This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Non-Profit Management

Non-Profit SuiteApps tackle the unique accounting and reporting challenges nonprofits face. These industry-specific SuiteApps give you data structures, roles, and dashboards for nonprofit accounting and constituent management.

Nonprofits can connect their fundraising solution with NetSuite using structured integration points in the data model. Alternatively, nonprofits can use the SuiteApps as a basic fundraising management solution.

Important: The Non-Profit SuiteApps are available only for North America (NoAM), United Kingdom (UK), Australia, and New Zealand (ANZ).

Read the following topics to learn more about Non-Profit SuiteApps:

- [Non-Profit Financial Management](#)
- [Non-Profit Financial Metrics](#)
- [Non-Profit Editions](#)
- [Social Impact Donation Edition](#)
- [Social Impact Starter Edition](#)
- [Social Impact Standard Edition](#)
- [NFP SuiteApps Update Verification](#)
- [Online Donations](#)
- [Indirect Cost Allocation for Grants](#)

Non-Profit Financial Management

NFP Financials is the main bundle for Social Impact SuiteSuccess editions. It gives you data structures for nonprofit accounting, constituent management, and grants.

In this chapter:

- [Setup for NFP Financials](#)
- [Revenue Restriction Management](#)
- [Grant Management](#)
- [Pledge and Donation Management](#)
- [Non-Profit Specific Reports](#)

SuiteApp Availability

NFP Financials is a managed SuiteApp that's automatically updated whenever there are new features or enhancements.

For instructions to set up and install the SuiteApp, see [Setup for NFP Financials](#).

Setup for NFP Financials

Applies to: Administrator

Setting up NFP Financials includes installing the SuiteApp and configuring settings in your account.

You'll need the Administrator role to finish installing and configuring it.

For installation and configuration instructions, see the following topics:

- [Installing NFP Financials](#)
- [Configuration for NFP Financials](#)
- [Custom Segments for NFP Financials](#)
- [Creating Segment Codes](#)
- [Modifying or Inactivating Segment Codes](#)
- [Constituents](#)
- [Items for Revenue and Expense](#)

Installing NFP Financials

Applies to: Administrator

You can install NFP Financials as a SuiteApp in your account.

Deployment Considerations for NFP SuiteApps

Keep these deployment considerations in mind before installing or updating the NFP SuiteApps:

- Before you install NFP Financials, reach out to your NetSuite sales or account rep to get the SuiteApp provisioned for your account.

- Only users with the Administrator role or SuiteBundler permission can install NFP SuiteApps.
- Don't rename classifications (Department, Class, Location, Subsidiary, or Account) with the same names as the custom segments in the NFP Financials SuiteApp. Otherwise, you might run into issues when updating the NFP SuiteApps. For more information, read the topic [Custom Segments for NFP Financials](#).
- Custom Segments are unlocked, so you can change them and their related Custom Record definitions. However, when you update the bundle, any changes you made to Custom Segments go back to how they are in the SuiteApp, except for these field values:
 - Label
 - Mandatory check box
 - Default Selection
 - Default Record Access Level
 - Default Search/Reporting Access Level
 - Sourcing lists from Transactions, Transaction Columns, Entities, CRM, and Items

To Install NFP Financials

1. Go to Customization > SuiteBundler > Search & Install Bundles.
See the help topic [Bundle Searches Overview](#) for a description of bundle search functionality.
2. In the **Keywords** field, enter the bundle number 253068 and press Enter.
3. In the **Name** column, click **NFP Financials**.
The Bundle Details page opens.
4. Click **Install**.
5. In the popup window, click **OK**.
The Review the Preview Bundle Install page opens.
This page lists bundle objects that will be installed, or for configuration bundles, the settings that will be copied. Here, you can say how to handle conflicts between bundle objects and target account objects with the same names or script IDs, pick installation preferences for some objects, and lock some objects so users can't change them. For details, see the help topic [Reviewing the Preview Bundle Install Page](#).
6. Click the **Install Bundle** button to begin the installation process.
For details, see the help topic [Starting the Bundle Installation Process](#).

 **Note:** Review the [Bundle Installation Notes](#) before you begin the process of installing a bundle.

Configuration for NFP Financials

 **Applies to:** Administrator

Roles and Permissions for NFP Financials

 **Applies to:** Administrator

The Administrator role is required for the initial setup of NFP Financials.

Report Configuration

Applies to: Administrator

You need to select and save the report layout in your account for FASB reports and the Grant Statement of Activity report.

The custom layout you pick for these reports doesn't stick when the SuiteApp's installed. You only have to do this setup in each account where the SuiteApp's installed. The Statement of Cash Flow report uses a standard layout and doesn't need any setup.

To configure the reports:

1. Select and open the report.
 - For FASB reports, go to NFP Financial Center > Financial Reports, and then select a report.
 - For the Grant Statement of Activity, go to NFP Financial Center > Grant Management > Grant Statement of Activity.
2. At the bottom of the report page, click **Customize**.
3. Near the top of the Financial Report Builder page, click **Edit Layout**.
4. In the **Layout** list, select the following layouts for the reports. Statement of Cash Flow is included for completeness. It should not require configuration.

Report	Layout
Statement of Activity	FASB Stmt of Activity Layout
Statement of Cash Flow	Standard Cash Flow Statement Layout (US)
Statement of Financial Position	FASB Financial Position (US)
Statement of Functional Expense	FASB Stmt of Expense Layout
Grant Statement of Activity	Grant Activity Layout

5. Click **Save**.

All the financial reports are designed for U.S. subsidiaries' requirements. You must customize the reports for other countries. For more information, see [Non-Profit Financial Reports](#).

By default, Release from Restriction accounts start with 69, and functional expense accounts start with 72. If you're not using these account defaults:

- Specify which accounts are Release from Restriction accounts. To tag an account as a Release from Restriction account, go to the Edit Account page, and then select **Release from Restriction** from the **Applies To** list.
- Make a copy of the report and then manually update it based on the appropriate account numbers.

Custom Segments for NFP Financials

Applies to: Administrator

Custom Segments are classification fields you can set on different transactions. This topic's about custom segments just for nonprofit organizations. For general information, see the help topic [Custom Segments](#).

You can track revenue and expenses with custom segments. Custom segments show up as fields or columns on line items in grant opportunities, pledges, donations, and other transactions. You can run reports on these segments for your nonprofit leadership to review. For details on reporting, see [Non-Profit Specific Reports](#).

All the included custom segments have general ledger impact. Segment values that are saved on transaction instances are displayed on the GL Impact page for those transactions. If a period is closed, you cannot change segment values that impact the general ledger on any transactions in the period.

 **Warning:** All custom segment fields are at the line-item level of transactions. Don't remove segments at the line level. You can add these custom segments to transaction headers if needed.

NFP Financials has these custom segments with some sample values in the following table. These custom segments apply to all social impact editions.

Custom Segment	Purpose	Affected Reports	Values
Restriction	Use this segment to tag contributed revenue as restricted by the donor. This segment also helps you manage the release of restricted funds. Always tag all expenses and non-contributed revenue as Without Donor Restrictions. This segment shows up as a column at the line-item level on transactions and other record types. This field is required.	Affected reports include Financial Accounting Standards Board (FASB) reports. For details, see Non-Profit Financial Reports. Key affected reports may include: - Statement of Activity - Grant Statement of Activity - Statement of Cash Flow - Statement of Financial Position - Statement of Functional Expense - Restricted Revenue by Account - Restricted Revenue by Program - Restricted Revenue by Program This is not an exhaustive list of affected reports.	The Restriction field is required. Included values are: - Without Donor Restrictions - With Donor Restrictions  Note: Do not delete or inactivate the included values. If you delete these values, financial reporting, restriction-based reporting, and KPIs are affected. If you add values, be sure to add rows for the new values on the Statement of Financial Position report. To manage the values for this segment, go to NFP Financial Center > Data Management > Restriction. You can edit the names of existing restrictions and add new ones.
Program	This segment helps you manage programs. For revenue transactions, use it to show why a donor placed a restriction. For expense transactions, use it to show which program the expense's for. This segment shows up as a column at the line-item level on transactions, the Project form, and other record types.	Affected reports include Non-Profit Revenue Reports and Non-Profit Expense Reports. Key affected reports may include: - Program Revenue by Month - Program Revenue by Year - Program Revenue Detail - Giving Statistics by Constituent - Giving Statistics by Program - Giving Statistics by Type - Net Assets by Program - Program Expenses by Year	Set up your own values for this segment. A value called Unrestricted is provided for transactions that are not restricted to a specific program. Go to NFP Financial Center > Data Management > Program > New to add programs.

Custom Segment	Purpose	Affected Reports	Values
		Program Expense Detail This is not an exhaustive list of affected reports.	
Grant	This segment helps you manage grants. You can use it to track a grant's revenue and expenses. This segment shows up as a column at the line-item level on transactions, the Project form, and budget and allocation schedules.	- Statement of Activity - Grant Statement of Activity - Grant Expenses by Year - Grant Expense Detail - Net Assets by Grant - Overdue Grant Payments - Upcoming Grant Milestones Report - Unbilled Grants Report	Set up your own values for this segment. Go to NFP Financial Center > Data Management > Grant > New to add grants.
Time Restriction	Use this segment to tag revenue or funding that a donor restricted for use in a future year. Multiyear grant funding usually uses this segment. This segment shows up as a column at the line-item level on transactions.	Release from Time Restriction	Included values represent fiscal years. Go to NFP Financial Center > Data Management > Time Restriction > New to add or edit the values.
Region	Use this segment to tag revenue or funding a donor restricted for a specific region or area. For expense transactions, use this segment to tag the region where the money's spent. This segment shows up as a column at the line-item level on transactions, the Project form, and allocation schedules.	Affected reports include Non-Profit Revenue Reports and Non-Profit Expense Reports .	Set up your own values for this segment. For example, your regions may be cities, states, countries, or any other geographical area. Go to NFP Financial Center > Data Management > Region > New to add regions.
Revenue Type	This segment helps you manage revenue streams. Use it to tag revenue transactions for major sources, like donations and grants. This segment shows up as a column at the line-item level on transactions (except for purchase and expense transactions) and other record types.	Non-Profit Revenue Reports, including: - Revenue Stream Distribution by Month - Revenue Stream Distribution by Year - Revenue Stream Distribution Detail - Comparative Revenue Summary - Giving Statistics by Type	Included values are: - Donation - Event - Fee for Service - Grant - Membership - Sale of Goods

Custom Segment	Purpose	Affected Reports	Values
			Note: Do not delete or inactivate the included values. If you delete these values, revenue-based reporting and KPIs are affected. You can rename the values and add new ones. To manage the values for this segment, go to NFP Financial Center > Data Management > Revenue Type. You can edit the names of existing revenue types and add new ones.
Revenue Subtype	Use this segment to track a major revenue source in more detail. This segment shows up as a column at the line-item level on transactions (except for purchase and expense transactions) and other record types.	Non-Profit Revenue Reports, including: ■ Revenue Stream Distribution by Month ■ Revenue Stream Distribution by Year ■ Revenue Stream Distribution Detail ■ Comparative Revenue Summary ■ Giving Statistics by Type	Included values by suggested revenue type value are: ■ Suggested for Donation □ Cash Donation □ Event Donation □ Gift in Kind □ Matching Gift □ Pledge □ Recurring Donation □ Stock Gift □ Tribute Gift ■ Suggested for Event □ Ticket Sale ■ Suggested for Fee for Service □ Government Services □ Program Service ■ Suggested for Grant □ Contribution Grant □ Exchange Agreement ■ Suggested for Membership □ Corporate Membership □ Individual Membership ■ Suggested for Sale of Goods □ Merchandise

Custom Segment	Purpose	Affected Reports	Values
			Note: Do not delete or inactivate the included values. If you delete these values, revenue-based reporting and KPIs are affected. You can rename the values and add new ones. To manage the values for this segment, go to NFP Financial Center > Data Management > Revenue Subtype. You can edit the names of existing revenue subtypes and add new ones.
Functional Expense	Use this segment to tag expense transactions by their purpose, like program service, fundraising, or general admin. You'll need this segment to create the Statement of Functional Expense report. This segment shows up as a column at the line-item level on transactions and on the Budget and Allocation form.	- Program Expenses by Year - Statement of Functional Expense	Included values are: - Fundraising - Management & General - Program Service Note: Do not delete or inactivate the included values. If you delete these values, expense-based reporting and KPIs are affected. You can rename the values and add new ones. To manage the values for this segment, go to NFP Financial Center > Data Management > Functional Expense. You can edit the names of existing expenses and add new ones.

You can import values for custom segments using CSV Import. For details, see the help topics [CSV Import and Custom Segments](#) and [Custom Segment Value Import](#). For more information on creating and editing values, see the help topic [Custom Segment Values](#)

To view, modify, or create any Custom Segments, go to Customization > Lists, Records, & Fields > Custom Segments. For details, see the help topic [Custom Segment Creation](#).

Warning: You must not rename the classifications (Department, Class, Location, Subsidiary, or Account) with the same name as any of the custom segments listed in the table above. Otherwise, you might have issues when updating the NFP SuiteApps.

Important: Custom Segments are unlocked, so you can modify Custom Segments and corresponding Custom Record definitions. However, a bundle update reverts Custom Segment modifications to the state in the SuiteApp, with the exception of the following field values:

- Label
- Mandatory check box
- Default Selection
- Default Record Access Level
- Default Search/Reporting Access Level
- Sourcing lists from Transactions, Transaction Columns, Entities, CRM, and Items

You can add new custom fields to related custom records, and they won't get overwritten by bundle updates.

Note: If you create a new custom segment, use Segment Code for the Source List. On the Custom Segment page, click **Application & Sourcing**, and then click **Transaction Columns**. From the Source List, select **Segment Code (Segment Code)**. Click **Custom Record Types**, and then check the **Segment Code** box.

Permissions for NFP Financials Custom Segments

Applies to: Administrator

Custom segments have three permission levels: Record Access, Search/Reporting Access, and Value Management Access. For the custom segments with NFP Financials, the default record and search/reporting access level is Edit.

Value Management Access levels are configured for five standard NetSuite roles as shown in the following table.

Custom Segment	Standard Role Value Management Access Levels				
	CFO	CEO	Accountant	A/R Clerk	A/P Clerk
Restriction	Full	Edit	View	View	View
Program	Full	Edit	View	View	View
Grant	Full	Edit	Edit	Create	Create
Time Restriction	Full	Edit	View	View	View
Region	Full	Edit	View	View	View

	Standard Role Value Management Access Levels				
Custom Segment	CFO	CEO	Accountant	A/R Clerk	A/P Clerk
Revenue Type	Full	Edit	View	View	View
Revenue Subtype	Full	Edit	View	View	View
Functional Expense	Full	Edit	View	View	View

Permissions for custom segments are complex. For more information, see the help topic [Permissions for Managing Custom Segments and Values](#).

Creating Segment Codes

Applies to: Administrator

Use segment codes to set which combinations of custom segments are valid on different transactions. Set up these codes to help keep your data accurate and make sure your internal controls work during transaction entry.

Set up the segment codes for your organization. For each code, pick the custom segment values it should use. Program and Restriction are required custom segments.

The codes you set up show up as options in the Segment Code list at the line-item level on transactions. The list only shows segment codes for the selected Subsidiary in the transaction. When you pick a segment code for a line item, the custom segment and other segmentation fields use the values from that code.

By default, the Record Access permission level is Edit for custom segments included in NFP Financials. To prevent users from changing the segment value after a segment code is selected, change the Record Access permission level to View for specific roles. For more information, see [Permissions for NFP Financials Custom Segments](#).

For example, you may create a code named CASH-AP-CA and specify the following custom segment values:

- Restriction – With Donor Restrictions
- Program – Abandoned Pets
- Region – California
- Revenue Type – Donation
- Revenue Subtype – Cash Donation

On a transaction, such as Donation, select CASH-AP-CA for a line item. The specified custom segments are populated from the code record.

To create new segment codes:

1. Ensure that you have all the required custom segments set up. See [Custom Segments for NFP Financials](#).
2. Go to NFP Financial Center > Data Management > Segment Code > New.
3. In the Name field, type a meaningful name for your code, following your own conventions.
For example, CASH-AP-CA could be a code to stand for the combination of revenue type, program, and region.

4. In the **Subsidiary** field, click one or more subsidiaries for the code.

 **Note:** The segment code is only available on the specified subsidiaries. On transactions, the Segment Code list is restricted by subsidiary.

5. If you use **Department**, select the appropriate classification to associate with the segment code. For information about Departments, see the help topic [Departments and Classes Overview](#).
6. From each applicable custom segment list, select the values to associate with the code. Program and Restriction are required fields. For example, from the **Functional Expense** list, select **Fundraising**.
7. Click **Save**.

Modifying or Inactivating Segment Codes

 **Applies to:** Administrator

You can modify or inactivate existing segment codes.

To modify a segment code:

1. Go to NFP Financial Center > Data Management > Segment Code.
2. Click **Edit** next to the segment code you want to modify.
3. On the Segment Code page, modify the code as needed.
4. To inactivate the code, check the **Inactive** box.
5. Click **Save**.

Constituents

 **Applies to:** Administrator

Constituents are people and organizations your nonprofit works with. They include volunteers, donors, and recipients. Constituent records let you track all your constituent info in one place.

You can create constituents and link them to NFP transactions, like pledges, grants, contributions, and merchandise sales. Constituent is a required field in these transactions. So, you'll need to create or import initial constituent records during setup.

The constituent record is the standard customer record with a new name. Since constituents use the standard customer record, you might still see the portlet title as Customers, like on custom dashboards.

For information about data in this record, see the help topic [Customers](#).

The **Giving Statistics** subtab in the Constituent record provides details of contributions made by the constituent.

To create a Constituent record:

1. Go to Lists > Relationships > Constituents > New.
2. For **Type**, choose **Company** or **Individual**.
The arrangement of the fields on the page changes depending on your selection.

3. Complete the fields for the constituent as desired. Required fields are identified by a gold asterisk (*).
4. When you have finished, click **Save**.

To update a Constituent record:

1. Go to Lists > Relationships > Constituents.
2. Locate the appropriate constituent record and click **Edit**.
3. Change any fields as appropriate.
4. Click **Save**.

To delete a Constituent record:

1. Go to Lists > Relationships > Constituents.
2. Locate the appropriate constituent record and click **Edit**.
3. From the **Actions** list, select **Delete**.
The system displays a popup window asking if you are sure you want to delete the record.
4. Click **OK**.

For information about importing constituent records, see the help topics [Importing CSV Files with the Import Assistant](#), [Guidelines for CSV Import Files](#), and [Relationships Import Type](#).

Creating a Program

i Applies to: Administrator

A program is a custom segment. For details, see [Custom Segments for NFP Financials](#).

This segment helps you manage programs. For revenue transactions, use it to show why a donor placed a restriction. For expense transactions, use it to show which program the expense's for.

You can set up your own values for this segment. There's an Unrestricted value for transactions that aren't tied to a specific program.

To create a program:

1. Go to NFP Financial Center > Data Management > Program > New.
2. In the **Name** field, enter a name for this program. The name you enter here appears in program lists on transactions.
3. From the **Parent** list, select the larger parent if the program is a subprogram or a smaller portion of another program.
If your role has the necessary permissions, you can click **New** to create a new program record to be the parent.
If you select a parent in this field, the name of this program is shown following the parent program and a colon in program lists.
4. From the **Program Manager** list, select the manager of the program.
If your role has the necessary permissions, you can click **New** to create a new employee record if needed.

5. In the **Start Date** field, type or select the date that the program becomes effective.
6. In the **End Date** field, type or select the date that the program expires.
7. Enter additional information as necessary. You can enter or view information related to notes and translation.
The Program page has subtabs. The subtabs that display on the page are determined by the setting and options you have enabled.
8. On the **Program Statistics** subtab, you can view summarized searches, including lifetime net assets, Year-to-Date (YTD), program contributors, yearly revenue, and yearly expense.
9. Click **Save**.

Items for Revenue and Expense

 **Applies to:** Administrator

Items in NetSuite have default general ledger accounts and classification info (Department and Class) for sales and purchase transactions. Most items you'll need for NFP Financials are just for financial info, not for inventory. For general information about items in NetSuite, see the help topic [Using Item Records](#).

- **Revenue and expense accounts** – Depending on the item type (for sale, purchase, or resale), you'll need an income account, expense account, or both. You'll set these accounts on the Accounting subtab of the item record. You can also pick deferred revenue and deferred expense accounts on the Accounting subtab.
- **Tax schedule** – Tax schedules are required if the Advanced Taxes feature's enabled. The tax schedule on an item decides how NetSuite calculates taxes for each tax nexus. You can set up non-taxable schedules for donation items that aren't subject to tax.
- **Billing schedule** – If the full revenue is not booked at the time of the award or contract, you can link a billing schedule to the item on the Sales/Pricing subtab. Examples of items with billing schedules include service fees, exchange agreements, or pledges that are not a promise to pay.

For information about billing schedules, see the help topic [Advanced Billing Overview](#).

- **Amortization template** – You can link a predefined amortization template to an item for purchase or resale on the Revenue Recognition/Amortization subtab. Amortization templates show how expenses are recognized over future periods. If you set an amortization template, you'll also need to pick a deferred expense account on the Accounting subtab.

For more information about deferred expenses and amortization, see the help topic [Expense Amortization](#).

Non-inventory or service items for sale or resale count as revenue on sales transactions. In NetSuite, non-inventory and service are item types, and for resale and for sale are subtypes.

Non-inventory or service items for purchase or resale count as expenses on purchase or payables transactions. You'll need expense items for any expenses with quantities and receipts. For other expenses, you can set the general ledger account right in the transaction.

Important: The **Can Be Fulfilled/Received** box on the item Preferences subtab is checked by default for non-inventory items and other charges. Be sure to **clear the box** unless the item requires fulfillment or receipt. After you use the item in a transaction, this preference on the item record cannot be changed.

To create items, go to Lists > Accounting > Items > New and click the link for the type of item you want to create. For more information, see the help topic [Creating Item Records](#).

