
3. Check the **Auto-Approve with Threshold** box.

4. In the **Auto-Approval Threshold** field, enter the maximum period of time that can be automatically approved. Requests over this limit will require supervisor approval. The value uses the unit from the **Increment Unit** field. The minimum value is **1**, and there is no maximum. You can enter a value such as 200 to allow for almost unlimited time-off auto-approvals.

For example, if you set the threshold to 5 days, requests of up to 5 consecutive days will be automatically approved. Requests over 5 days will require supervisor approval. For more information, see [Guidelines for Time-Off Auto-Approvals](#).

5. Click **Save**.

The following guidelines describe how time-off type auto-approvals work with other time-off types in the same request:

- If a request includes both auto-approved and non-auto-approved types, it needs supervisor approval.
- If a request has multiple auto-approved types, it might still need supervisor approval depending on each threshold. The total time is checked against the highest threshold in the request.

The following table summarizes different scenarios when submitting multiple auto-approved time-off types in the same request.

Time-Off Type Submitted		Total Duration of Time-Off Request	Requires Supervisor Approval?
A	B		
Within threshold	Within threshold	Within highest threshold value	No
Within threshold	Within threshold	Exceeds highest threshold value	Yes
Within threshold	Exceeds threshold	Within highest threshold value	Yes
Within threshold	Exceeds threshold	Exceeds highest threshold value	Yes
Exceeds threshold	Exceeds threshold	Exceeds highest threshold value	Yes

- To avoid issues, let users know they should submit auto-approved time-off requests separately from others.

To assign an employee as a time-off self-approver:

1. Go to List > Employees > Employees.
2. On the Employees list, click **Edit** next to the employee you want to set up as a time-off self-approver.
3. Click the **Time-Off** subtab.
4. Check the **Time-Off Self-Approver** box.
5. Click **Save**.

If your account has Advanced Employee Permissions enabled, make sure you add **Time-Off Self Approver** as a custom field in your custom employee permissions. For more information, see the help topic [Adding Custom Fields to Advanced Employee Permission](#).

Setting Up Time-Off Calendar Event Creation

You can set time-off types to automatically create an event in the NetSuite calendar. The time-off requester and their supervisor see the approved time-off requests in their Calendar portlet. When the

time-off request is cancelled or rejected, the calendar event is deleted from the calendar. For more information about the Calendar and events, see the help topics [Calendar Portlets](#) and [Working with Events](#).

A calendar event is created for each day in the approved time-off request. By default, all time-off calendar events are set as an All Day event and follows the timezone preferences of the time-off requester. The employee and their assigned supervisor are set as event attendees and must have Active employee records.

To set up automatic time-off calendar event creation:

1. Go to Setup > HR Information System > Time-Off Type.
2. Click **Edit** next to the time-off type you want to change.
3. Check the **Create Calendar Event** box.
4. Click **Save**.

Time-Off Plans

A time-off plan includes the types and rules that dictate how each time-off type is applied. The rules set how eligibility, accruals, entitlements, and carryover work for employees, and how these change over time.

Before you create a time-off plan, make sure you've set up and defined time-off types. For more information, see [Creating a Time-Off Type](#).

Watch the following help video for information about creating a time-off plan:

[Creating Time-Off Plans Using the Time-Off Management Feature — Video 2 of 4](#)

Creating a Time-Off Plan

Use the following procedure to create a time-off plan.

To create a time-off plan:

1. Go to Setup > HR Information System > Time-Off Plan > New.
2. In the **Name** field, enter a name for the time-off plan. This name appears whenever you need to select a time-off plan, such as the employee record. Name the plan so that you or someone else in HR can easily select the right plan to assign to each employee.
3. To show forecasted accruals for the year in days available to an employee, check the **Days Available Includes Future Accruals for the Year** box. To show only time off that employees have accrued so far, leave it unchecked.
4. In the **Start of Entitlement Period** list, select when the entitlement period starts. For example, if employees are entitled to 15 days, and if April is selected, the entitlement period starts April 1st.
5. If necessary, select a **Subsidiary, Class, Department, or Location**. You can assign this plan only to employees who are associated with the department, class, location, and subsidiary you set here. If you don't set any of these, this plan can be assigned to anyone.
6. Click **Save**.

After you save the plan, you can create time-off rules. For more information, see the help topic [Creating a Time-Off Rule](#).

Editing a Time-Off Plan

You can update a time-off plan at any time. After you save it, the system updates any future changes to match the new settings.

To edit a time-off plan:

1. Go to Setup > HR Information System > Time-Off Plan.
2. Click **Edit** next to the time-off plan you want to change.
3. When you're finished editing, click **Save**.

Note: If you're removing rules from a plan, you can't delete the last rule if the time-off plan is assigned to employees. You need to either add another rule or unassign the plan from all employees before you can delete it.

Inactivating or Deleting a Time-Off Plan

When you inactivate a time-off plan, it won't appear in lists anymore. If a plan is already assigned to an employee, remove it from their record before inactivating it. To see inactive plans, go to the list page and check the **Show Inactives** box.

To inactivate a time-off plan:

1. Go to Setup > HR Information System > Time-Off Plan.
2. Click **Edit** next to the time-off plan that you want to inactivate.
3. Check the **Inactive** box.
4. Click **Save**.

To delete a time-off plan:

1. Go to Setup > HR Information System > Time-Off Plan.
2. Click **Edit** next to the time-off plan that you want to delete.
3. From the **Actions** menu, select **Delete**.
4. When you're asked to confirm, click **OK**.

If you try to delete a time-off plan that has employees assigned to it, a popup window appears. Click the associate in the window to view to see who is assigned to the plan. Before you can delete the time-off plan, you need to remove it from each employee record.

Time-Off Rules

After you create a time-off plan, you'll need to set up and apply rules to it. Time-off rules let you decide how time off accrues for each type, and how to manage balances and carryover limits.

 **Important:** If you use SuitePeople U.S. Payroll in your NetSuite account, follow the setup instructions in [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

Watch the following help video for information about creating a time-off rule:

 [Creating Time-Off Rules Using the Time-Off Management Feature — Video 3 of 4](#)

Creating a Time-Off Rule

 **Important:** If you use SuitePeople U.S. Payroll in your NetSuite account, follow the setup instructions in [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

To create a time-off rule:

1. Go to Setup > HR Information System > Time-Off Plan.
2. Click **Edit** beside the plan that you want to define rules for.
3. Click **New Time-Off Rule**.
4. In the **Time-Off Type** field, select a time-off type to apply to the plan.

 **Tip:** Click **New** in the Time-Off type field to create a new time-off type for this plan.

5. Enter the minimum tenure for this time-off type, and choose months or years. Usually, minimum tenure increases how much time off employees get over time, but you can also use it to adjust accrual or carryover rules at milestones.

For example, you might want employees to start with 10 vacation days, then bump it up to 15 days after five years. To do this, add two rules for the same time-off type: one with a minimum tenure of zero and 10 days, and another with five years and 15 days.
6. Set up time-off accruals. For more information, see [Time-Off Accruals](#).
7. Set up balance and carryover limits. For more information, see [Setting up Balance and Carryover Limits in a Time-off Rule](#).
8. Click **Save**.

Repeat these steps for each rule you want to add. You can create multiple rules for one time-off type in a plan, but it has to accrue the same way — either by a fixed amount or by hours worked — in every rule.

Time-Off Accruals

 **Important:** If you use SuitePeople U.S. Payroll in your NetSuite account, follow the setup instructions in [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

Time-off types can automatically accrue in a plan either by a fixed amount per period or by hours worked. See [Setting up an Accrual Based on a Fixed Amount per Period](#) and [Setting up an Accrual Based on Hours Worked](#).

 **Note:** If you select a track-only time-off type in the time-off rule, you won't see accrual options.

The following diagram illustrates the process for setting up time-off accruals in a time-off rule:

Important: In a time-off plan, if two or more rules use the same time-off type, they all have to accrue the same way — either by a fixed amount or by hours worked.

Setting up an Accrual Based on a Fixed Amount per Period

Accruals based on a fixed amount are always set up in time-off rules.

When time-off types accrue by a fixed amount per period:

- Time off accrues after a fixed amount of time: weekly, biweekly, semi-monthly, monthly, or annually.
- You set an annual entitlement for the time-off type. For example, employees might be entitled to two personal days in a year.
- Accruals are calculated based on the annual entitlement divided by the number of accrual periods in a year.

For example, time off accrues semi-monthly (or 24 times a year). The annual entitlement is 15 days. Therefore, the accrual amount per period = $15 \div 24$.

For more information about how accruals are calculated, see [Understanding How Accruals are Generated when Multiple Time Rules are in One Time-Off Plan](#)

- Time off can accrue proactively (for the period employees are about to work) or retroactively (for the period they've already worked).

To set up an accrual based on a fixed amount:

1. In the time-off rule, under **Accrual Method**, check the **Automatically Accrue** box.
2. From the **Accrues Based On** list, select **Fixed Amount Per Period**.
3. From the **Accrual Type** list, select whether time off accrues proactively or retroactively:
 - If employees accrue time off for the period they're about to work, select **Proactive**. Then set the Minimum Tenure. If it's zero, in the **Opening Balance for New Employees** field, choose one of the following:
 - **Full Amount for Accrual Period** - Employees get the full accrual amount on their start date or the first day they're eligible, based on the plan rules.
 - **Prorated Amount for Accrual Period** - Employees get a prorated amount based on working days left in the period, applied on their start date or the first day they're eligible, based on the plan rules.
 - **Zero** - Employees' first accrual happens on the next regularly scheduled accrual date.
 - If employees accrue time off for the period they've already worked, select **Retroactive**.
4. In the **Accrual Frequency** field, choose when time off accrues.

If you select **Biweekly** or **Weekly** as the accrual frequency, set the day for the next accrual. This sets the calendar day when the accrual is applied.

Note: Annual and monthly accruals happen on the first day of the year or month for proactive, and the last day for retroactive. Semi-monthly accruals are on the 1st and 15th for proactive, and the 15th and last day for retroactive.

5. In the **Entitlement** field, enter the number of days or hours that employees earn each year.
6. In the **Entitlement Unit** field, choose whether the entitlement is in days or hours.

The **Accrual Amount** and **Accrual Amount Unit** fields show the accrual rate based on your selections.

7. To enable an accrual limit, check the **Set Accrual Limit** box, and do the following:
 - In the **Accrual Limit** field, enter the maximum number of days that employees can accrue. For example, if you enter 15 days, your employees stop accruing time when they reach this limit. Employees start accruing time again when they use some of their accrued time.

The **Accrual Limit Unit** field displays the accrual limit rate based on your selections.
8. Click **Save**.

Continue to [Setting up Balance and Carryover Limits in a Time-off Rule](#).

Understanding How Accruals are Generated when Multiple Time Rules are in One Time-Off Plan

Sometimes more than one time-off rule apply to an employee within the same accrual period. If both rules accrue proactively, and have different tenures, accruals are generated only when employees are eligible. This means employees can see their entitlement in the Employee Center only when they've reached the tenure period.

 **Note:** Remember that tenure is based on the Start Date for Time-Off Calculations on the employee record.

If you want employees to see their future entitlements, check the **Days Available Includes Future Accruals** for the Year box on the time-off plan.

For more details on how and when accruals are generated, see [Employee has Partial Time-Off Accrual at the Start of the Accrual Period](#)

Setting up an Accrual Based on Hours Worked

Accruals based on hours worked can be set up in one of two ways, depending on whether you use SuitePeople U.S. Payroll in your account:

- If you use the Payroll feature, you set up accruals on the Payroll > Accrued Time subtab of the employee record. For more information, see [Time-Off Management Integration With SuitePeople U.S. Payroll](#).

 **Note:** If you're setting up Time-Off Management for a subsidiary that doesn't use Payroll, accruals based on hours worked are **not** available.

- If the Payroll feature isn't enabled in your account, you set up accruals in time-off rules. The rest of this topic describes this method.

When time-off types accrue by hours worked:

- The Time Tracking feature must be enabled.
- Accruals are calculated based on the hours that an employee works on approved time entries, multiplied by an accrual rate.

For example, the accrual rate is 0.04. The approved time entry shows 20 hours worked. The accrual amount for the time entry = 20 x 0.04.

The following diagram shows how the Time Tracking feature and the Time-Off Management feature work together to calculate hourly accruals for an employee:

To set up an accrual based on hours worked:

1. In the time-off rule, under **Accrual Method**, check the **Automatically Accrue** box.
2. From the **Accrues Based On** list, select **Hours Worked**.
3. In the **Hourly Accrual Rate** field, enter the accrual rate.
4. To enable an accrual limit, check the **Set Accrual Limit** box and do the following:
 - In the **Maximum Accrual Limit** field, enter the maximum number of hours that employees can accrue. For example, if you enter 80 hours, employees stop accruing time when they reach this limit. Employees start accruing time again when they use some of their accrued time.

The **Maximum Accrual Unit** field displays the accrual limit rate based on your selections.
5. Click **Save**.