You can also import items using CSV files. For more information, see the help topics [CSV Imports Overview](#) and [Items Import](#)

Best Practices for Items Used for Nonprofits

The following are some best practices for nonprofit items:

- Create at least one revenue item for each income account you'll use for revenue transactions in your chart of accounts. The non-inventory for sale item type works best for these. For example, create items for contributions, membership dues, grant income, pledges, and other income sources as needed.
- If you use billing and amortization schedules, create items so you don't have to override the defaults when adding them to transactions.
- Leave the NetSuite segmentation fields (Department and Class) blank. You can set these values directly on the transactions.
- For expenses, create item records for things you buy for internal use or occasional resale.
- Use parent-child item hierarchy to set up logical relationships between items for easier reporting.
- Talk to your accountant before setting up tax schedules. Tax rules on items can vary a lot by state, exemption status, and item type.

Revenue Restriction Management

You can set restrictions on contributions, and after the donor-imposed restrictions have been met, release the revenue from its restriction.

This section contains information about:

- [Setting Restrictions on Contributions](#)
- [Restricted Revenue by Program](#)
- [Release from Time Restriction](#)
- [Releasing Revenue from Restrictions](#)

Setting Restrictions on Contributions

Set a restriction type for contributions. This is required for transactions. When entering donations, pledges, and grants, tag the transaction with the right restriction from the donor. You can set the restriction using the right Segment Code.

The restriction type can be set to:

- Without Donor Restrictions
- With Donor Restrictions

Using the time restriction segment, set a restriction by fiscal year.

You can also select any other fund type that you have added to the restriction custom segment.

For details, see [Custom Segments for NFP Financials](#)

You can also generate FASB reports.

Release from Use Restriction Report

This report shows details about restricted funds and revenue you can release. This helps you decide how much restricted revenue you can release each month.

For each program and grant, the report lists total funding, future restricted funding, revenue already released, total expenses, revenue to be released, and revenue available for release.

This is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

To view the Release from Use Restriction report:

1. Go to NFP Financial Center > Financial > Revenue to Release from Use Restriction.
NetSuite displays the report.
2. To view the details for a row, click on the program or grant in the row.

To print the report, click the print icon  at the bottom of the page.

Release from Time Restriction

This report shows info about funds restricted by time, where the restriction's for the current fiscal year. You can run this report at the start of the fiscal year and create a Release from Restriction transaction for the amount.

The report shows each transaction and the total funding restricted to the current fiscal year.

This is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

To view the Release from Time Restriction report:

1. Go to NFP Financial Center > Financial > Revenue to Release from Time Restriction.
NetSuite displays the report.
2. To view the details for a row, click on the program or grant in the row.

To print the report, click the print icon  at the bottom of the page.

Releasing Revenue from Restrictions

To see the revenue that can be released from restrictions, run the [Restricted Revenue by Program](#) report.

Once a year, run the [Release from Time Restriction](#) report to see how much revenue can be released in the current fiscal year. Create a Release from Restriction transaction for the amount.

After the donor-imposed restrictions have been met, release the revenue from its restriction.

To release revenue from restrictions:

1. Go to NFP Financial Center > Financial > Restriction Release Transaction > New.
NetSuite displays the Release from Restriction page.
2. On the **Lines** subtab, enter the details for the release. Add one credit line and one debit line.

The columns that appear are based upon your custom segments and the permissions set for your user role.

- a. In the **Account** field, select a Release from Restriction account. Use the same account for both debit and credit lines.
To tag an account as a Release from Restriction account, go to the Edit Account page, and then select **Release from Restriction** from the **Applies To** list.
 - b. In the **Memo** field, enter a memo to help you recognize this released fund.
 - c. Enter the **Debit** or **Credit** amount for the line.
 - d. Complete any of the following custom segment fields:
 - **Restriction** – For the credit line, select **Without Donor Restrictions**. For the debit line, select **With Donor Restrictions**.
 - **Grant** – Select the associated grant. Use the same value for both debit and credit lines.
 - **Program** – Select the program that identified the purpose of the restriction. Use the same value for both debit and credit lines.
 - **Region** – Select the associated region. Use the same value for both debit and credit lines.
 - **Time Restriction** – Select the fiscal year for the revenue. Use the same value for both debit and credit lines.
 - e. Click **Add**.
 - f. Repeat these steps for each line item.
3. Click **Save**.

Grant Management

You can record a grant in the proposal stage and turn it into a billing transaction when the award is won.

For contribution grants, all the revenue's booked when the grant's awarded.

For cost reimbursable grants (Exchange Agreements), invoices are created as needed to bill for actual time and expenses.

This grant management section includes the following topics:

- [Creating a Grant](#)
- [Editing a Grant](#)
- [Creating a Grant Opportunity](#)
- [Creating a Grant Milestone](#)
- [Upcoming Grant Milestones Report](#)
- [Grant Statement of Activity](#)
- [Overdue Grant Payments](#)
- [Unbilled Grants Report](#)

Creating a Grant

A grant is a custom segment. For details, see [Custom Segments for NFP Financials](#).

Use the grant record to store important information and report on that information.

Each transaction is associated with a grant ID at the line-item level for direct expense attribution.

 **Note:** If donors do not pay as promised, you can write off the grant. See [Writing off Pledge or Grant Receivables](#).

To create a grant:

1. Go to NFP Financial Center > Grant Management > Grant > New.
2. Under Primary Information:
 1. In the **Title** field, enter a name for this grant. The name you enter here appears in grant lists.
You can enter a short name or code here and include more information in the Grant Description.
 2. From the **Parent** list, select the larger parent grant if the grant is a subgrant or a smaller portion of another grant.
If your role has the necessary permissions, you can click **New** to create a new grant record to be the parent.
If you select a parent grant in this field, the name of this grant is shown following the parent grant and a colon in grant lists.
 3. In the **Grant Description** field, enter a description of this grant. There is a limit of 999 characters.
If you use codes for grant names, this is where you enter the full name of the grant.
 4. From the **Sponsor** list, select the constituent who is providing funds for the grant.
If your role has the necessary permissions, you can click **New** to create a new constituent record if needed.
 5. From the **Principal Investigator** list, select the principal investigator.
If your role has the necessary permissions, you can click **New** to create a new employee record if needed.
 6. In the **Total Amount** field, enter the total grant amount. Use your subsidiary's base currency for the amount.
 7. In the **Start Date** field, type or select the date that the grant becomes effective.
 8. In the **End Date** field, type or select the date that the grant expires.
 9. From the **Status** list, select the status of the grant.
If your role has the necessary permissions, you can click **New** to add another grant status option.
 10. From the **Form** list, select the form you want to use. For example, **NFP-Grant**.
 11. To inactivate this grant record, check the **Inactivate** box.
Inactivated records do not appear in lists or as options anywhere in your account.
To view inactivated grant records or reactivate them, go to NFP Financial Center > Grant Management > Grants, and then check the **Show Inactives** box.
3. In the Classification section:
 - a. From the **Grant Type** list, select the type of grant. For example: Federal, State, City, Foundation, or Corporate.
If your role has the necessary permissions, you can click **New** to add another grant type option.
 - b. From the **Grant Restriction** list, select one of the following options to indicate the type of grant restriction:

- Use – restricted for a specific purpose or project
 - Time – restricted for a specific time frame
 - Use and Time – restricted for both a specific purpose and time frame
- c. From the **Grant Term** list, select the term of the grant.
If your role has the necessary permissions, you can click **New** to add another grant term option.
- d. From the **Grant Priority** list, select the grant priority.
If your role has the necessary permissions, you can click **New** to add another grant priority option.
- e. If this is a federal grant, in the **CDFA Number** field, enter the five-digit CDFA number. This field applies only to federal grants.
- f. If the grant is subject to Single Audit, check the A-133 box. This field applies only to federal grants.
- 4. In the Other Information section:
 - a. From the **Relationship Manager** list, select the relationship manager.
If your role has the necessary permissions, you can click **New** to create a new employee record if needed.
 - b. From the **Program Officer** list, select the program officer.
 - c. From the **Grant Lead** list, select the grant lead.
 - d. In the **Grant Application Date** field, type or select the date that the grant application is due.
 - e. In the **Grant Application Decision Date** field, type or select the date that a decision on the grant application is expected.
 - f. In the **Grant Inquiry Date** field, type or select the date that the grant inquiry letter was issued.
 - g. In the **Grant Inquiry Decision Date** field, type or select the date that the decision was received on grant inquiry letter.
- 5. Enter additional information as necessary. You can enter or view information related to child records, milestones, related records, notes, files, workflow, and translation.
The Grant page has several subtabs. The subtabs that display on the page are determined by the setting and options you have enabled.
- 6. On the **Related Records** subtab, you can view the related net assets, invoices, expenses, opportunities, grant orders, and projects.
- 7. Click **Save**.

Editing a Grant

A grant is a custom segment. For details, see [Custom Segments for NFP Financials](#).

Use the grant record to store important information and report on that information.

Each transaction is associated with a grant ID at the line-item level for direct expense attribution.

To edit a grant:

1. Go to NFP Financial Center > Grant Management > Grant.
2. Click **Edit** next to the grant you want to modify.

3. On the Grant page, modify the grant as needed.
4. To inactivate this grant record, check the **Inactivate** box.
Inactivated records do not appear in lists or as options anywhere in your account.
To view inactivated grant records or reactivate them, go to NFP Financial Center > Grant Management > Grants, and then check the Show Inactives box.
5. Click **Save**.

Setting Grant Receivables

To tag an account as a Grant Receivable account, go to the Edit Account page, and then select **Grant Receivable** from the **Applies To** list.

If a donor did not pay as promised, you can write off the grant. To write off grant receivables, see [Writing off Pledge or Grant Receivables](#).

To invoice a grant opportunity, see [Invoicing Grant Opportunities](#).

Creating a Grant Opportunity

Record a grant opportunity or grant proposal.

For generic information on the opportunity record in NetSuite, see the help topic [Creating an Opportunity Record](#).

After you have created a grant opportunity, you can convert it to a pledge order or new invoice. In the opportunity record, click the **Sales** subtab, and then click **Closed Transactions**.

To create a grant opportunity:

1. Go to Transactions > Sales > Create Grant Opportunities.
2. Under Primary Information:
 1. In the **Title** field, enter a name for this grant opportunity.
NetSuite assigns a number to the grant opportunity.
 2. Select the constituent in the **Constituent** field.
 3. From the **Grant** list, select a grant to associate with this opportunity.
 4. From the **Project** list, select a project to associate with this opportunity.
 5. Select a status for the opportunity.
If a transaction other than an estimate is included in the opportunity, the status is automatically set to **Closed - Won**.
 6. Enter a probability that the deal will close. This probability is used to determine the weighted total of the opportunity.
 - If you selected the status **Closed Lost**, the probability is automatically set to **0%**.
 - If you selected the status **Closed Won**, the probability is automatically set to **100%**.
 7. Enter the date you expect this opportunity to close.
3. Under Forecasting:
 1. The projected total is calculated in one of the following ways:
 - If there are no items selected on the **Items** subtab and there are no estimates or transactions included in the opportunity, you can enter a projected total.

- If the opportunity has items selected on the **Items** subtab, but no estimates or other transactions included in the opportunity, the total of the items selected appears as the projected total.
- If there is one estimate associated with the opportunity, and the estimate is marked to include in forecasts, the total of the estimate is shown as the projected total.
- If there are multiple estimates associated with the opportunity, the projected total is the sum of all the estimates marked to include in forecasts.

If you manually enter a projected total, that total appears until you click **Update Projected** on the **Items** subtab.

4. On the **Items** subtab:

1. The prospective constituent's currency is shown in the **Currency** field.
2. The exchange rate for this currency appears in the **Exchange Rate** field. You can enter a new exchange rate for this for this transaction only, or you can update the currency's record with the exchange rate you enter here.
3. In the Item column, select the item the constituent is interested in, and enter other information for this item.
4. Set the Revenue Type to **Grant**.
5. Set the Revenue Subtype:
 - If the prospective grant is a contribution, set the Revenue Subtype to **Contribution Grant**.
After the opportunity is created, you can convert the record to an invoice.
 - If the prospective grant is a cost reimbursable, set the Revenue Subtype to **Exchange Agreement**.
After the opportunity is created, convert the record to a pledge.
6. Click **Add**.
7. Repeat these steps for each item.

5. On the **Communication** subtab:

1. Create any events, tasks, or phone calls you want to associate with this opportunity.
2. On the **Files** subtab, attach any files you want to associate with this opportunity.
3. On the **User Notes** subtab, enter any internal notes related to this opportunity.

6. Click **Save**.

Converting a Grant Opportunity

After you have created a grant opportunity, you can convert it to a pledge order or new invoice.

- If the Revenue Subtype was set to Contribution Grant, convert the record to an invoice.
- If the Revenue Subtype was set to Exchange Agreement, convert the record to an award using Pledge | Order.

To convert a grant opportunity:

1. Open the grant opportunity.
2. Click the **Sales** subtab.
3. Click **Closed Transactions**.

4. Convert the opportunity:
 - If the Revenue Subtype was set to Exchange Agreement, click **New Pledge | Order**.
 - If the Revenue Subtype was set to Contribution Grant, click **New Invoice**. See [Invoicing Grant Opportunities](#).

NetSuite opens the correct form. The values in the fields are sourced from the grant opportunity.

Invoicing Grant Opportunities

Convert a grant opportunity to an invoice.

To invoice a grant:

1. Open the grant opportunity.
2. Click the **Sales** subtab.
3. Click **Closed Transactions**.
4. Click **New Invoice**.

NetSuite opens the correct form. The values in the fields are sourced from the grant opportunity.

Note: In 18.2, depending on the agreed-upon payment schedule, you may need to create multiple invoices for a single grant. Create the first invoice, change the due date and amount, and then save it. Copy the saved invoice, and change the due date and amount again. Repeat this as necessary. For example, if the payment schedule on a \$1,000 pledge is \$200 per month for five months, create an invoice for each \$200 monthly payment.

In 19.1, you can use the installments feature to create installment terms instead. For more information, see the help topic [Creating Installments](#).

5. From the **Form** list, select the form you want to use. For example, **NFP Invoice**.

Where available, fields are populated from the order.

6. Under Primary Information:
 - a. From the **Account** field, select the Grant Receivable account.
 - b. Accept or changes the constituent in the **Constituent** field.
 - c. Accept or enter the date in the **Date** field.
 - d. Select or enter an invoice due date.

If you are creating multiple invoices for a single grant, change the due date for this invoice.

- e. Select the posting period to which you want to post this invoice.
7. In the **Opportunity** field, select the grant opportunity associated with this invoice.
8. In the **Items** subtab, review or modify the items populated from the pledge order.

If you are creating multiple invoices for a single pledge, change the amount for this invoice.

Note: The Invoice page has several subtabs. The subtabs that display on the page are determined by the setting and options you have enabled. For generic information on the subtabs, see the help topic [Creating an Invoice](#).

9. Enter additional information as necessary. You can enter information related to billing, accounting, sales team, communication, and system information.
10. Click **Save**.

If you are creating multiple invoices for a single pledge, create a copy of this invoice to modify. Select **Action > Make Copy**.

11. When you receive a payment for the invoiced pledge, click **Accept Payment**. For more information, see the help topic [Customer Payments](#).

To tag an account as a Grant Receivable account, go to the Edit Account page, and then select **Grant Receivable** from the **Applies To** list.

Creating a Grant Milestone

Use grant milestones to track the milestones for grants, such as deadlines for various reports, approval deadlines, and so on. This enables your organization to comply with a grant's terms and conditions.

You can also set up automatic reminders to the designated staff responsible for the milestone. Reminders can be for sending required reports on time or following-up on requested approvals.

To create a grant milestone:

1. Go to the Grant Milestone page:
 - If you already have the grant open, in the Milestones subtab, click **New Grant Milestone**.
 - If you don't have the grant open, you can also go to NFP Financial Center > Grant Management > Grant Milestone.

NetSuite opens the Grant Milestone page.

Note: From the **Custom Form** list, you should select a preferred form, rather than keeping the default selection.

2. If not already populated, in the **Grant** list, select the grant for which you want to add milestones.
3. From the **Milestone Type** list, select the type of deadline.
4. In the **Milestone Description** field, enter a description of the milestone.
5. From the **Assigned To** list, select the responsible staff member.
After assigned staff members reach the milestone, they can complete the **Date Completed** field.
6. In the **Due Date** field, pick the date by which this milestone must be reached.
7. From the **Notify To** list, select additional staff members to receive automatic email notifications for the milestone.
Hold down the Shift key to select multiple members.
8. If required, add a note.
9. Click **Save**.

NetSuite automatically sends an email notification to the chosen staff member.

Upcoming Grant Milestones Report

This report lists all the upcoming milestones for grants in the selected time period. Use this report to make sure milestone tasks get done on time.

This is a summary grouped by the Grant Revenue Type

The report is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

To view the Grant Milestones report:

1. Go to NFP Financial Center > Grant Management > Grant Milestones.
The page displays milestones that are due in the next 10 days. You can make a copy of this report to change the time range.
Any milestones that are complete do not appear in the report.
2. To view the details for a milestone, click **View** in the row.

To print the report, click the print icon  at the bottom of the page.

Grant Statement of Activity

This report is like the regular Statement of Activity, but it only shows revenue and expenses for grants, either one or several.

You can also add columns for each grant. For information about the regular Statement of Activity report, see [Statement of Activity](#).

This report includes the following sections:

- Grant Revenue
- Grant Expenses
- Increase in Grant Net Assets (Revenue – Expense)
- Grant Net Assets at Beginning of Period
- Grant Net Assets at End of Period

To view the Grant Statement of Activity report:

1. Go to NFP Financial Center > Grant Management > Grant Statement of Activity.
NetSuite displays the report.
2. At the bottom of the page, select values in **Period** or **From** and **To** fields.
3. Change the filters to display grants as desired:
 - If the **Grant Any Of** filter is not visible, click **More** to display the additional filters, and select a grant or grants from the filter list.
 - From **Column** list, select **Grant (Custom)** to add the columns for grants.
4. Click **Refresh**.

To print the report, click the print icon  at the bottom of the page.

Overdue Grant Payments

This report lists all grants with outstanding payments (payment isn't received in full and is overdue).

This is a summary grouped by the Grant Revenue Type

If donors do not pay as promised, you can write off the grant. See [Writing off Pledge or Grant Receivables](#).

The report is a saved search. Saved searches let you filter and sort NetSuite data in advanced ways. For information about saved searches, see the help topic [Saved Searches](#).

To view the Overdue Grant Payments report:

1. Go to NFP Financial Center > Grant Management > Overdue Grant Payments.
2. To view invoice details for an overdue grant, click on the Document No in the row.

To print the report, click the print icon  at the bottom of the page.

Unbilled Grants Report

This report lists all awarded grants that haven't been billed yet (sales orders tagged as Grant Revenue aren't billed).

This is a summary grouped by the Grant Revenue Type.

The report is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

To view the Unbilled Grants report:

1. Go to NFP Financial Center > Grant Management > Unbilled Grants.
2. To view invoice details for an unbilled grant, click on the Document No in the row.

To print the report, click the print icon  at the bottom of the page.

Pledge and Donation Management

Record pledges and cash donations received from your donors.

You can convert pledges into invoices, which post to the general ledger. Donations impact the general ledger automatically.

You can later report on the revenue from these categories.

Specify any restrictions the donor may impose on the pledges or donations.

If donors do not pay as promised, you can write off the pledge.

This section includes the following topics:

- [Creating Pledges](#)
- [Invoicing Pledges](#)
- [Creating Cash Donations](#)
- [Writing off Pledge or Grant Receivables](#)

Creating Pledges

You can create an unconditional pledge—a promise to pay a set amount by the due date. Agree on the payment schedule with the donor (for example, a \$1,000 pledge could be \$200/month for five months).

When you enter and bill an unconditional pledge in full, the revenue's marked as a pledge receivable that ages by the due dates from related invoices.

For generic information about the Sales | Pledge order in NetSuite, on which this customized page is based, see the help topic [Creating Sales Orders](#).

To create a pledge:

1. Go to Transactions > Sales > Enter Pledge | Orders.
NetSuite opens the Pledge | Order page.
2. From the **Custom Form** list, select the form you want to use. For example, **NFP Pledge | Order**.
3. From the **Constituent** list, select the constituent for the pledge.
4. In the **Date** field, enter or select a posting date for the pledge.
The current date is entered by default.
5. If required, change the **Status** of the pledge.
The default status is determined in your accounting preferences.
The status can be Pending Approval or Pending Fulfillment.
6. From the **Appeal** list, select an appeal if the pledge was received as part of a campaign.
7. In the **Memo** field, enter a note.
Memos can later be included on reports and searches.
8. If the donor does not have conditions on the pledge, check the **Unconditional Promise** box. The box is selected by default.

Note: A pledge is unconditional if the donor's agreed to pay the amount based on the agreed schedule, with no conditions. In NetSuite, when you check this box, you have to bill the entire amount.

Sometimes the donor puts a condition on the pledge, and you'll need to complete certain actions before payments can start. Track these conditional pledges by unchecking the box and adding tasks for the needed actions. You can't bill the pledge order until those tasks are done.

For details on creating tasks, see the help topic [Working with CRM Tasks](#).

9. In the **Sales Effective Date** field, enter or select an effective date for the pledge.
10. From the **Grant** list, select the associated grant.
11. In the **Items** subtab, add items to the pledge.
The columns that appear are based upon your custom segments and the permissions set for your user role.
 - a. From the **Items** list, select the type of pledge item.
 - b. If applicable, enter a quantity and rate.
 - c. In the **Amount** field, enter the amount of the pledge item.
 - d. Populate the custom segment fields by selecting a Segment Code, or individually complete any of the following fields:
 - **Restriction** – If the constituent has not put any restrictions on the pledge, select **Without Donor Restrictions**. This field is required.
 - **Program** – Select the program that identified the purpose of the restriction, if applicable.
 - **Time Restriction** – Select the fiscal year for the revenue.
 - **Region** – Select the associated region.
 - **Revenue Type** – Set the revenue type to **Donation**.
 - **Revenue Subtype** – Set the revenue subtype to **Pledge**.
 - e. Enter additional information as necessary.

- f. Click **Add**.
 - g. Repeat these steps for each line item.
- 12. Enter additional information as necessary. You can enter information related to shipping, billing, accounting, sales team, and communication. For details, see the help topic [Creating Sales Orders](#).
- 13. Click **Save**.

Invoicing Pledges

You can record revenue from pledges. This also lets you report on revenue from pledges.

Depending on the payment schedule, you might need to create several invoices for a single pledge. Create the first invoice, update the due date and amount, and save it. Copy that invoice, change the due date and amount again, and keep repeating as needed.

For example, for a \$1,000 pledge paid at \$200/month for five months, you'd make one invoice for each \$200 payment.

For generic information about invoicing in NetSuite, see the help topic [Creating an Invoice](#).

 **Note:** If no conditions are placed on the pledge, you can create multiple invoices at once. To invoice a batch of unconditional pledge and membership orders, see the help topic [Invoicing Sales Orders](#). Exclude any conditional pledges from the batch.

To invoice a pledge:

1. Go to Transactions > Sales > Enter Pledge | Orders > List.
2. Next to the pledge you want to invoice, click **View**.
3. Click **Next Bill**.

 **Note:** In 18.2, depending on the agreed-upon payment schedule, you may need to create multiple invoices for a single pledge. Create the first invoice, change the due date and amount, and then save it. Copy the saved invoice, and change the due date and amount again. Repeat this as necessary. For example, if the payment schedule on a \$1,000 pledge is \$200 per month for five months, create an invoice for each \$200 monthly payment.

In 19.1, you can use the installments feature to create installment terms instead. For more information, see the help topic [Creating Installments](#).

NetSuite opens the Invoice page.

4. From the **Form** list, select the form you want to use. For example, **NFP Invoice**.
Where available, fields are populated from the order.
5. Under Primary Information:
 - a. Accept or changes the constituent in the **Constituent** field.
 - b. Accept or enter the date in the **Date** field.
 - c. Select or enter an invoice due date.
If you are creating multiple invoices for a single pledge, change the due date for this invoice.
 - d. Select the posting period to which you want to post this invoice.
6. In the **Opportunity** field, select the grant opportunity associated with this invoice.

7. In the **Items** subtab, review or modify the items populated from the pledge order.

If you are creating multiple invoices for a single pledge, change the amount for this invoice.

Note: The Invoice page has several subtabs. The subtabs that display on the page are determined by the setting and options you have enabled. For generic information on the subtabs, see the help topic [Creating an Invoice](#).

8. Enter additional information as necessary. You can enter information related to billing, accounting, sales team, communication, and system information.
9. Click **Save**.
If you are creating multiple invoices for a single pledge, create a copy of this invoice to modify. Select **Action > Make Copy**.
10. When you receive a payment for the invoiced pledge, click **Accept Payment**. For more information, see the help topic [Customer Payments](#).

Creating Cash Donations

You can record a cash gift from a donor and specify any restrictions they set on the donation. This lets you accurately assign the revenue to the right donor for compliance and reporting.

For generic information about Cash Sales in NetSuite, on which this customized page is based, see the help topic [Cash Sales](#).

To enter a cash donation:

1. Go to Transactions > Sales > Enter Donation | Cash Sales.
NetSuite displays the Donation | Cash Sales page.
2. From **Custom Form**, select the form you want to use. For example, **NFP Donation Form**.
3. Under Primary Information:
 - a. In the **Constituent** field, select a constituent.
 - b. Accept or enter the date in the **Date** field.
 - c. Select the posting period to which you want to post this cash donation.
 - d. From the **Appeal** field, select the campaign or appeal associated with this donation, if any.
 - e. In the **Memo** field, enter a memo to identify this cash donation.
4. In the **Items** subtab, add items to the cash donation.
The columns that appear are based upon your custom segments and the permissions set for your user role.
 - a. From the **Items** list, select the type of donation item.
 - b. In the **Amount** field, enter the amount of the donation item.
 - c. Populate the custom segment fields by selecting a Segment Code, or individually complete any of the following fields:
 - **Restriction** – If the constituent has not put any restrictions on the cash donation, select **Without Donor Restrictions**. This field is required.
 - **Program** – Select the program that identified the purpose of the restriction, if applicable.
 - **Region** – Select the associated region.
 - **Revenue Type** – Select the revenue type.

- **Revenue Subtype** – Select the revenue subtype.
 - **Time Restriction** – Set to the current fiscal year by default. Donations are not time restricted.
 - d. Enter additional information as necessary.
 - e. Click **Add**.
 - f. Repeat these steps for each line item.
 - 5. Enter additional information as necessary. You can enter information related to shipping, billing, accounting, sales team, and communication.
 - 6. Click **Save**.
- You can also print or email transaction details to the donor. For more information, see the help topic [Emailing Transactions](#). To include standardized customer messages in print or email, see the help topic [Customer Message](#).

Note: The cash donation entry page has several subtabs. Which subtabs show up depends on the settings and options you've enabled. For generic information about the subtabs, see the help topic [Entering a Cash Sale](#).

Writing off Pledge or Grant Receivables

If a donor doesn't pay as promised, you can write off the pledge or grant.

Use the Receivable Write-off custom transaction to clear overdue pledges or grant receivables and follow accounting rules.

Note: To use Receivable Write-Off transaction, you must set the accounting preference. Go to Setup > Accounting > Accounting Preferences, and then click **Items/Transactions**. Under the Accounts section, select an account from the **Receivable Write-Off** list. This account should be a bad debt expense account.

To write off receivables:

1. Go to NFP Financial Center > Financial > Receivable Write-Off > New.
NetSuite displays the Receivable Write-off page. The Custom Form for NFP is selected by default.
2. In the Primary Information section:
 - a. The **Currency** field displays the base currency of the subsidiary selected in the **Subsidiary** field.
You can select any other currency available in your account.
 - b. The **Exchange Rate** field displays the default exchange rate of the selected subsidiary.
You can edit the exchange rate for this transaction only, or you can update the currency exchange rates list.
 - c. In the **Date** field, accept today's date or enter a new date for the journal entry.
 - d. If you use fiscal periods, select the **Posting Period** in which to post this write-off transaction.
 - e. In the **Memo** field, enter a memo to help you recognize this write-off transaction.
3. In the Classification section:
 - a. If you use **Departments**, select the appropriate classification to associate with this write-off transaction.

For information about Departments, see the help topic [Departments and Classes Overview](#).

- b. From the **Program** list, select the program that identified the purpose of the overdue pledge or grant receivable.
 - c. From the **Restriction** list, select **Without Donor Restriction**. This field is required.
 - d. From the **Functional Expense** list, select the expense category.
 - e. From the **Grant** list, select the associated grant.
 - f. From the **Region** list, select the associated region.
4. On the **Lines** subtab, enter the items to write off.
 - a. In the **Constituent** field, select the donor for the overdue pledge or grant receivable.
 - b. In the **Account** field, select the receivable account from the invoice of the overdue pledge or grant receivable.
 - c. In the **Amount** field, enter the amount of the overdue pledge or grant receivable.
 - d. In the **Memo** field, enter a memo to help you recognize this item.
 - e. Click **Add**.
 - f. Repeat these steps for each line item.
5. Click **Save**.
6. To close the invoice for the overdue pledge or grant receivable, apply the credit from this transaction to the invoice:
 - a. Go to Transactions > Sales > Create Invoices > List, and then click **View** next to the invoice for the Receivable Write-Off.
 - b. Click **Accept Payment**.
 - c. In the **Payment Amount** field, enter **0**.
 - d. Click **Credits**, and then select the Receivable Write-Off transaction line.
 - e. Click **Save**.

Creating Merchandise Sales

You can record revenue from selling merchandise, like books or apparel. This also lets you track and report on revenue from merchandise sales.

To enter a merchandise sale, use the Enter Donation | Cash Sales page, and then select the NFP Cash Sale Form. Set the Revenue Type for each item to **Sale of Goods**.

For generic information about Cash Sales in NetSuite, on which this customized page is based, see the help topic [Cash Sales](#).

To enter a merchandise sale:

1. Go to Transactions > Sales > Enter Donation | Cash Sales.
NetSuite displays the Donation | Cash Sales page.
2. From **Custom Form**, select the form you want to use. For example, **NFP Cash Sale Form**.
3. Under Primary Information:
 - a. In the **Constituent** field, select a constituent.
 - b. Accept or enter the date in the **Date** field.

- c. Select the posting period to which you want to post this sale.
 - d. From the **Appeal** field, select the lead source associated with this sale.
 - e. In the **Memo** field, enter a memo to identify this sale.
4. In the **Items** subtab, add items to the merchandise sale.
- The columns that appear are based upon your custom segments and the permissions set for your user role.
- a. From the **Items** list, select the type of sale item.
 - b. In the **Quantity** field, enter the quantity for the sale item.
 - c. In the **Rate** field, enter the amount rate for the sale item.
 - d. In the **Amount** field, enter the amount of the sale item.
 - e. Populate the custom segment fields by selecting a Segment Code, or individually complete the following fields:
 - **Restriction** – Select **Without Donor Restrictions**.
Restrictions can only be placed on Grants and Donations. This field is required.
 - **Program** – Select **Unrestricted**.
 - **Revenue Type** – To indicate this item is a merchandise sale, select **Sale of Goods**.
 - **Revenue Subtype** – Select the revenue subtype relevant to Sale of Goods. For example, **Merchandise**.
 - f. Enter additional information as necessary.
 - g. Click **Add**.
 - h. Repeat these steps for each line item.
5. Enter additional information as necessary. You can enter information related to shipping, billing, accounting, sales team, and communication.
6. Click **Save**.

Non-Profit Specific Reports

The NFP Financials and NFP Reports SuiteApps have reports to meet nonprofit reporting needs. You can also use any standard NetSuite reports you find useful. For general information about NetSuite reports, see the help topic [Reporting Overview](#).

Nonprofit-specific reports are available from the NFP Financial Center tab. This section includes the following report categories:

- **Non-Profit Financial Reports** – includes financial statements for U.S. subsidiaries that are required by the Financial Accounting Standards Board (FASB), as well as other financial reports
- **Non-Profit Revenue Reports** – various reports related to revenue, such as program revenue, revenue stream distribution, and giving statistics
- **Non-Profit Expense Reports** – various reports related to expenses, such as program expense detail and net assets by program and grant

The NFP Reports bundle includes the following reports:

- [Statement of Activity](#)
- [Statement of Cash Flow](#)
- [Statement of Financial Position](#)

- [Statement of Functional Expense](#)
- [Grant Statement of Activity](#)
- [Reports in Social Impact Standard Edition](#)

The remaining reports are included in the NFP Financials bundle.

For details on reports for revenue to release from restrictions, see [Revenue Restriction Management](#).

Several other reports specifically related to grants are included on the Grant Management menu. For details on grant reports, see [Grant Management](#).

For general information about reports, see the help topic [Working with Report Results](#).

For information about customizing reports in NetSuite, see the help topic [Report Customization](#).

Non-Profit Financial Reports

The financial statements in NFP meet FASB requirements for nonprofit organizations in the U.S.

The following reports are included:

- [Statement of Activity](#)
- [Statement of Cash Flow](#)
- [Statement of Financial Position](#)
- [Statement of Functional Expense](#)
- [Restricted Revenue by Account](#)
- [Restricted Revenue by Program](#)

Statement of Activity

The statement of activity shows your organization's financial activity over time. It shows how your net assets change, both with and without restrictions. For nonprofits, the statement of activity is similar to an income statement for businesses.

This FASB report's just for U.S. subsidiaries. If you're in another country, adjust the standard income statement to fit local needs. For more information, see the help topic [Financial Report Builder](#).

This report shows the change in permanently restricted, temporarily restricted, and unrestricted net assets. It includes the following sections:

- Revenue and Gains
 - Net Assets Released from Restriction
- Expenses and Losses
- Increase in Net Assets (Revenue – Expense)
- Net Assets at Beginning of Period – This amount is the value in the **Net Assets with Donor Restrictions** of the Statement of Financial Position of the previous year-end closing.
- Net Assets at End of Period

By default, accounts beginning with 69 are classified as Release from Restriction accounts. If your implementation does not use the 69 series accounts by default:

- Specify which accounts are Release from Restriction accounts. To tag an account as a Release from Restriction account, go to the Edit Account page, and then select **Release from Restriction** from the **Applies To** list.

- Make a copy of the report and then manually update it based on the appropriate account numbers.

To view the Statement of Activity report:

1. Go to NFP Financial Center > Financial Reports > Statement of Activity.
NetSuite displays the report.
2. At the bottom of the page, select values in **Period** or **From** and **To** fields.
3. From **Column** list, select **Restriction (Custom)** to add the columns for restrictions.
4. Click **Refresh**.

To print the report, click the print icon  at the bottom of the page.

Statement of Cash Flow

This FASB report is designed for U.S. subsidiaries only. For subsidiaries in other countries, customize the standard cash flow statement as needed to adjust the layout to meet local requirements. For more information, see the help topic [Financial Report Builder](#).

The standard Statement of Cash Flow includes the following rows:

- Operating Activities (header row)
 - Net Income (referenced row from Income Statement)
 - Adjustments to Net Income (header row)
 - Accounts Receivable (financial section)
 - Unbilled Receivable (financial section)
 - Inventory Asset (financial section)
 - Other Current Asset (financial section)
 - Accounts Payable (financial section)
 - Payroll Liabilities (financial section)
 - Sales Tax Payable (financial section)
 - Other Current Liabilities (financial section)
 - Total Adjustments to Net Income (summary row)
- Total Operating Activities (summary row)
- Investing Activities (header row)
 - Fixed Asset (financial section)
 - Other Asset (financial section)
- Total Investing Activities (summary row)
- Financing Activities (header row)
 - Long Term Liabilities (financial section)
 - Opening Balance Equity (financial section)
 - Other Equity (financial section)
- Total Financing Activities (summary row)
- Net Change in Cash for Period (formula row)
- Cash at Beginning of Period (referenced row from Cash Statement)
- Effect of Exchange Rate on Cash (financial section)

(OneWorld accounts with multi-currency enabled only)

- Cash at End of Period (formula row)

Sections with zero values are not included.

To view the Statement of Cash Flow report:

1. Go to NFP Financial Center > Financial Reports > Statement of Cash Flow.
NetSuite displays the report.
2. At the bottom of the page, select values in **Period** or **From** and **To** fields.
3. To include columns for custom segments, select the custom segment from the **Column** list.
4. Click **Refresh**.

To print the report, click the print icon  at the bottom of the page.

Statement of Financial Position

The statement of financial position is like a balance sheet for a business. For nonprofits, the statement of financial position works like a balance sheet.

Important: To calculate net assets correctly, all transactions must include a value for Restriction. If you add restriction values, be sure to customize this report to add rows under NET ASSETS for the additional Restriction values. For guidance, see the help topic [Report Customization](#).

This FASB report is designed for U.S. subsidiaries only. For subsidiaries in other countries, customize the standard balance sheet as needed to adjust the layout to meet local requirements. For more information, see the help topic [Financial Report Builder](#).

The standard Statement of Financial Position includes the following rows:

- ASSETS (header row)
 - Current Assets (header row)
 - Bank (financial section)
 - Accounts Receivable (financial section)
 - Unbilled Receivable (financial section)
 - Other Current Asset (financial section)
 - Total Current Assets (summary row)
 - Fixed Assets (financial section)
 - Other Assets (financial section)
- **Total ASSETS** (summary row)
- LIABILITIES & NET ASSETS (header row)
 - Current Liabilities (header row)
 - Accounts Payable (financial section)
 - Credit Card (financial section)
 - Other Current Liability (financial section)
 - Total Current Liabilities (summary row)

- Long Term Liabilities (financial section)
- NET ASSETS (header row)
 - Net Assets Without Donor Restrictions
 - Net Assets With Donor
- Total NET ASSETS (summary row)
- Total LIABILITIES & NET ASSETS (summary row)

Sections with zero values are not included.

To view the Statement of Financial Position report:

1. Go to NFP Financial Center > Financial Reports > Statement of Financial Position.
NetSuite displays the report.
2. At the bottom of the page, select values in **End of** or **As Of** fields.
3. To include columns for custom segments, select the custom segment from the **Column** list.
4. Click **Refresh**.

To print the report, click the print icon  at the bottom of the page.

Statement of Functional Expense

The statement of functional expenses breaks down costs by function (like programs, management, or fundraising) and type (personnel or non-personnel).

This FASB report is designed for U.S. subsidiaries only. For subsidiaries in other countries, customize this report as needed to adjust the layout to meet local requirements. For more information, see the help topic [Financial Report Builder](#).

To view the Statement of Functional Expense report:

1. Go to NFP Financial Center > Financial Reports > Statement of Functional Expense.
NetSuite displays the report.
2. At the bottom of the page, select values in **Period** or **From** and **To** fields.
3. From the **Column** list, select **Functional Expense (Custom)**.
4. Click **Refresh**.

To print the report, click the print icon  at the bottom of the page.

By default, accounts beginning with 72 are classified as functional expense accounts. If your setup doesn't use 72 series accounts by default, update this report manually. Copy the report and update it with the right account numbers.

Restricted Revenue by Account

This report shows details of restricted revenue transactions by account. Click an amount in the report to go to the transaction record.

The total in this report matches the restricted revenue total in the Statement of Activity for the same period.

To view the Restricted Revenue by Account report:

1. Go to NFP Financial Center > Financial Reports > Restricted Revenue by Account. NetSuite displays the report.
2. At the bottom of the page, select values in **Date** or **From** and **To** fields.
3. Click on an amount to go to the transaction record.

To print the report, click the print icon  at the bottom of the page.

Restricted Revenue by Program

This report shows details of restricted revenue transactions by program. Click an amount in the report to go to the transaction record.

To view the Restricted Revenue by Program report:

1. Go to NFP Financial Center > Financial Reports > Restricted Revenue by Program. NetSuite displays the report.
2. At the bottom of the page, select values in **Date** or **From** and **To** fields.
3. Click on an amount to navigate to the transaction record.

To print the report, click the print icon  at the bottom of the page.

Non-Profit Revenue Reports

Revenue reports give you details on program revenue, revenue stream distribution, and related stats.

The following revenue reports are included:

- [Program Revenue by Month](#)
- [Program Revenue by Year](#)
- [Program Revenue Detail](#)
- [Revenue Stream Distribution by Month](#)
- [Revenue Stream Distribution by Year](#)
- [Revenue Stream Distribution Detail](#)
- [Comparative Revenue Summary](#)
- [Giving Statistics by Constituent](#)
- [Giving Statistics by Program](#)
- [Giving Statistics by Type](#)

Program Revenue by Month

This report reflects monthly revenues over any time period specified, by Program and Restriction.

To view the Program Revenue by Month report:

1. Go to NFP Financial Center > Revenue Reports > Program Revenue by Month. NetSuite displays the report.

2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Program Revenue by Year

This report reflects yearly revenues over any time period specified, by Program and Restriction.

To view the Program Revenue by Year report:

1. Go to NFP Financial Center > Revenue Reports > Program Revenue by Year.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Program Revenue Detail

This report shows revenue transaction details by type, constituent, date, and amount for all programs and restrictions. You can run the report for any date range and filter the results.

To view the Program Revenue Detail report:

1. Go to NFP Financial Center > Revenue Reports > Program Revenue Detail.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Revenue Stream Distribution by Month

This report shows monthly revenues for any time period you pick, sorted by revenue type and subtype (like Donation, Grant, Membership, or Sale of Goods).

To view the Revenue Stream Distribution by Month report:

1. Go to NFP Financial Center > Revenue Reports > Revenue Stream Distribution by Month.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Revenue Stream Distribution by Year

This report shows yearly revenues for any time period you choose, sorted by revenue type and subtype (like Donation, Grant, Membership, or Sale of Goods).

To view the Revenue Stream Distribution by Year report:

1. Go to NFP Financial Center > Revenue Reports > Revenue Stream Distribution by Year.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Revenue Stream Distribution Detail

This report shows revenue transaction details by constituent, document number, date, and amount for all revenue types and subtypes.

To view the Revenue Stream Distribution Detail report:

1. Go to NFP Financial Center > Revenue Reports > Revenue Stream Distribution Detail.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Comparative Revenue Summary

This report shows revenue transaction details by constituent, document number, date, and amount for all revenue types and subtypes.

To view the Comparative Revenue Summary report:

1. Go to NFP Financial Center > Revenue Reports > Comparative Revenue Summary.
NetSuite displays the report.
2. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Giving Statistics by Constituent

The Giving Statistics by Constituent report shows donations from each constituent, including the number of gifts, total amount, and average gift size. You can run the report for any date range and filter the results.

The report is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

This report is also available as a subtab on the Grant form, under the Related Records subtab.

To view the Giving Statistics by Constituent report:

1. Go to NFP Financial Center > Revenue Reports > Giving Statistics by Constituent.

NetSuite displays the report.

2. To view the details for a constituent, click on the constituent name.

NetSuite displays the list of donations from the selected constituent.

Donations can include invoice, journal, or cash sale transaction types.

To print the report, click the print icon  at the bottom of the page.

Giving Statistics by Program

The Giving Statistics by Program report shows donations for each program, including the number of gifts, total amount, and average gift size. You can run the report for any date range and filter the results.

The report is a saved search. Saved searches are NetSuite queries that let you filter and sort data in advanced ways. For information about saved searches, see the help topic [Saved Searches](#).

To view the Giving Statistics by Program report:

1. Go to NFP Financial Center > Revenue Reports > Giving Statistics by Program.

NetSuite displays the report.

2. To view the details for a program, click on the program name.

NetSuite displays the list of donations from the selected program.

Donations can include invoice, journal, or cash sale transaction types.

To print the report, click the print icon  at the bottom of the page.

Giving Statistics by Type

The Giving Statistics by Type report shows donations for each type, including the number of gifts, total amount, and average gift size. This report is a summary search grouped by Donation Revenue Subtype. You can run the report for any date range and filter the results.