Continue to [Setting up Balance and Carryover Limits in a Time-off Rule](#).

Setting up Balance and Carryover Limits in a Time-off Rule

The following diagram illustrates the process for setting up balance and carryover limits:

To set up balance and carryover limits:

1. In the time-off rule, set up how you want to manage carryover balances:
 - To deduct unused time off from an employee's balance, under **Balance and Carryover Limits**, clear the **Allow Employees to Carry Over Unused Time-Off** box.
 - To allow carryover, check the **Allow Employees to Carry Over Unused Time-Off** box. This is the default setting. Then do the following:
 - To restrict how much unused time off can be added to next year's balance, check the **Limit the Amount of Time-Off Employees Carry Over** box. Then, do the following:
 1. In the **Maximum Carryover** field, enter the maximum amount of time each employee is entitled to carry over.
 2. In the **Maximum Carryover Unit** field, select the unit of time for the maximum carryover field.

For example, employees are entitled to carry over 5 days. Enter 5 in the **Maximum Carryover** field, and then select **Days** in the **Maximum Carryover Unit** field.

- To expire carried over time off after a specific period of time, check the **Expire Unused Carryover** box. Then, select which month the carried over time off should expire.

For example, if you select March, employees have until the end of March to take this type of time off. If they do not book the time off before it expires, it's removed from their accrual and they can no longer use it.

Note: If you select a date in the past, the expiry doesn't occur until the following year. If you change a carryover expiry month from a future date to a past date, the change doesn't occur until the following year. This is also true if you change a carryover expiry from a past date to a future date. The change takes effect in the current calendar year only if the expiry month is in the future.

- To prevent employees from carrying over negative balances at the end of the year, check the **Reset Negative Balances to Zero at Year End** box.
- To display expiry notification messages to employees in the Employee Center, check the **Show Balance Expiry** box. Notifications appear in the Employee Center when employees have time off that expires within the current or the next calendar month.

2. Click **Save**.

Deleting a Time-Off Rule

Use the following procedure to delete a time-off rule.

To delete a time-off rule:

1. Go to Setup > HR Information System > Time-Off Plan.
2. Click **Edit** beside the plan that contains the rule you want to delete.
3. From the **Time-Off Rule** subtab, select **Edit** beside the time-off type from the rule you want to delete.
4. From the **Actions** menu, select **Delete**.
5. When you're asked to confirm, click **OK**.

Note: You can't delete the last rule in a time-off plan when the plan is assigned to employees. Unassign the plan from all employees before you delete all of the rules in it.

Assigning a Time-Off Plan to an Employee

When you turn on the Time-Off Management feature, a **Time-Off** subtab is added to your employee records. From here you can assign a time-off plan to your employees and check their current time-off balances. Employees assigned to a time-off plan can submit time-off requests and check their balances in the Employee Center. They can request the types of time off they're eligible for, based on their plan's rules.

Before assigning a time-off plan to an employee:

- If you haven't already, create an employee record for employees you want to give access to time-off management. For more information about creating employee records, see the help topic [Adding an Employee](#).
- Make sure employees can access to time-off management from the Employee Center. For more information, see the help topic [About the Employee Center Role](#).

Important: If you use SuitePeople U.S. Payroll in your NetSuite account, see [Updating the Employee Record for Time-Off Management and Payroll](#).

Watch the following help video for information about assigning a time-off plan:

[Assigning a Time-Off Plan Using the Time-Off Management Feature — Video 4 of 4](#)

To assign a time-off plan to an employee:

1. Go to List > Employees > Employees.
2. On the Employees list, click **Edit** next to the employee you want to set up for time-off management.
3. In the **Supervisor** field, select the employee's supervisor. The supervisor receives any time-off requests that the employee submits.
4. Click the **Time-Off** subtab.
5. In the **Time-Off Plan** field, select the plan to assign to the employee. If the time-off plan doesn't appear, check that rules are assigned to the plan. For more information, see [Time-Off Rules](#).
6. In the **Start Date for Time-Off Calculations** field, enter the date you want to start tracking time off for this employee. This date helps decide which time-off rule applies, based on how long they've been with the company. It's different from the hire date and lets HR manage when each employee reaches time-off milestones.

For example, if your company acquires another company, you might want to use the date those employees started working, not the acquisition date.

Note: If you change an employee's start date after assigning them to a time-off plan, all future accruals, carry over, and expiry are updated based on the new date.

7. Click the **Human Resources** subtab.
8. In the **Work Calendar** field, select a work calendar for the employee.

When a work calendar is selected for time-off management, it:

- tells the system which days are working days for the employee
- blocks out the days that aren't considered working days when an employee fills out a time-off request
- calculates the number of hours to deduct from the employee's balance when a day is taken off

If you don't select a work calendar, the system assumes that the employee works eight hours a day, Monday to Friday, with no holidays. For more information, see the help topic [Setting Up a Work Calendar](#).

9. Click **Save**.

Time-Off Management Integration With SuitePeople U.S. Payroll

Important: This topic applies to you if you have SuitePeople U.S. Payroll in your account. If you are **not** using Payroll, follow the steps in [Time-Off Management Setup](#) to set up the Time-Off Management feature.

If SuitePeople U.S. Payroll is set up in your account, follow the steps in this section to set up the Time-Off Management feature. Time-Off Management and Payroll work together to track time-off accruals and

balances. When accruals and balances are correct, your employees are paid correctly and they receive the time off that they are entitled to.

To make sure that accruals and balances are correct, you'll need to turn on the Time Tracking feature. The diagram below illustrates how the Payroll, Time-Off Management, and Time Tracking features interact:

When an employee books time off, approved time off appears on their timesheet and enters Payroll. Time-off types are associated with payroll items, which are shared with the Time-Off Management system. The employee's accruals are calculated in one of two ways:

- If time off accrues by a fixed amount in a period of time, the time-off system calculates accruals. The Time-Off Management system shares accruals with the payroll system so that proper amounts appear on employees' pay statements.
- If time off accrues on an hourly basis, Payroll calculates accruals. Payroll shares accruals with the Time-Off Management system so that time-off balances are accurate.

Process for Setting up Time-Off Management With Payroll

The following diagram illustrates the process for setting up Time-Off Management with Payroll.

The following topics detail each step in the diagram:

1. [Setting up Payroll Items to Work With Time-Off Management](#)
2. [Associating a Time-Off Type With a Payroll Item](#)
3. [Creating a Time-Off Plan With Payroll](#)
4. [Setting up a Time-Off Rule With Payroll](#)
5. [Updating the Employee Record for Time-Off Management and Payroll](#)

When to Set Up Time-Off Management With Payroll

The changes that you make to time-off information have an impact on payroll information. To avoid errors in payroll calculation, set up the Time-Off Management feature only when you're not creating or committing payroll batches. If the Time-Off Management feature is already integrated with SuitePeople U.S. Payroll, make sure you only change time-off information when you're not creating or committing payroll batches. This includes adding new employees to a time-off plan.