The report is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

To view the Giving Statistics by Type report:

1. Go to NFP Financial Center > Revenue Reports > Giving Statistics by Type.

NetSuite displays the report.

2. To view the details for a program, click on the program name.

NetSuite displays the list of donations from the selected program.

Donations can include invoice, journal, or cash sale transaction types.

To print the report, click the print icon  at the bottom of the page.

Non-Profit Expense Reports

The expense reports provide relevant details on program and grant expenses and net assets.

The following reports are included:

- [Program Expenses by Year](#)
- [Program Expense Detail](#)
- [Net Assets by Program](#)
- [Grant Expenses by Year](#)
- [Grant Expense Detail](#)
- [Net Assets by Grant](#)
- [Comparative Expense Summary](#)

Program Expenses by Year

This report summarizes yearly program expenses by functional expense and program. You can run the report for any date range and filter the results.

To view the Program Expenses by Year report:

1. Go to NFP Financial Center > Expense Reports > Program Expenses by Year.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Program Expense Detail

This report shows functional expense details by program, department, region, vendor, transaction type, date, and amount.

To view the Program Expense Detail report:

1. Go to NFP Financial Center > Expense Reports > Program Expense Detail.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Net Assets by Program

The Net Assets by Program report summarizes total revenue, expenses, released revenue, and net assets (revenue minus expense) for each subsidiary and program. You can run the report for any date range and subsidiary, and filter the results.

The report is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

This report is also available as a subtab on the Grant form, under the Related Records subtab.

To view the Net Assets by Program report:

1. Go to NFP Financial Center > Expense Reports > Net Assets by Program.
NetSuite displays the report.
2. To view transaction details for a subsidiary, click on a subsidiary.

To print the report, click the print icon  at the bottom of the page.

Grant Expenses by Year

This report shows grant expenses by year and program. You can run the report for any date range and filter the results.

To view the Grant Expenses by Year report:

1. Go to NFP Financial Center > Expense Reports > Grant Expenses by Year.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Grant Expense Detail

This report shows grant expense details by program, department, region, vendor, transaction type, date, and amount. You can run the report for any date range and filter the results.

To view the Grant Expense Detail report:

1. Go to NFP Financial Center > Expense Reports > Grant Expense Detail.
NetSuite displays the report.
2. At the bottom of the page, you can change the values in **Date** or the **From** and **To** fields.
3. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Net Assets by Grant

The Net Assets by Grant report summarizes total revenue, expenses, released revenue, and net assets (revenue minus expense) for each grant. You can run the report for any date range and filter the results.

The report is a saved search. Saved searches are queries of NetSuite data that provide advanced data filtering and sorting options. For information about saved searches, see the help topic [Saved Searches](#).

To view the Net Assets by Grant report:

1. Go to NFP Financial Center > Expense Reports > Net Assets by Grant.
NetSuite displays the report.

To print the report, click the print icon  at the bottom of the page.

Comparative Expense Summary

This report shows expenses over different periods by functional expense and program segments. It compares the previous month to the current month, and the previous year to the current year.

To view the Comparative Expense Summary report:

1. Go to NFP Financial Center > Expense Reports > Comparative Expense Summary.
NetSuite displays the report.
2. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Non-Profit LYBUNT and SYBUNT Reports

The NFP Financials bundle includes the following saved search reports:

- **LYBUNT (Last Year But Not This Year)** – This report lists constituents who donated in the last fiscal year but did not donate again in this fiscal year. The report includes only the transactions that have **Revenue Type** set to **Donation**.
- **SYBUNT (Some Year But Not This Year)** – This report lists constituents who donated before the first day of last fiscal year but did not donate again in the last or current fiscal year. The report includes only the transactions that have **Revenue Type** set to **Donation**.

You can access the saved searches from Reports > Saved Searches > All Saved Searches.

Non-Profit Financial Metrics

Information in this topic includes:

- [Social Impact KPIs](#)
- [Social Impact KPI Scorecards](#)
- [Social Impact Report Snapshots](#)

Social Impact KPIs

For more information on KPIs in general, see the help topic [Key Performance Indicators](#).

For a table of standard NetSuite KPIs, see the help topic [Standard Key Performance Indicators Table](#).

Social Impact Customization includes key performance indicators that display results from saved searches depending on the period that you selected.

Depending on your role and your account's enabled features, some or all of the following table's KPIs are available for display in a Key Performance Indicators portlet. If you see a KPI in the table that is not available to you in NetSuite and that you would like to display, check with your administrator to see if the related feature can be enabled, or if you can use another role to log in to NetSuite.

The table lists the custom KPIs in alphabetical order.

KPI	Description	Edition
Average # of Gifts per Donor	This indicator shows the average number of gifts received from any individual or organizational donor and posted to income accounts. The calculation includes transactions for which Revenue Type is set to Donation. Credit Memos and Cash Refunds are not included. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Average # of Gifts per Individual	This indicator shows the average number of gifts received from individual donors and posted to income accounts. The calculation includes transactions for which Revenue Type is set to Donation. Credit Memos and Cash Refunds are not included. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Average # of Gifts per Organization	This indicator shows the average number of gifts received from organizational donors and posted to income accounts. The calculation includes transactions for which Revenue Type is set to Donation. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
NFP Average Days to Pay	This indicator shows the average number of days between invoice date and the payment date for the given time periods. This value is calculated using data from Vendor Bills. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Average Individual Gift Amount	This indicator shows the average gift amount from individual donors. The calculation includes transactions for which Revenue Type is set to Donation. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Average Organization Gift Amount	This indicator shows the average gift amount from organizational donors and posted to income accounts. The calculation includes transactions for which Revenue Type is set to Donation. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition

KPI	Description	Edition
Fundraising Expenses	This indicator shows the total debits to expense accounts (Expense, Other Expense, Cost of Goods Sold) during the given time periods. This value includes transactions for which Functional Expense is set to Fundraising. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Grant Pipeline	This indicator shows the total value of open grant opportunities expected to close within the given time periods (this month and last month). Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Grant Receivables	This indicator shows the total amount remaining on open invoices, posted to Grant Receivable accounts, during the given time periods. To label an account as Grant Receivable, set Applied To on the Edit Account page. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Grants Lost	This indicator shows the number of opportunities marked lost in the given time periods. This count includes grant opportunities that have a status of Closed-Lost or Lost Customer. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Grants Won	This indicator shows the number of opportunities that were won in the given time periods. This count includes grant opportunities that have a status of Closed-Won or Renewal. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Management & General Expenses	This indicator shows the sum of all transactions posted to expense accounts (Expense, Others Expense, Cost of Goods Sold). This value includes transactions for which Functional Expense is set to Management & General. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
New Constituents	This indicator shows the number of new constituents (individuals or organizations) created in the current month. This value does not include inactive constituents. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
NFP Open Purchase Orders	This indicator shows the amount total for purchase orders that have not been fully received and billed. This value does not include billed purchased orders. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Program Service Expenses	This indicator shows the sum of all transactions posted to expense accounts (Expense, Other Expense, COGS). This value includes transactions for which Functional Expense is set to Program Services. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Recurring Gifts	This indicator shows the total amount of gifts, which are recurring, received from any individual or organizational donor. This value includes transactions for which Revenue Type is set to Donation and Revenue Subtype is set to Recurring Donation. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Restricted Revenue	This indicator shows the sum of all restricted transactions posted to income accounts. This value includes transactions for which Restriction is set to "With Donor Restriction".	NFP Starter Edition

KPI	Description	Edition
	Click this KPI's periods or totals to open the full search results.	
Revenue Released from Restriction	This indicator shows the sum of all revenue released from restriction. This value includes transactions for which Transaction Type is set to "Release from Restriction" and Restriction is set to "Without Donor Restrictions". Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total Donations	This indicator shows the total amount of gifts received from all the donors and posted to income accounts. This value includes transactions for which Revenue Type is set to Donation. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total # of Constituents	This indicator shows the number of all active individual or organizational constituents for the current month. This value does not include inactive constituents. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total Grant Revenue	This indicator shows the total revenue received from Grants posted to income accounts. This value includes transactions for which Revenue Type is set to Grant. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total Individual Donations	This indicator shows the amount of gifts received from individual donors and posted to income accounts. This value includes transactions for which Revenue Type is set to Donation and Is Individual is set to True. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total Organization Donations	This indicator shows the amount of gifts received from organizational donors and posted to income accounts. This value includes transactions for which Revenue Type is set to Donation and Is Individual is set to False. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total Pledges	This indicator shows the total amount of donations received from all donors and posted to income accounts. This value includes transactions for which Revenue Type is set to Donation and Revenue Subtype is set to Pledge. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Total Pledge Write-offs	This indicator shows the total amount of Write-off transactions. For details on how to write off pledges, see Writing off Pledge or Grant Receivables. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Unbilled Grants	This indicator shows the total amount of orders that have not been billed yet. This value includes all Sales Orders for which a grant is selected in the header. Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
Unrestricted Revenue	This indicator shows the sum of all unrestricted transactions posted to income accounts. This value includes transactions for which Restriction is set to "Without Donor Restriction". Click this KPI's periods or totals to open the full search results.	NFP Starter Edition
NFP Average Days to Receive	This indicator shows the average number of days between invoice date and the receipt date for the given time periods. This value is calculated using data from Invoice. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition

KPI	Description	Edition
Average Days Late	This indicator shows the average number of days in which the purchase orders are delivered. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Number # of Orders Received	This indicator shows the count of purchase orders whose delivery is received in the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Number # of POs	This indicator shows the count of purchase orders in the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Number # of Bills	This indicator shows the count of vendor bills received in the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Number # of Vendor Returns	This indicator shows the number of vendor returns in the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
% On Time	This indicator shows the number of purchase orders delivered within the due date in the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Number # Late POs	This indicator shows the number of purchase orders that are delivered late in the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Other Receivables	This indicator shows the total amount remaining on open invoices. This value does not include grant, donation, or pledge revenue types. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Pledge Receivables	This indicator shows the total amount remaining on open invoices during the given time periods. This value includes invoices that have the Revenue type set to Donation and Revenue Subtype set to Pledge. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition
Value \$ of Vendor Returns	This indicator shows the total amount of vendor returns for the given time periods. Click this KPI's periods or totals to open the full search results.	NFP Standard Edition

Social Impact KPI Scorecards

For more information on KPI Scorecards in general, see the help topic [KPI Scorecards](#).

For details on the formula-based components, see [Social Impact Formulas for Financial Ratios](#).

The following table lists the KPI Scorecards that can be displayed in your dashboard:

Note: For customization of Social Impact KPI Scorecards, contact your NetSuite account manager.

KPI Scorecards	Description	Periods Available	Edition
NFP Executive	Displays the following standard components, saved searches, and formula-based components: - Program Expenses - Program Expense % - Administrative Expense % - Fundraising Expense % - Cash & Equivalents - Days Cash on Hand - Daily Operating Expenses - Fundraising Efficiency - Contributions Ratio	- This Period - Last Period - Same Period Last FY - This YTD - Last YTD	NFP Starter Edition
NFP Financial Analytics	Displays the following standard components, saved searches, and formula-based components: - Total Expenses - Program Expenses - Program Expense % - Administrative Expenses - Administrative Expense % - Fundraising Expenses - Fundraising Expense % - Total Revenue - Contribution Revenue - Fundraising Efficiency - Receivables - Receivables Turnover	- This Week - Last Week - This MTD - Last MTD - This FQTD - Last FQTD - This FYTD - Last FYTD	NFP Starter Edition
NFP Financials	Displays the following standard components, saved searches, and formula-based components: - Program Expense % - Administrative Expense % - Fundraising Expense % - Operating Expenses - Current Ratio - Cash & Equivalents - Days Cash on Hand - Fundraising Efficiency - Contributions Ratio - Receivables Turnover	- This Period - Last Period - Same Period Last FY - This YTD - Last YTD	NFP Starter Edition

	- Debt Ratio - Debt To Net Assets - Pledge Writeoff Rate		
NFP Revenue Analytics	Displays the following standard components, saved searches, and formula-based components: - Contributions - Contribution Ratio - Grant Revenue - Grant Revenue Ratio - Event Revenue - Event Revenue Ratio - Fee for Service - Fee for Service Ratio - Recurring Gifts - Individual Giving - Individual Gift Size - Organizational Giving - Organizational Gift Size	- This Week - Last Week - This MTD - Last MTD - This FQTD - Last FQTD - This FYTD - Last FYTD	NFP Starter Edition
NFP Operations	Displays the following standard components, saved searches, and formula-based components: - Program Efficiency % - Fundraising Efficiency % - Pledge Write-off Rate % - Program Expenses - Program Efficiency - Fundraising Expenses - Pledge Write-offs - Pledge Write-off Rate	- This Month - Last Month - Same Month Last FY - This YTD - Last YTD	NFP Standard Edition
NFP Vendor Performance	Displays the following standard components, saved searches, and formula-based components: # of POs # of Orders Received # of Bills # of Late POs # of Receipts % On Time - Average Days Late # of Vendor Returns \$ of Vendor Returns	- Today - This Week - This Month - Last Month - This FQTD - Last FQTD - This FYTD - Last FYTD	NFP Standard Edition

Social Impact Formulas for Financial Ratios

For examples of standard formulas, see the help topic [Financial Ratios Scorecard Formulas](#).

The following table lists the formulas used to calculate data for the prebuilt Social Impact KPI scorecards. Some of the formula components are custom NetSuite KPI IDs.

Scorecard Ratio	Formula
Administrative Expense %	$\{MANAGEMENT\&GENERAL\}EXPENSES\} / \{EXPENSES\}$
Asset Turnover	$\{SALES\} / (\{BANKBAL\} + \{RECEIVABLES\} + \{OTHERCURRENTASSET\} + \{FIXEDASSET\} + \{OTHERASSET\})$
Cash & Equivalents	$\{BANKBAL\} + \{OTHERCURRENTASSET\}$
Contributions Ratio	$\{TOTALDONATIONS\} / \{SALES\}$
Current Ratio	$(\{BANKBAL\} + \{RECEIVABLES\} + \{OTHERCURRENTASSET\}) / (\{PAYABLES\} + \{CREDITCARDBAL\} + \{OTHERCURRENTLIAB\})$
Daily Operating Expenses	$\{OPERATINGEXPENSES\} / \{DAYS\}$
Days Cash on Hand	$(\{BANKBAL\} + \{OTHERCURRENTASSET\}) / (\{OPERATINGEXPENSES\} / \{DAYS\})$
Days Sales Outstanding	$\{DAYS\} / (\{SALES\} / \{RECEIVABLES\})$
Debt Ratio	$(\{PAYABLES\} + \{CREDITCARDBAL\} + \{OTHERCURRENTLIAB\} + \{LONGTERMLIAB\}) / (\{BANKBAL\} + \{RECEIVABLES\} + \{OTHERCURRENTASSET\} + \{FIXEDASSET\} + \{OTHERASSET\})$
Debt to Equity	$(\{PAYABLES\} + \{CREDITCARDBAL\} + \{OTHERCURRENTLIAB\} + \{LONGTERMLIAB\}) / \{EQUITY\}$
Debt to Net Assets	$(\{PAYABLES\} + \{CREDITCARDBAL\} + \{OTHERCURRENTLIAB\} + \{LONGTERMLIAB\}) / (\{EQUITY\})$
Debt to Total Assets	$(\{PAYABLES\} + \{CREDITCARDBAL\} + \{OTHERCURRENTLIAB\} + \{LONGTERMLIAB\}) / (\{BANKBAL\} + \{RECEIVABLES\} + \{OTHERCURRENTASSET\} + \{FIXEDASSET\} + \{OTHERASSET\})$
Fundraising Efficiency	$\{FUNDRAISINGEXPENSES\} / \{TOTALDONATIONS\}$
Fundraising Expense %	$\{FUNDRAISINGEXPENSES\} / \{EXPENSES\}$
Grant Revenue Ratio	$\{TOTALGRANTREVENUE\} / \{SALES\}$
Pledge Writeoff Rate	$\{TOTALRECEIVABLEWRITE-OFFS\} / \{TOTALPLEDGES\}$
Profit Margin on Sales	$\{PROFIT\} / \{INCOME\}$
Program Expense %	$\{PROGRAMSERVICEEXPENSES\} / \{EXPENSES\}$
Receivables Turnover	$\{SALES\} / \{RECEIVABLES\}$
Return on Assets	$\{PROFIT\} / (\{BANKBAL\} + \{RECEIVABLES\} + \{OTHERCURRENTASSET\} + \{FIXEDASSET\} + \{OTHERASSET\})$
Return on Equity	$\{PROFIT\} / \{EQUITY\}$

- For more information about this scorecard, see the help topic [Financial Ratios Scorecard](#).
- For information about the underlying report, see the help topic [Trial Balance Report](#).
- For a list of standard KPI IDs, see the help topic [KPI IDs Available for Scorecard Formulas](#).
- For a list of standard KPIs and descriptions, see the help topic [Standard Key Performance Indicators Table](#).
- For information about adding formulas to KPI scorecards, see the help topic [Defining KPI Scorecard Formulas](#).

Social Impact Report Snapshots

For more information on how to manage report snapshots in general, see the help topic [Report Snapshots](#).

For information on standard report snapshots in NetSuite, see the help topic [Standard Report Snapshots Table](#).

The following table lists the Social Impact report snapshots that can be displayed on dashboards for some customized roles:

Report Snapshot	Description	Edition
Expenses by Department	This snapshot shows all the expenses tagged with a Department. For details on the Department segment, see the help topic Departments and Classes Overview .	NFP Starter Edition
Expenses by Grant	This snapshot shows all the expenses tagged with a Grant. This snapshot is based on the Grant Expenses by Year report. For details on the Grant custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition
Expenses by Program	This snapshot shows all the expenses tagged with a Program. This snapshot is based on the Program Expenses by Year report. For details on the Program custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition
Functional Expense	This snapshot shows all the expenses tagged with a Functional Expense. This snapshot is based on the Statement of Functional Expense report. For details on the Functional Expense custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition
Grant Revenue	This snapshot shows all the revenue tagged with a Grant. For details on the Grant custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition
Revenue by Program	This snapshot shows all the revenue tagged with a Program. This snapshot is based on the Program Revenue by Year report. For details on the Program custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition
Revenue by Restriction	This snapshot shows all the revenue by Restriction. For details on the Restriction custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition
Revenue Stream Distribution	This snapshot shows all the revenue tagged with a Revenue Type. This snapshot is based on the Revenue Stream Distribution by Year report. For details on the Revenue Type custom segment, see Custom Segments for NFP Financials .	NFP Starter Edition

Non-Profit Editions

Non-profit SuiteApps are available in different editions. Each edition has features for nonprofits of different sizes. The following table gives a comparison of the editions.

	Social Impact Donation Edition	Social Impact Starter Edition	Social Impact Standard Edition
SuiteApps included	- Application Performance Management - Dashboard Tiles - Navigation Portlet - NFP Configuration* - NFP Financials - NFP Reports - NFP Customization	- Application Performance Management - Dashboard Tiles - Navigation Portlet - NFP Configuration* - NFP Financials - NFP Reports - NFP Customization - NFP Starter Customization	- Application Performance Management - Dashboard Tiles - Navigation Portlet - NFP Standard Configuration* - NFP Financials - NFP Reports - NFP Customization - NFP Constituent Management - NFP Standard Customization - SuiteApprovals
Roles	NFP - CFO	- NFP ST CFO - NFP ST CEO - NFP ST Grant Administrator - NFP ST Accountant	- NFP EM CFO - NFP EM CEO - NFP EM Grant Administrator - NFP EM Controller - NFP EM A/P Clerk - NFP EM A/R Clerk - NFP EM Program Manager
Key features	- Custom CFO role and dashboard - Nonprofit KPIs - Customized forms - Report snapshots and scorecards	- Four custom roles and dashboards - Nonprofit KPIs - Customized forms - Report snapshots and scorecards	- Seven custom roles and dashboards - Nonprofit KPIs - Customized forms - Report snapshots and scorecards - Constituent relationships - Households
Suitable for	Small nonprofit organizations	Medium-size nonprofit organizations	Enterprise nonprofit organizations

* NFP Configuration and NFP Standard Configuration SuiteApps are not required for some regions.

Social Impact Donation Edition

Social Impact Donation Edition includes NFP Financials and the Non-Profit financial metrics. For details on bundle dependencies, see [Deployment Considerations for NFP SuiteApps](#) or contact your administrator.

This SuiteApp includes roles, dashboards, saved searches, fields, lists, records, and forms you set up after installing.

To begin using Social Impact, see [Setup for NFP Financials](#).

For the following topics, see [Non-Profit Financial Management](#):

- [Setup for NFP Financials](#)
- [Revenue Restriction Management](#)
- [Grant Management](#)
- [Pledge and Donation Management](#)
- [Non-Profit Specific Reports](#)

For the following topics, see [Non-Profit Financial Metrics](#):

- [Social Impact KPIs](#)
- [Social Impact KPI Scorecards](#)
- [Social Impact Report Snapshots](#)

Donation Edition Role and Dashboards

 **Note:** After installing the Customization bundle, contact your NetSuite account manager for the customization of roles and dashboards.

For more information about:

- Roles in NetSuite, see the help topic [NetSuite Roles Overview](#).
- Permissions for standard roles, see the help topic [Standard Roles Permissions Table](#).
- How to review differences in permissions, see the help topic [Showing Role Permission Differences](#).
- Dashboards in NetSuite, see the help topic [Dashboards Overview](#).
- Portlet types in NetSuite, see the help topic [Portlet Types Table](#).
- Standard KPIs, see the help topic [Standard Key Performance Indicators Table](#).
- Standard Scorecards, see the help topic [KPI Scorecards](#).
- Standard Report Snapshots, see the help topic [Report Snapshots](#).
- Starter Edition roles and dashboards, see [Social Impact Starter Edition Roles and Dashboards](#)
- Standard Customization roles and dashboards, see [Social Impact Standard Edition Roles and Dashboards](#)

The Donation edition contains the CFO role.

Click the custom tabs to see customized dashboards for your role. Use the following tables as guide for the available center tabs and portlets for your role:

NFP – CFO

The Chief Financial Officer (CFO) manages the company's finances, covering planning, risk management, record-keeping, and reporting.

The CFO role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ Analytics ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Tasks due today (headline) □ Tasks to complete (standard) □ Event Invitations to respond to (standard) ■ KPI Meters □ Operating Cash Flow ■ Trend Graphs □ Quarterly Payable (on the left) □ Quarterly Bank Balance (on the right) ■ Report Snapshots □ Expenses by Program (on the left) □ Functional Expenses (on the right) □ Revenue by Program (on the right) ■ Settings (standard portlet) ■ Tiles (custom portlet) □ Activity □ Financial □ Cash Flow □ Expenses ■ Navigation Shortcuts □ NFP Financial Management □ Financial Operations □ Expense Management □ Other Reports ■ Scorecard □ NFP Financials - For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ Restricted Revenue □ Unrestricted Revenue □ Revenue Released from Restriction □ Operating Cash Flow □ Total Bank Balance □ Program Service Expenses For details on the KPIs, see the help topics Standard Key Performance Indicators Table and Social Impact KPIs.

Center Type	Custom Center Tabs	Portlets
		■ Custom Saved Search □ Giving Statistics by Type □ Net Assets by Program  Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

Social Impact Starter Edition

Social Impact Starter Edition includes NFP Financials and the Non-Profit financial metrics. For details on bundle dependencies, see [Deployment Considerations for NFP SuiteApps](#) or contact your administrator.

This SuiteApp includes roles, dashboards, saved searches, fields, lists, records, and forms you set up after installing.

To begin using Social Impact, see [Setup for NFP Financials](#).

For the following topics, see [Non-Profit Financial Management](#):

- [Setup for NFP Financials](#)
- [Revenue Restriction Management](#)
- [Grant Management](#)
- [Pledge and Donation Management](#)
- [Non-Profit Specific Reports](#)

For the following topics, see [Non-Profit Financial Metrics](#):

- [Social Impact KPIs](#)
- [Social Impact KPI Scorecards](#)
- [Social Impact Report Snapshots](#)

Social Impact Starter Edition Roles and Dashboards

Note: After installing the Customization bundle, contact your NetSuite account manager for the customization of roles and dashboards.

For more information about:

- Roles in NetSuite, see the help topic [NetSuite Roles Overview](#).
- Permissions for standard roles, see the help topic [Standard Roles Permissions Table](#).
- How to review differences in permissions, see the help topic [Showing Role Permission Differences](#).
- Dashboards in NetSuite, see the help topic [Dashboards Overview](#).
- Portlet types in NetSuite, see the help topic [Portlet Types Table](#).
- Standard KPIs, see the help topic [Standard Key Performance Indicators Table](#).
- Standard Scorecards, see the help topic [KPI Scorecards](#).
- Standard Report Snapshots, see the help topic [Report Snapshots](#).
- Donation role and dashboards, see [Donation Edition Role and Dashboards](#)
- Standard Edition roles and dashboards, see [Social Impact Standard Edition Roles and Dashboards](#)

The Starter edition has the following roles. Click the custom tabs to see customized dashboards for your role. Use the following tables as guide for the available center tabs and portlets for your role:

- [NFP ST CEO](#)
- [NFP ST CFO](#)
- [NFP ST Grant Administrator](#)

■ NFP ST Accountant

NFP ST CEO

The Chief Executive Officer (CEO) is the highest-ranking executive in a company. The primary responsibilities of the CEO include:

- Making major corporate decisions
- Managing overall operations and resources
- Acting as the main point of communication between the board of directors and corporate operations

The CEO role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Sales/Marketing ■ Expenses ■ HR ■ Financial ■ Analytics ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Tasks due today (headline) □ Tasks to complete (standard) □ Event Invitations to respond to (standard) ■ KPI Meters □ New Constituents ■ Report Snapshots □ Functional Expenses (on the left) □ Revenue by Restriction (on the left) □ Revenue Stream Distribution (on the right) ■ Tiles (custom portlet) □ Activity □ Financial □ Cash Flow □ Expenses ■ Navigation Shortcuts □ NFP Executive Management □ Program Reports □ Fundraising □ Other Reports ■ Scorecard □ NFP Executive For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ New Constituents □ Total # of Constituents □ Average Individual Gift Amount □ Average Organization Gift Amount □ Unrestricted Revenue

Center Type	Custom Center Tabs	Portlets
		□ Restricted Revenue □ Total Contributions □ Total Grant Revenue For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Giving Statistics by Type ■ Settings (standard portlet) ■ Trend Graphs □ Quarterly Average Individual Gift Amount □ Quarterly Average Organization Gift Amount  Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP ST CFO

The Chief Financial Officer (CFO) has primary responsibility for managing the company's finances, including financial planning, management of financial risks, record-keeping, and financial reporting.

The CFO role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ Analytics ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Tasks due today (headline) □ Tasks to complete (standard) □ Event Invitations to respond to (standard) ■ KPI Meters □ Operating Cash Flow ■ Trend Graphs □ Quarterly Payable (on the left) □ Quarterly Bank Balance (on the right) ■ Report Snapshots □ Expenses by Program (on the left) □ Functional Expenses (on the right) □ Revenue by Program (on the right) ■ Settings (standard portlet) ■ Tiles (custom portlet) □ Activity □ Financial □ Cash Flow □ Expenses

Center Type	Custom Center Tabs	Portlets
		■ Navigation Shortcuts □ NFP Financial Management □ Financial Operations □ Expense Management □ Other Reports ■ Scorecard □ NFP Financials For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ Restricted Revenue □ Unrestricted Revenue □ Revenue Released from Restriction □ Operating Cash Flow □ Total Bank Balance □ Program Service Expenses For details on the KPIs, see the help topics Standard Key Performance Indicators Table and Social Impact KPIs. ■ Custom Saved Search □ Giving Statistics by Type □ Net Assets by Program  Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP ST Grant Administrator

The Grant Administrators are responsible for liaising with program, finance, and development. They track and manage all compliance related to grants, pledges, and restrictions.

The Grant Administrator role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Overdue Grant Payments (headline) □ Tasks to complete (standard) ■ KPI Meters □ New Grant Opportunities ■ Trend Graphs □ Monthly Program Service Expenses (on the left) □ Monthly Total Grant Revenue (on the right) ■ Report Snapshots

Center Type	Custom Center Tabs	Portlets
		□ Expenses by Grant (on the left) □ Grant Revenue Distribution (on the right) ■ Navigation Shortcuts □ NFP Grants Management □ Initiate Grant □ Manage Grants □ Transactions □ Reports ■ Key Performance Indicators □ New Grant Opportunities □ Open Grant Opportunities □ Grants Won □ Grants Lost □ Grant Pipeline □ Grant Receivables □ Unbilled Grants (Sales Orders) □ Total Grant Revenue For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Net Assets by Grant □ Upcoming Grant Milestones ■ Settings (standard portlet) Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP ST Accountant

The Accountant has primary responsibility for managing the company's accounts, including record-keeping and financial reporting.

The Accountant role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Bills to Pay □ Constituents to Bill □ Purchase Orders to Bill □ Memorized Transactions due □ Purchase Orders to Print □ Allocation Schedules due

Center Type	Custom Center Tabs	Portlets
		□ Amortization Entries pending □ Tasks that are overdue □ Tasks due today □ Tasks to complete (standard) □ Event Invitations to respond to (standard) ■ KPI Meters □ Operating Cash Flow ■ Trend Graphs □ Quarterly Payable (on the left) □ Quarterly Total Bank Balance (on the right) ■ Settings (standard portlet) ■ Report Snapshots □ Revenue by Program (on the right) □ Expenses by Grant (on the right) ■ Tiles (custom portlet) □ Activity □ Financial □ Cash Flow □ Expenses ■ Navigation Shortcuts □ NFP Accountant □ Lists and Transactions □ Financial Reports □ Other Reports □ A/P and A/R Reports ■ Key Performance Indicators □ Restricted Revenue □ Unrestricted Revenue □ Operating Cash Flow □ Total Bank Balance □ Program Service Expenses □ Expenses □ Operating Expenses □ Payables For details on the KPIs, see the help topics Standard Key Performance Indicators Table and Social Impact KPIs.

Social Impact Standard Edition

The NFP Standard Edition is the advanced version of Non-profit Social Impact releases. For details on bundle dependencies, see [Deployment Considerations for NFP SuiteApps](#) or contact your administrator.

This Edition includes roles, dashboards, saved searches, fields, lists, records, and forms you set up after installing. It also has the Constituent Relationship Management feature.

Constituent Relationship Management lets you track relationships between constituents and group family information using households.

Approving Transactions

The SuiteApprovals SuiteApp comes with the Social Impact Standard edition. To finish approving transactions, you need to set up approval rules for each type. For more information, see the help topic [Setting Up SuiteApprovals](#).

For the following topics, see [Non-Profit Financial Management](#):

- [Setup for NFP Financials](#)
- [Revenue Restriction Management](#)
- [Grant Management](#)

- Standard Scorecards, see the help topic [KPI Scorecards](#).
- Standard Report Snapshots, see the help topic [Report Snapshots](#).
- Donation Edition role and dashboards, see [Donation Edition Role and Dashboards](#)
- Starter Edition roles and dashboards, see [Social Impact Starter Edition Roles and Dashboards](#)

Along with the CEO, CFO, and Grant Administrator roles, this edition gives you these new roles. Click the custom tabs to see dashboards customized for your role.

- [NFP EM Controller](#)
- [NFP EM Program Manager](#)
- [NFP EM A/P Clerk](#)
- [NFP EM A/R Clerk](#)

Use the tables below as a guide to the available center tabs and portlets for your role.

NFP EM CEO

The Chief Executive Officer (CEO) leads the company. The primary responsibilities of the CEO include:

- Making major corporate decisions
- Managing overall operations and resources
- Acting as the main point of communication between the board of directors and corporate operations

The CEO role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Sales/Marketing ■ Expenses ■ HR ■ Financial ■ NFP CRM Center	■ Reminders (reminders with zero results still appear) □ Tasks due today (headline) □ Tasks to complete (standard) □ Event Invitations to respond to (standard) ■ KPI Meters

Center Type	Custom Center Tabs	Portlets
	■ NFP Financial Center	□ New Constituents ■ Report Snapshots □ Functional Expenses (on the left) □ Revenue by Restriction (on the left) □ Revenue Stream Distribution (on the right) ■ Tiles (custom portlet) □ Activity □ Financial □ Cash Flow □ Expenses ■ Navigation Shortcuts □ NFP Executive Management □ Program Reports □ Fundraising □ Other Reports ■ Scorecard □ NFP Executive For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ New Constituents □ Total # of Constituents □ Average Individual Gift Amount □ Average Organization Gift Amount □ Unrestricted Revenue □ Restricted Revenue □ Total Donations □ Total Grant Revenue For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Giving Statistics by Type ■ Settings (standard portlet) ■ Trend Graphs □ Quarterly Average Individual Gift Amount □ Quarterly Average Organization Gift Amount  Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP EM CFO

The Chief Financial Officer (CFO) manages the company's finances, covering planning, risk management, record-keeping, and reporting.

The CFO role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP CRM Center ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Purchase Request to Approve □ Journals to Approve by you □ Tasks due today (headline) □ Tasks to complete (standard) □ Event Invitations to respond to (standard) □ Bills to Pay □ Pledge Order to Invoice □ Purchase Order to Bills ■ KPI Meters □ Operating Cash Flow ■ Trend Graphs □ Quarterly Payable (on the left) □ Quarterly Bank Balance (on the right) ■ Report Snapshots □ Expenses by Program (on the left) □ Functional Expenses (on the right) □ Revenue by Program (on the right) ■ Settings (standard portlet) ■ Tiles (custom portlet) □ Activity □ Financial □ Cash Flow □ Expenses ■ Navigation Shortcuts □ NFP Financial Management □ Financial Operations □ Expense Management □ Other Reports ■ Scorecard □ NFP Financials For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ Restricted Revenue □ Unrestricted Revenue □ Revenue Released from Restriction □ Operating Cash Flow □ Total Bank Balance □ Program Service Expenses

Center Type	Custom Center Tabs	Portlets
		For details on the KPIs, see the help topics Standard Key Performance Indicators Table and Social Impact KPIs. ■ Custom Saved Search □ Net Assets by Program  Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP EM Grant Administrator

Grant Administrators work with program, finance, and development teams. They track and manage compliance for grants, pledges, and restrictions.

The Grant Administrator role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP CRM Center ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Tasks due today □ Tasks to complete (standard) □ Overdue Grant Payments (headline) ■ KPI Meters □ New Grant Opportunities ■ Trend Graphs □ Monthly Program Service Expenses (on the left) □ Monthly Total Grant Revenue (on the right) ■ Report Snapshots □ Expenses by Grant (on the left) □ Grant Revenue Distribution (on the right) ■ Navigation Shortcuts □ NFP Grants Management □ Initiate Grant □ Manage Grants □ Transactions □ Reports ■ Key Performance Indicators □ New Grant Opportunities □ Open Grant Opportunities □ Grants Won □ Grants Lost □ Grant Pipeline □ Grant Receivables □ Unbilled Grants (Sales Orders)

Center Type	Custom Center Tabs	Portlets
		□ Total Grant Revenue For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Net Assets by Grant □ Upcoming Grant Milestones ■ Settings (standard portlet) Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP EM Controller

The Controller is the chief accounting officer and leads the accounting department.

The Controller handles financial statements, general ledger, payroll, budgeting, taxes, and special analyses. They're responsible for financial planning, risk management, record-keeping, and reporting.

The Program Controller role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP CRM Center ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Journals to Approve by you □ Orders to Receive □ Invoices Overdue □ Purchase Requests to Approve □ Bills to Approve □ Bills to Pay □ Tasks to complete (standard) □ Tasks due today (standard) ■ Report Snapshots □ Functional Expenses (on the left) □ Expenses by Grant (on the left) □ Expenses by Program (on the left) □ Revenue by Restriction (on the right) □ Revenue Stream Distribution (on the right) □ Revenue by Program (on the right) ■ Settings (standard portlet) ■ Navigation Shortcuts □ NFP Controller □ Lists & Transactions □ FASB Reports □ Other Reports

Center Type	Custom Center Tabs	Portlets
		■ Scorecard □ NFP Financials For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ Restricted Revenue □ Unrestricted Revenue □ Revenue Released from Restriction □ Program Service Expenses □ Fundraising Expenses □ Management & General Expenses □ Payables □ Receivables □ Operating Cash Flow □ Total Bank Balance For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Net Assets by Program □ Giving Statistics by Type ■ KPI Meter □ Total Bank Balance (on the right) Note: Account Reconciliation Summary is a portlet added by core NetSuite. For more information about this portlet, see the help topic Portlet Types Table.

NFP EM Program Manager

The Program Manager manages the Not for Profit Programs. The Program Manager is responsible for monitoring the program performance including:

- financial planning
- management of financial risks
- revenue stream distribution by program
- tracking program beneficiaries
- reporting cost per mission outcome

The Program Manager role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors	■ Reminders (reminders with zero results still appear) □ Overdue Grant Payments □ Purchase Requests to Approve

Center Type	Custom Center Tabs	Portlets
	■ Payroll and HR ■ Financial ■ NFP CRM Center ■ NFP Financial Center	□ Expense Reports to Approve □ Tasks to complete (standard) □ Tasks due today (standard) □ Bills to Approve ■ Report Snapshots □ Revenue by Program (on the left) □ Expenses by Program (on the right) ■ Settings (standard portlet) ■ Navigation Shortcuts □ NFP Program Management □ Manage Programs □ Transactions □ Reports ■ Scorecard □ NFP Operations For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ Grant Pipeline □ Program Service Expenses □ Restricted Revenue For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Net Assets by Program ■ Trend Graphs □ Monthly Program Services Expenses (on the right)

NFP EM A/P Clerk

The A/P Clerk makes sure expense records are processed, reviewed, and reported quickly for payment.

The main job of the A/P Clerk is to review and audit expense reports and vendor bills for compliance.

The A/P Clerk role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP CRM Center	■ Reminders (reminders with zero results still appear) □ Purchase Requests to Approve □ Purchase Orders to Bill □ Bills to Pay □ Tasks to complete (standard) □ Tasks due today (standard) ■ KPI Meter

NFP EM A/R Clerk

The A/R Clerk makes sure cash sales and invoices are processed and reported quickly for payment.

The main job of the A/R Clerk is to review and audit revenue reports and invoices for compliance.

The A/R Clerk role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Billing ■ Constituents ■ Vendors ■ Payroll and HR ■ Financial ■ NFP CRM Center ■ NFP Financial Center	■ Reminders (reminders with zero results still appear) □ Invoices Overdue □ Event Invitations to respond to □ Tasks to complete (standard) □ Tasks due today (standard) ■ KPI Meters □ Receivables (on the left) □ NFP Average Days to Receive (on the right) ■ Trend Graphs □ Monthly Receivables (on the left)

Center Type	Custom Center Tabs	Portlets
		□ Monthly Average Days Overdue (on the right) ■ Navigation Shortcuts □ Account Receivable □ Tools □ Transactions □ Reports ■ Key Performance Indicators □ Receivables □ NFP Average Days to Receive □ Unbilled Grants □ Pledge Receivables □ Grant Receivables □ Other Receivables For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ NFP A/R Aging ■ List □ Constituents ■ Settings (standard portlet)

NFP EM Development Director

In nonprofit organizations, the Development Director's primary responsibility is to oversee fundraising.

The Development Director role includes custom dashboards. The following table highlights the key portlets on the Home dashboard.

Center Type	Custom Center Tabs	Portlets
Accounting	■ Home ■ Activities ■ Leads ■ Grant Opportunities ■ Constituents ■ Forecast ■ NFP CRM Center	■ Reminders (reminders with zero results still appear) □ Overdue Pledge Payments □ Overdue Grant Payments □ Tasks due today (standard) □ Tasks to complete (standard) ■ Report Snapshots □ Revenue Stream Distribution (on the left) □ Revenue By Restriction (on the right) ■ Trend Graphs □ Monthly Average Organization Gift Amount (on the left) □ Monthly Average Individual Gift Amount (on the right) ■ Navigation Shortcuts □ Constituents □ Fundraising □ Reports

Center Type	Custom Center Tabs	Portlets
		■ Scorecard □ NFP Operations - For details on custom scorecards, see Social Impact KPI Scorecards. ■ Key Performance Indicators □ New constituents □ Total Number of Constituents □ Average Individual Gift Amount □ Average Organization Gift Amount □ Recurring Gifts □ Total Individual Donations □ Total Organization Donations □ Total Grant Revenue □ Fundraising Expenses - For details on the custom KPIs, see Social Impact KPIs. ■ Custom Saved Search □ Giving Statistics By Program □ Last Year But Not This Year (LYBUNT) ■ Settings (standard portlet)

Reports in Social Impact Standard Edition

Besides the reports in the NFP Financial Center tab, NFP Standard Edition also has a Program Outcomes report.

Program Outcomes (statistical)

The Program Outcomes report gives you a statistical evaluation of a program. The report summarizes the following information about a program:

- Expense
- Total Expense
- Cost per Outcome
- Revenue
- Total Revenue
- Funding Raised per Outcome
- Net Assets
- Net Assets per Outcome

To view the program outcome report:

1. Go to Reports > Saved Reports > Program Outcomes (statistical).
NetSuite displays the report.
2. You can click on amounts to view more transaction details.

To print the report, click the print icon  at the bottom of the page.

Constituent Relationship Management

The Social Impact Standard Edition includes Constituent Relationship Management. Constituent Relationship Management has two parts: Constituent Relationship and Households.

Constituent Relationship Management Permissions

The following table lists the permissions of various roles for using Constituent Relationship Management features:

Role	NFP CRM Center > Constituent Management > Constituent Relationship	NFP CRM Center > Constituent Management > Relationship Report	NFP CRM Center > Constituent Management > Household Preferences	Lists > Relationships Constituents > Households
NFP EM A/R Clerk	Edit	View	None	Edit
NFP EM CEO	View	View	None	View
NFP EM CFO	Full	View	None	Full
NFP EM Controller	Full	View	None	Full
NFP EM Grant Administrator	Edit	View	None	Edit
NFP EM Program Manager	Edit	View	None	Edit
NFP EM A/P Clerk	View	View	None	View
Administrator	Full	Full	Full	Full

For each role, on the Role page, you must also provide View level access to the **Set Up Company** permission in the **Setup** subtab.

Constituent Relationship

With Constituent Relationship, you can track connections between constituents. These connections can be between individuals or between individuals and organizations. For example,

- Individual constituents related to one another in a household as spouses or partners
- Individual constituents affiliated with multiple organizations
- Individual constituents related to one another in a variety of ways like siblings, parents, friends, business associates, legal counsel, college roommates, and so on. These relationships can change over time.

Information about relationships can be useful for a non-profit organization in terms of fund raising and program delivery. The key features of constituent relationship management include:

- ability to link and track two constituents
- ability to activate and deactivate relationships manually or by date range

Creating a Constituent Relationship

You can create a constituent relationship from the NFP CRM Center tab.

To create constituent relationship:

1. Go to NFP CRM Center > Constituent Management > Constituent Relationship > New.
2. In the Constituent Relationship page:
 - From the **Source Constituent** list, select the first constituent.
 - From the **Target Constituent** list, select the second constituent.
 - From the **Relationship Type** list, select the relationship between the source and target constituents.
 - Optionally, enter **Start Date** and **End Date** in the respective fields. This will make the relationship time bound.
3. Click **Save**.

If one of the constituents is an organization and the other is an individual, you can check the **Add as Contact** box. This will add the individual to the organization's contact list.

Creating Relationship Labels

You can create custom relationship labels from the Relationship Labels page. For example, siblings, friends, and roommates.

To create a relationship label:

1. Go to NFP CRM Center > Constituent Management > Constituent Relationship > New.
2. Click the **New** icon next to the **Relationship Type** field.
3. In the Relationship Label page, enter the relationship name in the **Name** field.
4. Click **Save**.

Time Bound Relationships

When you add an end date to a relationship, the relationship turns inactive after the end date.