View the following videos to see an example of how to set up Time-Off Management with Payroll:

-  [Integrating NetSuite Payroll & Time-Off Management Overview — Video 1 of 4](#)
-  [Integrating NetSuite Payroll with Time-Off Management: Setting Up Payroll Items and Time-Off Types — Video 2 of 4](#)
-  [Integrating NetSuite Payroll & Time-Off Management: Creating Time-Off Plans and Time-Off Rules — Video 3 of 4](#)
-  [Integrating NetSuite Payroll & Time-Off Management: Updating the Employee Record — Video 4 of 4](#)

Prerequisites for Integrating Time-Off Management With Payroll

Before you can set up the Time-Off Management feature with SuitePeople U.S. Payroll, the following must be completed:

- SuitePeople U.S. Payroll needs to be set up in your NetSuite account. If it isn't contact NetSuite Customer Support. For more information, see the help topic [Payroll Setup](#).
- You need to turn on the Time Tracking feature in your account. For more information, see the help topic [Managing Time Tracking](#).
- You need to turn on the Time-Off Management feature.

Important: Be prepared to set up the Time-Off Management feature as soon as you enable it so that accruals in Payroll can be calculated correctly.

- Work calendars need to be assigned to your employees. For more information see [Assign Work Calendars to Employees](#).

Setting up Payroll Items to Work With Time-Off Management

Important: This topic applies to you if you use SuitePeople U.S. Payroll in your NetSuite account.

If you use SuitePeople U.S. Payroll, you already have payroll items set up in your NetSuite account. If you have payroll items set up for time off, make sure the Item Type is set to Earning:Sick or Earning:Vacation.

If you don't have payroll items set up for time off, use the following steps:

To create a payroll item for time off:

1. Go to Lists > Employees > Payroll Items > New.
2. If you use NetSuite OneWorld, select a subsidiary.
3. From the **Item Type** list, select **Earning:Sick** or **Earning:Vacation**.
4. In the **Item Name** field, enter a name for the payroll item. For example, "Personal Days" or "Vacation Time".
5. If necessary, select a **Pay Code**.
6. Click **Save**.

This payroll item will be associated with a time-off type in the step [Associating a Time-Off Type With a Payroll Item](#).

Associating a Time-Off Type With a Payroll Item

Important: This topic applies to you if you use SuitePeople U.S. Payroll in your NetSuite account.

You need to associate time-off types with the payroll items that you created or updated. For more information, see [Setting up Payroll Items to Work With Time-Off Management](#). Associating time-off types with payroll items ensures that:

- NetSuite associates time entries with the correct payroll item. Time entries track time-off usage against each payroll item. Employees who track time can see their booked time off on their timesheet.
- Accruals can be calculated based on hours worked. For more information about calculating accruals on an hourly basis, see [Accruals Based on Fixed Amounts and Accruals Based on Hours Worked](#).

If you use Payroll for multiple subsidiaries in your NetSuite account, you need to create separate time-off types for each subsidiary. You can't use the same time-off type with multiple subsidiaries. You also need to associate time-off types with payroll items that are associated with the same subsidiary.

For example, the subsidiaries Acme X and Acme Y both use Payroll. You set up a type called Vacation X for Acme X, and a type called Vacation Y for Acme Y. You also have a payroll item for Acme X called Vacation Pay X. You have another payroll item for Acme Y called Vacation Pay Y. To ensure that your time-off types work with payroll, you should associate the time-off type Vacation X with the payroll item Vacation Pay X. The time-off type Vacation Y should be associated with the payroll item Vacation Pay Y.

To create a time-off type that is associated with a payroll item:

1. Go to Setup > HR Information System > Time-Off Type > New.
2. In the **Name** field, enter a unique name for the type. The name specified here appears in time-off lists for time-off requests, time-off plans, and time-off changes.
As a best practice, if you use Payroll for multiple subsidiaries, you should include the subsidiary name in the time-off type name. For example, for a subsidiary called Acme X, you might want to name the time-off type **Vacation X**.
3. In the **Display Name** field, enter how you want the time-off type name to appear to employees. For example, you have different time-off types for different subsidiaries, departments, or locations. However, you want the type to appear the same to all employees.
4. To record usage without having an entitlement and accruing a positive balance, check the **Track Only** box.

 **Note:** When you change an existing time-off type to track-only, future accruals are not calculated. All balance entries prior to the change are saved and displayed in the time-off changes record. For more information, see [Viewing an Employee's Time-Off Balance](#).

5. Select a **Payroll Item**. This payroll item should be one that you created or updated in the step [Setting up Payroll Items to Work With Time-Off Management](#).
If you use Payroll for multiple subsidiaries, make sure that you select a payroll item that applies to the subsidiary for this time-off type.

 **Important:** A time-off type can be associated with only one payroll item.

6. In the **Minimum Increment** and **Increment Unit** fields, specify the minimum increment of time-off required for this type. Time-off requests can't be for less than this amount and must be multiples of this amount. You can leave the field value at zero or blank to allow employees to enter any value.
7. From the color selector, select the color that you want to use with this time-off type.
8. Click **Save**.

Creating a Time-Off Plan With Payroll

 **Important:** This topic applies to you if you use SuitePeople U.S. Payroll in your NetSuite account.

After you create time-off types and associate them with payroll items, you can create time-off plans. A time-off plan contains different time-off types and rules that you can assign to an employee. For example,

a time-off plan could include vacation time, personal time, sick days, and bereavement days. The plan would have rules that specify how these types of time off accrue. You might have different plans for part-time employees than for full-time employees. You might have different plans for employees who are paid hourly and employees who are paid a salary. You can create as many plans as you need to fulfill the time-off policies of your organization. Each time-off plan also contains time-off rules. These rules define entitlement for a time-off type and how that time-off type accrues within the plan. It's important to understand the difference between accruals based on fixed amounts and accruals based on hours worked.