Adding Relationship from Constituent Record

You can add relationship between existing constituents from the constituent record.

To add a relationship from a constituent record:

1. Go to Lists > Relationships > Customer, and then click Edit next to the constituent record to which you want to add relationship.
2. In the Relationships subtab, select Other Relationships.

3. In the Constituent Relationship page
 - From the **Target Constituent** list, select the second constituent.
 - From the **Relationship Type** list, select the relationship between the source and target constituents.
 - Optionally, enter **Start Date** and **End Date** in the respective fields. This will make the relationship time bound.
4. Click **Save**.

Viewing Constituent Relationships

You can view the relationship between constituents from the following places:

- On the Constituent record, under Relationships tab, clicking Other Relationships displays a sublist with all the relationships where the constituent is either a source or a target.
- As a saved search of type Constituent Relationship

Relationship Reports

A relationship report gives you the relationship of one constituent with the other. The constituents can be of type individual or organization. Following are some examples where these reports can be useful:

- To get a relationship report of all board members of an organization
- To get a report of all the individuals and organizations that have a relationship with a particular individual.

You can export the relationship report to an Excel or PDF format file.

To generate a relationship report:

1. Go to NFP CRM Center > Constituent Management > Relationship Reports.
2. Do one of the following:
 - Select a constituent from the **Constituent** list and click **Submit**.
A report of all the relationships of the selected constituents displays.
 - Select a relationship from the **Relationship Type** list and click **Submit**.
A report of all the constituents having the selected relationship type displays.
 - Select a constituent and a relationship type from the respective lists and click **Submit**.
A report of the constituent having the selected relationship type displays.
 - Click **Submit**.
A report of all constituent relationships displays.
3. To export to an Excel file, click **Export to Excel**.
4. To export to a PDF file, click **Export to PDF**.

Households

In the NFP SuiteApp, constituents can be individuals or organizations. Individuals can be part of a household, for example, a family.

The Households feature provides the ability to aggregate the information of all the constituents of a family.

You can use households and constituent relationship features to get reports about individuals, households, and organization and use the information for donation management.

Guidelines for Working with Households

Following are some guidelines for working with households:

- A household has one primary member. Optionally, you can add a spouse or partner, and multiple child and other members to the household.
- When you create an individual constituent, you can add the constituent as a member of an existing household.
- When you create a household, the primary member's address and phone number is added as the household's address and phone.
- If you have the **Share Household Address and Phone Updates** box checked, the primary member's contact details are added to the family member's contact details.
- Any changes to household details such as address, phone number, or email can be automatically propagated to all the members of the household.
- The household name changes as you add, remove, or update a spouse or partner member type. The change depends on the **Household Name Format** setting in the Household Preferences page.

Household Preferences

You can set the preferences for households in the Household Preferences page.

To set household preferences:

1. Go to NFP CRM Center > Household Preferences > Household Preferences.
2. Click **Edit** next to the household preference.
3. In the Household Preferences page, set the preferences according to the following table.

Preference	Description
Enable Household	Enables the household feature. If you clear this box, the household settings will not display in the Constituent page.  Note: If you have the Household feature enabled, you will not be able to perform inline editing in the constituent record list page.
Auto Create Household	Automatically creates the household name. This setting cannot be changed.
Propagate Address	Copies the address and home phone details of the primary member to the household and other members of the household.
Household Name Options	Lets you select placeholder fields for household name format. The selected fields are added to the Household Name Format setting below.
Household Name Format	Sets the format in which you want to display the household name. The options that you select from the Household Name Options list are added to this field. You can also enter text in this field.

Preference	Description
	 Note: You must add the household ID and any one named field in the household name format field. For example, say you want the household name to be the primary constituent's first and last name followed by the household ID and text "and Family". To achieve this, from the Household Name Options list, first select Primary First Name, then select Primary Last Name, and lastly select Household Id. In the Household Name Format field, insert a space between the options and add the text "and Family" after the options. The Household Name Format field should display as shown below: {PRIMARYFIRSTNAME} {PRIMARYLASTNAME} {HOUSEHOLDID} and Family
Formal Salutation Options	Lets you select placeholder fields for the formal salutation format. The selected fields are added to the Formal Salutation setting below.
Formal Salutation	Sets the format in which you want to display the formal salutation of the household. This salutation can be used when communicating with members of the household, such as sending email. The options that you select from the Formal Salutation Options list are added to this field. You can also enter text in this field. For example, say you want the formal salutation to be the primary constituent's first and last name followed by the text "and Family". To achieve this, from the Formal Salutation Options list, first select Primary First Name and then select Primary Last Name. In the Formal Salutation field, insert a space between the options and add the text "and Family" after the options. The Formal Salutation field should display the following: {PRIMARYFIRSTNAME} {PRIMARYLASTNAME} and Family
Informal Salutation Options	Lets you select placeholder fields for the informal salutation format. The selected fields are added to the Informal Salutation setting below.
Informal Salutation	Sets the format in which you want to display the informal salutation of the household. This salutation can be used when communicating with members of the household, such as sending email. The options that you select from the Informal Salutation Options list are added to this field. You can also enter text in this field. For example, say you want the informal salutation to be the primary constituent's first and last name followed by the text "and Family". To achieve this, from the Informal Salutation Options list, first select Primary First Name and then select Primary Last Name. In the Informal Salutation field, insert a space between the options and add the text "and Family" after the options. The Informal Salutation field should display the following: {PRIMARYFIRSTNAME} {PRIMARYLASTNAME} and Family

4. Click **Save**.

Propagating Address and Phone Details

The Household Preferences page contains the **Propagate Address** box. If this box is checked, the primary member's address and contact details are copied to the household. Also, the Constituent page contains the **Propagate Address and Phone Details** box. If this box is checked for primary member, the address and phone details are propagated to the household. For any other member, the household's address and phone details are propagated to the member.

Working with Households

This section explains the different tasks you can perform with households.

Creating a Household

Before creating a household, make sure that the household preferences are set. For details, see the section [Household Preferences](#). When you create a household, an ID is assigned to the household, which makes the household unique. In case two households are given the same name, this household ID helps in distinguishing the two.

To create a household manually:

1. Go to Lists > Relationships > Households > New.
2. Enter the following:
 - In the **Primary First Name** field, enter the first name of the primary member.
 - In the **Primary Last Name** field, enter the last name of the primary member.
 - Optionally, enter the details of the spouse or partner in the Spouse/Partner section.
 - Optionally, enter other household details such as address, email, and phone details in the Email | Phone | Address section.
3. Click **Save**.
The following actions take place:
 - A household is created with the name as defined in household preferences.
 - A primary constituent is created. If you add spouse or partner details, a constituent for the same is also created.

Adding Members to a Household

From the household record, you can add new constituents as members of the household.

To add a member to a household:

1. Go to Lists > Relationships > Households.
2. From the Households list page, click the Edit link next to the household to which you want to add the member.
3. In the Household page, select the Member subtab and click **Add Member**.
The Constituent record creation page opens. Observe that the Household field automatically populates the name of the household.
4. In the Constituent page:
 - In the **Name** field, enter the name of the constituent.
 - From the **Primary Subsidiary** list, select the primary subsidiary.
 - From the **Family Member** list, select the family member type.
 - Click **Save**.

Changing the Family Member Type

The following are the guidelines for changing the family member type of a constituent:

- If the household contains a primary member but not a spouse or partner, you cannot change the primary member to any other member type.
- If the household contains a primary member as well as a spouse or partner, you can swap the primary and spouse members.

You can change the member type from the **Family Member Type** list in the Constituent page.

Moving Members Across Households

The following are the guidelines for moving members across households:

- Primary member
 - You cannot move a primary member from one household to another directly.
 - If a household contains a primary member as well as a spouse member, you will have to first change the primary member to other member. This will automatically change the spouse to primary member. Then, you can move the other member to another household.
- Spouse or Partner member
 - You can move a spouse or partner from one household to other only if the other household does not contain a spouse or partner member.
 - When you move the spouse or partner from one household to other, the household name changes to reflect the removal of the spouse.
- Child or Other member — You can move the child or other family member type from one household to other.

You can move the member by selecting the desired household from the **Household** list in the Constituent page.

Deleting a Household

If you delete the primary member record, the household is automatically deleted.

If you delete or move the spouse member, the household name changes automatically, reflecting the removal of spouse.

Lifetime View

The Lifetime View feature provides valuable information about total grants and donations made by individual constituents of a household as well as by the entire household.

Lifetime view is calculated based on the cash sales and invoices raised for each constituent per year. The feature displays data for the last four years from the current date.

Lifetime view is calculated in the base currency. If the currency of a transaction differs from the base currency, NetSuite automatically calculates the value in base currency and displays it the Lifetime view.

Lifetime View	
2019	\$ 12486.74
2018	\$ 10000.00
2017	\$ 5000.00
2016	\$ 5000.00
Total	\$ 32486.74

For each constituent, the lifetime view appears in the Primary Information section of the Constituent page.

For each household, the lifetime view is calculated by adding the lifetime views of all the constituents of the household for each year.

For each household, the lifetime view appears on the Household page.

Email Template

The Communication subtab is provided in the constituent record as well as household record. You can use the Communication subtab to create and send emails to the household constituents. For more information, see the help topic [Working with Email Templates](#).

Soft Credits

Use the soft credits feature to recognize constituents who helped bring in a donation.

With a donation, only the donor constituent who makes the payment is credited for a donation. With soft credits, multiple constituents can be given credit for a donation.

Nonprofit organizations can view the soft credit amounts in the giving history and giving pattern of a constituent. The following are some examples in which soft credits can be used:

- To credit multiple constituents for same donation
- To apply soft credit to the spouse for any donation made by an individual
- To apply soft credit to an individual for a donation made by the organization
- To include soft credits to measure the total giving of a constituent

The soft credit feature is part of the Constituent Relationship Management feature. The feature also provides the option of either splitting the soft credits amongst multiple constituents or giving full credit to all the constituents.

You can apply soft credit to a transaction only if the **Revenue Type** custom segment is set to **Donation**.

Soft Credits Permissions

The following table lists the permissions required for the Soft Credit custom record by various roles:

Role	Soft Credit Custom Record Permission
NFP EM A/P Clerk	View
NFP EM A/R Clerk	Full
NFP EM CEO	View
NFP EM CFO	Full
NFP EM Controller	Full
NFP EM Grant Administrator	Full
NFP EM Program Manager	Full
Administrator	Full

Applying Soft Credits

You can apply soft credits from pledge order, cash sale, or invoice transactions. If the soft credit is applied to a pledge order, the same soft credit is automatically applied to the invoice generated from the pledge order.

To apply soft credits:

1. In a pledge order, click the **Soft Credits** subtab.
You can also open the **Soft Credits** subtab from a cash sale or an invoice.
2. From the **Constituent** column, select the constituent.
3. In the **Amount** column, enter the amount of soft credit that you want to apply to the constituent.
4. Click **Add**.
5. (Optional) To add more constituents, repeat steps 2 to 4.
6. Click **Save**.

Tip: Click **Split Equally** to split the soft credit equally amongst the selected constituents. Click **Full Credit to All** to apply full soft credit to all the selected constituents.

The soft credits applied to a constituent display in the **Soft Credits** sublist of the **Giving Statistics** subtab of each constituent record.

Applying Soft Credit to Spouse or Partner

If a constituent makes a donation, you can apply soft credit to the constituent's spouse automatically if the **Enable Full Soft Credits To Spouse/Partner** box preference is checked.

To enable applying soft credit to spouse or partner:

1. Go to Setup > Company > General Preferences.
2. In the **Custom Preferences** subtab, check the **Enable Full Soft Credits To Spouse/Partner** box.
3. Click **Save**.

For applying the soft credit automatically, the relationship label must be **Spouse/Partner**.

NFP SuiteApps Update Verification

When you update NFP SuiteApps, you might need to update some customizations manually.

The NFP SuiteApps Update Verification SuiteApp helps you check and update these customizations after an update.

The SuiteApp gives you a SuiteApps Update Verification page. Before updating an NFP SuiteApp, check and confirm the right fields on that page.

Installing NFP SuiteApps Update Verification

You can install the NFP SuiteApps Update Verification SuiteApp from the SuiteApp Marketplace. For more information, read the help topic [Installing from the SuiteApp Marketplace](#).

SuiteApps Update Verification is a managed SuiteApp that automatically updates whenever enhancements or new features are added.

Prerequisites for NFP SuiteApps Update Verification

The NFP SuiteApps Update Verification SuiteApp is developed and tested for use primarily with NetSuite OneWorld. For more information about NetSuite OneWorld, read [Introduction to NetSuite OneWorld](#).

Settings in the SuiteApps Update Verification Page

The SuiteApps Update Verification page provides the following fields:

Section	Field	Description
Custom Segments Verification	Verified Custom Segments Changes	Check this box after understanding that a SuiteApp update does not preserve changes to the following custom segments fields, and you must redo the changes after the update: ■ Filter By ■ Show in List ■ Display Type ■ Help ■ Description
Custom Records Verification	Verified Custom Records Changes	Check this box after verifying the following custom records related to custom segments: ■ No changes are made to the following subtabs □ Fields □ Icons ■ No entries are added to the following subtabs: □ Subtabs □ Sublists ■ No changes are made to the lists or records attached to a field

Section	Field	Description
		 Warning: If you change the list or record attached to a field, there is a data loss on SuiteApp update. Do not change the SuiteApp fields even if the fields are unlocked. You can add new fields and use them for your requirements.
Rename Classifications Verification	Verified Classifications	Check this box after verifying that you did not rename the following classifications with the same name as the custom segments in the NFP Financials SuiteApp: ■ Department ■ Class ■ Locations ■ Subsidiary ■ Account
Reports Customization Verification	Verified Report Changes	Check this box after understanding that you should not directly customize the reports delivered with the SuiteApps because the SuiteApp updates will overwrite the customizations. If you have customized the reports, verify that you have documented the changes and redo the changes after the SuiteApp updates.
Custom Transaction Verification	Verified Custom Transaction Changes	Check the box after understanding that the SuiteApp updates will reset any changes made to the custom transaction unlocked components. Verify that you have documented the changes and redo the changes after the SuiteApp updates.
Navigation Links Verification	Verified Navigation Links	Check the box after understanding that SuiteApp updates will reset navigation links changes, such as changes to the financial reports navigation links. Verify that you have documented the changes and redo the changes after the SuiteApp updates.
Sandbox/Release Preview Account Verification	Verified SuiteApp Updates in Sandbox/Release Preview	If you have a sandbox account or a release preview account, verify the SuiteApp updates in that account and note the changes. After verification, select Yes from this list. If you do not have access to a sandbox or release preview account, select Not Applicable.
SuiteApps Update Verification	Verified All Changes and Ready to Update SuiteApps	Understand and verify all the SuiteApp update related changes and confirm to get the SuiteApp updates.

Unlocked Components in NFP SuiteApps

The following is the list of unlocked components in each NFP SuiteApp:

Type	Components	SuiteApp	Usage
Custom Segments, Custom Records	■ Program ■ Revenue Subtype ■ Time Restriction ■ Restriction ■ Region	NFP Financials (These components are also referred and unlocked in all SuiteApps dependent on NFP Financials)	A SuiteApp update does not preserve changes to the following custom segments fields, and you must redo the changes after the update: ■ Filter By ■ Show in List

Type	Components	SuiteApp	Usage
	- Functional Expense - Revenue Type - Grant		- Display Type - Help - Description
	Household	NFP Constituent Management	Ensure the following: - No changes are made to the following subtabs - Fields - Icons - No entries are added to the following subtabs: - Subtabs - Sublists - No changes are made to the lists or records attached to a field Do not rename the following classifications with the same name as the custom segments in the NFP Financials SuiteApp: - Department - Class - Locations - Subsidiary - Account
Custom Forms	- NFP – Program - NFP-Grant	NFP Financials (These components also referred and unlocked in all SuiteApps dependent on NFP Financials)	Do not make any changes to these components. To customize these components, create a copy and then customize.
Transactions:	Release from Restriction	NFP Financials (These components also referred and unlocked in all SuiteApps dependent on NFP Financials)	SuiteApp updates will reset any changes made to the custom transaction unlocked components. Redo the changes after the SuiteApp updates.
Center Tabs:	- NFP Financial Center Classic Center - NFP Financial Center Accounting Center - NFP Financial Center Executive Center	NFP Financials (These components also referred and unlocked in all SuiteApps dependent on NFP Financials)	Do not make any changes to these components. To customize these components, create a copy and then customize.
	- NFP CRM Center (Executive Center) - NFP CRM Center (Sales Center) - NFP CRM Center (Classic Center)	NFP Constituent Management	

Type	Components	SuiteApp	Usage
	NFP CRM Center (Accounting Center)		
	- NFP Expense Management (Accounting Center) - NFP Expense Management (Classic Center) - NFP Expense Management (Executive Center)	NFP Labor Expense Allocation	
Saved Reports:	- Comparative Expense Summary - Comparative Revenue Summary - Grant Expense Detail - Grant Expenses by Year - Program Expense Detail - Program Expenses by Year - Program Revenue by Month - Program Revenue by Year - Program Revenue Detail - Restricted Revenue by Account - Restricted Revenue by Program - Revenue Stream Distribution by Month - Revenue Stream Distribution by Year - Revenue Stream Distribution Detail - Unbilled Grants	NFP Financials (These components also referred and unlocked in all SuiteApps dependent on NFP Financials)	Do not directly customize the reports delivered with the SuiteApps because the SuiteApp updates will overwrite the customizations. If you have customized the reports, verify that you have documented the changes and redo the changes after the SuiteApp updates.
	- Revenue by Restriction - Expenses by Department - Revenue Stream Distribution - Expense by Grant - Expenses by Program - Revenue by Program	NFP Customization	

Type	Components	SuiteApp	Usage
	- Grant Revenue Distribution - Expenses by Functional Expense	NFP Reports	
	- Statement of Cash Flow - Statement of Financial Position - NFP Income Statement - UR - Statement of Functional Expense - Statement of Activity - NFP Income Statement - TR - Grant Statement of Activity - Program Outcomes (statistical)		
Saved CSV Imports:	- Navigation Shortcut Import - Navigation Category Import - NFPC Default Dashboard Tiles - Navigation Shortcut Group Import - Navigation Shortcut Tooltip Import	NFP Customization	Do not make any changes to these components. To customize these components, create a copy and then customize.
	- NFP Project Import - NFP Historical Trial Balance Import - NFP Other Charge Item for Sale - NFP Vendor Bill Import - NFP Trial Balance as of Go-Live - NFP Pledge Order Import - NFP Region Import - NFP Program - NFP Grant Opportunity - NFP Donation Cash Sale Import - NFP Vendor Contact Import	NFP Data Migration	

Type	Components	SuiteApp	Usage
	■ NFP Employee Import ■ NFP Department Import ■ NFP Credit Memo Import ■ NFP Segment Code Import ■ NFP Service Sale Item Template ■ NFP COA Import ■ NFP Non Inventory Item For Purchase ■ NFP Non Inventory Item for Sale ■ NFP Release from Restriction Import ■ NFP Purchase Order Import ■ NFP Invoice Import ■ NFP Constituent Organization ■ NFP Expense Categories Import ■ NFP Grant Import ■ NFP Individual Constituents ■ NFP Vendor Import ■ NFP Open Vendor Credits		
	■ Navigation Shortcut Import ■ Navigation Category Import ■ NFPC Default Dashboard Tiles ■ Navigation Shortcut Group Import ■ Navigation Shortcut Tooltip Import	NFP Starter Customization	
	■ Navigation Shortcut Import ■ Navigation Category Import ■ NFPC Default Dashboard Tiles ■ Navigation Shortcut Group Import ■ Navigation Shortcut Tooltip Import	NFP Standard Customization

	Employee Pay Import	NFP Labor Expense Allocation	
Custom KPI Scorecards:	- NFP Financials - NFP Financial Analytics - NFP Revenue Analytics - NFP Executive	NFP Customization	Do not make any changes to these components. To customize these components, create a copy and then customize.
	- NFP Operations - NFP Vendor Performance	NFP Standard Customization	
Dashboards:	NFP CFO Dashboard	NFP Customization	Do not make any changes to these components. To customize these components, create a copy and then customize.
	- NFP ST CEO Dashboard - NFP ST Accountant Dashboard - NFP ST CFO Dashboard - NFP ST Grant Admin Dashboard	NFP Starter Customization	
	- NFP EM CFO Dashboard - NFP EM Controller Dashboard - NFP EM A/R Dashboard - NFP EM A/P Dashboard - NFP EM CEO Dashboard - NFP EM Grant Admin Dashboard - NFP EM Prgm Manager Dashboard	NFP Standard Customization	
Saved Searches:	Constituent Details	NFP Constituent Management	Do not make any changes to these components. To customize these components, create a copy and then customize.
Custom Sublists:	- Other Relationships - Soft Credits	NFP Constituent Management	Do not make any changes to these components. To customize these components, create a copy and then customize.

Enabling SuiteApp Updates

For updating NFP SuiteApps, you must check all the fields in the SuiteApps Update Verification page.

To enable SuiteApp updates:

1. In the global search, enter **SuiteApps Update Verification**.
2. From the search results, click **SuiteApps Update Verification**.
The SuiteApps Update Verification page opens.
3. Verify and check the following boxes:
 - a. Verified Custom Segments Changes
 - b. Verified Custom Records Changes
 - c. Verified Classifications
 - d. Verified Report Changes
 - e. Verified Navigation Links
 - f. Verified All Changes and Ready to Update SuiteApps
4. If you have a sandbox or release preview account, from the **Verified SuiteApp Updates in Sandbox/Release Preview** list, select **Yes**.

Note: If you do not have a sandbox or release preview account, select **Not Applicable**.

5. Click **Save**.

Notifications When Installing NFP SuiteApp Updates

In the following cases, an NFP SuiteApp update is blocked and the application sends an email to the account administrator:

- If you do not have the NFP SuiteApps Update Verification SuiteApp installed.
- If you do not verify and check all the fields in SuiteApps Update Verification page.
- If an error occurs when updating the SuiteApp.

Online Donations

The Online Donations SuiteApp lets you integrate your online donations right into NetSuite. When someone donates on your nonprofit website, the Online Donations SuiteApp automatically creates a donation transaction in NetSuite and sends out a receipt.

This SuiteApp uses the Payment Link feature to accept online donations and lets donors track their donations with the Customer Center role.

The SuiteApp enables you to perform the following tasks:

- Create a customizable HTML donation page that you can set up and add to your nonprofit's website.
- Set up different donation programs and amount options for your donors.
- Collect online donation payments with the Payment Link feature.
- Accept one-time, anonymous, and recurring online donations.
- Manage donation transactions in NetSuite and email donation confirmations.
- Track, view, and analyze online donation data with predefined SuiteAnalytics workbooks.

The Online Donations SuiteApp supports all available languages in the Multi-Language feature of NetSuite. To set the language preference in NetSuite, see the help topic [Choosing a Language for Your NetSuite User Interface](#).

Read the following topics to know more about the Online Donations SuiteApp:

- [Installing the Online Donations SuiteApp](#)
- [Setting Up Online Donations](#)
- [Online Donation Types](#)
- [Online Donations Workbook](#)

Installing the Online Donations SuiteApp

This section includes the prerequisites and instructions for installing the Online Donations SuiteApp.

Prerequisites

Before installing the Online Donations SuiteApp, you must ensure that the following prerequisites are met:

- Enable the Payment Link feature.

To enable the Payment Link feature:

1. Go to Setup > Company > Enable Features > Transactions > Payment Processing.
2. Check the **Payment Link** box.
3. Click **Save**.

For more information on how to setup and use the Payment Link feature, see the help topic [Payment Link](#).

- To use the recurring donations feature, you must enable the Advanced Billing feature. For more information, see the help topic [Advanced Billing Overview](#).
- If you are using a custom transaction form, make sure you assign a Payment Link Invoice PDF/HTML template. This ensures the email sent to the customers include the payment link. To set up Payment

Link templates and customize your transaction form, see the help topic [Set Up Payment Link Invoice Templates](#).

Installation

Any role with access to the SuiteApp Marketplace in NetSuite can install the Online Donations SuiteApp. For more information about the SuiteApp Marketplace, see the help topic [SuiteApp Marketplace in NetSuite](#).

To install the Online Donations SuiteApp:

1. Go to the **SuiteApps** tab.
2. In the Search Apps field, enter **Online Donations SuiteApp**.
3. Click the Online Donations SuiteApp tile.

4. Go to the top right area of the Online Donations SuiteApp details page and click **Install**.

For more information about installing a SuiteApp from the SuiteApp Marketplace, see the help topic [Installing from the SuiteApp Marketplace](#).

The Online Donations SuiteApp is a managed SuiteApp and is automatically updated whenever there are enhancements or new features added.

Setting Up Online Donations

To set up Online Donations, perform the following tasks:

1. [Enabling Online Donations Preferences](#)
2. (Optional) [Applying Custom Segments to Online Donations](#)
3. [Creating an Online Donation Setup Record](#)
4. [Generating an Online Donation HTML Page](#)
5. [Customizing Online Donations User role](#)

Enabling Online Donations Preferences

To use Online Donations, first turn on the custom donation preferences on the General Preferences page.

To enable Online Donations preferences:

1. Go to Setup > Company > General Preferences.
2. Click the **Custom Preferences** subtab, under the General section, check the following boxes:
 - a. **Enable Donor Access** – Check this box to let your donors access NetSuite. After a donor gives online, the system sends them an email about their access and automatically gives them the Customer Center role.

Clear this box if you do not want to provide NetSuite access to your donors.

- b. **Default Anonymous Customer** – Select the default customer record to use on transactions created from anonymous online donations.
3. Click **Save**.

(Optional) Applying Custom Segments to Online Donations

If you are using custom segments, you can apply your custom segments to your Online Donations Setup record.

To apply a custom segment to online donations:

1. Go to Customization > Lists, Records, & Fields > Custom Segments.
2. Click **Edit** next to the custom segment you want to apply.
3. Click **Application & Sourcing** subtab. Under the **Custom Record Types** subtab, check the Applied box next to the Online Donation Setup record type.
4. Click **Save**.

Creating an Online Donation Setup Record

Before you can accept online donations on your nonprofit website, you must first create an Online Donation Setup record.

To create an Online Donation Setup record:

1. Go to Customization > Lists, Records, & Fields > Record Types.
2. In the **Online Donation Setup** row, click **New Record**.
3. Complete the Online Donation Setup page.
 - a. Under the Online Donation Information section, set the following fields:

Field	Description
Name of Donation	Enter a unique name for the donation setup record.
Subsidiary	Select which subsidiary the donation is associated with.
GL Accounts Receivable	Select an Accounts Receivable GL account in NetSuite where transactions created from online donations will be posted.
Donor Identifier	Select the identifier to use during online donation registration. The system uses the identifier to check if the donor has an existing record in NetSuite. If none, a new customer record is created using the donor's email or phone number details.  Note: As of version 1.00.0, the SuiteApp only supports Email and Phone as donor identifiers. Creating a new identifier option will result to an error upon saving of the online donation setup record.
Currency	Select the currency you want to use for the donation. This field is already populated with the default currency of the subsidiary selected in the Subsidiary field, but you can select a different currency.
Allow Recurring Donation	This field is only available if the Advanced Billing feature is enabled in your NetSuite account. To provide donors the option to submit a recurring online donation, select Yes.

Field	Description
	If the donation is one-time only, select No .
Preferred Donation Frequency	This field is only available if the Advanced Billing feature is enabled in your NetSuite account and the Allow Recurring Donation is set to Yes. Select one of more frequencies that donors can choose from on the donation HTML page. Donation frequency refers to how many donations a donor will make during a set of periods. This is required if Allow Recurring Donation field is set to Yes.  Note: As of version 1.00.0, the SuiteApp supports Annually, Half Yearly, Monthly, and Quarterly donation frequencies only. Creating a new donation frequency record is currently not supported.
Start Date	Enter the start date for the donation period.
End Date	Enter the end date for the donation period.
Status	Select the status of the donation setup record: ■ Active – The donation setup record is currently active. ■ On Hold – The donation setup record is on hold and payment is suspended. Selecting this status disables the Create HTML button. ■ Archived – The donation setup record is no longer active. Selecting this status disables the Create HTML button.
Default Tax Code	Select the default tax code for the donation. The tax code must apply to the Subsidiary selected for the donation setup record.
Department	Select which department the donation is assigned to.
Class	Select which class the donation is assigned to.
Location	Select which location the donation is assigned to.
Item	Select the default item record to use on transactions created from online donations.  Note: The Online Donation SuiteApp supports both Inventory and Non-Inventory Sales item types.
Days to Purge Open Invoices	When a donor submits an online donation, an invoice gets automatically created in NetSuite. If a donor fails to pay, the invoice will remain in Open status. Enter how many days an invoice can remain open before the system automatically purges the transaction. The field only accepts whole numbers except zero (0). No purging of transactions will occur if you enter any invalid value such as zero (0) or a negative value.

- b. Under the Online Donation Display Amount section, set the following fields:

Field	Description
Donation List	Select one or more donations your donors can select on your HTML page. To display multiple options on your Online Donation HTML page, press and hold the Ctrl key while you select additional donation options. To create an online donation amount record: a. Click New or the plus icon next to the Donation List field.

Field	Description
	b. In the Name field of the Online Donation Amounts popup window, enter the name of the donation amount record. The value entered here is the name that appears on the generated HTML donation page. c. In the Amount field, enter the donation amount. d. In the Label field, enter the internal label for the donation amount record. The label name does not appear on the generated online donation HTML page. e. To set the online donation amount record as the default amount for your online donation, check the Default box. Checking the box automatically sets the value in the Default Amount field on the Online Donation Setup page. Note that the field value will only reflect after saving the Online Donation Setup record. f. Click Save.
Default Amount	This field displays the online donation amount program set as default on your Online Donation HTML page.

4. Click **Save**.

Generating an Online Donation HTML Page

When you generate an Online Donation HTML page, you can embed this page on your nonprofit website.

To generate an Online Donation HTML page:

1. Go to Customization > Lists, Records, & Fields > Record Types.
2. In the **Online Donation Setup** row, click **List**.
3. Click **View** next to the Online Donation Setup record.
4. Click **Create HTML**.
5. The system will start generating the HTML file. The process may take a while to finish. When your Online Donation HTML page is ready, you will receive a confirmation message. Click **OK**.
6. To view the Online Donation HTML file, go to Documents > Files > File Cabinet > SuiteApps > com.netsuite.onlinedonations > and then click the GeneratedHTML folder.

You can customize the look and feel of your Online Donation HTML page according to your preference. To learn how to work on your files in the File Cabinet, see the help topic [Editing Files in the File Cabinet](#).

Note: If you turned off the Advanced Billing feature after creating an Online Donation Setup record, you'll need to generate a new Online Donation HTML page to update your donation page.

Predefined Custom Record Limitation

When you use the Online Donations SuiteApp, don't rename these predefined custom record list values. Doing so can cause problems when you set up your donation record or errors when donors submit donations.

- Online Donation Frequencies
- Online Donor Key

Customizing Online Donations User role

The Online Donations User role is a predefined role included in the SuiteApp. By default, the Online Donations User role includes the following permissions:

Subtab	Permission	Level
Transactions	Find Transaction	View
	Invoice	Full
	Invoice Approval	Full
	Invoice Pledge Orders	Full
	Item Fulfillment	Full
	Pledge Order	Full
	Pledge Order Approval	Full
	Posting Period on Transactions	Full
	System Journal	View
	View Gateway Asynchronous Notifications	View
	View Payment Events	View
Reports	SuiteAnalytics Workbook	Edit
	Transaction Detail	View
Lists	Accounts	View
	Billing Schedules	Full
	Classes	Edit
	Constituents	Edit
	Contacts	Edit
	Departments	Full
	Documents and Files	Edit
	Email Template	Full
	Items	Edit
	Locations	Edit
	Memorized Transactions	Edit
	Notes Tab	View
	Perform Search	Full
	Projects	Edit
	Subsidiaries	View
Setup	Accounting Lists	Edit

Subtab	Permission	Level
	Deleted Records	Full
	Mobile Device Access	Full
	Other Lists	Edit
	REST Web Services	Full
	SOAP Web Services	Full
Custom Record	Online Donation Amounts	Full
	Online Donations Frequencies	Full
	Online Donation Setup	Full
	Online Donation Key	Full

However, additional actions are required to ensure online donation transactions and customer records are created when using the SuiteApp. Before using the Online Donations SuiteApp, you must manually update the Online Donations User role by performing the following actions:

1. Add custom record permissions for Online Donations
2. Update the script deployment to run as Online Donations User

To update the Online Donations User role:

1. Add the required custom permissions to the Online Donations User role.
 - a. Using an Administrator role, go to Setup > Users/Roles > Manage Roles
 - b. Search for Online Donations User role.
 - c. Click **Customize**.
 - d. Click **Permissions** subtab.
 - e. Under the **Custom Record** subtab, add the following permissions:

Record	Level
Household	Full
Household Preferences	Full
Relationship Label	Full
Segment Code	Full
Other custom records on sales order transaction, invoice transaction, and customer list in your account	Full

- f. Click **Save**.
2. Update the OD SL Generate Donor script deployment to run as Online Donations User.
 - a. Using an Administrator Role, go to Customization > Scripting > Script Deployments
 - b. On the Script Deployment page, search for OD SL Generate Donor script.
 - c. Click **Edit**.
 - d. In the **Execute As Role** field, select **Online Donations User**.
 - e. Click **Save**.

Viewing Transactions in Online Donations

You can set up saved searches to see transactions in the Online Donations SuiteApp.

Set up separate saved searches to view transactions created with the SuiteApp and those created without it.

Viewing Transactions Created Using the Online Donations SuiteApp

Here's how to create a saved search to view transactions made with the Online Donations SuiteApp.

To view transactions created using the Online Donations SuiteApp:

1. Go to Lists > Search > Saved Searches > New.
2. On the New Saved Search page, click **Transaction**.
3. In the **Search Title** field, enter the saved search name.
4. Under the **Criteria** subtab, from the **Filter** list, select **Donation Setup ID (Custom Body)**.

The Saved Transaction Search popup window opens.

- a. From the Donation Setup ID dropdown, select **none of**.
 - b. From the list box, click **None**.
 - c. Click **Set**.
 5. From the **Filter** list, select **Main Line**.
- The Saved Transaction Search popup window opens.
- a. From the **Main Line** selection, choose **Yes**.
 - b. Click **Set**.
 6. Click **Save**.

Viewing Transactions Not Created Using the Online Donations SuiteApp

The following procedure explains how to create a saved search to view transactions that were not made using the Online Donations SuiteApp.

To view transactions that were not created using the Online Donations SuiteApp:

1. Go to Lists > Search > Saved Searches > New.
2. On the New Saved Search page, click **Transaction**.
3. In the **Search Title** field, enter the saved search name.
4. Under the **Criteria** subtab, from the **Filter** list, select **Donation Setup ID (Custom Body)**.

The Saved Transaction Search popup window opens.

- a. From the Donation Setup ID dropdown, select **any of**.
 - b. From the list box, click **None**.
 - c. Click **Set**.

5. From the **Filter** list, select **Main Line**.
The Saved Transaction Search popup window opens.
 - a. From the Main Line selection, choose **Yes**.
 - b. Click **Set**.
6. Click **Save**.

For more information about adding a search filter, see the help topic [Advanced Search Criteria Filters](#).

Online Donation Types

The Online Donation SuiteApp lets you accept one-time, anonymous, and recurring donations from your nonprofit website.

Using the Payment Link feature, the SuiteApp lets you capture payments from online donations submitted through the Online Donation HTML page. When a donor clicks the Donate Now button, they're taken to the Payment Link page to enter their payment details.

The Payment Link page also shows a summary of the invoice for the online donation. Depending on your donation preferences and setup, NetSuite can also create a customer record.

After the invoice is processed, NetSuite emails the donor. If the payment goes through, the donor gets a Payment Link Payment Confirmation email. If not, they get a Payment Link Payment Declined Notification email.

Important: You must not copy (Make Copy function) any transaction submitted through the Online Donation HTML page. This action may result to potential issues when processing your donation transactions.

Read the following topics to know more about how transactions are processed and managed based on the type of donation setup:

- [One-Time Donation](#)
- [Anonymous Donation](#)
- [Recurring Donation](#)

One-Time Donation

When a one-time donation is submitted through the Online Donation HTML page, an invoice is generated in NetSuite.

If you set Allow Recurring Donation to No in the donation setup, donors can only make one-time donations on your website. However, they can still make multiple one-time donations.

Submitting a One-Time Donation

The following procedure is for donors to submit a one-time donation on your website.

To submit a one-time donation:

1. On the Online Donation HTML page, the donor provides the following details:
 - a. **Name** – Donor's complete name.

- b. **Email** – Donor's email address. If the **Donor Identifier** field is set to **Email**, the system uses the donor's email address to check if the donor already has an existing customer record in NetSuite. If there is none, then the system creates a customer record using the donor's email address.
 - c. **Phone Number** – Donor's phone number. If the **Donor Identifier** field is set to **Phone**, The system uses the donor's phone number to check if the donor already has an existing customer record in NetSuite. If none, If there is none, then the system creates a customer record using the donor's phone number.
 - d. **Donation** – Donor's preferred donation program.
 - e. **Amount** – The field dynamically displays the amount depending on the donation program or option the donor selects. A donor can also enter a custom amount.
2. The donor clicks **Donate Now**.
The page redirects to the Payment Link payment page where the donor enters their payment details.
The Payment Link page also displays a summary of the invoice created for the online donation.
 3. The donor clicks **Pay**.

Anonymous Donation

On the Online Donation HTML page, a donor can check the **Anonymous** box to submit online donation anonymously. After an anonymous donation is submitted, an invoice transaction is generated in NetSuite.

When setting up your anonymous online donations, keep in the mind the following tasks:

- You must assign a default customer record to use on transactions created from anonymous online donations. For more information, see [Enabling Online Donations Preferences](#).
For more information on how to create a customer record in NetSuite, see the help topic [Creating a Customer Record](#).
- All anonymous online donation transactions are created under one customer record.
- To display the Anonymous checkbox on your Online Donation HTML page, you can do either of the following actions:
 - Enable the Multi Subsidiary Customer feature. By enabling this feature, the Anonymous checkbox automatically becomes available on your Online Donation HTML file. For more information, see the help topic [Enable the Multi-Subsidiary Customer Feature](#).
 - Modify the HTML code in your Online Donation HTML file to display the Anonymous checkbox. To learn how to work on your files in the File Cabinet, see the help topic [Editing Files in the File Cabinet](#).

Submitting an Anonymous Donation

The following procedure is for donors to submit anonymous donation on your website.

To submit an anonymous donation:

1. On the Online Donation HTML page, the donor checks the **Anonymous** box.
2. The donor provides the following details:
 - a. **(Optional) Name, Email, and Phone Number** – For anonymous donations, donors are not required to enter their Name, Email, and Phone Number details. This is because no

new customer record is created in NetSuite when an anonymous donation is submitted. All anonymous donation transactions are automatically associated with the default customer record set on the General Preferences page.

To assign a customer record for anonymous donations, see [Enabling Online Donations Preferences](#).

- b. **Donation** – Donor's preferred donation program.
 - c. **Amount** – The field dynamically displays the amount depending on the donation program or option you select. The donor can also enter a custom amount.
3. The donor clicks **Donate Now**.
The page redirects to the Payment Link payment page where the donor enters their payment details.
The Payment Link page also displays a summary of the invoice created for the online donation.
4. The donor clicks **Pay**.

Recurring Donation

The Online Donations SuiteApp lets you accept and track recurring online donations in NetSuite. In the donation setup, make sure Allow Recurring Donation is set to Yes and choose the donation frequencies donors can pick from.

On the Online Donation HTML page, donors can check the **Recurring** box to submit a recurring donation. Donors can choose their preferred recurring cycle and set a recurring end date before submitting their online donation.

This feature requires the Advanced Billing feature. To enable, go to Setup > Company > Enable Features. On the Transactions subtab, under the Billing section, check the **Advanced Billing** box. If you do not see this feature, contact your account manager. For more information, see the help topic [Advanced Billing](#).

When someone submits a recurring donation, NetSuite first creates an invoice and automatically assigns a billing schedule to it. NetSuite then automatically creates sales orders for future recurring donations.

After NetSuite generates the invoice, it sends an email to the donor. The email includes the invoice details and a link to the Payment Link page for payment.

When a billing schedule is assigned, NetSuite adds a bill to the billing queue at the intervals determined by the schedule. Then, go to Transactions > Sales > Invoice Sales Orders (Administrator) to create those invoices.

The SuiteApp does not store payment details for recurring donations. Therefore, succeeding recurring transactions do not get charged automatically. Each time an invoice is generated for a recurring donation, the donor needs to pay using the emailed link.

Submitting a Recurring Donation

The following procedure is for donors to submit a recurring donation on your website.

To submit a recurring donation:

1. On the Online Donation HTML page, the donor provides the following details:
 - a. **Name** – Donor's complete name.
 - b. **Email** – Donor's email address. If the **Donor Identifier** field is set to **Email**, the system uses the donor's email address to check if the donor already has an existing customer record

in NetSuite. If there is none, then the system creates a customer record using the donor's email address.

- c. **Phone Number** – Donor's phone number. If the **Donor Identifier** field is set to **Phone**, the system uses the donor's phone number to check if the donor already has an existing customer record in NetSuite. If there is none, then the system creates a customer record using the donor's phone number.
 - d. **Donation** – Donor's preferred donation program.
 - e. **Amount** – The field dynamically displays the amount depending on the donation program or option you select. The donor can also enter a custom amount.
2. The donor checks the **Recurring** box.
 3. The donor selects a recurring donation cycle.
 4. In the **End Recurring On** field, the donor enters a date for when their recurring donation ends.
 5. The donor clicks **Donate Now**.
The page redirects to the Payment Link payment page where the donor enters their payment details.
The Payment Link page also displays a summary of the Invoice created for the online donation.
 6. The donor clicks **Pay**.

Online Donations Workbook

The Online Donations SuiteApp provides an Online Donations Report Workbook and a Donor Report Workbook. These workbooks include predefined source date, criteria, charts, and tables.

- [Online Donations Report Workbook](#)
- [Donor Report Workbook](#)

To access an online donation workbook, go to the Workbooks subtab of the Analytics home page and click the workbook link from the Workbook list.

For more information about SuiteAnalytics Workbook, see the help topic [SuiteAnalytics Workbook Overview](#).

Online Donations Report Workbook

This workbook is based on the Online Donations Reporting dataset and displays information from the online donations generated in NetSuite.

Online Donations Report Dataset

The Online Donations Report workbook includes the following predefined criteria and fields. The dataset combines fields from several record types so you can retrieve and analyze data related to transactions generated through online donations.

Root Record Type	Joined Record Type	Data Grid	Criteria Filters
Transaction	■ Address Book ■ Entity (Customer)	The following fields are included in the dataset:	The following criteria is used to filter the dataset:

Root Record Type	Joined Record Type	Data Grid	Criteria Filters
	- Donation Setup ID - Transaction Line	Transaction: - Currency - Date - Entity - Item Transaction Line: - Amount (Transaction Currency) - Class - Department - Expense Account - Location - Subsidiary Entity (Customer): - Email - Address - Phone Donation Setup ID: - Donation Setup ID	Donation Setup ID is not blank Transaction Line: Amount (Transaction Currency) (not consolidated) is greater than 0.00 Type is Invoice

Donor Report Workbook

This workbook is based on the Donors Reporting dataset and displays information about your online donors and their corresponding donation transaction details. You can also use this workbook to track your recurring online donations.

Donor Report Dataset

The Donor Report workbook includes the following predefined criteria and fields. The dataset combines fields from several record types so you can retrieve and analyze your online donor's transaction history.