Accruals Based on Fixed Amounts and Accruals Based on Hours Worked

When Time-Off Management and Payroll are integrated, time-off accruals can be automatically calculated in one of two ways:

Fixed Amount Per Period	Hours Worked (NetSuite U.S. Payroll)
The system calculates accruals based on a fixed amount (weekly, bi-weekly, monthly, semi-monthly, or annually).	The system calculates accruals based on the hours an employee works. This type of accrual might be appropriate for users who are paid hourly.
Time-Off Management calculates the accruals. You add the payroll items associated with each time-off type to the employee record in the Payroll > Accrued Time subtab.	Payroll calculates the accruals.
When you run payroll, accrual amounts and balances from Time-Off Management are included on employees' pay statements for the period ending date. Time-off balances also appear accurately in the Time-Off portlet in the Employee Center.	When you run payroll, accrual amounts and balances from Payroll are included on employees' pay statements for the period ending date. Time-off balances also appear accurately in the Time-Off portlet in the Employee Center.
You'll need to add payroll items for these accruals to the employee's record in the Payroll > Accrued Time subtab. This way, the payroll items show up on employees' pay statements.	Set up payroll items for these accruals on the employee's record in the Payroll > Accrued Time subtab. For more information, see Setting up Accruals Based on Hours Worked On the Employee Record for Payroll .
Annual entitlement can reset at the start of any month.	Annual entitlement must reset at the start of January.
Employees can carry over unused time off, and you can set carryover expiry limits.	You can use the Accrued Time subtab on the employee record to specify whether employees can carry over unused time off, but you can't set carryover expiry limits.

For each time-off type that you plan to use, decide which type of accrual works best with your time-off policies.

To create a time-off plan with payroll:

1. Go to Setup > HR Information System > Time-Off Plan > New.
2. In the **Name** field, enter a name for the time-off plan. This name appears wherever you need to select a time-off plan, such as the employee record. Name the plan so that you or someone else in HR can easily choose the right one for each employee.
3. Check the **Days Available Includes Future Accruals for the Year** box to include forecasted accruals through the end of the year. If you only want to include time off employees have accrued, leave the box unchecked.

4. From the **Reset Annual Entitlement At the Start Of** list, select the month when the entitlement period starts. The default setting is January.

Important: For a time-off rule that includes a time-off type that accrues based on hours worked, set **Reset Annual Entitlement At the Start Of** to **January**.

5. If necessary, select a **Subsidiary**, **Class**, **Department**, or **Location**. You can assign this plan only to employees who are associated with the department, class, location, and subsidiary you set here. If you don't set a these fields, you can assign this plan to anyone.
6. Click **Save**.

Setting up a Time-Off Rule With Payroll

Important: This topic applies to you if you use SuitePeople U.S. Payroll in your NetSuite account.

After you create a time-off plan, you'll need to define and apply rules to the time-off plan. Time-off rules let you decide how employees accumulate time off over time. The image below depicts the process for setting up accruals in a time-off rule:

To set up a time-off rule with payroll:

1. Go to Setup > HR Information System > Time-Off Plan.
2. Next to the plan you want to define rules for, click **Edit**.
3. Click **New Time-Off Rule**.
4. In the **Time-Off Type** field, select the type of time off to apply to the plan. To integrate with Payroll, choose a time-off type that you created in [Associating a Time-Off Type With a Payroll Item](#).
5. Specify the minimum tenure for this time-off type and whether it's in months or years. Typically, minimum tenure is used to increase the amount of time off employees are entitled to over a specific period of time. It can also be used to adjust an accrual or carryover rule at an employment milestone.

For example, you might want employees to start with 10 vacation days, then set an increase after five years of employment to 15 vacation days. To do this, you would add two time-off rules to the plan using the same time-off type. One rule would have a minimum tenure of zero with an entitlement of 10 vacation days. The second rule would have a minimum tenure of five years with an entitlement of 15 vacation days.

Note: If you set a minimum tenure on a time-off rule, keep in mind that the associated payroll item appears on employee pay statements only after an employee has met the minimum tenure.

Next, set up accruals for the time-off rule. Consider if you want time-off types to accrue by a fixed amount or by hours worked:

- [Setting up an Accrual Based on a Fixed Amount With Payroll](#)
- [Setting up an Accrual Based on Hours Worked With Payroll](#)

For more information, see [Accruals Based on Fixed Amounts and Accruals Based on Hours Worked](#).

Setting up an Accrual Based on a Fixed Amount With Payroll

Use the following procedure to set up an accrual based on a fixed amount.

To set up an accrual based on a fixed amount:

1. In the time-off rule, under **Accrual Method**, check the **Automatically Accrue** box.
2. From the **Accrues Based On** list, select **Fixed Amount Per Period**.
3. From the **Accrual Type** list, select whether you want to accrue time proactively or retroactively:
 - If employees accrue time off for the period they're about to work, select **Proactive**. Next, set the **Minimum Tenure**. If minimum tenure is set to zero, in the **Opening Balance for New Employees** field, choose one of the following:
 - **Full Amount for Accrual Period** - Employees' first accrual is the full amount for the accrual period. It's applied either on their start date, or the first day they are eligible to accrue based on the rules defined in their plan.
 - **Prorated Amount for Accrual Period** - Employees' first accrual is a prorated amount based on the number of working days remaining in the accrual period. It's applied either on their start date, or the first day they are eligible to accrue based on the rules defined in their plan.
 - **Zero** - Employees' first accrual takes place on the next regularly scheduled accrual date.

- If employees accrue time off for the period they've already worked, select **Retroactive**.

4. In the **Accrual Frequency** field, choose when time off accrues.

If you select **Biweekly** or **Weekly** as the accrual frequency, set the day of the next accrual. This determines the calendar day on which the accrual is applied.

Note: Annual and monthly accruals happen on the first day of the year or month for proactive accruals, and on the last day for retroactive ones. Semi-monthly accruals happen on the 1st and 15th for proactive, and on the 15th and last day for retroactive.

5. In the **Entitlement** field, enter how many days or hours employees earn each year.

6. In the **Entitlement Unit** list, select whether the entitlement is in days or hours.

The **Accrual Amount** and **Accrual Amount Unit** fields display the accrual rate based on your selections.

7. To enable an accrual limit, check the **Set Accrual Limit** box, then do the following:

In the **Accrual Limit** field, enter the maximum number of days that employees can accrue. For example, if you enter 15 days, your employees stop accruing time when they reach this limit. Employees start accruing time again when they use some of their accrued time.

The **Accrual Limit Unit** field displays the accrual limit rate based on your selections.

8. Set up how you want to manage carryover balances:

- To deduct unused time off from an employee's balance, clear the **Allow Employees to Carry Over Unused Time-Off** box.

- To allow carryover, check the **Allow Employees to Carry Over Unused Time-Off** box. Then do the following:

- To limit how much unused time off gets added to the next year's balance, check the **Limit the Amount of Time-Off Employees Carry Over** box. Then do the following:

1. In the **Maximum Carryover** field, enter the maximum amount of time off that each employee can carry over.
2. In the **Maximum Carryover Unit** field, select the unit of time for the maximum carryover field.

For example, employees are entitled to carry over 5 days. Enter 5 in the **Maximum Carryover** field, and then select **Days** in the **Maximum Carryover Unit** field.

- To expire carried over time off after a specific period of time, check the **Expire Unused Carryover** box. Then select which month the carried over time off should expire.

For example, if you select March, employees have up until the end of March to take this type of time off. If they do not book the time before it expires, it is removed from their plan and they can't use it anymore.

Note: If you select a month in the past, the expiry won't happen until next year. If you change the expiry month from a future to a past date (or vice versa), the change won't take effect until the following year—unless the current expiry month is in the future and you change it to another future date, in which case it can take effect this year.

- Check the **Reset Negative Balances to Zero at Year End** box to prevent employees from carrying over negative balances at the end of the year for this time-off type.
- To display expiry notification messages to employees in the Employee Center, check the **Show Balance Expiry** box. Notifications appear in the Employee Center when employees have time off that expires in the current month or next calendar month.

9. Click **Save**.

Continue to [Updating the Employee Record for Time-Off Management and Payroll](#).

Setting up an Accrual Based on Hours Worked With Payroll

Use the following procedure to set up an accrual based on hours worked.

To set up an accrual based on hours worked:

1. In the time-off rule, under **Accrual Method**, check the **Automatically Accrue** box.
2. From the **Accrues Based On** list, select **Hours Worked (NetSuite U.S. Payroll)**.
3. Click **Save**.

Continue to [Updating the Employee Record for Time-Off Management and Payroll](#).

Updating the Employee Record for Time-Off Management and Payroll

Important: This topic applies to you if you use SuitePeople U.S. Payroll in your NetSuite account.

After you create time-off rules in your time-off plans, you need to assign a time-off plan to each of your employees. If some of your time-off plans include accruals based on hours worked, you need to set up those accruals on the employee record.

Assigning a Time-Off Plan to an Employee

Use the following procedure to assign a time-off plan to an employee.

To assign a time-off plan to an employee:

1. Go to Lists > Employees > Employees.
2. Beside an employee, click **Edit**.
3. In the **Time-Off** subtab, select a plan from the **Time-Off Plan** list.
4. In the **Start Date for Time-Off Calculations** field, enter the date for time-off calculations. The date calculates the number of days that the employee is entitled to time off. It's based on the minimum and maximum tenures set in the time-off plan. If there's no value specified in this field, this employee can't be assigned to a time-off plan.
5. Click **Save**.

Adding Payroll Items to the Employee Record

To make sure payroll items associated to a time-off type show up on employees' pay statements, you'll need to add those items to each employee's record.

Important: Payroll items that accrue based on hours worked need additional setup. For more information, see [Setting up Accruals Based on Hours Worked On the Employee Record for Payroll](#).

To add payroll items to the employee record:

1. Go to Lists > Employees > Employees.
2. Beside an employee, click **Edit**.
3. Click the **Payroll** subtab, and then click the **Accrued Time** subtab.
4. In the **Sick/Vacation Time** list, select a payroll item.
5. Click **Save**.

When a payroll item is associated with a time-off type that accrues based on a fixed amount, the accrual appears on the employee's pay statement. It doesn't appear in the Accrued Hours field on the Accrued Time subtab.

Setting up Accruals Based on Hours Worked On the Employee Record for Payroll

You need to set up accrual rates for payroll items that accrue based on hours worked on each employee's record.

To set up accruals based on hours worked for an employee:

1. Go to Lists > Employees > Employees.
2. Beside an employee, click **Edit**.
3. Click the **Payroll** subtab, and then click the **Accrued Time** subtab.
4. In the **Sick/Vacation Time** list, select a payroll item that accrues by hours worked. The **Accrues Based On** field is set to **Hours Worked (NetSuite U.S. Payroll)**.
For example, you might have associated a time-off type with a payroll item called **PTO - Vacation**.
5. In the **Accrued Hours** field, enter a beginning balance if the employee has accrued time that's not in the system.
After the beginning balance is set, the system keeps track of this total.
6. In the **Accrue As** list, select **Per Hour Worked**.

Warning: If you select an option other than Per Hour Worked in the Accrue As list, it could result in inaccurate accrual balances on the employee's pay statement.

7. In the **Accrual Rate** field, enter the number of hours this employee accrues for each hour worked (for example, 0.04).
8. In the **Monetary Rate** field, enter the cost per hour of the accrued time.
9. Depending on whether your time-off policy allows carryover, you can do one of the following:
 - If you **do not** allow employees to carry over unused time off, check the **Reset at Year End** box. At the end of each calendar year, NetSuite sets the total accruals to zero and starts calculations again.
 - If you allow employees to carry over unused time off, **do not** check the **Reset at Year End** box.

10. If your company sets a limit for accrued time, enter the maximum number of hours that can be accrued in the **Maximum Hours** field.
11. Click **Save**.

When a payroll item is associated with a time-off type that accrues based on hours worked, the employee's accrual appears in the Accrued Hours field and on the pay statement.

Viewing an Employee's Time-Off Balance

To view an employee's time-off balance, go to Lists > Employees > Employees. On the Employees list, click **View** next to the employee you want to check, then click the **Time-Off** subtab to see a summary of their time-off balance for the entire year.

The **Available Now** subtab displays how much time off an employee has left, and how much they've used and scheduled for the current year. This subtab includes:

- **Available This Year** - If the **Days Available Includes Future Accruals** box on the Time-Off Plan page is checked, the time-off plan includes all future accruals and manual increases and decreases for the current year. For more information, see [Time-Off Plans](#).
- **Used This Year** - The amount of time off that's been used as of the current date.
- **Scheduled This Year** - The amount of time off that's been requested and approved, but not yet taken.
- **Available Now** - The total remaining time off for the current year.

The **Balances** subtab displays an employee's available balance as of the current date, based on the accruals and carry over rules defined in the time-off plan. This subtab includes:

- **Carried Over** - The amount of time off that's carried over as of the current date.
- **Accrued** - The amount of time off that's accrued as of the current date.
- **Used** - The amount of used time off.
- **Expired Carryover** - The amount of time off that's expired as of the current date.
- **Balance** - Displays the balance as of the current date based on the amount of time carried over, accrued, used, and any expired carry over.

Time-Off Changes

When an employee accrues or uses time off, or when time off expires or gets carried over, NetSuite creates a time-off change record. If you need to update an employee's time-off balance, you can create or adjust a time-off change record.