Root Record Type	Joined Record Type	Custom Formula Field	Data Grid	Criteria Filters
Transaction	- Address Book - Entity (Customer) - Donation Setup ID - Transaction Line	The following custom formula is included in the dataset: Amount Paid: CASE WHEN {status}='B' AND {type}='CustInvc' THEN TO_NUMBER({foreigntotal#converted}) ELSE 0 END Amount Unpaid: CASE WHEN {type}='CustInvc' AND {status}='A' THEN TO_NUMBER({foreigntotal#converted}) WHEN {type}='SalesOrd' THEN ROUND(TO_NUMBER({	The following fields are included in the dataset: Transaction: - Currency - Date - Entity - Item - Memo - Status	The following criteria is used to filter the dataset: Type is any of Invoice and Sales Order Donation Setup ID is not blank Transaction Line: Line Number is equal to 1

		<pre>foreigntotal#converted})*(1- {transactionlines. quantitybilled})) ELSE 0 END</pre> ■ Status: {status} ■ Total Amount: CASE WHEN {type}='CustInvc' THEN TO_NUMBER({ foreigntotal#converted}) WHEN {type}='SalesOrd' THEN ROUND(TO_NUMBER({ foreigntotal#converted})*(1- {transactionlines. quantitybilled})) ELSE 0.0 END	■ Total Amount (Transaction Currency) ■ Type Transaction Line: ■ Quantity Billed Entity (Customer): ■ Email ■ Address ■ Comments ■ Phone Donation Setup ID: ■ Donation Setup ID	

Indirect Cost Allocation for Grants

Nonprofits that receive grants need to recover indirect costs based on their agreements. Nonprofits usually use a provisional rate to calculate indirect costs based on total allowable direct costs for each grant.

The Indirect Cost Allocation for Grants SuiteApp lets nonprofits set provisional rates on grants and the allowable costs used to calculate indirect costs.

To learn more, watch the video:

 [Indirect Cost Allocation for Grants Overview](#)

The Indirect Cost Allocation SuiteApp enables you to perform the following tasks:

- Enter a provisional or agreed rate for each grant.
- Identify which direct costs on the grant are allowable according to the grant agreement and specify any dollar limits.
- Automatically calculate the indirect costs and post them to the grant for each month.
- View the total costs incurred on the grant and the indirect costs at any given time.

The Indirect Cost Allocation for Grants SuiteApp supports all available languages in the Multi-Language feature of NetSuite. To set the language preference in NetSuite, see the help topic [Choosing a Language for Your NetSuite User Interface](#).

Read the following topics to know more about the Indirect Cost Allocation for Grants SuiteApp:

Installing Indirect Cost Allocation for Grants SuiteApp

This section includes the prerequisites and instructions for installing the Indirect Cost Allocation for Grants SuiteApp.

Prerequisites

The Indirect Cost Allocation for Grants SuiteApp is developed and tested for use primarily with NetSuite OneWorld. For more information about NetSuite OneWorld, see the help topic [Introduction to NetSuite OneWorld](#).

Installation

Any role with access to the SuiteApp Marketplace in NetSuite can install the Indirect Cost Allocations for Grants SuiteApp. For more information about the SuiteApp Marketplace, see the help topic [SuiteApp Marketplace in NetSuite](#).

To install the Indirect Cost Allocations for Grant SuiteApp, see the help topic [Installing from the SuiteApp Marketplace](#).

The Indirect Cost Allocation for Grants SuiteApp is a managed SuiteApp and is automatically updated whenever there are enhancements or new features added.

For more information about the SuiteApp Marketplace, see the help topic [SuiteApp Marketplace in NetSuite](#).

Roles and Permissions for Indirect Cost Allocation for Grants

The following permissions are required to use the Indirect Cost Allocations for Grants SuiteApp:

Subtab	Permission	Minimum Access Level
Transaction	Indirect Cost Allocation	Full
Setup	Custom Segment	Full
	Custom Record	Full
	SuiteApp Deployment	Full
	SuiteScript	Full
	SuiteScript Scheduling	Full
	Suite Sign-on	Full
Custom Record	ICA Method and Rates	Full
	ICA Allocation Preferences	Full
	Allowable Costs	Full
	Cost Categories	Full

For more information, see the help topics [Assigning Roles to an Employee](#) and [Customizing or Creating NetSuite Roles](#).

Setting Up Indirect Cost Allocation for Grants

To set up Indirect Cost Allocation for Grants SuiteApp, perform the following tasks:

1. [Setting Up the Indirect Cost Allocation for Grants Preferences](#)
2. [Adding Cost Categories](#)
3. [Deploying the ICA UE Segment Sublist Script](#)
4. [Setting Up Indirect Cost Allocation Method and Rates](#)

Setting Up the Indirect Cost Allocation for Grants Preferences

The indirect cost allocation for grants preferences lets you to map the fields in your records and set the allocation segments in the account.

Important: The system permits only one set of preferences in an account.

To set up the Indirect Cost Allocation for Grants Preferences:

1. Go to Indirect Cost Allocations > Setup > Preferences > New.
The Indirect Cost Allocation Preference page opens.
2. In the **ICA Customer Source** field, enter **customer|customer**.
3. In the **ICA Rate Source** field, enter **rate|rate**.
4. From the **Allocation Segment** list, select your preferred allocation segment.
5. From the **Allocation Grouping Segments** list, select the segments that you want to appear in the indirect cost allocation records.
6. Click **Save**.

Adding Cost Categories

Cost categories are categories of direct costs enabled in your account. These categories are used as a base for allocating indirect cost.

To add a cost category:

1. Go to Indirect Cost Allocations > Setup > Cost Categories.
2. Click **New Cost Category**.
3. In the **Name** field, enter a name for your new cost category.
4. Click **Save**.

Selecting a Cost Category for Accounts

After adding cost categories, you must select a specific cost category per account to create allowable cost records.

To select a cost category for an account:

1. Go to Setup > Accounting > Chart of Accounts.
2. Click **Edit** next to the account that you want to customize.
3. From the **Cost Category** list, select a cost category that you want to associate with the account.
4. Click **Save**.

Deploying the ICA UE Segment Sublist Script

The selected allocation segment on Indirect Cost Allocation Preferences page populates as a dynamic list in your custom records. For the dynamic list to have populated values, you must perform the following:

To deploy the ICA UE Segment Sublist Script:

1. Go to Customization > Scripting > Scripts.
2. Click **View** next to **ICA UE Segment Sublist**.
3. Click **Deploy Script**.
4. On the Script Deployment page:
 - a. In the **Applies To** field, select the same value of the **Allocation Segments** field on your Indirect Cost Allocation Preferences page.
 - b. From the **Status** list, select **Released**.
 - c. From the **Log Level** list, select **Error**.
5. On the **Audience** subtab, perform the following steps:
 - a. Check the **Select All** box next to Roles.
 - b. Check the **Select All** box next to Employees.
6. Click **Save**.

Setting Up Indirect Cost Allocation Method and Rates

The Indirect Cost Allocation Method and Rates page determines how indirect costs are calculated in your account.

After installing the SuiteApp, you must set up the Indirect Cost Allocation Method and Rates page.

To set up the Indirect Cost Allocations Method and Rates page:

1. Go to Indirect Cost Allocations > Allocations > Allocation Method and Rates > New.
2. From the Indirect Cost Allocation Method list, select a method.

Important: According to federal regulations, only the following two options should be provided in this field:

- **NICRA rate** – the rate established by the Federal Government
- **Provisional rate** – the temporary rate applicable to a particular period

3. In the **Indirect Cost Rate** field, enter a value in percentage.
4. From the **Indirect Cost Allocation Account** field, select an account where the indirect cost will be allocated.
5. The allocation segment selected in your preferences is populated as a field in the Indirect Cost Allocation Method and Rates page. Select a value according to your needs.
6. Click **Save**.

Creating an Allowable Cost record

An allowable cost is a necessary and reasonable cost that can be funded by your grant according to its contract.

An allowable cost transaction must only be created from a specific indirect cost allocation method and rates record.

To create an allowable cost record:

1. Go to Indirect Cost Allocations > Allocations > Allocation Method and Rates.
2. Click **Edit** next to Indirect Cost Allocation Method and Rates.
3. Click the **Allowable Costs** subtab and click the **New Allowable Cost** button.
4. On the Allowable Cost page:
 - a. From the **Cost Category** list, select the applicable cost category for your allowable cost.
 - b. In the **Allowable Maximum Base Amount** field, enter the maximum amount allowable for the selected cost category.
 - c. From the **Base Account** list, select the appropriate base account where the cost will be credited from. You can select more than one account.
 - d. From the **ICA Item** list, select an item to bill the allocated indirect costs to.
 - e. Check the **ICA Billable** box if you want the transaction to be included to the ICA transactions list in the Invoice page.
 - f. Click **Save**.

Indirect Cost Allocation Workbook

The workbook uses the Expense Transaction Detail dataset and shows your cost allocation data.

To access the Indirect Cost Allocations Workbook:

1. Go to Analytics > Workbooks subtab.
2. In the **Search** field, enter **Indirect Cost Allocations Workbook**.
3. Click the Indirect Cost Allocations Workbook tile. The workbook opens.

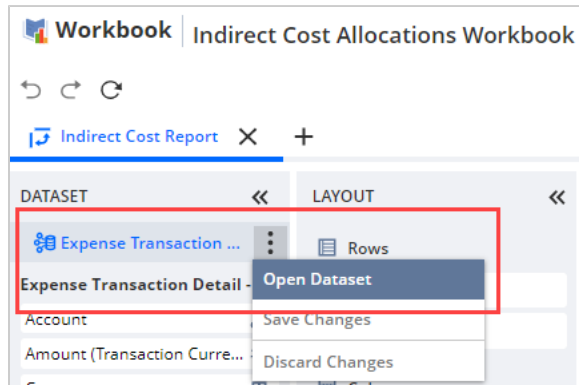

To get accurate data groupings in the dataset and the workbook, you must select Grant as your allocation segment in Indirect Cost Allocation for Grants Preferences page. For more information, see [Setting Up the Indirect Cost Allocation for Grants Preferences](#).

Adding Grant Field to Dataset and Workbook

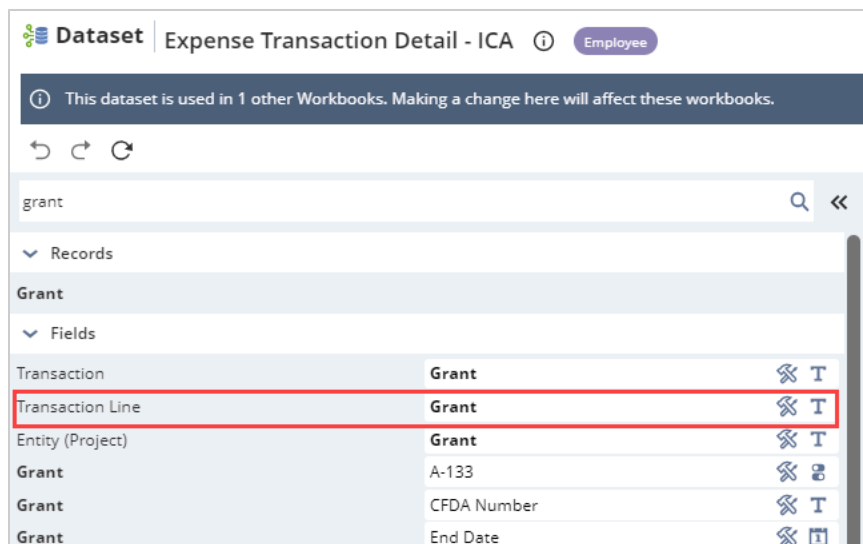

After selecting Grant as allocation segment in the preferences, you must add and apply the Grant field to the dataset and workbook.

To add the Grant field to the dataset and workbook:

1. Go to Analytics > Workbooks subtab.
2. In the **Search** field, enter **Indirect Cost Allocations Workbook**.
3. Click the Indirect Cost Allocations Workbook tile.
The workbook opens.
4. Next to Expense Transaction Detail dataset name, click the menu icon, and then select **Open Dataset**.

5. In the **Search** field, enter Grant.
6. From the **Fields** list, drag the **Grant** field next to Transaction Line and move it to the data grid.

A new column for **Transaction Line: Grant** should appear in the data grid.

2161	Grant A	Mar 2023	Indirect Cost Allocation #1	03/01/2023	Indirect Cost Allocati...	Parent Company	US
1954	Grant A	Jun 2022	Journal #JE06	06/06/2022	Journal	Parent Company	US

7. Click **Apply to Workbook**. The dataset builder closes.

The **Grant** field lists under the **Dataset** column.

The screenshot shows the 'Indirect Cost Allocations Workbook' interface. On the left, the 'DATASET' column contains a list of fields. The 'Grant' field is highlighted with a red rectangle. On the right, the 'LAYOUT' column shows sections for 'Rows', 'Columns', and 'Measures'. The 'Rows' section is currently empty, and the 'Columns' section has a 'Drop fields' button. The 'Measures' section lists several calculated measures like 'MTDC (Sum)', 'Indirect Cost (Sum)', etc.

DATASET		LAYOUT	
Expense Transaction Detail - ICA		Rows	
Account	🔗	Posting Period	
Amount (Transaction Curre...	#	Subsidiary	
Currency	T	Columns	
Date	📅	Drop fields	
Default Exchange Rate (To...	#	Measures	
Grant	🔗 T	MTDC (Sum)	
Indirect Cost	fx #	Indirect Cost (Sum)	
Internal ID	#	Other Direct Expense (Sum)	
MTDC	🔗 #	Total Expenses (Sum)	
Other Direct Expense	fx #	Create Calculated Measure	
Posting Period	📅		
Subsidiary	🔗		
Total Expenses	fx #		
Transaction	T		
Type	T		

8. Drag the **Grant** field to the **Rows** section of the **Layout** column.

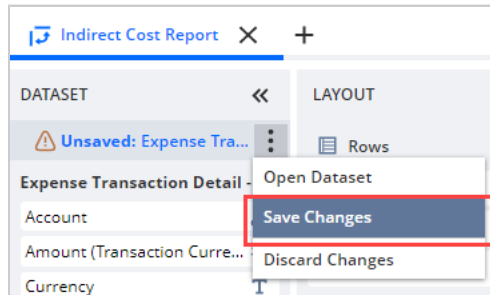

9. Next to the timestamp, click the menu icon, and then click **Clear Cache**.

10. Click the **Refresh** icon. The preview now shows grouped indirect cost allocation transactions according to grant, posting period, and subsidiary. Here is an example.

Grant	Posting Period	Subsidiary	MTDC	Indirect Cost	Other Direct Expense	Total Expenses
▼ No Grant	▼ Jan 2023	Parent Company	500.00	50.00	-500.00	50.00
▼ Fund	▼ Feb 2023	Parent Company		0.00	50.00	50.00
▼ Edu Umbrella	▼ Jan 2023	UK Company		0.00	53.52	53.52
		Parent Company		0.00	7,800.00	7,800.00

Note: When multiple currencies are involved, the workbook automatically converts the amounts to a root subsidiary currency using a consolidated exchange rate. This conversion may result in slight rounding-off differences in the amounts.

11. To save the dataset, click the menu icon next to **Expense Transaction Detail** dataset and select **Save Changes**.

12. To save the workbook, click **Save**.

For more information about navigating workbooks and editing datasets, see the help topic [Workbooks and Datasets](#).

Generating Indirect Cost Allocations Manually

When the automatic monthly creation of indirect cost allocation transactions fail in the account, you can manually generate these transactions.

To manually generate indirect cost allocations:

1. Go to Indirect Cost Allocations > Generate Indirect Cost Allocations.
2. Click **Generate**.
3. To check the status of the indirect cost allocation manual generation, click **Status** in the popup confirmation message.

Creating Invoices for Billable Indirect Costs

The Indirect Cost Allocation for Grants SuiteApp enables you to create invoices for billable indirect costs.

Before creating invoices, ensure the following:

- The indirect cost allocation status is **Approved**.
- On the Indirect Cost Allocation Method and Rates page, the **Default Billable** box is checked.
- The **ICA Customer** field is not empty.

To create an invoice for billable indirect costs:

1. Go to Transactions > Sales > Create Invoices.
2. Under the Primary Information section:
 - a. In the **Customer** field, select the appropriate customer for your invoice.
 - b. In the **Date** field, enter the date for the invoice.
3. On the **Items** subtab:

- a. Click the **Billable Indirect Costs** subtab.
- b. To show the billable indirect costs on the subtab, click **Show ICA Lines**.
- c. Check the corresponding boxes next to the indirect costs you want to include in the invoice.
- d. Click **Bill ICA Lines**.
The selected indirect costs are now transferred to the **Items** subtab.
- e. Click **Save**.

Common Indirect Cost Allocation Transaction Creation Errors

If automatic creation of an indirect cost allocation transaction fails, administrators get an email with the error details.

Following are some of the indirect cost allocation transaction creation errors and their resolutions:

Error	Description	Action
You have entered an invalid field value <value> for the following field: cseg_ica_cost_ctgry	The cost category you selected is inactive.	1. Go to Indirect Cost Allocations > Setup > Cost Categories. 2. Check the Show Inactives box. 3. Clear the Inactive box next to the cost category you selected in Allowable Cost list. 4. Click Save. 5. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
You have entered an invalid field value <value> for the following field: Account	The indirect cost allocation account is inactive, or the account is unavailable in the subsidiary.	1. Go to Setup > Accounting > Chart of Accounts. 2. Check the Show Inactives box. 3. Locate the account that is selected in the Indirect Cost Allocation Account list on the Indirect Cost Allocation Method and Rates page. Click the corresponding Edit link. 4. Clear the Inactive box and select a subsidiary to make it available. 5. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
You need to enter a value for the following field: Restriction	There is a missing required custom segment.	1. Go to the expense transaction that needs to be processed: ■ If the expense transaction is for credit cards, go to Transactions > Bank > Use Credit card. ■ If the expense transaction is for vendor bills, go to Transactions > Payables > Enter Bills.

Error	Description	Action
		■ If the expense transaction is for journal entries, go to Transactions > Financial > Make Journal Entries. ■ If the expense transaction is for expense reports, go to Transactions > Employees > Enter Expense Report. 2. Click Edit next to the transaction. 3. Select a value for each required custom segment. 4. Click Save. 5. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
The account used by the transaction is not available on this subsidiary.	There is no offset account.	1. Go to Setup > Accounting > Accounting Preferences. 2. On the Items/Transactions subtab, select an account from Indirect Cost Allocation Account sublist. 3. Click Save. 4. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
You have entered an invalid field value <value> for the following field: cseg_npo_grant_segm	A custom segment has an inactive value. Example: Grant A was selected in Indirect Cost Allocation Method and Rates and in the expense transaction, but Grant A is tagged as inactive.	1. Go to Customization > Lists, Records & Fields > Record Types. 2. Click List next to the custom segment. 3. Check the Show Inactives box. 4. Click Edit next to the inactive custom segment. 5. Clear the Inactive box. 6. Click Save. 7. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
Undefined	The allocation segment is inactive.	1. Go to Customization > Lists, Records & Fields > Custom Segments. 2. Check the Show Inactives box. 3. Click Edit next to the inactive allocation segment. 4. Clear the Inactive box. 5. Click Save. 6. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.

Error	Description	Action
The transaction record subsidiary must be present in both item and customer subsidiary lists.	There is a subsidiary mismatch between Customer and Item in ICA Method and Rates record or in the expense transaction.	1. Go to Indirect Cost Allocations > Allocations > Allocation Method and Rates. 2. Click Edit next to the record in question. 3. Check the selected ICA Customer and the selected subsidiary. 4. In the Allowable Costs subtab: a. Click Edit next to the allowable cost record in question. b. Check the selected ICA Item and its subsidiary. The ICA Customer and the ICA Item must belong to the same subsidiary. 5. Go to the source transaction that needs to be processed. 6. Check the selected subsidiary in the expense transaction. The selected subsidiary for ICA Customer, ICA Item, and in the expense transaction must be the same. 7. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
The lines have reached the maximum allowable amounts. Review the MTDC in the ICA Methods and Rates page and update the maximum allowable amounts for generating lines.	One or more allowable maximum base amount has reached the limit.	1. Go to Indirect Cost Allocations > Allocations > Allocation Method and Rates. 2. Click Edit next to record in question. 3. Check the ICA Customer selected and its subsidiary. 4. On the Allowable Costs subtab: a. Click Edit next to the allowable cost record in question. b. Update the Allowable Maximum Base Amount field to allow more transactions to be processed. 5. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
The internal IDs you have entered are invalid. Make sure that the internal IDs are present in the allocation segment record, and then try again.	The Internal ID entered does not exist.	1. Go to Customization > Lists, Records & Fields > Record Types. 2. In the Edit column, click the allowable segment selected in your ICA Preferences.

Error	Description	Action
		3. Use the existing field ID from Fields Subtab or add a new field. 4. Enter the same ID in the appropriate field in ICA Preferences. 5. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
The selected tax code is not valid for this subsidiary. Check if tax code is available in the subsidiary's country	The country selected in the Tax Code field and the country selected in the Subsidiary field does not match.	1. Go to Indirect Cost Allocations > Allocations > Allocation Transactions. 2. Click View next to the transaction in question. 3. Check the populated subsidiary. 4. Go to Setup > Company > Subsidiaries. 5. Click View next to the subsidiary present in the ICA Transaction. 6. Check the selected country for the subsidiary. 7. Go to Setup > Accounting > Tax Codes. 8. Create a tax code for the populated subsidiary in the transaction. Make sure that the country selected matches the selected country for the populated subsidiary. 9. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
The selected tax code is not valid for this transaction. Check if the tax code is enabled for sale transaction.	The subsidiary in the ICA Transaction does not match the subsidiary in the tax code.	1. Go to Indirect Cost Allocations > Allocations > Allocation Transactions. 2. Click View next to the transaction in question. 3. Check the populated subsidiary. 4. Go to Setup > Accounting > Tax Codes. 5. Click Edit next to the tax code. 6. In the Subsidiaries field, select the value that matches the subsidiary populated in the ICA record. 7. Generate the indirect cost allocations manually. For guidelines and procedure, see Generating Indirect Cost Allocations Manually.