For more information, see:

- [Viewing Time-Off Changes](#)
- [Creating a Time-Off Change](#)

Viewing Time-Off Changes

The Time-Off Changes page displays a list view of all the time-off change records for the employees at your company. Time-off change records are created when time-off requests are approved, when

you make manual adjustments, when carryover is applied, when time off expires, and when automatic accruals are calculated. Each change is recorded separately so you can tell them apart.

To view time-off changes:

1. Go to Setup > HR Information System > Time-Off Change.
The Time-Off Change page displays a list of all time-off changes, sorted by most recent changes.
2. To filter the list of time-off changes, expand the **Filters** section and try these options:
 - To find time-off changes for a specific employee, select the employee from the **Employee** list.
 - To view time-off changes by time-off types, select a time-off type in the **Time-Off Type** list. To make multiple selections, hold down the Ctrl key.
 - To view time-off changes by time-off change type, select a time-off change type from the **Time-Off Change Type** list.

Note: When a time-off request for a future date that was previously approved is rejected, the associated time-off change record is deleted.

Creating a Time-Off Change

You can manually adjust an employee's time-off balance for any of the time-off types that are part of the employee's plan. If needed, you can correct mistakes to time-off balances by deleting the existing time-off change and submitting a new one. You can also submit a new time-off change with the required adjustment. You often need to create or edit a time-off change if an approved time entry is edited.

You can't create a time-off change for yourself or make adjustments to your own time-off balance.

Note: To preserve employee data for auditing purposes, you can't delete employee records for employees who have modified time-off balances. Instead, you should inactivate these employee records.

To adjust an employee's time-off balance:

1. Go to Setup > HR Information System > Time-Off Change > New.
2. Select the employee and the time-off type that you want to make the adjustments to.
3. In the **Amount** field, enter a negative or positive value.
4. In the **Amount Specified In** field, specify if this amount is in hours or days.

Note: When days is selected, the amount saves and displays in hours on the time-off change record. For example, you enter two days. It appears as 16 hours on the record when the employee's work calendar is set to an eight-hour work day. For more information, see the help topic [Setting Up a Work Calendar](#).

5. Enter the date when you want to apply this change.
6. If required, enter a description.
7. Click **Save**.

To delete a time-off change record, go to Setup > HR Information System > Time-Off Change. From the list page of all the time-off change records, click **Edit** next to the time-off change record you want to delete. From the **Actions** menu, select **Delete**. At the prompt, click **OK** to confirm.

Submitting Time-Off Requests on Behalf of Employees as an Administrator

You can submit a time-off request on behalf of employees. The employee must be active and have available time-off entitlements.

Common scenarios where this feature is useful include:

- Submitting requests for employees who are sick or have emergencies.
- Consolidating time-off balances for employees who may have missed submitting time-offs.

To submit a time-off request on behalf of an employee:

1. Go to Setup > HR Information System > Time-Off Request.
2. Click **New Time-Off Request**.
3. On the Request Time-Off page, check that **Submit On Behalf Of** is switched on.

4. In the **Employee** field, type the employee's name. As you type, suggested names appear that match what you've typed.
5. Click a name or press Enter to select the first employee on the list.
6. Note that the **Auto-Approve** box is checked by default so the request is automatically approved upon submission.

(Optional) If you want the employee's supervisor to review the request, clear this box.

Note: This box is checked and unavailable when:

- The employee selected is set up as a time-off self-approver.
- The time-off type you select is set up for auto-approval and the request duration is within the auto-approval threshold.

7. Specify the start and end dates of your request.
After you specify the date range using the calendar, each day appears in chronological order.

Message to Approver

 **Summary**

You are requesting **3 Sick days** from **April 6th** to **April 8th 2021**.

8. For each date in your request, select the type of time-off you are requesting. If the time-off type you select has multiple days available, the dates will fill in automatically.
You can also use a combination of time-off types for a time-off request.
9. To change a time-off type or adjust the duration, click the **Edit** icon beside the entry you want to change.
10. Make any required changes in the popup window that appears, and click **Done**.
11. Review the summary box for a breakdown of your request, and then click **Submit**.

An email is sent to the employee's supervisor informing them of the request.

Approving or Rejecting a Time-Off Request as an Administrator

 **Note:** You cannot approve or reject your own time-off request.

To approve or reject a time-off request:

1. Go to Setup > HR Information System > Time-Off Request.
2. Select **View** beside the time-off request that you want to approve or reject.
3. To approve the request, click **Approve**.
4. To reject the request, click **Reject**. Optionally, enter a reason for the rejection, and then click **OK**.

Rejecting an Approved Time-Off Request

Sometimes, employees submit a time-off request that gets approved, but then decide to during all or part of that time. In many cases, you can reject the time-off request to update their available balance.

Time-Off Requests That Appear on a Calculated Payroll Batch

To reject an approved time-off request that appears on a calculated payroll batch:

1. Remove the employee's paycheck from the payroll batch. See the help topic [Removing Paychecks from a Batch](#).
2. Reject the time-off request. See [Approving or Rejecting a Time-Off Request as an Administrator](#).
3. Add the employee back to the payroll batch. See the help topic [Adding Employees to a Payroll Batch](#).
4. Calculate the payroll batch again. See the help topic [Calculating a Payroll Batch](#).

Time-Off Management for Employees or Managers

With NetSuite Time-Off Management, you can get your time off approved before you take it. You can create and submit time-off requests using the Book Time Off button in the Time-Off portlet on your Employee Center home page. The types of time off and the rules for your plan are based on your company's policies and are set up by your HR Administrator. After you submit a time-off request, the approver gets an email notification.

 **Note:** To use time-off management as an employee or manager, you need to use your Employee Center role.

Submitting Time-Off Requests

[Requesting Time Off from NetSuite's Employee Center](#)

Use the following procedure to submit a time-off request.

 **Important:** If the Time-Off portlet doesn't appear on the home page of your Employee Center, then the Time-Off Management feature hasn't been enabled for your account. To add the Time-Off portlet to your Employee Center, contact your NetSuite Administrator or HR Generalist.

To submit a time-off request:

1. From the home page of your Employee Center, in the **Time-Off** portlet, click **Home**.
2. Click **Request Time-Off**.

- On the Request Time-Off page, specify the start and end dates for your time-off request.

You can't enter time off for days that aren't part of your work week. Non-working days and pending or approved whole day requests are grayed out and can't be selected.

Note: To request only one day off, click the day you want off in the calendar twice. The Dates field will automatically populate with the specified date.

After you specify the date range using the calendar, each day is displayed in chronological order.

Request Time-Off

Submit **Cancel**

Dates ★

February 06, 2017 to February 13, 2017

MON	FEBRUARY 06	
TUE	FEBRUARY 07	
WED	FEBRUARY 08	VACATION 3.5 days available
THU	FEBRUARY 09	SICK DAY 3 days available
FRI	FEBRUARY 10	
MON	FEBRUARY 13	FLEX 2 days available

Include a message to help make your case

Requesting 6 days of vacation.

Submit **Cancel**

- For each date in your request, select the type of time off you're requesting. If the time-off type you select has multiple days available, the corresponding date entries in the list are automatically filled for you.

For example, if you select **Vacation** with three days available, the first three days in the list are tagged as vacation days.

You can also use a combination of time-off types for a time-off request. For example, you can specify that you want to use a combination of vacation days and floating holidays.

The displayed days available takes into account time off that has already been approved for the year, but that you haven't taken.

If the time-off type is tagged as track only, no time off is accumulated, and only your usage is tracked. For example, you have no limit to the number of sick days that you can take. The sick day time-off type is tagged as track only.

Note: If your company lets you carry over unused time, and you're booking time off for next year, note the following. You don't see your carryover balance in the forecasted balance. Your carryover days are calculated at the end of the year to ensure you don't overbook your time off for next year.

- To change a time-off type, or adjust the duration of the time off, click the **Edit** icon beside the entry that you want to change. Make any required changes in the popup window that appears, and click **Done**.

Summary
 You are requesting 3 Sick days from April 6th to April 8th 2021.

8. For each date in your request, select the type of time off you're requesting. If the time-off type you select has multiple days available, the corresponding date entries in the list are automatically filled. You can also use a combination of time-off types for a time-off request.
9. To change a time-off type or adjust the duration of the time off, click the **Edit** icon beside the entry that you want to change.
10. Make any required changes in the popup window that appears, and click **Done**.
11. Review the summary box for a breakdown of your request, and then click **Submit**.

For time-off types set with automatic calendar event creation, calendar events will also be created. The event can be viewed in your Calendar portlet and includes the employee as an attendee.

Viewing Time-Off Requests

Use the following procedure to view time-off requests.

To view time-off requests:

1. From the home page of your Employee Center, in the **Time-Off** portlet, click **Requests**.

2. To see more time-off requests, in the portlet, click **View All Requests**.
3. On the Time-Off Request page, you can:
 - See the current status of the request, who submitted it, the date range, and the time-off types used for the request.
 - Use the **Filters** section to find a specific time-off request, or view a history of requests for a specific employee, or a specific status. To make multiple selections, hold down the Ctrl key.
 - Click **View** beside a time-off request to see the original request.
4. To export the information, in the header row above the list, click one of the following icons:
 - the CSV Export icon
 - the Excel icon
 - the PDF icon
5. To print the list of time-off requests, click the Printer icon.

Viewing Time-Off Balances

From the Time-Off portlet in the Employee Center, you can see a summary of time-off balances, pending requests, and any upcoming booked time-off for yourself. If your role has the appropriate permission, you can also view time-off information for your subordinates.

Time-Off			
Home Balances Requests			
	To Be Booked (Days)	Scheduled + Used (Days)	
PERSONAL	4	1	1 Scheduled
VACATION	15	5	5 Used
SICK		0	
View Balance Details			

Note: Your time-off balances are view only and can't be edited. If you see something that is incorrect, contact your HR administrator.

To view time-off balances:

1. From the home page of your Employee Center, in the **Time-Off** portlet, click **Balances**. By default, your balance is displayed in days.

Tip: To view time-off balances in hours instead of days, click the **More** icon, and then select **Switch to Hours**.

2. To see a list of pending requests, upcoming time-off, and past time-off, or to view your balance in hours, click **View Balance Details**.

Approving or Rejecting Time-Off Requests

If your role has the right permissions, you'll receive email notifications when you have time-off requests to approve. You can use the links in the email to quickly approve or reject the request. For time-off types set with automatic calendar event creation, calendar events are created as soon as you approve the request. You can view the event in your Calendar portlet, and it includes the employee as an attendee.

Watch the following help video for information about approving or rejecting time-off requests:

Quickly Approving or Rejecting Time-Off Requests

Use the following procedure to approve or reject time-off requests.

To quickly approve or reject a time-off request:

1. Do one of the following:
 - From the home page of your Employee Center, in the **Home Links** portlet, under **Time-Off**, click **Approve Time-Off Requests**.
 - From the email notification, use the links to take action on the request:
 - To approve the request, click **Approve**.
 - To reject the request, click **Reject**. Optionally, enter a reason for the rejection, and then click **OK**.

You can't reject only a specific day in a multiple day time-off request. You'll need to reject the whole request.

Rejected time-off requests can't be resubmitted.

Reviewing Details of a Specific Request

You can view more details of a specific request. For example, you can check whether the employee has enough time-off balance for the request.

To review details of a specific request before you approve it:

1. From the email notification, click **View Record**.
2. On the Request Time-Off page, review the request details.

Request Time-Off

Approve **Reject** **Cancel**

2. Do one of the following:
 - To approve a request, click **Approve**.
 - To reject a request, click **View Request**, and then click **Reject**. You are prompted to enter a comment, which is sent to the employee.

 **Note:** A rejected request cannot be resubmitted.

Canceling Time-Off Requests

After you submit a time-off request, you can cancel pending and approved time-off requests for a future date. Time-off calendar events will be deleted when you cancel an approved time-off request.

 **Note:** Approved time-off requests that are associated with a locked timesheet can't be canceled. If your time-off balances need to be corrected because you didn't take scheduled time off, contact your administrator.

To cancel a time-off request:

1. From the home page of your Employee Center, in the **Time-Off** portlet, click **Requests**.
2. Select the time-off request that you want to cancel.
3. Click **Cancel Request**.

Time-Off Reports

The Time-Off Management feature comes with a variety of reporting tools and saved searches you can use to pull, view, and analyze your time-off data:

- [Available Time-Off Report](#)
- [Time-Off Balance Summary Report](#)
- [Time-Off Balance Details Report](#)
- [Time-Off Tracking Reports](#)
- [Time-Off Management Ad Hoc Reports](#)

For more information, see the help topic [Reporting Overview](#).

Time-Off Management Ad Hoc Reports

You can create ad hoc reports to fit your company's specific needs. For an ad hoc report, select the type of data you want to report on and the report format. Then, decide how you want to subtotal and group the information.

To create a report, go to Reports > New Report. Then, choose the data metric to include in your report. For Time-Off Management, you can choose from Time-Off and Time-Off Balance Adjustments.

For more information, see the help topics [Ad Hoc Reports](#) and [Choices for Ad Hoc Reports](#).
